**2013 PRELIMINARY ANNUAL 33% RPS COMPLIANCE REPORT OF
PACIFIC GAS AND ELECTRIC COMPANY (U 39 E)
(PUBLIC VERSION)**

I. INTRODUCTION

Pacific Gas and Electric Company (“PG&E”) hereby submits its 2013 Preliminary Annual 33% Renewables Portfolio Standard (“RPS”) Compliance Report (the “Report”) in accordance with the California Public Utilities Commission’s (“CPUC” or “Commission”) RPS reporting requirements.^{1/} Appendix A to this filing is a populated version of the final Report template distributed by the Commission’s Energy Division.

The Report is intended to show PG&E’s progress toward achieving the statutory RPS compliance targets, as implemented by the Commission.^{2/}

PG&E’s Report shows that PG&E procured approximately 22.5 percent of its 2013 retail sales with actual 2013 deliveries from approved RPS-eligible procurement. Approximately 83

^{1/} See Data Request from Robert Blackney of the Energy Division to the service list for Commission Rulemaking (“R.”)11-05-005, June 5, 2014 (requiring Commission-jurisdictional retail sellers to submit an RPS Compliance Report on August 1, 2014 using the template provided by the Energy Division). See also Decision (“D.”) 06-10-050 at 64 (Ordering Paragraph (“OP”) 3; “Assigned Commissioner’s Ruling with Final Document Addressing Process Issues Relative to RPS Compliance Report,” issued November 20, 2008 in Rulemaking (“R.”) 08-08-009; “Administrative Law Judge’s Ruling Adopting Standardized Reporting Format, Setting Schedule for Filing Updated Reports and Addressing Subsequent Process,” issued March 12, 2007 in R. 06-05-027.

^{2/} See Cal. Pub. Util. Code § 399.11 *et seq*; D.11-12-020; D.11-12-052; D.12-06-038.

percent of the 2013 procured RPS-eligible products were associated with contracts executed prior to June 1, 2010, and PG&E expects that another 17 percent of the RPS products it procured in 2013 will be eligible for the first portfolio content category (“PCC”) established by Section 399.16(b)(1) of the California Public Utilities Code.

With regard to the first (2011-2013) RPS Compliance Period, the Report shows that PG&E expects to comply with the compliance period target of an average of 20% of retail sales from RPS-eligible resources. PG&E procured approximately 20.5% of its retail sales from RPS-eligible resources during the first compliance period, and it retired and applied Renewable Energy Credits (“RECs”) associated with RPS-eligible generation to meet the first compliance period Procurement Quantity Requirement (“PQR”)^{3/} equal to approximately 20.4% of its retail sales in the same period.^{4/} The Report also shows that PG&E complied with the RPS Portfolio Balancing Requirements (“PBRs”) in the first compliance period.^{5/} All of PG&E’s non-grandfathered procurement in the first compliance period is expected to be in the PCC 1 category.

^{3/} The Commission established the RPS PQRs for each compliance period in D.11-12-020.

^{4/} For purposes of this Report, PG&E considered a REC “procured” in the year in which the REC was generated. Once procured, the REC may remain in PG&E’s active trading account in the Western Renewable Energy Generation Information System (“WREGIS”) or be retired for RPS compliance use. If the REC is retired in WREGIS within 36 months of the generation of the REC, PG&E applied the REC toward its PQR and other RPS requirements, as reflected in the “RECs Retired To Meet PQR” tab of Appendix A. The procured and retired figures in each year and for the compliance period are different because some RECs are retired in different years than when they were procured, because some procured RECs were not applied toward the PQR, and for the other technical reasons more fully described in the explanatory note box in the Procurement Detail tab of Appendix A.

^{5/} Under statute and the Commission’s implementing decisions, at least 50% of procurement associated with contracts executed after June 1, 2010 and applied to compliance in the 2011-2013 compliance period must be from Portfolio Content Category (“PCC”) 1, and no more than 25% of procurement from PCC 3. *See* Cal. Pub. Util. Code § 399.16(c).

Pursuant to Commission decisions implementing the 33% RPS statute, PG&E's compliance with its target for the 2011-2013 Compliance Period will be determined conclusively only after the California Energy Commission ("CEC") verifies PG&E's RPS-qualifying retirements of RECs for that period through Western Renewable Energy Generation Information System ("WREGIS") and the Commission accepts PG&E's final verified compliance report for the period.^{6/}

PG&E's Report excludes from the "RECs Retired to Meet PQR" tab 134,323 megawatt-hours ("MWh") associated with 2011 generation from the Hay Canyon Wind Facility and the Nine Canyon Wind Phase 3 because the WREGIS certificates associated with these volumes were not retired within the RPS statute's 36-month retirement deadline for RECs.^{7/} The WREGIS certificates associated with generation from these facilities in the first six months of 2011 were delivered to PG&E at the beginning of 2014 after approval of the transactions by the Commission in late 2013, and PG&E did not retire the certificates until June 2014 when it retired its 2013 RPS procurement. These volumes are shown as "failing" the 36 month requirement in the (2013) 36 Month Retirement tab of the Report. The inability to claim these volumes for compliance reduced PG&E's percentage of retail sales met by RPS-eligible products in the 2011-2013 compliance period by 0.1%. Since PG&E expects these volumes will not count towards RPS procurement, PG&E will remove all costs associated with these late retired WREGIS Certificates from the Energy Resource Recovery Account ("ERRA") balancing account.

^{6/} D.11-12-020 at 23-24 (Ordering Paragraph ("OP") 1); D.12-06-038 at 48-51 (clarifying that RECs must be retired for compliance in order to count toward RPS targets).

^{7/} Cal. Pub. Util. Code § 399.21(a)(6).

II. NARRATIVE REPORTING REQUIREMENTS

Pursuant to the instructions included in the Commission's RPS Compliance Report template, PG&E provides the following responses to the narrative reporting requirements.

A. The Status of Any Necessary Siting and Permitting Approvals from Federal, State, and Local Agencies for Those Eligible Renewable Energy Resources Procured by PG&E That Have Not Yet Attained Their Commercial On-Line Dates.

Appendix C provides a table showing the status of siting and permitting approvals for the projects in PG&E's RPS portfolio that have not yet come on-line (excluding contracts executed under the Assembly Bill ("AB") 1969 feed-in tariff ("FIT") program and the Renewable Market Adjusting Tariff ("ReMAT") program). While PG&E's ability to comply with the RPS procurement requirement targets remains contingent on a number of factors outside of PG&E's control, including the ability of independent power producers that have executed Power Purchase Agreements ("PPAs") with PG&E to receive necessary siting and permitting approvals, PG&E saw significant progress during 2013 in the ability of its counterparties to meet key development milestones. Based on this progress, PG&E currently projects substantial incremental RPS-eligible deliveries in 2014.

As more fully detailed in Appendix C, PG&E currently has 43 contracts (excluding contracts executed under the AB 1969 FIT program and the ReMAT program) with facilities that are under development but have not yet attained commercial on-line status. Of the 43 contracts under development, five are phased solar projects that are currently delivering, but have not yet achieved full commercial operation under their PPAs. One is a phased geothermal project that has not yet achieved full commercial operation, and two are existing facilities that have not yet begun delivering under their new PPAs. Most of the projects under construction have either secured necessary permits or are on schedule to do so.

B. Identification of Procurement from Eligible Renewable Energy Resources Located Outside California and within the Western Electricity Coordinating Council (“WECC”) during the Period Covered by the Report.

The table below identifies all procurement during 2013 from eligible renewable energy resources located outside California and within the WECC. The table lists the facility name, location (City and State), and the amount of RPS-eligible products procured during 2013.

Project Name	City	State	2013 Procurement (MWhs)
Agua Caliente Solar Project	Roll	Arizona	687,163
Halkirk I Wind Project	Stettler, Canada	Alberta	466,418
Mesquite Solar 1	Tonopah	Arizona	414,002
Rattlesnake Road Wind (Arlington) Project	Arlington	Oregon	221,633
Copper Mountain Solar 2	Boulder City	Nevada	226,935
Klondike IIIA	Wasco	Oregon	201,890
Vantage Wind Energy Center	Ellensburg	Washington	245,524
Klondike III	Wasco	Oregon	266,310
CM48 (fka Sempra Copper Mountain 1)	Boulder City	Nevada	105,245
CM10 (fka Sempra El Dorado Solar)	Boulder City	Nevada	20,436

C. Identification of All Procurement of Unbundled RECs during the Period Covered by the Report.

The table below identifies all procurement during 2013 of unbundled RECs. The table lists the facility name, location (City and State), and the amount of unbundled RECs procured during 2013.

Contract Detail	City	State	2013 Procurement (MWhs)
SPI (RECs)	Anderson, Burney, Lincoln, Quincy, Sonora	California	101,256

D. Recommendations to Remove Impediments to Making Progress toward Achieving the Renewable Energy Resources Procurement Requirements Established by Statute and Implemented by Commission Decision.

As discussed above in shown in Appendix A, PG&E expects that the operational RPS-eligible projects in its portfolio and those additional RPS projects in development that are under contract to PG&E will enable PG&E to comply with the first and second RPS compliance period requirements. However, this progress should not suggest that California's compliance with RPS goals will be inexpensive. The 33% RPS legislation moved the goalposts by creating new RPS portfolio content requirements - strongly disincentivizing procurement from projects connected to the grid outside of a California Balancing Authority ("CBA") - while imposing new constraints on LSE's ability to bank surplus procurement across compliance periods. These new requirements may increase the cost to customers of achieving 33%, and such cost increases may contribute over time to an erosion of customer support for the RPS Program requirements. PG&E recommends that the Commission establish a meaningful RPS procurement cost limitation, as required by statute,^{8/} in an expedited fashion in order to preserve public support for the program and to prevent disproportionate rate impacts from RPS-eligible procurement.

1. Restrictions on Banking of Excess RPS Procurement

The statutory restrictions on PG&E's ability to bank RPS-eligible procurement from one compliance period for use in future compliance periods has a potentially significant impact on PG&E's RPS procurement strategy and compliance position. For example, PG&E is required to reduce any excess procurement it has in a compliance period by the amount of RPS-eligible products it received from contracts of less than 10 years in duration.^{9/} As the renewables market

^{8/} See Cal. Pub. Util. Code § 399.15(c).

^{9/} Cal. Pub. Util. Code § 399.13(a) (4) (B).

matures, the State may wish to revisit whether limiting the value of such procurement continues to advance the goal of achieving RPS targets at the least cost.

2. Portfolio Content Requirements

The portfolio content requirements in the 33% RPS legislation limit PG&E's ability to procure unbundled RPS-eligible products and RPS-eligible products that are not delivered directly or in real-time to a CBA.^{10/} These restrictions reduce PG&E's flexibility to procure the least-cost, best-fit resources from anywhere within the Western electricity grid, and they could lead to increased RPS implementation costs. In response to the portfolio content requirements, PG&E has stated a preference in its 2014 Draft RPS Solicitation Protocol^{11/} for projects that can meet the first product content category, which requires a direct interconnection to a CBA or deliveries in real-time to a CBA without the use of substitute energy.^{12/}

3. Other Contingencies Impacting RPS Compliance Projections

Many of the renewable resources PG&E has contracted for on a long-term basis have expected online dates in the 2014 to 2015 timeframe. PG&E is relying on many of these projects achieving timely commercial operation to meet the compliance period requirements under the 33% RPS legislation. New renewable projects, however, may face challenges. The timely development of renewable energy generation facilities is subject to many uncertainties and risks, including permitting, financing, and the timely construction of transmission interconnections and system upgrades.

^{10/} See generally Cal. Pub. Util. Code § 399.16(c).

^{11/} See PG&E's June 4, 2014 Draft 2014 Renewable Energy Procurement Plan, filed in R.11-05-005.

^{12/} See Cal. Pub. Util. Code § 399.16(b) (1).

Additionally, variability in either PG&E's load or RPS generation can significantly impact PG&E's RPS compliance status. For example, the ongoing drought in California tends to reduce generation from RPS-qualifying hydroelectric facilities. PG&E's June 4, 2014 Draft Renewable Energy Procurement Plan ("RPS Plan") provides a detailed discussion regarding these risks and potential impediments.^{13/} In particular, PG&E's RPS Plan assesses, models, and manages RPS compliance risk by proposing a voluntary margin of procurement ("VMOP") in the form of a bank of surplus procurement. An adequate RPS compliance bank is necessary in order to: (a) mitigate risks associated with short-term variability in load, (b) protect against project failure or delay exceeding forecasts, and (c) manage variability from RPS resource generation. PG&E's ongoing ability to maintain a compliance bank and adequate margins of procurement will impact its ability to achieve cost-effective RPS compliance.

At both the Federal and State levels, programs and measures are being implemented to provide alternatives for financing renewable projects, streamlining project permitting activities, and expediting transmission access. PG&E is encouraged by the progress it saw over the past year in the ability of its counterparties to meet major development milestones and is optimistic that this progress suggests developers are overcoming obstacles. While more work needs to be done to promote more timely completion and commercial operation of renewable facilities, California, and PG&E, took significant positive steps in 2013 toward meeting the State's aggressive RPS goals.

^{13/} PG&E's June 4, 2014 Draft 2014 Renewable Energy Procurement Plan, filed in R.11-05-005, at Section 5, pp. 34-45, and Section 6, pp. 46-57.

E. The Current Status and Progress Made During the Prior Year toward Construction of, and Upgrades to, Transmission and Distribution Facilities and Other Electrical System Components Owned by PG&E to Interconnect Eligible Renewable Energy Resources and to Supply the Electricity Generated by Those Resources to Load.

PG&E responds to this reporting requirement, including the status of planning, siting, and permitting of transmission facilities by federal, state, and local agencies, in the following sections. Please note all data provided reflects projects interconnecting into PG&E's system; projects may not be under contract to deliver output to PG&E.

1. Status and Progress of Interconnection Planning Studies for Renewable Resources

To evaluate the impact of interconnection of new renewable resources on the transmission network, the California Independent System Operator ("CAISO") and the applicable Participating Transmission Owners ("PTOs") conduct generation interconnection studies. These studies follow the requirements set forth in the CAISO's tariff.^{14/}

Following is a timeline of the renewable cluster studies performed by CAISO and PG&E during the 2011, 2012, 2013, and 2014 cluster windows:

- Clusters 1&2 Phase 2 (January to July 2011) - Reports issued August 2011
- Cluster 3 Phase 1 (October 2010 to March 2011) - Reports issued May 2011
- Cluster 4 Phase 1 (June to November 2011) - Reports issued January 2012
- Clusters 3&4 Phase 2 (April to November 2012) - Reports issued November 2012
- Cluster 5 Phase 1 (June 2012 to January 2013) - Reports issued January 2013
- Cluster 5 Phase 2 (May 2013 to December 2013) – Reports issued December 2013

^{14/} CAISO Tariff, Appendix Y, "Generator Interconnection Procedures ("GIP"), available at <http://www.caiso.com/Documents/AppendixY-FifthReplacementCAISOTariff.pdf>.

- Cluster 6 Phase 1 (July 2013 to January 2014) – Reports issued January 2014
- Cluster 6 Phase 2 (May 2014 to November 2014) – Reports are to be released in November 2014
- Cluster 7 Phase 1 (July 2014 to December 2014) – Reports are to be released in December 2014

In addition to the cluster studies, as a part of CAISO’s Transmission Planning Process (“TPP”), CAISO conducts policy-driven studies to identify transmission needs to interconnect 33% RPS portfolios approved by the Commission.^{15/} PG&E actively participates in this study process as a stakeholder. For the 2014-2015 TPP cycle, the CAISO has published its study plan and process documents.^{16/} The study plan includes details of the studies that the CAISO is performing to assess the transmission needs for meeting 33% RPS. The CAISO plans to present its preliminary assessment of policy driven planning study results and brief stakeholders on the projects recommended as being needed that are less than \$50 million in November 2014.

To improve the management of the transmission planning and interconnection processes, the CAISO developed the Transmission Planning Process and Generator Interconnection Procedures (“TPP-GIP”) Integration initiative. The TPP-GIP process has been implemented and is now known as the Generator Interconnection and Deliverability Allocation Procedures (“GIDAP”). The new process, which PG&E supports, is expected to identify and approve ratepayer-funded transmission additions and upgrades under a single comprehensive process. It

^{15/} See CAISO, “2013-14 Transmission Plan,” March 25, 2014 (results from most recently concluded TPP) (available at <http://www.caiso.com/Documents/Board-Approved2013-2014TransmissionPlan.pdf>).

^{16/} See generally CAISO 2014-15 Transmission Planning Process homepage (available at <http://www.caiso.com/planning/Pages/TransmissionPlanning/2014-2015TransmissionPlanningProcess.aspx>).

will provide incentives for renewable energy developers to interconnect to the CAISO grid at the most cost-effective locations by promoting early withdrawal of unviable projects while decreasing the uncertainty for viable generation requests.^{17/}

To evaluate the impact of interconnection of new renewable resources on PG&E's distribution system, PG&E conducts generation interconnection studies. These studies follow the Commission's Rule 21 and the Federal Energy Regulatory Commission ("FERC")-approved Wholesale Distribution Tariff ("WDT"). Over the last several years, RPS-eligible interconnection requests to PG&E's distribution system have significantly increased. These increases have posed significant challenges to distribution system owners in California, including PG&E, and PG&E has initiated a number of internal efforts, and collaborated on external initiatives, to address these challenges.

The most notable changes in the distribution-level interconnection study process since 2011 include:

- The WDT was amended in March 2011 to address modifications similar to those made to the CAISO's Tariff in December 2010. The process that was previously acceptable for smaller volumes of interconnection requests was improved to handle higher volumes of interconnection requests. These amendments created a path for distribution resources to seek deliverability and the following three separate study paths:
 - Fast Track: for small interconnection requests that pass a screening process where no impacts to the system are likely.

^{17/} The GIDAP establishes a method for awarding transmission capacity to generation projects considered most viable, for the areas of the grid where the volume of interconnection requests exceed the capacity of transmission developed through the TPP.

- Independent Study Process: for interconnection requests not eligible for the Fast Track that are electrically isolated from other interconnection requests.
- Cluster Study Process: for interconnection requests not eligible for the Fast Track that are not electrically isolated from other interconnection requests.
- Rule 21 was amended in September 2012 to include a process and agreements for RPS-eligible generators. The prior version of Rule 21 did not provide an interconnection path for exporting generators that ultimately enter into a PURPA PPA with PG&E. The new Rule 21 was modeled after the WDT to provide a consistent process between Rule 21 and the WDT.
- The WDT was amended in December 2012 to align the generator interconnection process with Rule 21 to provide consistency for Interconnection Customers applying for interconnection to PG&E's distribution system.
- In June of 2014, PG&E filed, along with Southern California Edison and San Diego Gas and Electric, revisions to their respective Rule 21 tariffs with the CPUC to incorporate the Distribution Group Study Process to allow for a process similar to the FERC Cluster Study Process for CPUC jurisdictional generators.

2. Status and Progress of Improvements to the Bulk Transmission System that May Help to Supply RPS-Eligible Electricity to Load.

In June 2011, the CAISO ten-year transmission plan noted that additional study of a Central California 500 kilovolt ("kV") project was warranted, which prompted a new Central California transmission study for the 2012/2013 TPP. One of the project objectives is the integration of renewable resources, in addition to supporting reliability of the greater Fresno

area. In September 2012, PG&E proposed the Greater Fresno Area Upgrade 230kV Project to the CAISO to address some of these identified transmission needs in Central California. In March 2013, the CAISO subsequently approved one element of this proposal, the Gates-Gregg 230kV transmission line, as part of the final 2012/2013 TPP. Because the Gates-Gregg project will provide economic and public policy benefits, the CAISO has deemed it to be subject to a competitive bid process to finance, construct and own the new line. PG&E submitted a joint bid proposal with MidAmerican, LLC in June 2013. It was awarded by the CAISO and the project is proceeding forward with implementation. PG&E has not yet filed an application with the Commission for a Certificate of Public Convenience and Necessity (“CPCN”) for the Gates-Gregg project.

3. Status and Progress of Renewable Generation Interconnection Projects within the PG&E-owned Transmission and Distribution Systems.

PG&E is continuing to see the commencement of commercial operations for a large wave of renewable generation development triggered by the RPS procurement requirements. In 2011, a mass of interconnection upgrade projects associated with this development wave progressed through the Interconnection Study (“Study”) process, but had generally not reached construction. In 2012 and 2013, this wave of interconnection requests began entering the implementation phase. In 2013 and 2014, there has been an increase in applications under the exporting provisions of Rule 21 while a corresponding decrease in applications to the WDT has been observed. On the Wholesale Transmission side, projects have continued to move into implementation at a rapid pace, with a significant number of projects expected to achieve commercial operation in the last quarter of 2014 and the first half of 2015.

Approximately 847 megawatts (“MW”) of RPS-eligible generation has interconnected to PG&E’s transmission grid between January 1, 2013 and July 14, 2014. An additional 113 MW of renewable generation has interconnected to PG&E’s distribution system during this period.

The current PG&E portfolio of RPS-related, transmission-level interconnection projects consists of 2,096 MW of transmission-level generation with executed Interconnection Agreements (“IA”). These projects are in implementation including permitting, if required. An additional 1,224 MW and 708 MW of generation are in the Negotiation and Study phases, respectively. This generation has yet to execute an IA with PG&E, though developers may have begun their own permitting and siting processes.

The PG&E Distribution portfolio consists of 39 MW and 36 MW of generation in the IA negotiation and Study phases, respectively for Wholesale Distribution. Additionally, there are 23 MW and 35 MW of generation in IA negotiation and Study phases, respectively for Rule 21 Export. An additional 257 MW of projects within PG&E’s distribution interconnection portfolio are in project implementation with permitting, if required, and/or construction in progress under Wholesale Distribution. Under Rule 21 Export, there are an additional 25 MW within PG&E’s distribution interconnection portfolio that are in project implementation with permitting, if required, and/or construction in progress.

PG&E notes that many RPS-related interconnection projects to date have been exempt from the Commission’s Permit to Construct (“PTC”) and CPCN requirements. Currently, no PTC or CPCN for an RPS-related interconnection project within the PG&E-owned grid is pending before the Commission.

Summary of Current RPS-related Interconnection Project Progress^{18/}		
	Transmission (MW)	Distribution (MW)
Achieved Commercial Operation	847	113
Implementation (Development)	2,096	282
IA Negotiation	1,224	62
Study	708	71
Total	4,875	528

III. UPDATED RENEWABLE NET SHORT CALCULATIONS

Consistent with the Energy Division Staff methodology for calculating the renewable net short (“RNS”)^{19/}, PG&E is attaching at Appendices B(1) and B(2) updated RNS calculations. As more fully described in the new methodology and in PG&E’s Draft 2014 RPS Procurement Plan ,^{20/} the RNS may show different anticipated deliveries from RPS-eligible resources under contract than the volumes shown in Appendix A to this Report because the RNS takes into account the risk that contracts will be terminated and will fail to deliver the contracted volumes. Appendix B(1) calculates the volumes that PG&E projects it will need for RPS compliance based on direction provided in the May 21, 2014 ALJ Ruling. Appendix B(2) provides an Alternative RNS calculation (the “Alternative RNS”). There are two main differences between the RNS and the Alternative RNS. First, the RNS utilizes PG&E’s Bundled Retail Sales Forecast for years 2014-2018 and the Long Term Procurement Plan proceeding methodology for 2019-2033, while the Alternative RNS relies on PG&E’s internal Bundled Retail Sales Forecast for 2014-2033. Second, the Alternative RNS presents a modified display of PG&E’s RNS in order to adequately

^{18/} Table reflects interconnection activities from January 1, 2013 through July 14, 2014.

^{19/} See Administrative Law Judge’s Ruling on Renewable Net Short issued in R. 11-05-005 on May 21, 2014, including subsequent changes to the RNS reporting template per direction from the Energy Division on June 2, 2014.

^{20/} See PG&E’s June 4, 2014 Draft 2014 Renewable Energy Procurement Plan, filed in R.11-05-005, and Appendices C.1 and C.2.

show the results from PG&E's stochastic optimization of its RPS position. Further details on PG&E's stochastic optimization approach can be found in the Draft 2014 RPS Plan.

PG&E's Alternative RNS continues to show that PG&E's existing RPS portfolio is expected to provide sufficient RPS-eligible deliveries to meet PG&E's RPS compliance requirements in the second compliance period (2014-2016). Appendix B(2) also shows that if RPS-eligible projects in PG&E's portfolio perform as expected, PG&E has an incremental need beginning in 2020 (prior to applying any excess procurement from earlier compliance periods) and beyond in order to maintain a 33% RPS level. Based on this current expected need assessment, PG&E has sought Commission approval to solicit up to 1,600 gigawatt-hours ("GWh") in long-term incremental RPS procurement as part of its Draft 2014 RPS Solicitation, with a preference for deliveries starting in 2020. This immediate future procurement is one step in a multi-year procurement strategy that seeks to capture the market costs of renewables over time by procuring PG&E's identified long-term and ongoing RPS need through moderate

///

///

volumes purchased over time. Volumes procured through future solicitations may vary and will depend on a combination of the ultimate success of current executed-but-not-operational projects, as well as the competitiveness of existing resources seeking new long-term contracts.

Respectfully submitted,

Attorneys for
PACIFIC GAS AND ELECTRIC COMPANY

VERIFICATION

I am an employee of PACIFIC GAS AND ELECTRIC COMPANY, a corporation, and am authorized to make this verification on its behalf. I have read the foregoing “PRELIMINARY 2013 ANNUAL 33% RPS COMPLIANCE REPORT OF PACIFIC GAS AND ELECTRIC COMPANY (U 39 E) (PUBLIC VERSION)” dated August 1, 2014. The statements in the foregoing document are true of my own knowledge, except as to matters which are therein stated on information and belief, and as to those matters I believe them to be true.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on this 1st day of August, 2014 at San Francisco, California.

/s/ John Pappas

John Pappas
Principal, Renewable Energy
Pacific Gas and Electric Company

**DECLARATION OF JOHN PAPPAS
SEEKING CONFIDENTIAL TREATMENT
FOR DATA AND INFORMATION
CONTAINED IN THE AUGUST 1, 2014 PG&E'S PRELIMINARY 2013 ANNUAL 33%
RPS COMPLIANCE REPORT
(PACIFIC GAS AND ELECTRIC COMPANY - U 39 E)**

I, John Pappas, declare:

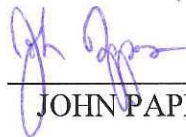

1. I am presently employed by Pacific Gas and Electric Company ("PG&E"), and have been an employee at PG&E since 1977. My current title is Principal Renewable Energy, within PG&E's Energy Procurement organization. In this position my responsibilities include renewable energy procurement strategy, policy, compliance and reporting. Prior to my current position, I have had extensive commercial transaction and regulatory proceeding experience involving PG&E's Renewable Energy and Qualifying Facility portfolio. Through this experience I have become familiar with the type of information that the Commission has indicated is confidential and gained knowledge about the types of information that electricity sellers consider confidential and proprietary.

2. Based on my knowledge and experience, and in accordance with Decision ("D") 08-04-023 and the August 22, 2006 "Administrative Law Judge's Ruling Clarifying Interim Procedures for Complying with Decision 06-06-066," I make this declaration seeking confidential treatment of certain information and data contained in Appendices A, B1, B2, and C of the "Preliminary 2013 Annual 33% RPS Compliance Report" submitted on August 1, 2014.

3. Attached to this declaration is a matrix identifying the data and information for which PG&E is seeking confidential treatment. The matrix specifies that the material PG&E is seeking to protect constitutes the particular type of data and information listed in Appendix 1 of D.06-06-066 and Appendix C of D.08-04-023 (the "IOU Matrix"), or constitutes information that should be protected under General Order 66-C. The matrix also specifies the category or

categories in the IOU Matrix to which the data and information corresponds, if applicable, and why confidential protection is justified. Finally, the matrix specifies that: (1) PG&E is complying with the limitations specified in the IOU Matrix for that type of data or information, if applicable; (2) the information is not already public; and (3) the data cannot be aggregated, redacted, summarized or otherwise protected in a way that allows partial disclosure. By this reference, I am incorporating into this declaration all of the explanatory text in the attached matrix.

I declare under penalty of perjury, under the laws of the State of California, that to the best of my knowledge, the foregoing is true and correct. Executed on August 1, 2014, at San Francisco, California.

A handwritten signature in blue ink, appearing to read "John Pappas", is positioned above a horizontal line.

APPENDIX A:

PG&E'S PRELIMINARY 2013 ANNUAL 33% RPS
COMPLIANCE REPORT
(PUBLIC VERSION)

AUGUST 1, 2014

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

Order Instituting Rulemaking to Continue Implementation and
Administration of California Renewables Portfolio Standard
Program.

Rulemaking 11-05-005
(Filed May 5, 2011)

Pacific Gas and Electric Company

2013 Preliminary Annual 33% RPS Compliance Report

Reporting progress towards meeting the procurement quantity requirements for California's RPS
Program in the first compliance period (2011-2013)

August 1, 2014

William V. Manheim
Charles R. Middlekauff
Name: M. Grady Mathai-Jackson
Title: Attorneys for Pacific Gas and Electric Company
Email: mqml@pge.com
Phone: (415) 973-3744
Fax: (415) 972-5952
Address: P.O. Box 7442
San Francisco, CA 94120

CALIFORNIA'S RENEWABLES PORTFOLIO STANDARD**2013 Preliminary Annual 33% RPS Compliance Reporting Instructions**

Annual RPS compliance reports submitted by retail sellers include qualitative and quantitative elements, as required by the Public Utilities Code 399.13 and Commission decisions, notably, Decision (D.) 11-12-020, D.11-12-052 and D.12-06-038. Specific procedural guidelines, reporting requirements and general explanations about the RPS compliance spreadsheet are detailed below. Any questions concerning RPS compliance matters should be directed to Robert Blackney robert.blackney@cpuc.ca.gov, (415) 703-3072.

Procedural Guidelines

1. D.12-06-038 requires Investor Owned Utilities (IOU), Multi-Jurisdictional Utilities (MJU), Electric Service Providers (ESP), and Community Choice Aggregators (CCAs) to submit an annual report on its compliance with the California RPS program. Refer to D.12-06-038 for additional details related to the calculations within the RPS compliance spreadsheet.
2. Any retail seller seeking confidentiality protection for information required by the Compliance Report should file a declaration. Confidentiality requests shall comply with the substantive and procedural rules set forth in D.06-06-066, as modified by D.08-04-023, the Commission's decision in its Confidentiality proceeding, Rulemaking (R.) 05-06-040, and any subsequent decisions issued in the same or successor proceeding. A declaration for confidentiality should identify all redacted information by tab name and cell reference.
3. RPS Compliance reports must be submitted to the Commission as specified below:
 - a. Serve a public version on the service list in proceeding R.11-05-005. All pages must be legible: If reports need to be printed and scanned to be issued to the service list, please ensure that scanned documents are not blurry or distorted. Retail sellers are responsible for maintaining confidentiality when serving a redacted report. The most current version of the service list can be found on the Commission's webpage :
http://www.cpsc.ca.gov/service_lists/R1105005_79864.htm
 - b) Submit a confidential Excel version utilizing the locked spreadsheet with the Energy Division by e-mailing an electronic version to robert.blackney@cpuc.ca.gov and rpscompliance@cpuc.ca.gov. Please only submit Excel documents in .xls format (.xlsm files will NOT be accepted). If your file is larger than 7MB, please file the confidential versions of the RPS Compliance Spreadsheet through the CUPC FTP site (<https://cpucftp.cpsc.ca.gov/>).
 - c) Send paper copies (confidential and public) to each of the assigned Administrative Law Judges (ALJs):

Regina M. DeAngelis and Anne E. Simon
California Public Utilities Commission
505 Van Ness Avenue
San Francisco, CA 94102
 - d) Do not send paper copies of the confidential version to anyone except the persons listed above, unless specifically requested.
4. Include the Title Page and fill out the following information:
 - a) Name of the retail seller serving the Compliance Report
 - b) Date the Compliance Report is being served
 - c) Contact information
5. Complete the Officer Verification Form in the format provided (Rule 1.11)

Narrative Reporting Requirements

Pursuant to Public Utilities Code Section 399.13(a)(3), each retail seller must include the following narrative information in each Annual Compliance Report and in the final report for each compliance period:

1. The status of any necessary siting and permitting approvals from federal, state, and local agencies for those eligible renewable energy resources procured by the retail seller that have not yet attained their commercial on-line dates.
2. Identification of all procurement from eligible renewable energy resources located outside California and within the WECC during the period covered by the report. Retail sellers should submit a list of facilities in a matrix format including: facility name, location (City and State), and the amount of renewable energy credits (RECs) procured during the year covered by the report (i.e. 2013 for this report). If a retail seller did not procure any RECs from out of state facilities, please include a brief summary on whether the retail seller intends to procure RECs from facilities located out of state in the future, and if so where these facilities may be located.
3. Identification of all procurement of unbundled RECs during the period covered by the report. Retail sellers should submit a list of facilities in a matrix format including: facility name, location (City and State), and the amount of unbundled RECs procured during the year covered by the report (i.e. 2013 for this report). If a retail seller did not procure any unbundled RECs, please include a brief summary on whether the retail seller intends to procure unbundled RECs in the near future, and if so where these RECs originate.
4. Recommendations to remove impediments to making progress toward achieving the renewable energy resources procurement requirements established by statute and implemented by Commission decision.

Each retail seller that is also an electrical corporation must, in addition to the four items set forth above, include the following narrative information in each annual compliance report and in the final report for each compliance period:

1. The current status and progress made during the prior year toward construction of, and upgrades to, transmission and distribution facilities and other electrical system components owned by that electrical corporation to interconnect eligible renewable energy resources and to supply the electricity generated by those resources to load. The narrative must specifically include, but is not limited to, the status of planning, siting, and permitting of transmission facilities by federal, state, and local agencies. If a retail seller does not currently own any transmission lines, describe any plans to own transmission lines in the future, if at all.

RPS Compliance Report Spreadsheet Instructions**General Instructions**

1. Orange cells throughout the spreadsheet indicate data provided by the retail seller.
2. All data must be entered in megawatt-hours (MWh) out to three decimal points to accurately account for reported retail sales, quantity or renewable energy credits (RECs) and targets. The spreadsheet will display MWh throughout. Do not round any reporting data, as this may result in calculation errors.

3. The RPS compliance spreadsheet has locked cells to ensure accurate calculations. An unprotected version of the spreadsheet is available by request.
4. Protecting confidential data: Individual cells may be formatted black, which will serve to redact info when excel file is converted to pdf. Select cell - click on "fill color" icon - choose black. Note: Once converted to pdf, additional steps are necessary to ensure redacted data is not accessible.

Accounting tab instructions

The Accounting tab is where the primary RPS compliance calculations are made.

Information from the 20% RPS Program: 2010 retail sales figure (cells C11:D11) is needed to calculate the long-term contracting requirement for the first compliance period. Enter the "Surplus/(Deficit) Carried Forward" value from the "Provisional 20% RPS Closing Report" (cells C12:D12). Pursuant to D.12-06-038, all CA retail sellers are required to file a Closing Report to calculate their surplus/(deficit) procurement amount from the 20% RPS program.

Annual RPS Procurement and Percentages: This section calculates retail seller's annual percentage target and procurement made towards those targets, prior to the application of specific compliance rules.

Procurement Quantity Requirement: This section calculates retail seller's Procurement Quantity Requirement (PQR) for a given compliance period, and shows the total amount of RECs applied to the PQR (data sourced from the "RECs Retired to meet PQR Detail" tab).

Portfolio Balance Requirements: This section calculates (i) whether the retail seller met the minimum procurement requirement for Category 1 RECs, and (ii) whether the retail sellers procured Category 3 RECs within the limit for each compliance period.

Excess Procurement Calculation: This section calculates the quantity and classification of RECs that qualify as for excess procurement. Retail sellers will classify any RECs that qualify as excess procurement (row 57) as either a Pre-June 1, 2010 REC, a Category 1 REC or a Category 2 REC (rows 58-60).

Excess Procurement Bank: This section shows the amount of excess procurement available for future RPS compliance, and a retail seller's application of excess procurement RECs towards a procurement quantity requirement, as applicable.

RPS Compliance Status: This section shows whether or not a retail seller met its procurement quantity requirement and the deficit amount, if any. Enforcement rules for RPS compliance have yet to be determined.

Deficit from the 20% Closing Report: This section how the retail seller will satisfy its net deficit from the 20% RPS Program, as reported in the Closing Report, if any.

Procurement Detail tab

Procurement Summary: This section differentiates the reported RECs procured by classification (i.e., PCC 0, PCC 1, PCC 2 or PCC 3) and calculates whether the retail seller met the long-term contracting requirements, if any short-term (< 10 yrs) contracts were executed in a compliance period.

Contract Detail: For each contract, enter actual and forecasted data (MWh) for each year throughout the contract term. Do not assume that an expiring contract will be renegotiated.

a) For ALL RPS Eligible Contracts: List contracts by CPUC ID Number, name, annual contracted deliveries (MWh), contract status, facility status, resource type, expected portfolio content category (i.e. PCC 1, PCC 2, etc.), contract length (i.e. short-term/long-term), whether contracted RECs are bundled/unbundled, the facility location (City and State), contract execution date, and the total MWh volume of the contract.

b) "Contract Volume" (Column "AG") Input the total MWh over the term of the contract identified in the contract.

c) Contract Execution Date: The date the original contract was signed. If the parties signed on different dates, or there are any contract amendments or modifications occurring after June 1, 2010, that increase the nameplate capacity or expected quantities of annual generation, or substitute a different renewable energy resource, use the most recent execution/signing date.

d) Date of Most Recent Contract Extension: The date the most recent contract extension was signed. If a contract or ownership agreement originally signed by a retail seller as defined in Public Utilities Code Section 399.12(j) prior to June 1, 2010 is amended or modified after June 1, 2010, to increase the nameplate capacity or expected quantities of annual generation, the originally contracted procurement may be used for all compliance purposes, but the incremental procurement resulting from the amendment or modification will be subject to the then-applicable rules for portfolio balance, long-term contracting, and excess procurement.

e) If any procurement data for a specific contract differs from what is reported to the CEC or included in an RPS Verification Report of the CEC for that year, the specific cell should be highlighted and the discrepancy should be explained.

f) Procurement claims from contract/ownership agreements executed before June 1, 2010, or January 13, 2011 for ESPs, are not subject to the PCC classifications established in D.11-12-052. For the purposes of RPS compliance any eligible RPS RECs that are not subject to PCC 1, 2, or 3 will be placed in their own classification, that CPUC staff will henceforth refer to as PCC 0.

RECs Retired to meet POR

The information provided in this tab is largely the same as the information within the "Procurement Detail tab"; however, rather than including all RPS eligible RECS procured, retail sellers should provide only the MWh figures of RECs retired through WREGIS *and* applied to their Procurement Quantity Requirement.

36 Month Retirement tab instructions

This tab includes formulas to determine the retirement deadline for all RPS RECs and whether the RECs retired "Pass" or "Fail" the requirements of the 36 month retirement limit.

CPUC ID: The identification number provided to facility by the CPUC.

RPS ID: The identification number provided to facility by the CEC.

WREGIS ID: The identification number provided to facility by WREGIS.

Facility Name: For Facilities NOT interconnected to a CBA, - Retail sellers must enter the facility's source name, as registered with OATI's webRegistry. This applies mainly to facilities not directly connected to a CBA.

Vintage Year/Month of RECs: Enter the year and month which the RECs were generation. Please create one line per combination of REC vintage and retirement date. For example RECs that have the same vintage are retired on two separate dates, please include one line per retirement date. Likewise if RECs of different vintages (e.g. June 2013 and July 2013) are retired on the same date, please include one line per vintage.

REC Retirement Date: Enter the date that RECs were retired - enter one line per vintage and retirement date combination. If RECs with the same vintage month/year are retired on separate date, please enter one line for each of the distinct retirement dates.

Last Month/Year to Retire RECs: This is a calculated field that determines the last month and year that RECs of a given vintage can be retired.

Do RECs "Pass" or "Fail" Requirements of 36 Month Rule: This is a calculated field that determines if RECs were retired within the required 36-month timeframe.

MWh REC Quantity Retired: Enter the quantity of RECs, with a given vintage and retirement date combination, that were retired for compliance.

2	Annual RPS Compliance Report: (2011) 36 Month Retirement					Note : Please create one line per combination of REC vintage and REC retirement date. For example RECs that have the same vintage are retired on two separate dates, please include one line per retirement date. Likewise if RECs of different vintages (e.g. June 2013 and July 2013) are retired on the same date, please include one line per vintage.				
3	Data Reported by:									
4	Pacific Gas and Electric Company			Input Required						
5	August 1, 2014			Information is Hard Coded (No Input Required)						
6

1	Annual RPS Compliance Report: (2012) 36 Month Retirement																							
2	Data Reported by:		Input Required		Note : Please create one line per combination of REC vintage and REC retirement date. For example RECs that have the same vintage are retired on two separate dates, please include one line per retirement date. Likewise if RECs of different vintages (e.g. June 2013 and July 2013) are retired on the same date, please include one line per vintage.																			
3	Pacific Gas and Electric Company		Information is Hard Coded (No Input Required)																					
4	August 1, 2014

1	Annual RPS Compliance Report: (2013) 36 Month Retirement									
2	Data Reported by:				Note: Please create one line per combination of REC vintage and REC retirement date. For example RECs that have the same vintage are retired on two separate dates, please include one line per retirement date. Likewise if RECs of different vintages (e.g. June 2013 and July 2013) are retired on the same date, please include one line per vintage.

OFFICER VERIFICATION FORM

I am an officer of the reporting corporation herein, and am authorized to make this verification on its behalf. The statements in the foregoing document are true of my own knowledge, except as to matters which are therein stated on information or belief, and as to those matters I believe them to be true. The spreadsheet format used to file this compliance report has been altered from the version issued or approved by Energy Division to include text boxes with explanatory language.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on July 24, 2014 at San Francisco, California.

Variable	Calculation in Energy Division RNS Calculation Template	Revised Calculation Correcting Apparent Errors in Energy Division Template	Item	Deficit from RPS prior to Reporting Year	2011 Actuals	2012 Actuals	2013 Actuals	2011-2013	2014 Forecast	2015 Forecast	2016 Forecast	2014-2016	2017 Forecast	2018 Forecast	2019 Forecast	2020 Forecast	2017-2020	2021 Forecast	2022 Forecast	2023 Forecast	2024 Forecast	2025 Forecast
Step 2 Result: Stochastically-Adjusted Net Short (Physical Net Short + Stochastic Risk Adjustment)4																						
Gd			Stochastically-Adjusted Annual Gross RPS Position (GWh)																			
Ge			Stochastically-Adjusted Annual Gross RPS Position (%)																			
Application of Bank																						
Ia	H - Hc (from previous year)	J - Hc (from previous year)	Existing Bundled RECs above the PQR (The Bank at beg. of Period) 6																			
Ib			RECs above the PQR added to Bank			31	34	65	Optimization is Based on Compliance Period Only					199	Optimization is Based on Compliance Period Only					87		
Ic			Non-bankable RECs above the PQR																			
Id			Gross Balance of RECs above the PQR																			
Ie			Planned Application of RECs above the PQR towards RPS Compliance																			
If			Planned Sales of RECs above the PQR7																			
Ij			Net Balance of RECs above the PQR (The Bank at End of Period)5																			
Ik			Category 0 RECs																			
Il			Category 1 RECs																			
Im			Category 2 RECs																			
Expiring Contracts																						
In			RECs from Expiring RPS Contracts		N/A	N/A	N/A	N/A	6	295	719	1,060	1,290	3,432	4,132	5,004	13,878	5,341	7,765	8,800	8,194	8,295
Step 3 Result: Stochastically-Optimized Net Short (Stochastically-Adjusted Net Short + Application of Bank)8																						
La	Ga + Ia - Ib - Ic	Gd-Ia-Ib	Annual Net RPS Position after Bank Optimization (GWh)						Optimization is Based on Compliance Period Only					Optimization is Based on Compliance Period Only								
Lb	(F + Ia - Ib - Ic)/A	(Gd-Ia-Ib-E)/A	Annual Net RPS Position after Bank Optimization (%)																			

General Table Notes: Values are shown in GWhs. Fields in grey are protected as Confidential under CPUC Confidentiality Rules.

(1) (Row A) PG&E uses its own internal retail sales forecast for its procurement decisions.

(2) (Row D) As a portion of the Bank will be used as VMOP, Row D will remain zero. See 2014 RPS Plan for a description of PG&E's VMOP.

(3) (Step 1 Result: Physical Net Short) Rows Ga and Gb represent PG&E's physical net short based on PG&E's internal bundled retail sales forecast, as opposed to the LTPP forecast provided in the RNS.

(4) (Step 2 Result: Stochastically-Adjusted Net Short (Physical Net Short + Stochastic Risk Adjustment)) PG&E added rows Gd and Ge to the Alternative RNS in order to show the stochastically-adjusted physical net short, which incorporates the risks and uncertainties addressed in the stochastic model. For more details on PG&E's stochastically modeled risks, see PG&E's 2014 RPS Plan.

This is prior to any application of the Bank.

(5) (Rows Ia and Ib) As PG&E's Alternative RNS—incorporates—additional risk adjustments to the results from the Physical Net Short, the Bank sizes indicated in Rows Ia and I appear smaller than they are in Rows Ia and I of the RNS, which shows the non-stochastically-adjusted Bank size.

(6) (Rows Ia) At the beginning of each compliance period Row Ia subtracts previous compliance period net balance of RECs. For example, the 2021 forecast for Row Ia is equivalent to the Row I in CP3 minus Row Ic in CP3.

(7) (Row If) The purpose of the planned sales is to minimize the non-bankable volumes, but the actual sales could be a combination of bankable and non-bankable volumes.

(8) (Step 3 Result: Stochastically-Optimized Net Short (Stochastically-Adjusted Net Short + Application of Bank))

(a) Rows La and Lb represent the optimized net short that results from taking Row Gd (Step 2 Result) and then applying Bank usage. Bank can be used for either (i) compliance purposes (row Ia) or (ii) sales (Row Ib).

(b) Row La and Lb in the Alternative RNS do not match Row La and Lb in the RNS, because the RNS does not include Row Gd (Stochastically-Adjusted Net Short). Row Gd presents a more updated RPS position than Ga, and therefore should be used in the calculations for La and Lb.

(c) PG&E includes the non-bankable volumes in calculating rows La and Lb. Although these volumes can not be carried forward, per Decision 12-06-038, these volumes could be used towards meeting compliance in the current period. Therefore, the non-bankable volumes should be included in the Annual Net RPS Position after Bank Optimization.

(8) (Row F) Row F has subtracted 134 GWh of RECs associated with 2011 generation from the Hay Canyon Wind Facility and the Nine Canyon Wind Phase 3. These RECs are not being used for RPS compliance because they were not retired within the RPS statute's 36-month REC retirement deadline, as discussed on pages 2-3 of this report.

*Stochastic Results in Rows Gd-Lb reflect a June 2014 stochastic modeling vintage.
