Subject: RE: Question about CES-21 flexibility metrics project

Maria,

The Operating Flexibility Matrix and Standards Project maps to the generation or electricity production sector of the energy system value chain. While this mapping was included in the original business case filed in AL 4215-E on April 19, 2013 (p. 2), it was omitted from AL 4402-E filed on April 25, 2014. The focus of the project on integrating greater amounts of intermittent renewable generation resources is discussed generally throughout the business case.

Sorry for any confusion we may have caused on this issue and let me know if you have any additional questions.

Best regards,

Erik

Subject: FW: Question about CES-21 flexibility metrics project

Hi Antonio and Erik,

Hope you're well. I just sent this to Redacted but he's out of office. I figured perhaps you two would be the next contacts who might be able to answer/direct my question?

Subject: Question about CES-21 flexibility metrics project

Hi Reda,

Question for you/the team. Can you point me to a specific, explicit place anywhere in the CES-21 AL that maps the proposed flexibility metrics project to the energy system value chain? The cybersecurity project has this but not seeing it for this project.

Thank you. A response by COB tomorrow will be very helpful.

Maria Sotero
