4. Recommendations to remove impediments to making progress toward achieving the renewable energy resources procurement requirements established by statute and implemented by Commission decision:

Regulatory uncertainty adds to the difficulty in achieving the goals. In particular, frequent changes in law and regulations leads to more regulatory uncertainty and a reluctance to engage in procurement any earlier than absolutely necessary and in amounts any greater than absolutely necessary. Despite warnings on regulatory uncertainty being raised many times in many different proceedings before the CPUC, the message never seems to be understood. As a result, California is synonymous with regulatory uncertainty.
