Subject: RE: Redacted Version of Kern Report

Charlotte,

Attached are the three documents related to the Public Records Act request with PG&E's proposed redactions. We have redacted the names of individuals, some discussion of the decedent's medical issue, and the bid scoring data related to our procurement process.

Please let me know if you have any concerns or questions regarding the information we are proposing to keep confidential.

Best regards,

Erik

Subject: RE: Redacted Version of Kern Report

Erik,

SED has received Public Records Act requests for three documents related to the Kern incident, which are attached to this email:

-An analysis by PG&E (the title begins Kern Power Plant...) -An analysis by Cleveland (the title begins Conf - RCA Report...) -The Bureau Veritas root cause analysis (the title begins PGE Kern Power Plant...)

PG&E submitted the first two analyses to SED under PU Code Section 583. SED asks that PG&E review these documents and notify us of any proposed redactions to the documents.

PG&E did not cite Section 583 when submitting the Bureau Veritas root cause analysis to SED. Nevertheless, SED asks that PG&E notify us if you request any redactions to the Bureau Veritas document. At this time, the only redactions SED is planning for this document are the names of the workers involved in the incident. (We are still reviewing the other two documents.)

Thank you,
Charlotte

Subject: Redacted Version of Kern Report

Charlotte,

As you requested, attached is a redacted version of the SED investigation report regarding the Kern Power Plant.

The only confidential information PG&E proposes to redact are two percentage figures noted on the top of page 11. PG&E considers the bids and weighting selection criteria from the competitive solicitation process to be confidential. I therefore redacted those two figures in the attached report for your review.

The SED report also refers to a number of source documents that contain confidential information. We assume these source documents are not being made public at this time and we have not reviewed them to identify confidential information that should be redacted in the event they are made public. If SED intends to make any of the supporting documents public, please let me know so we can start the process of also reviewing them for confidentiality.

Thanks,

Erik
