**BEFORE THE PUBLIC UTILITIES COMMISSION OF THE  
STATE OF CALIFORNIA**

Order Instituting Rulemaking to Continue	)	
Implementation and Administration of California	)	Rulemaking 11-05-005
<u>Renewables Portfolio Standard Program</u>	)	(Filed May 5, 2011)

**SOUTHERN CALIFORNIA EDISON COMPANY'S (U 338-E) 2013 PRELIMINARY  
ANNUAL 33% REPORT**

**(PUBLIC VERSION)**

Pursuant to Decision (“D.”) 12-06-038, Southern California Edison Company (“SCE”) respectfully submits its 2013 Preliminary Annual 33% Renewables Portfolio Standard (“RPS”) Compliance Report (“RPS Compliance Report”). In D.12-06-038, the California Public Utilities Commission (“Commission” or “CPUC”) directed all retail sellers to submit an annual RPS compliance report on August 1 of each year.<sup>1</sup>

**I.**

**RPS COMPLIANCE REPORT**

SCE’s RPS Compliance Report spreadsheet is included as Appendix A, and uses the template issued by the Energy Division. The information included in SCE’s RPS Compliance Report spreadsheet is stated based on information and belief.

---

<sup>1</sup> See D.12-06-038 at 102-103 (Ordering Paragraph 34).

## **II.**

### **SITING AND PERMITTING STATUS OF PROJECTS IN DEVELOPMENT**

The RPS Compliance Report Reporting Instructions issued by Energy Division (“Reporting Instructions”) require retail sellers, pursuant to Public Utilities Code Section 399.13(a)(3), to provide the status of any necessary siting and permitting approvals from federal, state, and local agencies for those eligible renewable energy resources procured by the retail seller that have not yet attained their commercial on-line dates. SCE has 131 RPS-eligible projects under contract that are in various stages of development. The status of siting and permitting for each of these eligible renewable energy resources is provided in the Siting and Permitting Status Table attached as Appendix B.

## **III.**

### **PROCUREMENT OF ELIGIBLE RENEWABLE RESOURCES LOCATED OUTSIDE OF CALIFORNIA**

In accordance with Public Utilities Code Section 399.13(a)(3), the Reporting Instructions require identification of all procurement from eligible renewable energy resources located outside California and within the Western Electricity Coordinating Council during the year covered by this RPS Compliance Report (i.e., 2013). Below, SCE includes its procurement from contracts with such resources for 2013.

## Procurement from Out-of-State Renewable Resources<sup>2</sup>

<b><u>Out-of-State Contracts</u></b>	<b><u>Project Location</u></b>	<b><u>2013 Procurement</u></b>
North Hurlburt Wind, LLC	Arlington, OR	542,117
South Hurlburt Wind, LLC	Arlington, OR	585,493
Horseshoe Bend Wind, LLC	Arlington, OR	612,269
Goshen Phase II LLC	Idaho Falls, ID	332,110
<b>Total (MWh)</b>		<b>2,071,989</b>

### IV.

#### **PROCUREMENT OF UNBUNDLED RENEWABLE ENERGY CREDITS**

The Reporting Instructions also require identification of all procurement of unbundled renewable energy credits (“RECs”) during the year covered by this RPS Compliance Report (i.e., 2013). SCE procured no unbundled RECs in 2013. Moreover, SCE has not executed any contracts for future delivery of unbundled RECs. SCE may procure unbundled RECs in the future; however, SCE cannot identify the potential future source(s) of any such unbundled RECs at this time.

### V.

#### **RECOMMENDATIONS FOR REMOVING IMPEDIMENTS TO MAKING PROGRESS TOWARD ACHIEVING THE 33% RPS GOAL**

As provided in Public Utilities Code Section 399.13(a)(3), the Reporting Instructions request recommendations for removing impediments to making progress toward achieving the renewable energy goals established by statute and implemented by Commission decision. California and SCE have made significant progress toward those goals. Today, the State enjoys a mature renewables market where contracting opportunities abound. Existing procurement programs sufficiently support the development of renewable energy in the State. With a robust

---

<sup>2</sup> Out-of-state renewable resources are resources located outside California and not directly connected to a California Balancing Authority.

market for renewable energy already established, additional subsidies and incentives are neither appropriate, nor necessary. Nevertheless, some regulatory and procedural barriers remain that can impede achievement of the State's 33% RPS goal. See Section IV of SCE's 2014 RPS Procurement Plan<sup>3</sup> filed on June 4, 2014 for a discussion of several factors that will challenge achievement of the State's RPS goals. In the Plan, SCE identifies five primary factors that will challenge achievement of the State's RPS goals: (1) permitting, siting, approval, and construction of both transmission and renewable generation projects; (2) a heavily subscribed interconnection queue; (3) developer performance issues; (4) curtailment; and (5) the increasing proportion of intermittent resources in SCE's renewables portfolio. SCE discusses each of these potential issues that could cause compliance delays and describes the steps it has taken to mitigate the effects of these challenges. SCE's recommends using the mitigation steps discussed in SCE's RPS Procurement Plan as a starting point to identify policies and rules that can help alleviate obstacles for meeting the State's RPS targets.

## **VI.**

### **STATUS AND PROGRESS TOWARD DEVELOPMENT OF TRANSMISSION AND DISTRIBUTION FACILITIES**

Consistent with Public Utilities Code Section 399.13(a)(3), the Reporting Instructions request information about the current status and progress made during the prior year toward construction of, and upgrades to, transmission and distribution facilities and other electrical system components owned by electrical corporations to interconnect eligible renewable energy resources and to supply the electricity generated by those resources to load.

California's renewable energy goals have created a need for additional transmission and distribution infrastructure in order to deliver renewable power from remote locations. Below,

---

<sup>3</sup> See SCE's 2014 RPS Procurement Plan at 22-29 (June 4, 2014)

SCE lists the status and progress of SCE’s major transmission projects that will interconnect renewables and deliver their energy to load.

**A. Devers-Colorado River and Devers-Valley No. 2 Transmission Project (“DCR”)**

Project Description	The DCR project involves construction of approximately 153 miles of new 500-kilovolt (“kV”) transmission line from SCE’s Valley Substation to SCE’s Devers Substation and then to a new SCE Colorado River Substation near Blythe, California.
Purpose Related to RPS	This project will help bring vast renewable and conventional generation from the solar energy-rich areas of eastern Riverside County to the power grid.
Current Status/Major Activities Completed	In Service: In May 2008, SCE filed a Petition for Modification (“PFM”) of the Certificate of Public Convenience and Necessity (“CPCN”) received from the CPUC to build only the California portion of SCE’s previously-proposed Devers-Palo Verde #2 project. In November 2009, the CPUC granted approval of SCE’s petition contingent upon subsequent CAISO approval, which was secured in August 2010. CPUC and Bureau of Land Management permitting was completed in July 2011. Construction commenced in January 2012. The project went in-service in September 2013.
Expected MW of Renewable Generation Integrated	2,300 MW

**B. West of Devers Upgrade Project (“WOD”)**

Project Description	The proposed WOD facilities will be located in San Bernardino and Riverside Counties in southern California. WOD entails the removal and rebuilding of five existing 220 kV lines (Devers-Vista #1, Devers-Vista #2, Devers-San Bernardino, Devers-El Casco, and El Casco-San Bernardino). The upgraded 220 kV lines are needed to allow full delivery of multiple generation projects interconnecting at SCE’s new Colorado River and Red Bluff Substations.
Purpose Related to RPS	Construction of WOD will increase the transfer capability of the existing WOD corridor and provide for the full delivery of new renewable solar generation being developed in California.
Current Status/Major Activities Completed	Licensing and Permitting: The WOD project is in the early development stage. Site and route evaluation, community and agency outreach, and other pre-licensing activities are

	underway. SCE filed a CPCN with the CPUC in October 2013 with forecast in-service by 2019.
Expected MW of Renewable Generation Integrated	4,000 MW

**C. Eldorado-Ivanpah Transmission Project (“EITP”)**

Project Description	The EITP consists of a new 220/115 kV Substation near Primm, Nevada and approximately 35 miles of new double-circuit, 220 kV transmission lines that extend from the Ivanpah Dry Lake Area in southern California to Eldorado Substation in southern Nevada.
Purpose Related to RPS	EITP will improve the reliability and reduce the cost of power by reducing transmission congestion on the CAISO grid. In addition, this project will provide greater access to the renewable resource-rich areas of the Mojave Desert along the California-Nevada border around Primm, Nevada.
Current Status/Major Activities Completed	In Service: CPUC and Bureau of Land Management permitting was completed in May 2011. Construction began in March 2012. The project went in-service in July 2013.
Expected MW of Renewable Generation Integrated	1,400 MW

**D. Coolwater-Lugo**

Project Description	The proposed Coolwater-Lugo project consists of approximately 63 miles of primarily double-circuit, 220 kV transmission line between SCE’s existing Coolwater 220/115 kV Substation in Daggett, through a new Jasper 220kV Substation (separate project) which will be a new point of interconnection for new renewable generation, and SCE’s existing Lugo 500/220 kV Substation in Hesperia, California. In addition, the project involves siting of a future 500/220 kV Desert View Substation between the new Jasper Substation and SCE’s existing Lugo Substation, and 16 miles of transmission line between Desert View Substation and Lugo Substation, consisting of 500 kV single circuit transmission line and towers, initially energized at 220 kV until the future Desert View Substation becomes fully operational.
Purpose Related to RPS	Construction of Coolwater-Lugo will remedy the reliability and congestion problems that would result from the development and interconnection of over 1,200 MW of renewable solar and wind generation in the Barstow and

	Lucerne Competitive Renewable Energy Zones of the Mojave Desert region of southern California.
Current Status/Major Activities Completed	Licensing and Permitting: The Coolwater-Lugo project is in the development stage. Environmental Assessment preparation, community and agency outreach, and other pre-licensing activities are underway. SCE filed a CPCN with the CPUC in August 2013 with a forecast in-service date of April 2018.
Expected MW of Renewable Generation Integrated	1,200 MW

**E. Tehachapi Renewable Transmission Project (“TRTP”)**

Project Description	TRTP is an 11-segment project consisting of new and upgraded 220 kV and 500 kV transmission lines and associated substations built primarily to assist the development of renewable energy generation projects in remote areas of eastern Kern County, California. Segments 1-3 consist of 83 miles of new transmission line and Segments 4-11 consist of 173 miles of transmission line.
Purpose Related to RPS	TRTP will support interconnection of up to 4,500 MW of generation, most of which is expected to be from renewable resources. This will improve the reliability of the California transmission grid by enabling the expansion of the transfer capability of Path 26, serving load growth in the Antelope Valley, and easing transmission constraints in the Los Angeles basin.
Current Status/Major Activities Completed	In Construction: Regulatory approvals granted for Tehachapi Segments 4-11 include: CPUC CPCN in December 2009, US Forest Service Biological Opinion in July 2010, US Forest Service Record of Decision (“ROD”) in October 2010, US Army Corp of Engineers ROD in February 2011, and Angeles National Forest Special Use Permit in September 2011. SCE filed a PFM with the CPUC in October 2011 and a decision was obtained in October 2013. An additional PFM was filed in July 2013 and a decision was obtained in January 2014. Construction on Segments 4-11 began in 2010. Segments 1-5, Segment 10, Windhub Substation, Whirlwind Substation, and Highwind Substation are all in service and have integrated 2,690 MW of renewable generation. Segments 6-9 and Segment 11 are forecast to be in-service by 2016.
Expected MW of Renewable Generation Integrated	4,500 MW

**F. Path 42 Upgrade**

Project Description	This project, in partnership with Imperial Irrigation District (“IID”), will enable the delivery of additional renewable energy to the CAISO-controlled grid. The SCE portion of this project primarily consists of the construction of approximately 15 miles of the Devers-Mirage #1 and Devers-Mirage #2 230kV transmission lines along with various upgrades at both Devers Substation and Mirage Substation.
Purpose Related to RPS	This project will enable transfer of renewable energy from IID to SCE’s portion of the CAISO-controlled grid.
Current Status/Major Activities Completed	In Construction: Development activities, which include preliminary engineering and environmental permitting, have begun. IID is preparing the California Environmental Quality Act and National Environmental Policy Act documents necessary for the environmental review process. Construction began in January 2014 is expected to be complete by December 2014.
Expected MW of Renewable Generation Integrated	1,090 MW

**G. West of Devers Interim Project**

Project Description	The project involves temporary installation of twelve single-phase series reactors on four West of Devers 220 kV lines to facilitate the interconnection of generators until the larger WOD Upgrade Project is complete. These series reactors will be located on two previous laydown areas west of Devers Substation. The four West of Devers 220 kV transmission lines will be rerouted into the series reactors. Segments of existing subtransmission lines will be relocated around the new reactors.
Purpose Related to RPS	This project meets the CAISO request for SCE to implement an interim solution to provide incremental deliverability to new renewable generation entering the Devers area (impacting the WOD Upgrade Project).
Current Status/Major Activities Completed	In Construction: Federal Aviation Agency approval was granted in October 2012. CPUC General Order 131-D licensing exemption status was confirmed November 2011. Construction began in November 2012 and went in-service in October 2013.
Expected MW of Renewable Generation Integrated	1,050 MW

In addition to the transmission projects listed above, SCE has made upgrades to its distribution system to interconnect eligible renewable energy resources and to supply the electricity generated by those resources to load. Based on executed Interconnection Agreements from January 1, 2013 to December 31, 2013, SCE has installed or is in the process of installing the following distribution system upgrades in support of distributed renewable generation projects:

- Approximately 12.24 circuit miles of underground cable and overhead conductor
- 63 gas switches with automation
- Automate 7 existing switches
- Approximately 79 pole replacements
- 13 Remote Automatic Reclosers (RAR)
- 2 Capacitor Banks
- 5 Remote Terminal Units (RTU)
- 1 Voltage Regulator
- 1 Circuit Breaker

These upgrades represent distribution system-level upgrades. Most distribution upgrades require permitting according to local city requirements, are planned according to a standardized internal SCE process, and are paid for by generators and not directly by SCE's customers.

## **VII.**

### **RENEWABLE NET SHORT UPDATE**

Appendices C.1, C.2, C.3, and C.4 include SCE's forecast of its renewable procurement position and need – i.e., SCE's renewable net short ("RNS"). These Appendices use the standardized reporting template included in the Administrative Law Judge's Ruling on Renewable Net Short, dated May 21, 2014 ("RNS Ruling"). As required in the Revised Energy

Division Staff Methodology for Calculating the Renewable Net Short (“Revised RNS Methodology”) attached to the RNS Ruling, Appendices C.1 and C.2 include physical RNS calculations. Moreover, Appendices C.3 and C.4 include optimized RNS calculations. Appendices C.1 and C.3 include physical and optimized RNS calculations using all required assumptions for the Commission’s Revised RNS Methodology. Appendices C.2 and C.4 include physical and optimized RNS calculations using SCE’s assumptions. SCE based its forecasted renewable procurement position and need, using both SCE’s assumptions and the Commission’s assumptions, on the RPS procurement targets adopted by the Commission in D.11-12-020 and other relevant RPS program rules (e.g., rules on banking of excess procurement across compliance periods). Both forecasts include all projects under contract and assume contracted projects that are currently on-line will deliver 100% of their expected amount of renewable energy. Both forecasts also include generation from pre-approved procurement programs (i.e., RAM, Re-MAT, and SPVP) at a 100% success rate before contracts are signed.<sup>4</sup> Additionally, both forecasts incorporate current expected on-line dates for all projects that are not yet on-line.

Furthermore, both forecasts account for potential issues that could delay RPS compliance, project development status, minimum margin of procurement, and other potential risks through the use of SCE’s probabilistic risk-adjusted success rates for energy deliveries from contracted projects that are not yet on-line. These probabilistic risk-adjusted success rates are intended to reflect a number of dynamic factors and are periodically adjusted based on new information. The forecasts include individual project-specific, risk-adjusted success rates for large, near-term projects and a flat 60% success rate for the remaining projects, which is based on these projects’ overall weighted average success rate. The overall probabilistic risk-adjusted success rate for energy deliveries from SCE’s portfolio of contracts with projects that are not yet

---

<sup>4</sup> After contracts from such programs are signed, they are risk adjusted in the same manner as other projects with executed contracts that are not yet on-line.

on-line varies from around 78% for the second compliance period to approximately 72% in the third compliance period and thereafter.

The difference between the forecasts using SCE's assumptions, as reflected in Appendices C.2 and C.4, and the Commission's assumptions, as reflected in Appendices C.1 and C.3, is that SCE uses its most recent bundled retail sales forecast for all years while the Commission's assumptions use SCE's most recent bundled retail sales forecast for 2014 through 2018 and 2022 through 2030, and the 2010 Long-term Procurement Plan ("LTPP") standardized planning assumptions for 2019 through 2021.<sup>5</sup> SCE uses its own bundled retail sales forecast for renewable procurement planning because it is SCE's best forecast of bundled retail sales.

## VIII.

### **RENEWABLE ENERGY CREDIT RETIREMENT ISSUES**

SCE has retired 46,158,666 RECs for compliance period one, exceeding procurement quantity requirements by meeting 20.6% of retail sales with renewable resources. Aside from this success, SCE would like to highlight a unique reporting instance with its Ormesa Geothermal I contract, and request eligibility for a specific batch of renewable energy credits ("RECs") that has been identified as in violation of the 36-month REC retirement rule in Appendix A.

In 2011, SCE was made aware that the Geo East Mesa generator, one of the Ormesa Geothermal I facility's three generators, was not certified by the California Energy Commission ("CEC") as RPS-eligible. SCE worked with Ormat, the developer of the Ormesa Geothermal I facility, and the CEC to establish correct capacity allocations for each of the three generators of the Ormesa Geothermal I facility in an effort to correctly update the amount of generation that

---

<sup>5</sup> The Revised RNS Methodology states that retail sellers can use their own forecasts for bundled retail sales for the first five years and should use the LTPP standardized planning assumptions thereafter. *See* RNS Ruling, Attachment A at 25. In Appendices C.1 and C.3, SCE uses its own bundled retail sales forecast for 2022 through 2030 because there is no LTPP forecast for those years.

was RPS-eligible. Based on the EIA-860 form for the Ormesa Geothermal I facility, it was established that approximately 37 percent of the entire facility's output belonged to the Geo East Mesa generator, and could not be retired as RPS-eligible. SCE retired RECs from the Ormesa Geothermal I facility's output according to this allocation. The CEC verified SCE's final RPS claim amount for the Ormesa Geothermal I facility for March 2007 through December 2010.<sup>6</sup> Separately, SCE submitted an RPS eligibility certification application to ensure the entire output of the Geo East Mesa generator would be RPS-eligible moving forward. The CEC approved RPS eligibility for the Geo East Mesa generator starting in April 2011.

In early 2014, SCE mistakenly continued to retire RECs according to the 37 percent RPS-ineligible allocation for vintage April 2011 through December 2011, even though the entire facility's output was 100 percent RPS-eligible. SCE recognized this oversight in May 2014, and corrected it by retiring the remaining 37 percent of RECs from vintage April 2011 through December 2011. However, two batches of these RECs are considered late according to the Commission's interpretation of the 36-month REC retirement rule. SCE highlights these specific REC retirements below, and asks the Commission to consider the circumstances surrounding the retirements. SCE was applying the 37 percent ineligible allocation to the output of the Ormesa Geothermal I facility to correctly report that the Geo East Mesa generator was awaiting approval of its CEC RPS certification application for a certain period of time, and inadvertently continued to apply the allocation even after the CEC had approved the generator as 100 percent RPS-eligible.

On May 30, 2014, SCE retired 13,172 RECs<sup>7</sup> for April 2011 and 13,652 RECs<sup>8</sup> for May 2011, totaling 26,824 RECs. The 13,172 RECs created for April 2011 were mistakenly retired after the 36-month REC retirement deadline as explained above. The 13,652 RECs created for

---

<sup>6</sup> See CEC's RPS 2008-2010 Verification Report at 47-48 (November 2013) (available at <http://www.energy.ca.gov/2013publications/CEC-300-2013-010/CEC-300-2013-010-CMF.pdf>)

<sup>7</sup> This represents 37 percent of the Ormesa Geothermal I facility for April 2011.

<sup>8</sup> This represents 37 percent of the Ormesa Geothermal I facility for May 2011.

May 2011 were retired in May 2014, and have also been identified as in violation of the 36-month REC retirement deadline, as explained above. Public Utilities Code Section 399.21(a)(6) states that “[a] renewable energy credit shall not be eligible for compliance with a renewables portfolio standard procurement requirement unless it is retired in the tracking system established pursuant to subdivision (c) of Section 399.25 by the retail seller or local publicly owned electric utility within 36 months from the initial date of generation of the associated electricity.” The Commission counts the month in which a REC is generated as one of the full 36 months within the deadline; thus a REC created for May 2011 must be retired by April 2014.<sup>9</sup> However, that is not the only interpretation of Public Utilities Code Section 399.21(a)(6). Indeed, the CEC’s RPS enforcement procedures for local publicly owned electric utilities (“POUs”) provide that:

A POU may not use a REC associated with electricity products to meet its RPS procurement requirements unless it is retired within 36 months from the initial month of the generation of the associated electricity. For example, a POU can retire a REC associated with electricity generated in February 2011 no later than February 28, 2014, to claim the REC toward the POU’s RPS procurement quantity requirements.<sup>10</sup>

Accordingly, SCE’s May 2011 RECs retired in May 2014 would meet the CEC’s 36-month retirement deadline.

SCE respectfully requests that due to the “good faith” intentions in which these RECs were created in May 2011 and retired in May 2014, the Commission allow these 13,652 RECs to count toward RPS goals. The RECs were retired within 36 calendar months of generation. Moreover, as evidenced by the CEC’s interpretation of Public Utilities Code Section 399.21(a)(6), counting these RECs toward RPS targets would not violate the requirements of the statute. This interpretation and implementation of the 36-month retirement rule would ultimately allow for more RPS-eligible generation to count towards California’s RPS program targets while staying within the intent of the RPS law. SCE is not requesting a similar waiver for the 13,172

---

<sup>9</sup> See D.12-06-038 at 48-49.

<sup>10</sup> 20 C.C.R. § 3202(c).

RECs from April 2011 because they were clearly retired beyond the 36-month requirement. SCE appreciates the Commission’s consideration of this matter, and looks forward to any potential further dialogue.

Additionally, there are several batches of RECs from Coso Power Developers, Coso Energy Developers, and Goshen Phase II that are incorrectly listed as “failing” under the 36-month retirement rule in Appendix A as shown in the table below. RECs from these three projects were incorrectly labeled with earlier vintage months by the Western Renewable Energy Generation Information System (“WREGIS”), and must be corrected in order to avoid false violations of the 36-month retirement rule. This mislabel of RECs is a result of the way WREGIS processes negative adjustments. Specifically, RECs that are already created for a vintage month cannot be deleted or relabeled, even if a lower generation amount is later reported for that vintage month as an adjustment. As a specific example, the batch of 750 RECs labeled as vintage April 2009 for Coso Power Developers in Appendix A was originally part of 35,798 MWh reported and created for April 2009. SCE later reported an adjusted amount of 35,048 MWh (750 MWh less) for April 2009 during the April 2011 REC cycle, and retired those 35,048 RECs. Instead of discarding the extra 750 RECs for April 2009, WREGIS created 750 fewer RECs for eligible generation in February 2011. Because SCE retired 750 less RECs for April 2009, this adjustment was already reflected in SCE’s earlier retirements, and 750 RECs were therefore incorrectly subtracted from eligible February 2011 generation. Even though those 750 RECs are labeled as April 2009, they correctly belong to February 2011, and therefore do not violate the 36-month REC retirement rule with the retirement date of January 31, 2014. This same issue applies to the other three batches of RECs from Coso Energy Developers and Goshen Phase II, but with different vintage months as seen below. SCE highlights these reporting issues so that the Commission can count the RECs highlighted in the table below as passing the 36-month rule. These RECs are specifically located in Appendix A within the “(2013) 36 Month Retirement” tab, rows 1860, 1892, 2757, and 7044.

Facility Name	Vintage Month/Year	Retirement Date (DD/MM/YYYY)	Last Month to Retire REC (Month/Year)	Do RECs "Pass" or "Fail" Requirements of 36 Month Rule:	MWh REC Quantity Retired	Actual Vintage
Coso Energy Developers - Coso Energy Developers	05/2009	31/01/2014	Apr-2012	FAIL	5987	02/2011
Coso Power Developers - Coso Power Developers	04/2009	31/01/2014	Mar-2012	FAIL	750	02/2011
Goshen Phase II LLC - Goshen Phase II LLC	09/2010	31/01/2014	Aug-2013	FAIL	27	03/2011
Coso Energy Developers - Unit 2	05/2009	31/01/2014	Apr-2012	FAIL	2993	02/2011

## IX.

### **CONFIDENTIALITY**

SCE is submitting a confidential and a public version of its RPS Compliance Report. Confidentiality Declarations for the RPS Compliance Report are included as Appendix D.

## X.

### **CONCLUSION**

SCE respectfully submits its RPS Compliance Report.

Respectfully submitted,

## CALIFORNIA'S RENEWABLES PORTFOLIO STANDARD

### 2013 Preliminary Annual 33% RPS Compliance Reporting Instructions

*Annual RPS compliance reports submitted by retail sellers include qualitative and quantitative elements, as required by the Public Utilities Code 399.13 and Commission decisions, notably, Decision (D.) 11-12-020, D.11-12-052 and D.12-06-038. Specific procedural guidelines, reporting requirements and general explanations about the RPS compliance spreadsheet are detailed below. Any questions concerning RPS compliance matters should be directed to Robert Blackney robert.blackney@cpuc.ca.gov, (415) 703-3072.*

#### Procedural Guidelines

1. D.12-06-038 requires Investor Owned Utilities (IOU), Multi-Jurisdictional Utilities (MJU), Electric Service Providers (ESP), and Community Choice Aggregators (CCAs) to submit an annual report on its compliance with the California RPS program. Refer to D.12-06-038 for additional details related to the calculations within the RPS compliance spreadsheet.
2. Any retail seller seeking confidentiality protection for information required by the Compliance Report should file a declaration. Confidentiality requests shall comply with the substantive and procedural rules set forth in D.06-06-066, as modified by D.08-04-023, the Commission's decision in its Confidentiality proceeding, Rulemaking (R.) 05-06-040, and any subsequent decisions issued in the same or successor proceeding. A declaration for confidentiality should identify all redacted information by tab name and cell reference.
3. RPS Compliance reports must be submitted to the Commission as specified below:
  - a. Serve a public version on the service list in proceeding R.11-05-005. All pages must be legible: If reports need to be printed and scanned to be issued to the service list, please ensure that scanned documents are not blurry or distorted. Retail sellers are responsible for maintaining confidentiality when serving a redacted report. **The most current version of the service list can be found on the Commission's webpage :**  
[http://www.cpsc.ca.gov/service\\_lists/R1105005\\_79864.htm](http://www.cpsc.ca.gov/service_lists/R1105005_79864.htm)
  - b) Submit a confidential Excel version utilizing the locked spreadsheet with the Energy Division by e-mailing an electronic version to robert.blackney@cpuc.ca.gov and rpscompliance@cpuc.ca.gov. Please only submit Excel documents in .xls format (.xslm files will *NOT* be accepted). **If your file is larger than 7MB, please file the confidential versions of the RPS Compliance Spreadsheet through the CUPC FTP site ( <https://cpucftp.cpsc.ca.gov/> ).**
  - c) Send paper copies (confidential and public) to each of the assigned Administrative Law Judges (ALJs):  
Regina M. DeAngelis and Anne E. Simon  
California Public Utilities Commission  
505 Van Ness Avenue  
San Francisco, CA 94102
  - d) **Do not send paper copies of the confidential version to anyone except the persons listed above, unless specifically requested.**
4. Include the Title Page and fill out the following information:
  - a) Name of the retail seller serving the Compliance Report
  - b) Date the Compliance Report is being served
  - c) Contact information
5. Complete the Officer Verification Form in the format provided (Rule 1.11)

#### Narrative Reporting Requirements

Pursuant to Public Utilities Code Section 399.13(a)(3), each retail seller must include the following narrative information in each Annual Compliance Report and in the final report for each compliance period:

1. The status of any necessary siting and permitting approvals from federal, state, and local agencies for those eligible renewable energy resources procured by the retail seller that have not yet attained their commercial on-line dates.
2. Identification of all procurement from eligible renewable energy resources located outside California and within the WECC during the period covered by the report. Retail sellers should submit a list of facilities in a matrix format including: facility name, location (City and State), and the amount of renewable energy credits (RECs) procured during the year covered by the report (i.e. 2013 for this report). If a retail seller did not procure any RECs from out of state facilities, please include a brief summary on whether the retail seller intends to procure RECs from facilities located out of state in the future, and if so where these facilities may be located.
3. Identification of all procurement of unbundled RECs during the period covered by the report. Retail sellers should submit a list of facilities in a matrix format including: facility name, location (City and State), and the amount of unbundled RECs procured during the year covered by the report (i.e. 2013 for this report). If a retail seller did not procure any unbundled RECs, please include a brief summary on whether the retail seller intends to procure unbundled RECs in the near future, and if so where these RECs originate.
4. Recommendations to remove impediments to making progress toward achieving the renewable energy resources procurement requirements established by statute and implemented by Commission decision.

Each retail seller that is also an electrical corporation must, in addition to the four items set forth above, include the following narrative information in each annual compliance report and in the final report for each compliance period:

1. The current status and progress made during the prior year toward construction of, and upgrades to, transmission and distribution facilities and other electrical system components owned by that electrical corporation to interconnect eligible renewable energy resources and to supply the electricity generated by those resources to load. The narrative must specifically include, but is not limited to, the status of planning, siting, and permitting of transmission facilities by federal, state, and local agencies. If a retail seller does not currently own any transmission lines, describe any plans to own transmission lines in the future, if at all.

## RPS Compliance Report Spreadsheet Instructions

### General Instructions

1. Orange cells throughout the spreadsheet indicate data provided by the retail seller.
2. All data must be entered in megawatt-hours (MWh) out to three decimal points to accurately account for reported retail sales, quantity or renewable energy credits (RECs) and targets. The spreadsheet will display MWh throughout. Do not round any reporting data, as this may result in calculation errors.
3. The RPS compliance spreadsheet has locked cells to ensure accurate calculations. An unprotected version of the spreadsheet is available by request.
4. Protecting confidential data: Individual cells may be formatted black, which will serve to redact info when excel file is converted to pdf. Select cell - click on "fill color" icon - choose black. Note: Once converted to pdf, additional steps are necessary to ensure redacted data is not accessible.

### Accounting tab instructions

The Accounting tab is where the primary RPS compliance calculations are made.

**Information from the 20% RPS Program** : 2010 retail sales figure (cells C11:D11) is needed to calculate the long-term contracting requirement for the first compliance period. Enter the "Surplus/(Deficit) Carried Forward" value from the "Provisional 20% RPS Closing Report" (cells C12:D12). Pursuant to D.12-06-038, all CA retail sellers are required to file a Closing Report to calculate their surplus/(deficit) procurement amount from the 20% RPS program.

**Annual RPS Procurement and Percentages**: This section calculates retail seller's annual percentage target and procurement made towards those targets, prior to the application of specific compliance rules.

**Procurement Quantity Requirement**: This section calculates retail seller's Procurement Quantity Requirement (PQR) for a given compliance period, and shows the total amount of RECs applied to the PQR (data sourced from the "RECs Retired to meet PQR Detail" tab).

**Portfolio Balance Requirements**: This section calculates (i) whether the retail seller met the minimum procurement requirement for Category 1 RECs, and (ii) whether the retail sellers procured Category 3 RECs within the limit for each compliance period.

**Excess Procurement Calculation**: This section calculates the quantity and classification of RECs that qualify as for excess procurement. Retail sellers will classify any RECs that qualify as excess procurement (row 57) as either a Pre-June 1, 2010 REC, a Category 1 REC or a Category 2 REC (rows 58-60).

**Excess Procurement Bank**: This section shows the amount of excess procurement available for future RPS compliance, and a retail seller's application of excess procurement RECs towards a procurement quantity requirement, as applicable.

**RPS Compliance Status**: This section shows whether or not a retail seller met its procurement quantity requirement and the deficit amount, if any. Enforcement rules for RPS compliance have yet to be determined.

**Deficit from the 20% Closing Report**: This section how the retail seller will satisfy its net deficit from the 20% RPS Program, as reported in the Closing Report, if any.

### Procurement Detail tab

**Procurement Summary**: This section differentiates the reported RECs procured by classification (i.e., PCC 0, PCC 1, PCC 2 or PCC 3) and calculates whether the retail seller met the long-term contracting requirements, if any short-term (< 10 yrs) contracts were executed in a compliance period.

**Contract Detail**: For each contract, enter actual and forecasted data (MWh) for each year throughout the contract term. Do not assume that an expiring contract will be renegotiated.

- a) For ALL RPS Eligible Contracts: List contracts by CPUC ID Number, name, annual contracted deliveries (MWh), contract status, facility status, resource type, expected portfolio content category (i.e. PCC 1, PCC 2, etc.), contract length (i.e. short-term/long-term), whether contracted RECs are bundled/unbundled, the facility location (City and State), contract execution date, and the total MWh volume of the contract.
- b) "Contract Volume" (Column "AG") Input the total MWh over the term of the contract identified in the contract.
- c) Contract Execution Date: The date the original contract was signed. If the parties signed on different dates, or there are any contract amendments or modifications occurring after June 1, 2010, that increase the nameplate capacity or expected quantities of annual generation, or substitute a different renewable energy resource, use the most recent execution/signing date.
- d) Date of Most Recent Contract Extension : The date the most recent contract extension was signed. If a contract or ownership agreement originally signed by a retail seller as defined in Public Utilities Code Section 399.12(j) prior to June 1, 2010 is amended or modified after June 1, 2010, to increase the nameplate capacity or expected quantities of annual generation, the originally contracted procurement may be used for all compliance purposes, but the incremental procurement resulting from the amendment or modification will be subject to the then-applicable rules for portfolio balance, long-term contracting, and excess procurement.
- e) If any procurement data for a specific contract differs from what is reported to the CEC or included in an RPS Verification Report of the CEC for that year, the specific cell should be highlighted and the discrepancy should be explained.
- f) Procurement claims from contract/ownership agreements executed before June 1, 2010, or January 13, 2011 for ESPs, are not subject to the PCC classifications established in D.11-12-052. For the purposes of RPS compliance any eligible RPS RECs that are not subject to PCC 1, 2, or 3 will be placed in their own classification, that CPUC staff will henceforth refer to as PCC 0.

### RECs Retired to meet PQR

The information provided in this tab is largely the same as the information within the "Procurement Detail tab"; however, rather than including all RPS eligible RECS procured, retail sellers should provide only the MWh figures of RECs retired through WREGIS **and** applied to their Procurement Quantity Requirement.

### 36 Month Retirement tab instructions

This tab includes formulas to determine the retirement deadline for all RPS RECs and whether the RECs retired "Pass" or "Fail" the requirements of the 36 month retirement limit.

**CPUC ID**: The identification number provided to facility by the CPUC.

**RPS ID**: The identification number provided to facility by the CEC.

**WREGIS ID**: The identification number provided to facility by WREGIS.

**Facility Name**: For Facilities NOT interconnected to a CBA, - Retail sellers must enter the facility's source name, as registered with OATI's webRegistry. This applies mainly to facilities not directly connected to a CBA.

**Vintage Year/Month of RECs**: Enter the year and month which the RECs were generation. Please create one line per combination of REC vintage and retirement date. For example RECs that have the same vintage are retired on two separate dates, please include one line per retirement date. Likewise if RECs of different vintages (e.g. June 2013 and July 2013) are retired on the same date, please include one line per vintage.

**REC Retirement Date**: Enter the date that RECs were retired - enter one line per vintage and retirement date combination. If RECs with the same vintage month/year are retired on separate date, please enter one line for each of the distinct retirement dates

**Last Month/Year to Retire RECs**: This is a calculated field that determines the last month and year that RECs of a given vintage can be retired.

**Do RECs "Pass" or "Fail" Requirements of 36 Month Rule**: This is a calculated field that determines if RECs were retired within the required 36-month timeframe.

**MWh REC Quantity Retired**: Enter the quantity of RECs, with a given vintage and retirement date combination, that were retired for compliance.

### RPS Compliance Report: 2011 Annual Summary

2011 Annual Summary
31-Jul-14

	2011	
RPS Summary Report	MWh	% of Total Retail Sales

# Annual RPS Compliance Report: (2011) 36 Month Retirement

Data Reported by:

Southern California Edison Company (U 338-E)

July 31, 2014

Input Required

Information is Hard Coded (No Input Required)

Note: Please create one line per combination of REC vintage and REC retirement date. For example RECs that have the same vintage are retired on two separate dates, please include one line per retirement date. Likewise if RECs of different vintages (e.g. June 2013 and July 2013) are retired on the same date, please include one line per vintage.

CPUC ID	RPS ID	WREGIS_ID	Facility Name	Vintage Month/Year	Retirement Date (DD/MM/YYYY)	Last Month to Retire REC (Month/Year)	Do RECs "Pass" or "Fail" Requirements of 36 Month Rule:	MWh REC Quantity Retired

## Annual RPS Compliance Report: (2012) 36 Month Retirement

Data Reported by:

Southern California Edison Company (U 338-E)

July 31, 2014

Input Required

Information is Hard Coded (No Input Required)

**Note:** Please create one line per combination of REC vintage and REC retirement date. For example RECs that have the same vintage are retired on two separate dates, please include one line per retirement date. Likewise if RECs of different vintages (e.g. June 2013 and July 2013) are retired on the same date, please include one line per vintage.

## Annual RPS Compliance Report: (2013) 36 Month Retirement

Data Reported by:

Southern California Edison Company (U 338-E)

July 31, 2014

Input Required

Information is Hard Coded (No Input Required)

Note: Please create one line per combination of REC vintage and REC retirement date. For example RECs that have the same vintage are retired on two separate dates, please include one line per retirement date. Likewise if RECs of different vintages (e.g. June 2013 and July 2013) are retired on the same date, please include one line per vintage.

# **OFFICER VERIFICATION FORM**

I am an officer of the reporting corporation herein, and am authorized to make this verification on its behalf. The statements in the foregoing document are true of my own knowledge, except as to matters which are therein stated on information or belief, and as to those matters I believe them to be true. The spreadsheet format used to file this compliance report has not been altered from the version issued or approved by Energy Division.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on July 23, 2014 at Rosemead, California.

  
\_\_\_\_\_  
Stuart R. Hemphill, Senior Vice President, Southern California Edison

- Forecast of deliveries by portfolio content categories is for executed contracts only; does not include program generics

## **Appendix D**

### **Confidentiality Declarations**

**DECLARATION OF ALEXANDER CABRERA REGARDING THE  
CONFIDENTIALITY OF CERTAIN DATA**

I, Alexander Cabrera, declare and state:

1. I am a Project Manager in the Power Supply, Market Regulation and Cost Recovery department at Southern California Edison Company ("SCE"). As such, I have reviewed the data in SCE's 2013 Preliminary Annual 33% Renewables Portfolio Standard ("RPS") Compliance Report, Appendix B, Permitting and Siting Status Table (the "Protected Materials"). I make this declaration in accordance with California Public Utilities Commission ("Commission" or "CPUC") Decisions ("D.") 06-06-066 and D.08-04-023, issued in Rulemaking ("R.") 05-06-040. I have personal knowledge of the facts and representations herein and, if called upon to testify, could and would do so, except for those facts expressly stated to be based upon information and belief, and as to those matters, I believe them to be true.

2. Listed below are the data in the Protected Materials for which SCE is seeking confidential treatment. SCE is seeking confidential treatment of certain data that is market-sensitive, but may not fall into a category on the Matrix of Allowed Confidential Treatment Investor Owned Utility ("IOU") Data ("Matrix") appended to D.06-06-066.

3. The Permitting and Siting Status Table: the following columns contain confidential, market-sensitive information, as applicable: "Site Control Status" (Column F), "Permit Status" (Column H), and "Expected or Actual permitting completion date" (Column I). For the reasons discussed below, this information is confidential and market-sensitive and should not be disclosed to the public.

4. The information identified in paragraph 3 is confidential because it relates to the terms and conditions of the individual contracts entered into between SCE and the respective generators. Contractual information is protected under the Matrix under "Section VII. Bilateral

Contract Terms and Conditions – Electric (G) Renewable Resource Contracts under RPS program – Contracts without SEPs.” More specifically, Section VII.G provides that contract information shall be confidential for three years after first delivery or one year following expiration. SCE is seeking confidential treatment for contracts that have not been delivering for three years; thus, the information is protected. Additionally, the Commission also concluded that project-specific project viability information should remain confidential in D.09-06-018.

5. Information identified in paragraph 3 is also protected under Public Utilities Code Section 454.5(g) and General Order 66-C.

6. Public Utilities Code Section 454.5(g) requires the Commission to maintain the confidentiality of “market sensitive information.” It provides: “The commission shall adopt appropriate procedures to ensure the confidentiality of any market sensitive information submitted in an electrical corporation’s proposed procurement plan or resulting from or related to its approved procurement plan, including, but not limited to, proposed or executed power purchase agreements, data request responses, or consultant reports, or any combination, provided that the Office of Ratepayer Advocates and other consumer groups that are nonmarket participants shall be provided access to this information under confidentiality procedures authorized by the commission.”

7. General Order 66-C requires the Commission to protect confidential information that would place a utility at an “unfair business disadvantage” if it were publicly disclosed. It categorizes as information that is “not open to public inspection,” those “[r]eports, records, and information requested or required by the Commission which, if revealed, would place the regulated company at an unfair business disadvantage.” General Order 66-C, § 2.2(b).

8. The information identified in paragraph 3 is considered market sensitive and would place SCE at an unfair business disadvantage for several reasons.

9. Public disclosure of SCE's judgment that a particular project is failing to meet milestones or otherwise struggling may impair the project developer's ability to secure financing, attract investors, or raise capital. Obviously, a project's failure to gain funding of any type could result in the project failing. The Commission should be as concerned about the effect on the project developer of releasing SCE's assessment of the projects overall viability as it is about the effect on SCE and its customers. Disclosure of this type of information in the hope of providing greater public access to RPS data may actually have the opposite of the presumably desired effect by causing or contributing to project failure.

10. SCE maintains the confidentiality of this information not only from the public at large, but from its counterparties as well. If this information were to be released and result in the failure of a contract based on an inability to acquire financing because of publicly released negative information from SCE, then SCE could be exposed to potential litigation from developers for the release of such information.

11. SCE could be damaged by the long-term effect of the loss of trust between SCE and prospective renewable generators that would be engendered by such a disclosure. This "loss of trust" would create a competitive disadvantage for SCE in its procurement efforts on behalf of its customers.

12. Disclosure of the status of an RPS project would also hinder SCE's contract administration of all of its yet to be completed RPS projects. By revealing that certain milestones have not been reached or revealing that delays have occurred, a "floor" is created as to what SCE is willing to allow a future developer to do during the development of a project.

This “floor” will disadvantage SCE in the development of RPS projects by allowing such parties to exploit concessions that SCE provided under unique circumstances even though such concessions would not be appropriate in a different context or under different facts. Simply stated, publically revealing this information may impair SCE’s ability to actively manage milestones and administer contracts for projects in development, a result that would appear to be directly contrary to the desire of policy makers to bring as much renewable power on-line as soon as possible.

13. I am informed and believe and thereon allege that the information identified in paragraph 3 cannot be aggregated, redacted, summarized, masked or otherwise protected in a manner that would allow partial disclosure of the data while still protecting confidential information.

14. I am informed and believe and thereon allege that the information identified in paragraph 3 has never been made publically available.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed on July 29, 2014 at Rosemead, California.

A handwritten signature in black ink, appearing to read 'AC', is written above a horizontal line.

**DECLARATION OF ERIC LAVIK REGARDING THE CONFIDENTIALITY OF  
CERTAIN DATA**

I, Eric Lavik, declare and state:

1. I am the Principal Manager of Portfolio Reporting at Southern California Edison Company ("SCE"). As such, I have reviewed the data in SCE's 2013 Preliminary Annual 33% Renewables Portfolio Standard ("RPS") Compliance Report, Appendix A, RPS Compliance Report spreadsheet ("RPS Compliance Spreadsheet") and Appendices C.1-C.4, Renewable Net Short Calculations (collectively, the "Protected Materials"). I make this declaration in accordance with California Public Utilities Commission ("Commission" or "CPUC") Decisions ("D.") 06-06-066 and D.08-04-023, issued in Rulemaking ("R.") 05-06-040. I have personal knowledge of the facts and representations herein and, if called upon to testify, could and would do so, except for those facts expressly stated to be based upon information and belief, and as to those matters, I believe them to be true.

2. Listed below are the data in the Protected Materials for which SCE is seeking confidential treatment and the categories on the Matrix of Allowed Confidential Treatment Investor Owned Utility ("IOU") Data ("Matrix") appended to D.06-06-066 to which these data correspond.

<b>Data</b>	<b>Spreadsheet/Tab and Cell Reference</b>	<b>Matrix Category</b>	<b>Period of Confidentiality</b>
Forecast of bundled customer energy retail sales and information that calculates back to this forecast	<b>RPS Compliance Spreadsheet (Appendix A): 33% RPS Progress Summary tab:</b>  "Retail Sales (MWh)" (Cells F:10-I:10)  "Annual RPS Target" (Cells F:12-I:12)	V.C LSE Total Energy Forecast – Bundled Customer (MWh)	Front three years of forecast data confidential.

	<p>“Procurement Quantity Requirement” (Cells F:13-L:13)</p> <p><b>RPS Compliance Spreadsheet (Appendix A): Accounting tab:</b></p> <p>“Annual Retail Sales” (Cells F:18-I:18)</p> <p>“Annual RPS Procurement Percentage” (Cells F:21-I:21)</p> <p>“Procurement Quantity Requirement (PQR)” (Cells F:26-L:26)</p>		
Forecast of bundled customer energy retail sales and information that calculates back to this forecast	<p><b>Physical Renewable Net Short Calculations Based on CPUC Assumptions (Appendix C.1):</b></p> <p>“Bundled Retail Sales Forecast (LTPP)” (Cells K:6-O:6, S:6)</p> <p>“Gross RPS Procurement Quantity Requirement (GWh)” (Cells K:8-O:8, S:8)</p> <p>“Net RPS Procurement Need (GWh)” (Cells K:10-O:10, S:10)</p> <p>“Annual Gross RPS Position (GWh)” (Cells K:24-O:24, S:24)</p> <p>“Annual Gross RPS Position (%)” (Cells K:25-O:25, S:25)</p> <p>“Existing Banked RECs above the PQR”</p>	V.C LSE Total Energy Forecast – Bundled Customer (MWh)	Front three years of forecast data confidential.

	(Cells K:36-O:36, S:36)  “Annual Net RPS Position After Bank Optimization (GWh)” (Cells K:40-O:40, S:40)  “Annual Net RPS Position After Bank Optimization (%)” (Cells K:41-O:41, S:41)  <b>All of Optimized          Renewable Net Short          Calculations Based on          CPUC Assumptions          (Appendix C.3)</b>  <b>All of Optimized          Renewable Net Short          Calculations Based on          SCE Assumptions          (Appendix C.4)</b>		
--	--	--	--

3. In addition to the confidential information included in both the Physical and Optimized Renewable Net Short Calculations identified in the table above, the Application of Bank and Net RPS Position (Optimized Net Short) sections of the Optimized Renewable Net Short Calculations (Appendices C.3 and C.4) should be confidential for all years because they show SCE’s portfolio optimization strategy for utilizing renewable energy credits (“RECs”) above the procurement quantity requirement (“PQR”). This is consistent with the Commission’s Revised Energy Division Staff Methodology for Calculating the Renewable Net Short (“RNS”), which states that “[t]he optimized RNS will be confidential and include a retail seller’s assumptions for its overall portfolio strategy including any plans to sell forecast RECs above the PQR, apply forecast RECs above the PQR towards a future RPS compliance requirement, or procure more RECs above the PQR in future years.” This detailed information on SCE’s portfolio optimization strategy for utilizing RECs above the PQR is also market sensitive

information that would put SCE at an unfair business disadvantage if it were publicly disclosed. Accordingly, it is protected under Public Utilities Code Section 454.5(g) and General Order 66-C. All public information in Appendices C.3 and C.4 is publicly disclosed in the Physical Renewable Net Short Calculations in Appendices C.1 and C.2.

4. This information has not been made public, and cannot be aggregated, redacted, summarized, masked or otherwise protected in a way that allows partial disclosure.

5. I am informed and believe and thereon allege that SCE is complying with the limitations on confidentiality specified in the Matrix that pertain to the data listed in the table above.

6. I am informed and believe and thereon allege that the data in the table above cannot be aggregated, redacted, summarized, masked or otherwise protected in a manner that would allow partial disclosure of the data while still protecting confidential information.

7. Additionally, SCE is seeking confidential treatment of certain data that is market-sensitive, but may not fall into a category on the Matrix.

8. In the RPS Compliance Spreadsheet: Procurement Detail tab, the “Facility Status” column (Column Z) contains confidential, market-sensitive information as applicable. Specifically, this column requires SCE to indicate the status (e.g., “on schedule” or “delayed”) for RPS contracts that are not currently on-line or terminated. For the reasons discussed below, this information is confidential and market-sensitive and should not be disclosed to the public.

9. The information identified in paragraph 8 is confidential because it relates to the terms and conditions of the individual contracts entered into between SCE and the respective generators. Contractual information is protected under the Matrix under “Section VII. Bilateral Contract Terms and Conditions – Electric (G) Renewable Resource Contracts under RPS

program – Contracts without SEPs.” More specifically, Section VII.G provides that contract information shall be confidential for three years after first delivery or one year following expiration. SCE is seeking confidential treatment for contracts that have not been delivering for three years or expired for one year; thus, the information is protected. In addition, and in accordance with the level of protection afforded under the Matrix, SCE has not redacted the individual contract summaries, which include counterparty name, resource type, location, capacity, and length of contract. Finally, the Commission also concluded that project-specific project viability information should remain confidential in D.09-06-018.

10. Information identified in paragraph 8 is also protected under Public Utilities Code Section 454.5(g) and General Order 66-C.

11. Public Utilities Code Section 454.5(g) requires the Commission to maintain the confidentiality of “market sensitive information.” It provides: “The commission shall adopt appropriate procedures to ensure the confidentiality of any market sensitive information submitted in an electrical corporation’s proposed procurement plan or resulting from or related to its approved procurement plan, including, but not limited to, proposed or executed power purchase agreements, data request responses, or consultant reports, or any combination, provided that the Office of Ratepayer Advocates and other consumer groups that are nonmarket participants shall be provided access to this information under confidentiality procedures authorized by the commission.”

12. General Order 66-C requires the Commission to protect confidential information that would place a utility at an “unfair business disadvantage” if it were publicly disclosed. It categorizes as information that is “not open to public inspection,” those “[r]eports, records, and

information requested or required by the Commission which, if revealed, would place the regulated company at an unfair business disadvantage.” General Order 66-C, § 2.2(b).

13. The information identified in paragraph 8 is considered market sensitive and would place SCE at an unfair business disadvantage for several reasons.

14. Public disclosure of SCE’s judgment that a particular project is failing to meet milestones or otherwise struggling may impair the project developer’s ability to secure financing, attract investors, or raise capital. Obviously, a project’s failure to gain funding of any type could result in the project failing. The Commission should be as concerned about the effect on the project developer of releasing SCE’s assessment of the projects overall viability as it is about the effect on SCE and its customers. Disclosure of this type of information in the hope of providing greater public access to RPS data may actually have the opposite of the presumably desired effect by causing or contributing to project failure.

15. SCE maintains the confidentiality of this information not only from the public at large, but from its counterparties as well. If this information were to be released and result in the failure of a contract based on an inability to acquire financing because of publicly released negative information from SCE, then SCE could be exposed to potential litigation from developers for the release of such information.

16. SCE could be damaged by the long-term effect of the loss of trust between SCE and prospective renewable generators that would be engendered by such a disclosure. This “loss of trust” would create a competitive disadvantage for SCE in its procurement efforts on behalf of its customers.

17. Disclosure of the status of an RPS project would also hinder SCE’s contract administration of all of its yet to be completed RPS projects. By revealing that certain

milestones have not been reached or revealing that delays have occurred, a "floor" is created as to what SCE is willing to allow a future developer to do during the development of a project. This "floor" will disadvantage SCE in the development of RPS projects by allowing such parties to exploit concessions that SCE provided under unique circumstances even though such concessions would not be appropriate in a different context or under different facts. Simply stated, publically revealing this information may impair SCE's ability to actively manage milestones and administer contracts for projects in development, a result that would appear to be directly contrary to the desire of policy makers to bring as much renewable power on-line as soon as possible.

18. I am informed and believe and thereon allege that the information identified in paragraph 8 cannot be aggregated, redacted, summarized, masked or otherwise protected in a manner that would allow partial disclosure of the data while still protecting confidential information.

19. I am informed and believe and thereon allege that the information identified in paragraph 8 has never been made publically available.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed on July 29, 2014 at Rosemead, California.
