6. The data for which DEB requests confidentiality and thereby protection from public disclosure are of the types and correspond to the category (or categories) in the ESP Matrix specified below:

7. The data for which DEB is claiming confidentiality is not already public.
8. The confidentiality of the data for which DEB is claiming confidentiality would not be compromised if it were first aggregated with the equivalent data of all other load serving entities before being made public. Other than by the aforesaid process, the data cannot be aggregated, redacted, summarized, masked or otherwise protected in a way that allows partial disclosure.
9. DEB's customers may be harmed by the loss of confidentiality insofar as members of the public not eligible to review the data as non-market participating parties—primarily other market participants such as other ESPs or wholesale suppliers or RPS supplies—can use this data to derive DEB-specific RPS procurement requirements (net short) and DEB's current compliance position, particularly in light of the relative scarcity of such resources eligible for the product content category one resources.

Declared under penalty of perjury that the aforesaid is true of my own knowledge, except as to matters that are stated on information or belief and as to those matters I believe them to be true.

Dated: September 4, 2015
