1. The status of any necessary siting and permitting approvals from federal, state, and local agencies for those eligible renewable energy resources procured by the retail seller that have not yet attained their commercial on-line dates.

Liberty Power had no procurement for 2014 from any eligible renewable energy resources located outside California and within the WECC.

3. Identification of all procurement of unbundled renewable energy credits (RECs) during the period covered by the report.

Response:

4. Recommendations to remove impediments to making progress toward achieving the renewable energy resources procurement requirements established by statute and implemented by Commission decision.

Response:

Any efforts by the Commission to coordinate with the California Energy Commission and the Western Renewable Energy Generation Information System (“WREGIS”) to facilitate tracking, availability, and verification of data needed to substantiate renewable procurement eligibility as well as the portfolio content category of procurement will help reduce the administrative burden faced by retail sellers to compile such data in RPS compliance reports.
