_____, Seller shall be paid for After 1 energy delivered at prices equal to PGandE's full 2 short-run avoided operating costs. 3 4 ARTICLE 5 CAPACITY ELECTION AND CAPACITY PRICE 56 Seller may elect to deliver either firm capacity or 7 as-delivered capacity, and Seller's election is indicated 8 below. PGandE's prices for firm capacity and as-delivered 9 capacity are derived from PGandE's full avoided costs as 10 approved by the <u>CPUC</u>. 11 12 Firm capacity - _____ kW for ____ years from the 13 firm capacity availability date with payment determined 14 in accordance with Appendix E. Except for hydro-15 electric facilities, PGandE shall pay Seller for 16capacity delivered in excess of firm capacity on an 17 in accordance with basis capacity as-delivered 18 As-Delivered Capacity Payment Option _____ set forth 19 in Appendix D. 2021 OR 2223As-delivered capacity with payment determined in Х 24 accordance with As-Delivered Capacity Payment Option 2 25set forth in Appendix D. 26 2728s.o. #4 10 May 7, 1984

| 1 | ARTICLE 6 LOSS ADJUSTMENT FACTORS |
|----|---|
| 2 | |
| 3 | Capacity Loss Adjustment Factors shall be as shown in |
| 4 | Appendix D and Appendix E, dependent upon Seller's capacity |
| 5 | election set forth in Article 5 of this Agreement. |
| 6 | |
| 7 | Energy Loss Adjustment Factors shall be considered as |
| 8 | unity for all energy payments related to Energy Payment |
| 9 | Options 1 and 2 set forth in Appendix B for the entire <u>fixed</u> |
| 10 | price period of this Agreement, except for the percentage of |
| 11 | payments that Seller elected in Article 4 to have calculated |
| 12 | based on PGandE's full short-run avoided operating costs. |
| 13 | Energy Loss Adjustment Factors for all payments related to |
| 14 | PGandE's full short-run avoided operating costs are subject |
| 15 | to <u>CPUC</u> rulings for the entire <u>term</u> of <u>agreement</u> . |
| 16 | |
| 17 | ARTICLE 7 CURTAILMENT |
| 18 | |
| 19 | Seller has two options regarding possible curtailment |
| 20 | by PGandE of Seller's deliveries, and Seller's selection is |
| 21 | indicated below: |
| 22 | X Curtailment Option A - Hydro Spill and Negative Avoided |
| 23 | Cost |
| 24 | Curtailment Option B - Adjusted Price Period |
| 25 | |
| 26 | The two options are described in Appendix C. |
| 27 | |
| 28 | |

APPENDIX A GENERAL TERMS AND CONDITIONS 1 2 3 4 DEFINITIONS A-1 5 Whenever used in this Agreement, appendices, and 6 attachments hereto, the following terms shall have the 7 8 following meanings: 9 Adjusted firm capacity price - The \$/kW-year purchase 10 price for firm capacity from Table E-2, Appendix E for the 11 period of Seller's actual performance. 12 13 As-delivered capacity - Capacity delivered to PGandE 14 in excess of firm capacity or in lieu of a firm capacity 15 16 commitment. 17 CPUC - The Public Utilities Commission of the State 18 19 of California. 20 Current firm capacity price - The \$/kW-year capacity 21 price from PGandE's firm capacity price schedule effective **2**2 at the time PGandE derates the firm capacity pursuant to **2**3 Section E-4(b), Appendix E or Seller terminates performance 24 under this Agreement, for a term equal to the period from • 25 **2**6 27 s.o. #4 May 7, 1984 28 A-2

the date of deration or termination to the end of the term of agreement. 2 Designated PGandE switching center - That switching 3 identified in installation 4 PGandE other center OI 5 Article 10. 6 Facility - That generation apparatus described in 7 Article 3 and all associated equipment owned, maintained, 8 9 and operated by Seller. 10 Firm capacity - That capacity, if any, identified as 11 firm in Article 5 except as otherwise changed as provided 12 13 herein. 14 Firm capacity availability date - The day following 15 the day during which all features and equipment of the 16 Facility are demonstrated to PGandE's satisfaction to be 17 capable of operating simultaneously to deliver firm capacity 18 continuously into PGandE's system as provided in this 19 **2**0 Agreement. 21 Firm capacity price - The price for firm capacity **2**2 applicable for the firm capacity availability date and the **2**3 number of years of firm capacity delivery from the firm 24 5 capacity price schedule, Table E-2, Appendix E. **2**5 **2**6 27 s.o. #4 May 7, 1984 28 A-3

1

<u>Firm capacity price schedule</u> - The periodically published schedule of the \$/kw-year prices that PGandE offers to pay for <u>firm capacity</u>. See Table E-2, Appendix E.

<u>Fixed price period</u> - The period during which forecasted or levelized energy prices, and/or forecasted <u>as-delivered capacity</u> prices, are in effect; defined as the first five years of the <u>term of agreement</u> if the <u>term of</u> <u>agreement</u> is 15 or 16 years; the first six years of the <u>term</u> <u>of agreement</u> if the <u>term of agreement</u> is 17, 18, or 19 years; or the first ten years of the <u>term of agreement</u> if the <u>term of agreement</u> is anywhere from 20 through 30 years.

<u>Forced outage</u> - Any outage resulting from a design defect, inadequate construction, operator error or a breakdown of the mechanical or electrical equipment that fully or partially curtails the electrical output of the

18 Facility.

costs operating avoided 19 CPUC-approved costs which are the basis of PGandE's **2**0 published energy prices. PGandE's current energy price 21 calculation is shown in Table B-5, Appendix B. PGandE's **2**2 published off-peak hours' prices shall be adjusted, as **2**3 appropriate, if Seller has selected Curtailment Option B. 24 25 **2**6

A-4

S.O. #4 May 7, 1984

Interconnection facilities - All means required and apparatus installed to interconnect and deliver power from the Facility to the PGandE system including, but not limited transformation, switching, connection, metering, to, communications, and safety equipment, such as equipment required to protect (1) the PGandE system and its customers from faults occurring at the Facility, and (2) the Facility from faults occurring on the PGandE system or on the systems of others to which the PGandE system is directly or indirectly connected. Interconnection facilities also include any necessary additions and reinforcements by PGandE to the PGandE system required as result of the a interconnection of the Facility to the PGandE system.

A-9

(d) Upon the request of Seller, PGandE shall provide a binding estimate for the installation of interconnection 1 2 facilities by PGandE. 3 4 Meter Installation A-2.3 5 install, own, PGandE shall specify, provide, 6 operate, and maintain as <u>special facilities</u> all metering and 7 data processing equipment for the registration and recording 8 of energy and other related parameters which are required 9 for the reporting of data to PGandE and for computing the 10 11 payment due Seller from PGandE. 12 Seller shall provide, construct, install, own, 13 and maintain at Seller's expense all that is required to 14 accommodate the metering and data processing equipment, such 15 as, but not limited to, metal-clad switchgear, switchboards, 16 metering panels, enclosures, conduits, rack 17 cubicles, structures, and equipment mounting pads. 18 19 (c) PGandE shall permit meters to be fixed on 20 If meters are placed on 21 PGandE's side of the transformer. PGandE's side of the transformer, service will be provided **2**2 at the available primary voltage and no transformer loss **2**3 adjustment will be made. If Seller chooses to have meters 24 placed on Seller's side of the transformer, an estimated **2**5 transformer loss adjustment factor of 2 percent, unless the **2**6 Parties agree otherwise, will be applied. 27 s.0. #4 28 May 7, 1984 A-10

OPERATION A-3

1

2

3

4

5

16

17

28

Inspection and Approval A-3.1

Seller shall not operate the Facility in parallel PGandE authorized until an system PGandE's with 6 representative has inspected the interconnection facilities, 7 and PGandE has given written approval to begin parallel 8 Seller shall notify PGandE of the Facility's operation. 9 start-up date at least 45 days prior to such date. PGandE shall inspect the interconnection facilities within 30 days 10 of the receipt of such notice. If parallel operation is not 11 authorized by PGandE, PGandE shall notify Seller in writing 12 13 reason the inspection of after days five within 14 authorization for parallel operation was withheld. 15

Facility Operation and Maintenance A-3.2

18 and maintain its Facility operate shall Seller according to prudent electrical practices, applicable laws, 19 orders, rules, and tariffs and shall provide such reactive **2**0 power support as may be reasonably required by PGandE to 21 **2**2 maintain system voltage level and power factor. Seller shall operate the Facility at the power factors or voltage **2**3 levels prescribed by PGandE's system dispatcher or desig-24 nated representative. If Seller fails to provide reactive **2**5 26 power support, PGandE may do so at Seller's expense. 27

s.o. #4 A-11 May 7, 1984

Point of Delivery A-3.3 1 Seller shall deliver the energy at the point where 2 Seller's electrical conductors (or those of Seller's agent) 3 contact PGandE's system as it shall exist whenever the 4 deliveries are being made or at such other point or points 5 as the Parties may agree in writing. The initial point of 6 delivery of Seller's power to the PGandE system is set forth 7 8 in Appendix F. 9 A-3.4 Operating Communications 10 11 (a) Seller shall maintain operating communications 12 with the <u>designated</u> <u>PGandE</u> <u>switching</u> <u>center</u>. The operatin 13 communications shall include, but not be limited to, syste 14 or separation, scheduled 15 shutdowns, equipment clearances, levels of operating voltage paralleling 16 or power factors and daily capacity and generation report 17 18 Seller shall keep a daily operations log f 19 each generating unit which shall include information on un **2**0 availability, maintenance outages, circuit breaker t 21 operations requiring a manual reset, and any signific **2**2 events related to the operation of the Facility. **2**3 24 than (c) If Seller makes deliveries greater **2**5 megawatt, Seller shall measure and register on a gra **2**6 recording device power in kW and voltage in kV at a loca 27 May 7, 1984 A-12 28

within the Facility agreed to by both Parties.

1

2

3

4

5

6

7

9

22

24

(d) If Seller makes deliveries greater than one and up to and including ten megawatts, Seller shall report to the <u>designated PGandE</u> <u>switching center</u>, twice a day at agreed upon times for the current day's operation, the hourly readings in kW of capacity delivered and the energy in kWh delivered since the last report.

If Seller makes deliveries of greater than ten (e) 10 megawatts, Seller shall telemeter the delivered capacity and 11 energy information, including real power in kW, reactive 12 power in kVAR, and energy in kWh to a switching center 13 PGandE may also require Seller to selected by PGandE. 14 telemeter transmission kW, kVAR, and kV data depending on 15 the number of generators and transmission configuration. 16 Seller shall provide and maintain the data circuits required 17 for telemetering. When telemetering is inoperative, Seller 18 shall report daily the capacity delivered each hour and the 19 energy delivered each day to the designated PGandE switching **2**0 center. 21

23 A-3.5 Meter Testing and Inspection

(a) All meters used to provide data for the
computation of the payments due Seller from PGandE shall be
sealed, and the seals shall be broken only by PGandE when
the meters are to be inspected, tested, or adjusted.

A-13 S.O. #4 May 7, 1984

(b) PGandE shall inspect and test all meters upon At Seller's 1 their installation and annually thereafter. request and expense, PGandE shall inspect or test a meter 2 PGandE shall give reasonable notice to 3 more frequently. Seller of the time when any inspection or test shall take 4 place, and Seller may have representatives present at the 5 test or inspection. If a meter is found to be inaccurate or 6 defective, PGandE shall adjust, repair, or replace it at its 7 8 expense in order to provide accurate metering. 9 10 Adjustments to Meter Measurements A-3.6 11 If a meter fails to register, or if the measurement 12 made by a meter during a test varies by more than two 13 percent from the measurement made by the standard meter used 14 in the test, an adjustment shall be made correcting all 15 measurements made by the inaccurate meter for -- (1) the 16 actual period during which inaccurate measurements were 17 made, if the period can be determined, or if not, (2) the 18 period immediately preceding the test of the meter equal to 19 one-half the time from the date of the last previous test of **2**0 meter, provided that the period covered by 21 the 22 correction shall not exceed six months. **2**3 24 PAYMENT A-4 **2**5 PGandE shall mail to Seller not later than 30 days **2**6 after the end of each monthly billing period (1) a statement 27 s.o. #4 28 A-14 May 7, 1984

showing the energy and capacity delivered to PGandE during on-peak, partial-peak, and off-peak periods during the monthly billing period, (2) PGandE's computation of the amount due Seller, and (3) PGandE's check in payment of said 2 Except as provided in Section A-5, if within 30 3 days of receipt of the statement Seller does not make a 4 report in writing to PGandE of an error, Seller shall be 5 deemed to have waived any error in PGandE's statement, 6 and payment, and they shall be considered 7 8 computation, 9 correct and complete. 10 ADJUSTMENTS OF PAYMENTS 11 A-5 12 payments a adjustments to required as a result of inaccurate meters, PGandE shall u 13 the corrected measurements described in Section A-3.6 14 recompute the amount due from PGandE to Seller for 15 capacity and energy delivered under this Agreement dur 16 17 the period of inaccuracy. 18 The additional payment to Seller or refund 19 PGandE shall be made within 30 days of notification of 20 21 owing Party of the amount due. 22 **2**3 ACCESS TO RECORDS AND PGande DATA 24 A-6 Each Party, after giving reasonable written not **2**5 **2**6 the other Party, shall have the right of access to all 27 May 7, 198 28

Energy Payment Option 2 - Levelized Energy Prices

1

2

3

4

Pursuant to Article 4, the energy payment calculation for Seller's energy deliveries during the fixed price period shall include the appropriate prices set forth in Table B-2 for the year in which energy deliveries begin and term of 5 agreement, multiplied by the percentage Seller has specified 6 If Seller has selected Curtailment Option B 7 in Article 4. in Article 7, the levelized off-peak hours' energy prices 8 listed in Table B-2 shall be adjusted upward by 7.7% for 9 Period A and 9.6% for Period B. The discount specified in 10 (c)(vi) below, if applicable, will be applied to the energy 11 12 payments during the fixed price period. 13 During the fixed price period, Seller shall be subject 14 to the following conditions and terms: 15 16 17 (a) Minimum Damages 18 The Parties agree that the levelized energy prices 19 which PGandE pays Seller for the energy which Seller **2**0 delivers to PGandE is based on the agreed value to 21 PGandE of Seller's energy deliveries during the entire 22 In the event PGandE does not **2**3 fixed price period. a of reason performance by 24 full such receive termination, Seller shall pay PGandE an amount based on **2**5 the difference between the net present values, at the 26 27 s.O. #4 28 May 7, 1984 B-3

time of termination, of the payments Seller would receive at the forecasted energy prices in Table B-1 and the payments Seller would receive at the levelized energy prices, for the remaining years of the <u>fixed</u> <u>price period</u>. This amount shall be calculated by assuming that Seller continued to generate for the remaining years of the <u>fixed price period</u> at a level equal to the average annual energy generation during the period of performance, and by applying the weighted annual average levelized price applicable to Seller's <u>Facility</u> and the weighted annual average forecasted energy prices in Table B-1 for the remaining years of the <u>fixed price period</u>. The following formula shall be used to make this calculation:

$$P = \sum_{n=1}^{Y} \frac{(F_n)(A)(W)}{(1.15)^n} - \sum_{n=1}^{Y} \frac{(L)(A)(W)}{(1.15)^n}$$

where:

28

P = amount due PGandE.

- Y = number of years remaining in the fixed price period.
- F_n = weighted annual average forecasted energy price in the nth year after the breach, failure to perform, or expiration of security, as shown in Table B-1 for the corresponding calendar year.

B-4

•

during adjusted price periods, or scheduled maintenance including major overhauls, and the probability that Seller's future performance will be adequate), either request payment from Seller or immediately draw on the security posted, up to the amount equal to $P \ge \frac{A-B}{A}$, where:

P and A are as defined in Section (a) above.
B = Seller's average annual energy generation during the year or series of years in which the 70% performance requirement was not met.

PGandE shall not request payment from Seller or draw on the security posted if the <u>Facility's</u> output during the last part of the <u>fixed price period</u> falls below 70% of the average annual energy generation during the first part of the <u>fixed price period</u> solely because of force majeure as defined in Section A-8, Appendix A or a lack of or limited availability of the primary energy resource of the <u>Facility</u>, if such energy resource is wind, water, or sunlight.

Section 6103(a)). 27 s.o. #4 May 7, 1984 28 B-19

1

TABLE B-5

ENERGY PRICES

Energy Prices Effective May 1 - July 31, 1985

The energy purchase price calculations which will apply to energy deliveries determined from ter readings taken during May, June, and July 1985 are as follows:

| meter readings taken au | (a) | (b) | (c) Revenue Requirement | Energy Purchase Price ⁴ |
|-------------------------------------|--|---|--|---|
| Time Period | Incremental Energy Rate ¹ (Btu/kWh) | Cost of Energy ² (\$/10 ⁶ Btu) | for Cash Working Capital ³ (\$/kWh) | $\frac{(d) = [(a) \times (b)] + (c)}{(\$/kWh)}$ |
| May 1 - July 31 (Period A) | | | | |
| Time of Delivery Basis: | 10 168 | 5.2445 | 0.00041 0.00038 | 0.06423 |
| On-Peak Partial-Peak Off-Peak | 12,168 11,369 9,429 | 5.2445 5.2445 | 0.00033 | 0.04978 0.05551 |
| Seasonal Average (Period A) | 10,515 | 5.2445 | 0.00036 | riod B are derived from |

(d)

Incremental energy rates (Btu/kWh) for Seasonal Period A and Seasonal Period B are derived from the marginal energy costs (including variable operating and maintenance expense) adopted by the CPUC in Decision No. 83-12-068 (page 339). They are based upon natural gas as the incremental 1 fuel and weighted average hydroelectric power conditions. The incremental energy rates in column (a) include the Helms Pumped Storage Facility and Diablo Canyon Unit 1. If Diablo Canyon Unit 1 does not become commercially operative May 1, the incremental energy rates in column (a) will not apply and instead the incremental energy rates, and the resulting energy prices, shown 11 apply until Diablo Canyon Unit 1 is commercially operative.

Seasonal Average

- Cost of natural gas under PGandE Gas Schedule No. G-55 effective May 1, 1985. Revenue Requirement for Cash Working Capital as prescribed by the CPUC in Decision No. 83-12-068. 2
- Energy Purchase Price = (Incremental Energy Rate x Cost of Energy) + Revenue Requirement for Cash 3 Working Capital. The energy purchase price excludes the applicable energy line loss adjustment factors. However, as ordered by Ordering Paragraph No. 12(j) of CPUC Decision No. 82-12-120, 4 this figure is currently 1.0 for transmission and primary distribution loss adjustments and is equal to marginal cost line loss adjustment factors for the secondary distribution voltage level. These factors may be changed by the CPUC in the future. The currently applicable energy loss adjustment factors are shown in Table B-6. s.o. #4

16

17

28

If Seller is selling <u>net energy output</u> to PGandE and simultaneously purchasing its electrical needs from (d) PGandE and Seller elects not to sell energy to PGandE at the 5 hydro savings price pursuant to subsection (a) or when 6 PGandE curtails deliveries of energy pursuant to subsection 7 (b), Seller shall not use such energy to meet its electrical 8 needs but shall continue to purchase all its electrical 9 If Seller is selling surplus energy 10 needs from PGandE. output to PGandE, subsections (a) or (b) shall only apply to 11 the surplus energy output being delivered to PGandE, and 12 Seller can continue to internally use that generation it has 13 14 retained for its own use. 15

CURTAILMENT OPTION B - ADJUSTED PRICE PERIOD

In each calendar year, the price which PGandE is 18 obligated to pay Seller for energy deliveries during 1,000 19 off-peak hours (as defined in Table B-4, Appendix B) may be **2**0 adjusted to a price equal to, but not in excess of, PGandE's 21 available alternative source. This adjusted price shall be 22 effective under any of the following conditions: **2**3 24 (i) when PGandE's energy source at the margin **2**5 is not a PGandE oil- or gas-fueled plant, and PGandE **2**6 27

> s.o. #4 C-3 May 7, 1984

can replace Seller's energy with energy from this source at a cost less than the price paid to Seller; 1 when PGandE would incur negative avoided 2 defined by the CPUC) due to continued 3 (ii) acceptance of energy deliveries under this Agreement; 4 costs (as 5 6 OT (iii) when PGandE is experiencing minimum system 7 8 9 operations. During any of the conditions described above 10 the 11 adjusted price may be zero. 12 13 Seller give shall PGandE possible, 14 energy any price adjustment for (b) Whenever 15 reasonable notice of deliveries and its probable duration. 16 If Seller is selling net energy output to PGandE 17 and simultaneously purchasing its electrical needs from 18 PGandE and Seller elects not to sell energy to PGandE at the 19 adjusted price, Seller shall not use such energy to meet its 20 electrical needs but shall continue to purchase all it 21 22 electrical needs from PGandE. **2**3 Seller receives notice of the probab 24 duration of the period during which the adjusted price wi **2**5 be paid, Seller may elect to perform maintenance during su **2**6 27 May 7, 1984 28

| 1 | period and so inform the PGandE employee in charge at the |
|----|--|
| 2 | designated PGandE switching center prior to the time when |
| 3 | the adjusted price period is expected to begin. If Seller |
| 4 | makes such election, the number of off-peak hours of |
| 5 | probable duration quoted in PGandE's notice to Seller shall |
| 6 | be applied to the 1,000-hour calendar year limitation set |
| 7 | forth in this section. After an election to do maintenance, |
| 8 | if Seller makes any deliveries of energy during the guoted |
| 9 | probable duration period, Seller shall be paid the adjusted |
| 10 | price quoted in its notice from PGandE without regard to any |
| 11 | subsequent changes on the PGandE system which may alter the |
| 12 | adjusted price or shorten the actual duration of the |
| 13 | 3 condition. |

APPENDIX D 1 AS-DELIVERED CAPACITY 2 D-1 AS-DELIVERED CAPACITY PAYMENT OPTIONS 3 4 Seller has two options for <u>as-delivered</u> capacity 5 payments and Seller has made its selection in Article 5. 6 7 The two options are as follows: 8 AS-DELIVERED CAPACITY PAYMENT OPTION 1 9 10 PGandE shall pay Seller for <u>as-delivered</u> <u>capacity</u> at 11 prices authorized from time to time by the CPUC. 12 as-delivered capacity prices in effect on the date of 13 execution are calculated as shown in Exhibit D-1. 14 15 AS-DELIVERED CAPACITY PAYMENT OPTION 2 16 17 the <u>as-delivered</u> the <u>fixed price</u> period, 18 capacity prices will be calculated in accordance with 19 Exhibit D-1 and the forecasted shortage costs in Table D-2. 20 21 For the remaining years of the term of agreement, 22 PGandE shall pay Seller for as-delivered capacity at the **2**3 24 **2**5 **2**6 27 s.o. #4 28 May 7, 1984 D-1

1 higher of: 2 prices authorized from time to time by the 3 (i) CPUC; 4 5 the <u>as-delivered</u> capacity prices that were 6 (ii) paid Seller in the last year of the fixed 7 price period; or 8 9 the as-delivered capacity prices in effect in 10 (iii) the first year following the end of the fixed 11 price period, provided that the annualized 12 shortage cost from which these prices are 13 derived does not exceed the annualized value 14 of a gas turbine. 15 16 D-2 AS-DELIVERED CAPACITY IN EXCESS OF FIRM CAPACITY 17 18 The amount of capacity delivered in excess of firm 19 capacity will be considered as-delivered capacity. This **2**0 as-delivered capacity is based on the total kilowatt-hours 21 delivered each month during all on-peak, partial-peak and **2**2 off-peak hours excluding any energy associated with **2**3 generation levels equal to or less than the firm capacity. 24 **2**5 Seller has the two options listed in Section D-1 for **2**6 payment for such as-delivered capacity. Seller has made its 27 selection in Article 5. 28 s.o. #4 D-2 May 7, 1984

The <u>as-delivered capacity</u> price (in **cents** per kw-hr) for power delivered by the <u>Facility</u> is the product of three factors:

(a) The shortage cost in each year the <u>Facility</u>
 is operating. Currently, this shortage cost is \$60 per
 kW-year.

(b) A-capacity loss adjustment factor which provides for the effect of the deliveries on PGandE's transmission and distribution losses based on the Seller's interconnection voltage level. The applicable capacity loss adjustment factors for non-remote¹ Facilities are presented in Table D-1(a). Capacity loss adjustment factors for remote Facilities shall be calculated individually.

(c) An allocation factor which accounts for the different values of <u>as-delivered capacity</u> in different time periods and converts dollars per kW-year to cents per kWh. The current allocation factors are presented in Table D-1(b). The time periods to which they apply are shown in Table B-4, Appendix B. The allocation factors are subject to change from time to time.

APPENDIX E 1 FIRM CAPACITY 2 3 GENERAL E-1 4 5 This Appendix E establishes conditions and prices under 6 which PGandE shall pay for firm capacity. 7 8 PGandE's obligation to pay for firm capacity shall 9 begin on the firm capacity availability date. The firm 10 capacity price shall be subject to adjustment as provided 11 for in this Appendix E. 12 13 The firm capacity prices in Table E-2 are applicable 14 for deliveries of firm capacity beginning after December 30, 15 1982. 16 17 E-2 PERFORMANCE REQUIREMENTS 18 19 receive full capacity payments, the firm (a) To **2**0 capacity shall be delivered for all of the on-peak hours' in 21 the peak months on the PGandE system, which are presently 22 the months of June, July, and August, subject to a 20 23 any month. in outages allowance for forced percent 24 Compliance with this provision shall be based on the **2**5 Facility's total on-peak deliveries for each of the peak 26 27 On-peak, partial-peak, and off-peak hours are defined in Table B-4, 1 28 Appendix B. s.o. #4 E-2 May 7, 1984

months and shall exclude any energy associated with generation levels greater than the <u>firm capacity</u>.

(b) If Seller is prevented from meeting the performance requirements because of a forced outage on the PGandE system, a PGandE curtailment of Seller's deliveries, or a condition set forth in Section A-7, Appendix A, PGandE shall continue capacity payments. <u>Firm capacity</u> payments will be calculated in the same manner used for scheduled maintenance outages.

(c) If Seller is prevented from meeting the performance requirements because of force majeure, PGandE shall continue capacity payments for ninety days from the occurrence of the force majeure. Thereafter, Seller shall be deemed to have failed to have met the performance requirements. <u>Firm capacity</u> payments will be calculated in the same manner used for scheduled maintenance outages.

the meeting from prevented Seller is If (d) performance requirements because of exteme dry year conditions, PGandE shall continue capacity payments. Extreme dry year conditions are drier than those used to establish firm capacity pursuant to Section E-8. Seller shall warrant to PGandE that the Facility is a hydroelectric facility and that such conditions are the sole cause of Seller's inability to meet its firm capacity obligations.

> S.O. #4 May 7, 1984

E-3

meeting the from prevented Seller is If (e) 1 other than those for reasons performance requirements 2 described above in Sections E-2(b), (c), or (d): 3 the reduced firm receive shall Seller (1)4 capacity payments as provided in Section E-5 for a 5 probationary period not to exceed 15 months, or as 6 otherwise agreed to by the Parties. 7 If, at the end of the probationary period (2) 8 Seller has not demonstrated that the Facility can meet 9 the performance requirements, PGandE may derate the 10 firm capacity pursuant to Section E-4(b). 11 12 SCHEDULED MAINTENANCE E-3 13 14 Outage periods for scheduled maintenance shall not 15 exceed 840 hours (35 days) in any 12-month period. This 16 allowance may be used in increments of an hour or longer on 17 Seller may basis. nonconsecutive consecutive or 18 accumulate unused maintenance hours from one 12-month period 19 to another up to a maximum of 1,080 hours (45 days). This 20 accrued time must be used consecutively and only for major 21 Seller shall provide PGandE with the following overhauls. **2**2 advance notices: 24 hours for scheduled outages less than 23 one day, one week for a scheduled outage of one day or more 24 : (except for major overhauls), and six months for a major **2**5 overhaul. Seller shall not schedule major overhauls during 26 the peak months (presently June, July and August). Seller 27 shall make reasonable efforts to schedule or reschedule 28

> S.O. #4 May 7, 1984

E-4

routine maintenance outside the peak months, and in no event shall outages for scheduled maintenance exceed 30 peak hours 1 during the peak months. Seller shall confirm in writing to 2 PGandE pursuant to Article 9, within 24 hours of the 3 original notice, all notices Seller gives personally or by 4 telephone for scheduled maintenance. 5 6 If Seller has selected Curtailment Option B, off-peak 7 hours of maintenance performed pursuant to Section (d) of 8 Curtailment Option B, Appendix C shall not be deducted from 9 Seller's scheduled maintenance allowances set forth above. 10 11 E-4 ADJUSTMENTS TO FIRM CAPACITY 12 13 Seller may increase the firm capacity with the 14 approval of PGandE and receive payment for the additional 15 the applicable capacity thereafter in accordance with 16 capacity purchase price published by PGandE at the time the 17 increase is first delivered to PGandE. 18 19 (b) Seller may reduce the firm capacity at any time 20 prior to the firm capacity availability date by giving 21 written notice thereof to PGandE. PGandE may derate the 22 firm capacity in accordance with Section E-2(e) as a result 23 of appropriate data showing Seller has failed to meet the 24 performance requirements of Section E-2. 25 26 27 S.O. #4 May 7, 1984 28 E-5

E-5 FIRM CAPACITY PAYMENTS

1

2

3

4

5

6

17

The method for calculation of <u>firm</u> <u>capacity</u> payments is shown below. As used below in this section, month refers to a calendar month.

The monthly payment for firm capacity will be the 7 product of the Period Price Factor (PPF), the Monthly 8 Delivered Capacity (MDC), the appropriate capacity loss 9 adjustment factor from Table E-1 based on the Facility's 10 interconnection voltage, and the appropriate performance 11 bonus factor, if any, from Table E-3, plus any allowable 12 payment for outages due to scheduled maintenance. The firm 13 capacity price shall be applied to meter readings taken 14 during the separate times and periods as illustrated in 15 Table B-4, Appendix B. 16

18 The PPF is determined by multiplying the <u>firm capacity</u> 19 <u>price</u> by the following Allocation Factors¹:

| 20 21 | | Allocation Factor | X Capa | Firm acity Price | = (| PPF (\$/kW-month) |
|----------------|----------------------|---|----------------|---------------------|---------|-----------------------------|
| 2 2 | Seasonal Period A | .18540 | | | | |
| 23 24 | Seasonal Period B | .01043 | | | | |
| 25 26 27 | No. PGan | e allocation factor 83-12-068. All al dE based on PGandE rmined in general | 's margi | nal capacity | cost al | location, as e the CPUC. |
| 28 | Seas | onal Periods A and | B are d E-6 | S.O. | | •• |

The MDC is determined in the following manner: 1 (1) Determine the Performance Factor (P), which is 2 defined as the lesser of 1.0 or the following quantity: 3 4 $P = \frac{A}{C \times (B-S) \times (0.8^*)}$ (≦ 1.0) 5 6 Where: 7 A = Total kilowatt-hours delivered during all on-peak 8 and partial-peak hours excluding any energy 9 associated with generation levels greater than the 10 firm capacity. 11 C = Firm capacity in kilowatts. 12 B = Total on-peak and partial-peak hours during the 13 month. 14 S = Total on-peak and partial-peak hours during the 15 month Facility is out of service on scheduled 16 maintenance. 17 18 (2) Determine the Monthly Capacity Factor (MCF), which 19 is computed using the following expression: 20 21 $MCF = P \times (1.0 - \frac{M}{D})$ **2**2 Where: **2**3 M = The number of hours during the month Facility is 24 5 out of service on scheduled maintenance. 25 D = The number of hours in the month. 26 27 0.8 reflects a 20% allowance for forced outage. ¥ 28 s.o. #4 E-7 May 7, 1984

(3) Determine the MDC by multiplying the MCF by C: 1 (kilowatts) = MCF x C MDC 2 3 The monthly payment for firm capacity is then 4 determined by multiplying the PPF by the MDC, by the 5 appropriate capacity loss adjustment factor presented from 6 Table E-1, and by the appropriate performance bonus factor, 7 if any, from Table E-3. 8 9 performance capacity loss X monthly payment bonus factor = PPF x MDC X 10 adjustment factor for firm capacity 11 Furthermore, the payment for a month in which 12 there is an outage for scheduled maintenance shall also 13 include an amount equal to the product of the average hourly 14 firm capacity payment¹ for the most recent month in the same 15 type of Seasonal Period (i.e., Seasonal Period A or Seasonal 16 Period B) during which deliveries were made times the number 17 of hours of outage for scheduled maintenance in the current 18 Firm capacity payments will continue during the month. 19 outage periods for scheduled maintenance provided that the 20 provisions of Section E-3 are met. 21 **2**2 probationary period Seller's monthly а During 23 determined by. Ъе shall capacity firm for payment 24 ٠. substituting for the firm capacity, the capacity at which **2**5 **2**6 Total monthly payment divided by the total number of hours in the 27 1 monthly billing period. 28 s.o. #4 E-8 May 7, 1984

Seller would have met the performance requirements. In the 1 event that during the probationary period Seller does not 2 meet the performance requirements at whatever firm capacity 3 was established for the previous month, Seller's monthly 4 payment for firm capacity shall be determined by 5 substituting the firm capacity at which Seller would have 6 met the performance requirements. The performance bonus 7 factor shall not be applied during probationary periods. 8 9 10 TABLE E-1 11 12 If the Facility is non-remote¹ the firm capacity loss 13 adjustment factors are as follows: 14 15 Loss Adjustment Factor Voltage Level 16 .989 Transmission 17 .991 Primary Distribution 18 .991 Secondary Distribution 19 20 If the Facility is remote the firm capacity loss adjustment 21 factor is _____ 2 22 **2**3 24 As defined by the CPUC. 1 **2**5 Determined individually. 2 **2**6 27 28 s.o. #4 E-9 May 7, 1984

| 17 | June, July, and August) in any year (span), |
| 18 | |
| 19 | (i) the firm capacity factor for each such month shall |
| 2 0 | be calculated in the following manner: |
| 21 | |
| 2 2 | FIRM CAPACITY FACTOR (%) = $\frac{F}{(N-W) \times Q} \times 100$ |
| 2 3 | |
| 24 | Where: |
| 2 5 | F = Total kilowatt-hours delivered by Seller in any |
| 2 6 | peak month during all on-peak hours excluding any |
| 27 | energy associated with generation levels greater |
| 28 | than the firm capacity. |
| 1 | E-11 S.O. #4 May 7, 1984 |
| | |

N = Total on-peak hours during the month. = Total on-peak hours during the peak month that the 2 W scheduled out of service OD is Facility 3 maintenance. 4 Q = Firm capacity in kilowatts. 5 6 (ii) the arithmetic average of the above firm capacity 7 factors shall be determined for that span, 8 9 (iii) the average of the above arithmetic average firm capacity factors for the most recent span(s), not to exceed 10 5, shall be calculated and shall become the Demonstrated 11 12 Firm Capacity Factor. 13 To calculate the performance bonus factor for a Demonstrated Firm Capacity Factor not shown in Table E-3 use 14 15 the following formula: 16 Performance Bonus Factor = Demonstrated Firm Capacity Factor (%) 17 18 19 **2**0 SECTIONS E-6 THROUGH E-10 SHALL APPLY ONLY TO HYDROELECTRIC 21 **2**2 **2**3 PROJECTS 24 E-6 DETERMINATION OF NATURAL FLOW DATA **2**5 Natural flow data shall be based on a period of record **2**6 of at least 50 years and which includes historic critically 27 28 **S.O.** #4 E-12 May 7, 1984

1

In the event Seller demonstrates that a dry periods. natural flow data base of at least 50 years would be 2 unreasonably burdensome, PGandE shall accept a shorter 3 period of record with a corresponding reduction in the 4 Seller shall averaging basis set forth in Section E-8. determine the natural flow data by month by using one of the 5 6 following methods: 7 8 Method 1 9 If stream flow records are available from a recognized 10 gauging station on the water course being developed in the 11 general vicinity of the project, Seller may use the data 12 13 from them directly. 14 15 Method 2 16 If directly applicable flow records are not available, 17 18 based on Seller may develop theoretical natural flows for the closest 19 correlation with available flow data adjacent and similar area which has a recognized gauging **2**0 station using generally accepted hydrologic estimating 21 22 methods. **2**3 24 E-7 THEORETICAL OPERATION STUDY **2**5 Based on the monthly natural flow data developed under **2**6 Section E-6 a theoretical operation study shall be prepared 27 28 **S.O.** #4 E-13 May 7, 1984

1

by Seller. Such a study shall identify the monthly capacity rating in kW and the monthly energy production in kWh for each month of each year. The study shall take into account all relevant operating constraints, limitations, and requirements including but not limited to --

 (1) Release requirements for support of fish life and any other operating constraints imposed on the project;
 (2) Operating characteristics of the proposed equipment of the <u>Facility</u> such as efficiencies, minimum and maximum operating levels, project control procedures, etc.;
 (3) The design characteristics of project facilities

such as head losses in penstocks, valves, tailwater elevation levels, etc.; and

(4) Release requirements for purposes other than power generation such as irrigation, domestic water supply, etc.

The theoretical operation study for each month shall 16 assume an even distribution of generation throughout the 17 month unless Seller can demonstrate that the Facility has 18 For the study to show water storage characteristics. 19 monthly capacity ratings, the Facility shall be capable of **2**0 operating during all on-peak hours in the peak months on the 21 PGandE system, which are presently the months of June, July, **2**2 If the project does not have this capability and August. **2**3 throughout each such month, the capacity rating in that 24 month of that year shall be set at zero for purposes of this **2**5 theoretical operation study. **2**6

S.O. #4 May 7, 1984 E-8 DETERMINATION OF AVERAGE DRY YEAR CAPACITY RATINGS

Based on the results of the theoretical operation study developed under Section E-7, the average dry year capacity rating shall be established for each month. The average dry year shall be based on the average of the five years of the lowest annual generation as shown in the theoretical annual lowest years of such Once study. operation generation are identified, the monthly capacity rating is determined for each month by averaging the capacity ratings The firm capacity shown in from each month of those years. Article 5 shall not exceed the lowest average dry year 12 monthly capacity ratings for the peak months on the PGandE 13 system, which are presently the months of June, July, and 14 15 August.

Seller shall provide the following information to 19 PGandE for its review: **2**0

A summary of the average dry year capacity ratings 21 (1)based on the theoretical operation study as provided in 22 **2**3 Table E-4:

(2) A topographic project map which shows the location 24 of all aspects of the Facility and locations of stream **2**5 gauging stations used to determine natural flow data; **2**6

(3) A discussion of all major factors relevant to 27 28 project operation;

E-15

S.O. #4 May 7, 1984

(4) A discussion of the methods and procedures used to 1 establish the natural flow data. This discussion shall be 2 in sufficient detail for PGandE to determine that the 3 methods are consistent with those outlined in Section E-6 4 and are consistent with generally accepted engineering 5 practices; and 6 (5) Upon specific written request by PGandE, Seller's 7 theoretical operation study. 8 9 E-10 ILLUSTRATIVE EXAMPLE 10 11 are flows These natural flows (1) Determine 12 developed based on historic stream gauging records and are 13 compiled by month, for a long-term period (normally at least 14 periods which dry which covers more) or years historically occurred in the 1920's and 30's and more 15 50 recently in 1976 and 77. In all but unusual situations this 16 will require application of hydrological engineering methods 17 to records that are available, primarily from the USGS 18 19 publication "Water Resources Data for California". **2**0 (2) Perform theoretical operation study - Using the 21 natural flow data compiled under (1) above a theoretical 22 operation study is prepared which determines, for each month **2**3 24 of each year, energy generation (kWh) and capacity rating . This study is performed based on the Facility's 25 (**k**W). **2**6 and operating capabilities, constraints, etc., design, should take into account all factors relevant to project 27

s.o. #4 May 7, 1984

E-16

28

operation. Generally such a study is done by computer which features, project through flows natural routes the considering additions and withdrawals from storage, spill past the project, releases for support of fish life, etc., Then the to determine flow available for generation. generation and capacity amounts are computed based on equipment performance, efficiencies, etc.

(3) Determine average dry year capacity ratings -9 After the theoretical project operation study is complete the five years in which the annual generation (kWh) would 10 have been the lowest are identified. Then for each month, 11 the capacity rating (kW) is averaged for the five years to 12 13 arrive at a monthly average capacity rating. The firm capacity is then set by the Seller based on the monthly 14 average dry year capacity ratings and the performance 15 requirements of this appendix. An example project is shown 16 17 in the attached completed Table E-4. 18

Revised Cal. P.U.C. Sheet No. 8516-E Cancelling Driginal Cal. P.U.C. Sheet No. 7693-E

BULE NO. 21 - MONUTILITY-DUNED PARALLEL GENERATION ŧ٢. This describes the minimum operation, matering and interconnection requirements for any generating sources or sources paralleled with the Utility's electric system. Such source or sources may include, but are not limited to, hydroelectric generators, mind-turbine generators, staam or gas driven turbine generators and photovoltaic systems. CENERAL The type of interconnection and voltage available at any location and the Utility's apecific interconnection requirements shall be determined by inquiry at the Utility's local office. 1. The Utility's distribution and transmission lines which are on integral part of its 2. (N) overall system are distinguished by the voltages at which they are operated. Distribution lines are operated at voltages below 60 kv and transmission lines are operated at voltages 60 ky and higher. (N) The Power Producer (Producer) shall ascertain and be responsible for compliance with 3. the requirements of all governmental authorities having jurisdiction. The Producer shall sign the Utility's written form of power purchase agreement or 4. perallel operation opnoment before connecting or operating a generating source in perallel with the Utility's system. The Producer shall be fully responsible for the costs of designing, installing, suming, operating and maintaining all interconnection facilities defined in Section 3.1. 5. The Producer shall submit to the Utility, for the Utility's review and written acceptance, equipment specifications and detailed plans for the installation of all interconnection facilities to be furnished by the Producer prior to their purchase or installation. The Utility's review and written acceptance of the Producer's equipment 6. specifications and detailed plans shall not be construed as confirming or endorsing the Producer's design or as werranting the equipment's safety, durability or reliability. The Utility shall not, by reason of such review or lack of review, be responsible for strength, details of design adequacy, or especity of equipment built pursuant to such specifications, mor shall the Utility acceptance be deemed an endorsement of any such equipment. No generating source shall be operated in perallel with the Utility's system until the interconnection facilities have been inspected by the Utility and the Utility has 7. provided written approval to the Producer. 8. Only duly authorized amplayees of the Utility are allowed to annect Producer-installed interconnection facilities to, or disconnect the same from, the Wtility's everhead or underground lines. 8, INTERCONNECTION FACILITIES GENERAL: Interconnection facilities are all means required, and apparatus installed, 1. to interconnect the Producer's generation with the Utility's system. Where the Producer desires to sell power to the Utility, interconnection facilities are also all means required, and apparatus installed, to enable the Utility to receive power deliveries from the Producer. Interconnection facilities may include, but are not limited to: connection, transformation, smitching, matering, communications, control, protective and safety equipment; and **A**. any necessary additions to and reinforcements of the Utility's system by the Utility. ٥. HETERING Ż. A Producer desiring to sell power to the Utility shall provide, install, own and maintain all facilities necessary to accommodate metering equipment specified by the Utility. Such metering equipment may include meters, telemetering (applicable where deliveries to the Utility exceed 10 MM) and other recording and memunications devices as may be required for the reporting of power delivery deta to the Utility. Except as previded for in Section 8.2.5 following, the Utility shall provide, install, own and meintain all metering equipment as special facilities in accordance with Section F. (Continu 8. **(T)** (Continued)

BULE NO. 21 -- NORITILITY-DANED PARALLEL GENERATION (Cont'd.)

HITERCONNECTION FACILITIES (continued)

UTILITY SYSTEM ADDITIONS AND REINFORCEMENTS

- Except as provided for in Section 3.5, all additions to and reinforcements of the (N) Except as provided for in Section 8.5, all additions to and relatoresonants of the Utility's system necessary to interconnect with and receive power deliveries from the Producer's generation will be provided, installed, caned and maintained by the Utility as special facilities in accordance with Section F. Such additions and reinforcements may include the installation of a Utility distribution or transmission line extension or the increase of cepacity in the Utility's existing distribution or transmission lines. The Utility shall determine whether any such additions or reinforcements shall include an increment of additional capacity for the Utility's mae in furnishing service to its centores. If an, then the ensta 8. additions or roinforcements shall include an increment of additional capacity for the Utility's use in furnishing service to its customers. If so, then the costs of providing, installing, owning and maintaining such additional capacity shall be borne by the Utility and/or its oustomers in accordance with the Utility's applicable tariffs on file with and authorized by the California Public Utilities Commission (Commission).
- b. The Producer shall advance to the Utility its estimated costs of performing a grelininary or detailed engineering study as may be reasonably required to identify any Producer related Utility system additions and reinforcements. Where identify any Producer related Utility system additions and reinforcements. Under identify any finite detailed and the initial details. such proliminary or detailed engineering study involves analysis of the Utility's transmission lines (60 kv and higher), the Utility shall complete its study within twolve calendar months of receiving all mecassary plans and specifications free the Producer.
- S. PRODUCER-INSTALLED UTILITY-OWNED LINE EXTENSIONS: The Producer may at its option provide and install on extension of the Utility's distribution or transmission lines provide and install an extension of the Utility's distribution or transmission lines where required to complete the Producer's interconnection with the Utility. Such extension shall be installed by contractors approved by the Utility and in accordance with its design and specifications. The Producer shall pay the Utility its estimated mosts of design, administration and inspection as may be reasonably required to assure such extension is installed in complete with the Utility's requirements. Upon final such extension and ecceptance by the Utility, the Producer shall transfer annership of the inspection and acceptance by the Utility, the Producer shall be sumed and maintained as line extension to the Utility where thereafter it shall be sumed and maintained as line extension do the Utility only on the Section F. This provision does not proclude the opecial facilities in accordance with Section F. This provision does not proclude the extension as part of its other Producer-sumed interconnection facilities.
- CUSIS OF PUTURE UTILITY SYSTEM ALTERATIONS: The Producer shall be responsible for the meass of only these future Utility system alterations which are directly related to the Producer's presence or necessary to maintain the Producer's interconnection in eccordance with the Utility's applicable operating, metering and equipment publication in effect when the Producer and the Utility entered into a written form of power purchase oproment. Alterations made at the Producer's expense shall specifically exclude increases of emisting line especity necessary to accumudate the other Producers or Utility exteners. Such alterations may, however, include relocation or endergrounding of the Utility's distribution or transmission lines as may be ordered by a governmental authority having juriadiction. 6. COSTS OF PUTURE UTILITY SYSTEM ALTERATIONS: The Producer shall be responsible for the
- ALLOCATION OF THE UTILITY'S EXISTING LINE CAPACITY: For two or more Producers seeking to use an existing line, a first some, first served approach shall be used. The first Producer to request an interconnection shall have the right to use the existing line and shall incur no ablightion for costs associated with future line upgrades moded to and shall incur no ablightion for costs associated with future line upgrades moded to accommodate other Producers or dustamers. The Utility's power purchase agreement action of the date by which the Producer must been monstruction. If that date 7. Accumodate other Producers or Gustomers. The Utility's power purchase agreement whall specify the date by which the Producer must begin construction. If that date passes and construction has not commenced, the Producer shall be given 30 days to percet the deficiency after receiving a reminder from the Utility that the construction start-up date has passed. If construction has not commenced after the senstruction start-up date has passed. If construction has not commenced after the senstruction start-up date has passed. If construction has not commenced after the senstruction start-up date has passed. If construction has not commenced after the senstruction start-up date has passed. If construction has not commenced after the senstruction start-up date has passed. If construction has not commenced after the senstruction start-up date has passed. If construction has not commenced after the senstruction start-up date has passed. If construction has not commenced after the to the first Producer and offer the right to interconnect on the suisting line to the senst Producer in order. If the Producers establish the right of first-in-time simultaneously, the two Producers shall share the sets of any additional line upgrade mecessary to facilitate their cumulative sapacity requirements. Costs shall be shared mecessary to facilitate their cumulative sapacity asch Producer will add to the line. Acontinue (Continued)

|----|------------------------------|--|
| ٤. | ELEC fate sent elec | TRIC SERVICE FROM THE UTILITY: If the Producer requires regular, supplemental, rruptible or standby service from the Utility, the Producer shall enter into separate ractual errangements with the Utility in accordance with the Stillty's applicable tric tariffs on file with and authorized by the Commission. |
| D. | 6P EX | ATION |
| | 1. | PREPARALLEL INSPECTION: In accordance with Section A.7, the Utility will inspect the (Producer's interconnection facilities prior to providing it with written authorization to commence parallel operation. Such inspection shall determine whether or not the Producer has installed certain control, protective and safety equipment to the Utility's specifications. Where the Producer's generation has a rated output in excess of 100 km, the Producer shall pay the Utility its estimated costs of performing the inspection. |
| | 2. | JURISDICTION OF THE UTILITY'S SYSTEM DISPATCHER: The Producer's generation while operating in perallel with the Utility's system is at all times under the jurisdiction of the Utility's system dispatcher. The system dispatcher shall mormally delegate such control to the Utility's designated writching conter. |
| | 3. | COMMULTATIONS: The Producer shall usintain telephone service from the local telephone company to the location of the Producer's generation. In the event such Incation is remote or unattended, telephone service shall be provided to the mearest building normally occupied by the Producer's generator operator. The Utility and the Producer shall maintain operating communications through the Utility's designated writching conter. |
| | 4. | EDERATOR LDC: The Producer shall at all times keep and maintain a detailed generator operations log. Such log shall include, but not be limited to, information on unit availability, maintenance outages, sincuit breaker trip operations requiring manual reset and unusual events. The Utility shall have the right to review the Producer's log. |
| | 5. | REPORTING ADNORMAL CONDITIONS: The Utility shall edvice the Producer of abnormal conditions which the Utility has reason to believe could affect the Utility's deprating conditions or procedures. The Producer shall keep the Utility similarly informed. |
| | 6. | POWER FACTOR: The Producer shall furnish reactive power as may be reasonably required by the Utility. |
| • | | The Utility reserves the right to specify that generators with power factor sentrol sepability, including synchronous generators, be capable of operating continuously at any power factor between 35 percent leading (absorbing wers) and 30 percent legging (producing wars) at any weltage level within a 5.0 percent of rated voltage. For other types of generators with ne inherent power factor sentrol capability, the Utility reserves the right to specify the installation of capacitors by the Producer to correct generator output to mear 35 percent leading power factor. The Utility may also require the installation of anitched by operating a synchronous generator of the same size between 35 percent leading on 80 percent leading more factor. Mere either the Producer or the Utility determines that it is not practical for the Producer to farmish the Utility's required level of reactive power or when the Producer to farmish the Utility's required level of sective power or when the Producer to farmish the Utility's required level of sective power or when the Producer to farmish the Utility's required level of sective power or when the Producer to farmish the Utility's required level of sective power or when the Producer to farmish the Utility's required level of sective power or when the Producer to farmish the Utility's required level of sective power or when the Producer to farmish the Utility's required level of sective power or when the Producer to farmish the Utility's required level of sective power or when the Producer to farmish the Utility's required level of sective power or when the produce to power to factor. |

BULE NO. 21 -- NONUTILITY-OWNED PARALLEL GENERATION (Cont'd.)

WITERFERENCE WITH SERVICE AND CONNERICATION FACILITIES (sentimone)

The Producer shall not operate equipment that superimposes upon the Utility's system a The Producer shall not operate equipment that superimposes upon the Utility's system a veltage or current which causes interference with the Utility's operations, service to the Utility's customers or interference to communication facilities. If the Producer causes service interference to others, the Producer must diligently pursue and take corrective action at the Producer's expense after being given notice and reasonable time to do so by the Utility. If the Producer does not take timely corrective action, or continues to operate the equipment causing the interference without restriction or limit, the Utility may, without liability, disconnect the Producer's equipment from the Utility's system until a suitable permanent solution provided by the Producer is appearational at the Producer's expense. 2.

_ . <u>_</u>__

F. SPECIAL FACILITIES

- There the Producer requests the Utility to furnish interconnection facilities or where it is necessary to make additions to or reinforcements of the Utility's system and the It is necessary to make additions to or reinforcements of the Utility's system and the Utility agrees to do so, such facilities shall be deemed to be special facilities and the costs thereof shall be borne by the Producer, including such continuing emership 1. mosts as may be apoliable.
- 2. Special facilities are (a) these facilities installed at the Producer's request which the Utility does not normally furnish under its tariff achedules, or (b) a prorata portion of existing facilities requested by the Producer, allocated for the sole use of such Producer, which would not normally be allocated for such sole use. Unless otherwise provided by the Utility's filed tariff schedules, special facilities will be installed, sumed and maintained or allocated by the Utility as an accumodation to the Producer only if acceptable for operation by the Utility and the reliability of service to the Utility's sustaners is not impaired.
- Special Facilities will be furnished under the terms and conditions of the Utility's (N) "Agreement for Installation or Allocation of Special Facilities for Parallel Operation "Agreement for installation or Allocation of Special Facilities for Parallel Operation of Nonutility-owned Generation and/or Electrical Standby Service" (Form 79-280, offective June 1984) and its Appendix A, "Detail of Special Facilities Charges" (Form 79-702, effective June 1984). Prior to the Producer signing such an agreement, the Utility shall provide the Producer with a Breakdown of special facilities costs in a form having detail sufficient for the information to be reasonably understood by the Producer. The special facilities agreement will include, but is not limited to, a binding quotation of marges to the Producer and the following general terms and conditions: 3. (#)
 - Where facilities are installed by the Utility for the Producer's use as special facilities, the Producer shall advance to the Utility its estimated installed mest of the special facilities. The amount advanced is subject to the monthly amorship charge applicable to customer-financed special facilities as set forth in Section 1 of the Utility's Bule No. 2.
 - At the Producer's option, and where such Producer's generation is a qualifying facility' and the Producer has established credit worthiness to the Utility's ۵. satisfaction, the Utility shall finance those special facilities it doesn to be removable and rousable equipment. Such equipment shall include, but not be limited to, transformation, disconnection and metaring equipment.
 - Existing facilities allocated for the Producer's use as special facilities and removable and reusable equipment financed by the Utility in accordance with Section F.3.b are subject to the monthly emership charge applicable to Utility-financed special facilities as set forth in Section 1 of Bule 2. ĉ.

A qualifying facility is one which mosts the requirements established by the Federal Energy Regulatory Commission's rules (18 Code of Federal Regulations 292) implementing the Public Utility Regulatory Policies Act of 1978 (16 U.S.C.A. 796, at seq.).

F. SPECIAL FACILITIES (continued)

···· · -·· --

- d. Where the Producer elects to fratall and deed to the Utility an extension of the Stility's distribution or transmission lines for use as special facilities in accordance with Section B.S, the Utility's estimate of the installed cost of such extension shall be subject to the monthly emership shares applicable to sustemer-financed special facilities as set forth in Section 1 of the Rule No. 2.
- 4. Where payment or collection of continuing monthly emership charges is not {T} practicable, the Producer shall be required to make an equivalent one-time payment in I fou of such monthly charges.
- 5. Cests of special facilities borne by the Producer may be subject to dommard adjustment when such special facilities are used to furnish permanent service to a oustomer of the Utility. This adjustment will be based upon the extension allowance or other auch customer allowance which the Utility would have utilized under its then applicable tariffs if the special facilities did not otherwise exist. If no event shall such adjustment exceed the original installed cost of that portion of the special facilities used to serve a new oustomer. An adjustment, where applicable, will consist of a refund applied to the Producer's initial payment for apocial facilities and/or a corresponding reduction of the comership charge.
- C. EXCEPTIONAL CASES: Where the application of this rule appears impractical or unjust, the Producer may refer the matter to the Commission for special ruling or for the approval of special conditions.
- H. INCOMPORATION INTO POWER PURCHASE ACREDIENTS: Pursuant to Decision No. 83-10-093, if in accordance with Section A.4 the Producer enters into a written form of power purchase agreement with Utility, a support the Rule No. 21 in effect on the date of execution will be appended to, and incorporated by reference into, such power purchase agreement. The Rule appended to such power purchase agreement shall then be applicable for the term of the Producer's power purchase agreement with the Utility. Subsequent revisions to this rule shall not be incorporated into the rule appended to auch power purchase agreement.
