3. Identification of all procurement of unbundled renewable energy credits (RECs) during the period covered by the report.

Response:

PacifiCorp executed a contract on December 4, 2015, for the following unbundled RECs:

<b>Table 2</b>			
<b>REC Vintage Period</b>	<b>Contract Quantity (RECs)</b>	<b>Resource</b>	<b>Status</b>
October 1, 2013 to December 31, 2015 <sup>1</sup>	53,025	Biomass One, LP	Delivered; retired for 2015 RPS
October 1, 2014 to December 31, 2016	28,367	TBD; California Eligible Resource	Delivery on or before April 15, 2017

4. Recommendations to remove impediments to making progress toward achieving the renewable energy resources procurement requirements established by statute and implemented by Commission decision.

Response:

PacifiCorp currently has no specific recommendations to remove impediments to making progress toward achieving the renewable energy resources procurement requirements. The Company looks forward to continuing to work with the Commission on the implementation of Senate Bill 350, particularly as it relates to procurement under the state's increased renewables portfolio standard.

---

<sup>1</sup> Actual delivery was of 2015 vintage RECs.

### **III. Additional Narrative Reporting Requirements – Transmission Planning**

Each retail seller that is also an electrical corporation must, in addition to the four items set forth above, include the following narrative information in each annual compliance report and in the final report for each compliance period:

1. The current status and progress made during the prior year toward construction of, and upgrades to, transmission and distribution facilities and other electrical system components owned by that electrical corporation to interconnect eligible renewable energy resources and to supply the electricity generated by those resources to load. The narrative must specifically include, but is not limited to, the status of planning, siting, and permitting of transmission facilities by federal, state, and local agencies.

Response:

The Company is a member of the Northern Tier Transmission Group (NTTG), the planning entity through which the Company demonstrates compliance with the regional planning requirements of Federal Energy Regulatory Commission (FERC) Order No. 890. NTTG is currently working on the 2016-2017 Biennial Transmission Plan that provides a regional perspective on the incremental transmission required to efficiently meet the growing load and resource needs of the region. The report is based on a roll-up of each NTTG transmission provider's local transmission plan, and generation assumptions including resources necessary to meet all applicable state renewable portfolio standards (RPS), including California's renewables portfolio standard. Associated with this is the ongoing regional and interregional development of the Order No. 1000 Attachment K Open Access Transmission Tariff (OATT) filings.

PacifiCorp filed its regional compliance filing with the FERC on October 10, 2012 (Regional Filing) and the interregional compliance filing on May 10, 2013 (Interregional Filing) that outlines interregional coordination of transmission plans and cost allocation. On May 17, 2013 the FERC issued an order partially approving PacifiCorp's Regional Filing and requiring further modification of Attachment K of its OATT within sixty days of the issuance of the order. On September 16, 2013, PacifiCorp submitted the regional compliance filing including the required modifications. On April 17, 2014, the FERC issued an order accepting the OATT revisions in part and requiring further modification and a compliance filing due within sixty days of the issuance of the order. On June 13, 2014 PacifiCorp submitted the compliance filing addressing the April 17, 2014 order. On March 24, 2015, the FERC issued an order accepting the Regional Filing.

On December 18, 2014, FERC issued an order approving PacifiCorp's Interregional Filing with required modifications as requested by FERC to specifically align with changes FERC ordered as part of its review of the California Independent System Operator's interregional filing with a compliance filing due sixty days after the issuance of the order. On February 17,

2015 PacifiCorp submitted the Interregional compliance filing addressing the December 18, 2014 order. On June 1, 2015, FERC issued an order accepting the Interregional Filing.

PacifiCorp's Energy Gateway transmission projects, considered in the Company's 2015 IRP, in NTTG's regional transmission plan and in the Western Electricity Coordinating Council's (WECC) 2024 long-term ten-year transmission plan, play an important role in the Company's commitment to provide safe, reliable, reasonably priced electricity to meet the needs of customers. Energy Gateway's design and extensive footprint provides needed system reliability improvements and supports the development of a diverse range of cost-effective resources required for meeting customers' energy needs, including needs driven by California and other states' RPS requirements.

The first major segment of Energy Gateway – Populus to Terminal – was placed into service in November 2010, the second major segment – Mona to Oquirrh – was placed into service in May 2013, and the third major segment – Sigurd to Red Butte – was placed into service in May 2015. Outreach, siting and permitting processes continue for additional transmission segments, including Gateway West and Gateway South. Under the National Environmental Policy Act, the Bureau of Land Management (BLM) has completed the Environmental Impact Statement (EIS) for the Gateway West project. On April 26, 2013, the Bureau of Land Management published the Final Environmental Impact Statement for the Gateway West project in the Federal Register and a record of decision was issued November 2013 for eight of the ten segments. A record of decision on the remaining two segments across Idaho is anticipated in late 2016. On May 13, 2016, the BLM published the final Environmental Impact Statement for Gateway South with a Record of Decision scheduled for November 2016. The Energy Gateway projects are necessary to reliably move network resources to network loads. For additional background, detail, status and schedule information on the Energy Gateway expansion plan, see Chapters 4 and 9 of PacifiCorp's 2015 IRP Update.<sup>2</sup>

---

<sup>2</sup> The 2015 IRP Update was filed with the Company's 2016 Off-Year IRP Supplement on July 15, 2016 and can also be accessed at PacifiCorp's website at <http://www.pacificorp.com/es/irp.html>.
