**Subject:** Update

Here are some additional points that support press release.  
More than 100 PG&E response personnel are in the area assessing damage, performing leak surveys and restoring gas service.

- We have shut down gas and electric services to 16 structures; 12 were due to severe building damage.

- There has been one grade-three leak on a 6-inch distribution main. We are monitoring these leaks per standard safety practices.

- Approximately 20 customers are without gas service at this time in the area. These issues were due to structure loss.

- We're working as quickly and safely as possible to assess damage and

restore service.

· Customers should report emergencies, such as damaged power equipment or a gas leak, to PG&E's toll-free customer service line at 1-800-743-5002.
