Hi Aimee,

We'll provide a more thorough update, but regarding your request we have a Grade 3 leak on a 6" distribution main in American Canyon. As it is a Grade 3 we will not be making repairs right away, but will monitor it.

Please let me know if you have any questions.

Bill,

Please confirm the following information which was on the FEMA update report as of 1030 PST yesterday (8/24), and provide details (if accurate):

A potential 6-inch gas main leak has been reported with emergency crews en route.

I do not see it mentioned in the summary update below.

Thanks,
