	LONG-TERM ENERGY AND CAPACITY
1	POWER PURCHASE AGREEMENT
2	BETWEEN
3	MEGA RENEWABLES, INC.
	AND
5	PACIFIC GAS AND ELECTRIC COMPANY
6	
8	
8	
10	MEGA RENEWABLES, INC. ("Seller"), and PACIFIC GAS AND
10	ELECTRIC COMPANY ("PGandE"), referred to collectively as
11	"Parties" and individually as "Party", agree as follows:
12	
13	ARTICLE 1 QUALIFYING STATUS
15	
16	Seller warrants that, at the date of first power
17	deliveries from Seller's Facility ¹ and during the term of
18	agreement, its Facility shall meet the qualifying facility
19	requirements established as of the effective date of this
20	Agreement by the Federal Energy Regulatory Commission's
21	rules (18 Code of Federal Regulations 292) implementing the
22	Public Utility Regulatory Policies Act of 1978 (16 U.S.C.A.
23	796, et seq.).
24	
2 5	
26	
27	Underlining identifies those terms which are defined in Section A-1
28	of Appendix A.
	3 S.O. #4 May 7, 1984

ARTICLE 2 COMMITMENT OF PARTIES

The prices to be paid Seller for energy and/or capacity delivered pursuant to this Agreement have wholly or partly been fixed at the time of execution. Actual avoided costs at the time of energy and/or capacity deliveries may be substantially above or below the prices fixed in this Therefore, the Parties expressly commit to the Agreement. prices fixed in this Agreement for the applicable period of performance and shall not seek to or have a right to renegotiate such prices for any reason. As part of its consideration for the benefit of fixing part or all of the energy and/or capacity prices under this Agreement, Seller waives any and all rights to judicial or other relief from its obligations and/or prices set forth in Appendices B, D, 15 and E, or modification of any other term or provision for 16 any reasons whatsoever. 17

This Agreement contains certain provisions which set forth methods of calculating damages to be paid to PGandE in the event Seller fails to fulfill certain performance inclusion of such provisions is not The obligations. intended to create any express or implied right in Seller to terminate this Agreement prior to the expiration of the term Termination of this Agreement by Seller prior of agreement. to its expiration date shall constitute a breach of this Agreement and the damages expressly set forth in this

s.o. #4 May 7, 1984

Agreement shall not constitute PGandE's sole remedy for such 1 breach. 2 3 ARTICLE 3 PURCHASE OF POWER 4 5 Seller shall sell and deliver and PGandE shall (a) 6 purchase and accept delivery of capacity and energy at the 7 voltage level of _____ kV¹. 8 9 (b) Seller shall provide capacity and energy from its 10 5,000 kW Facility located North of Montgomery Creek, Shasta 11 County, California. 12 13 The scheduled operation date of the Facility is (C) 14 December 31, 1987. At the end of each calendar quarter 15 Seller shall give written notice to PGandE of any change in 16 the scheduled operation date. 17 18 (d) To avoid exceeding the physical limitations of the 19 limit the shall facilities, Seller interconnection 20Facility's actual rate of delivery into the PGandE system to 21 _____ kW¹. 2223 (e) The primary energy source for the Facility is 24 hydroelectric. 2526To be determined upon execution of the Special Facilities Agreement 271 for the Facility. 28 s.o. #4 5 May 7, 1984

1	(f) If Seller does not begin construction of its
2	Facility by July 31, 1987. PGandE may reallocate the
3	existing capacity on PGandE's transmission and/or
4	distribution system which would have been used to
5	accommodate Seller's power deliveries to other uses. In the
6	event of such reallocation, Seller shall pay PGandE for the
7	cost of any upgrades or additions to PGandE's system
8	necessary to accommodate the output from the Facility. Such
9	additional facilities shall be installed, owned and
10	maintained in accordance with the applicable PGandE tariff.
11	
12	(g) The transformer loss adjustment factor is $\1$.
13	
14	ARTICLE 4 ENERGY PRICE
15	
16	PGandE shall pay Seller for its net energy ouput ² under
17	the energy payment option checked below ³ :
18	Bridge
19	Energy Payment Option 1 - Forecasted Energy Prices
20	
21	
22	¹ If Seller chooses to have meters placed on Seller's side of the transformer, an estimated transformer loss adjustment factor of 2 unless the Parties agree otherwise will be applied. This
23	estimated transformer loss figure will be adjusted to a measurement
24	of actual transformer losses performed at Seller's request and expense. To be determined upon execution of the <u>Special</u>
2 5	Facilities Agreement for the Facility.
26	2 Insert either "net energy output" or "surplus energy output" to show the energy sale option selected by Seller.
27	³ Energy Payment Option 2 is not available to oil or gas-fired
28	cogenerators. 6 S.O. #4
	May 7, 1984

. ,

During the <u>fixed price period</u>, Seller shall be paid for energy delivered at prices equal to _____¹ percent of the prices set forth in Table B-1, Appendix B, plus ____² percent of PGandE's <u>full short-run</u> avoided operating <u>costs</u>.

, 1

For the remaining years of the <u>term of agreement</u>, Seller shall be paid for energy delivered at prices equal to PGandE's <u>full short-run</u> avoided operating costs.

If Seller's Facility is not an oil or gas-fired cogeneration facility, Seller may convert from Energy Payment Option 1 to Energy Payment Option 2 and be subject to the conditions therein, provided that Seller shall not change the percentage of energy prices to be based on PGandE's full short-run avoided operating Such conversion must be made at least 90 days costs. prior to the date of initial energy deliveries and must with accordance written notice in made by be Section A-17, Appendix A.

X ____ Energy Payment Option 2 - Levelized Energy Prices

24

25

26

Insert either 0, 20, 40, 60, 80, or 100, at Seller's option. If Seller's <u>Facility</u> is an oil or gas-fired cogeneration facility, either 0 or 20 must be inserted.

Insert the difference between 100 and the percentage selected under

27 28

2

footnote 1 above.

During the fixed price period, Seller shall be 1 paid for energy delivered at prices equal to 100¹ 2 percent of the levelized energy prices set forth in 3 Table B-2, Appendix B for the year in which energy 4 deliveries begin and term of agreement, plus 0² percent $\mathbf{5}$ of PGandE's full short-run avoided operating costs. 6 During the fixed price period, Seller shall be subject 7 to the conditions and terms set forth in Appendix B, 8 Energy Payment Option 2. 9 10 For the remaining years of the term of agreement, 11 Seller shall be paid for energy delivered at prices 12 equal to PGandE's full short-run avoided operating 13 costs. 14 15 Seller may convert from Energy Payment Option 2 to 16 Energy Payment Option 1, provided that Seller shall not 17 change the percentage of energy prices to be based on 18 PGandE's full short-run avoided operating costs. Such 19 conversion must be made at least 90 days prior to the 20date of initial energy deliveries and must be made by 21 in accordance with Section A-17, notice written 22Appendix A. $\mathbf{23}$ 24 2526Insert either 20, 40, 60, 80, or 100, at Seller's option. 1 27 Insert the difference between 100 and the percentage selected under 2 footnote 1 above. $\mathbf{28}$

8

S.O. #4 May 7, 1984

Energy Payment Option 3 - Incremental Energy Rate $\mathbf{2}$ Beginning with the date of initial energy deliveries and continuing until ¹, Seller shall be paid monthly for energy delivered at prices equal to PGandE's full short-run avoided operating costs, provided that adjustments shall be made annually to the extent set forth in Appendix B, Energy Payment Option 3. The Incremental Energy Rate Band Widths specified by Seller in Table I below shall be used in determining the annual adjustment, if any. Table I Incremental Energy Rate Band Widths Year (must be multiples of 100 or zero)

 $\mathbf{28}$

Specified by Seller. Must be December 31, 1998 or prior.

____, Seller shall be paid for After 1 energy delivered at prices equal to PGandE's full 2 short-run avoided operating costs. 3 4 ARTICLE 5 CAPACITY ELECTION AND CAPACITY PRICE 56 Seller may elect to deliver either firm capacity or 7 as-delivered capacity, and Seller's election is indicated 8 below. PGandE's prices for firm capacity and as-delivered 9 capacity are derived from PGandE's full avoided costs as 10 approved by the <u>CPUC</u>. 11 12 Firm capacity - _____ kW for ____ years from the 13 firm capacity availability date with payment determined 14 Except for hydroin accordance with Appendix E. 15 for electric facilities, PGandE shall pay Seller 16 capacity delivered in excess of firm capacity on an 17 accordance with in basis capacity as-delivered 18 As-Delivered Capacity Payment Option _____ set forth 19 in Appendix D. 2021 OR 2223 As-delivered capacity with payment determined in Х 24 accordance with As-Delivered Capacity Payment Option 2 25set forth in Appendix D. 2627 $\mathbf{28}$ s.o. #4 10 May 7, 1984

1	ARTICLE 6 LOSS ADJUSTMENT FACTORS
2	
3	Capacity Loss Adjustment Factors shall be as shown in
4	Appendix D and Appendix E, dependent upon Seller's capacity
5	election set forth in Article 5 of this Agreement.
6	
7	Energy Loss Adjustment Factors shall be considered as
8	unity for all energy payments related to Energy Payment
9	Options 1 and 2 set forth in Appendix B for the entire <u>fixed</u>
10	price period of this Agreement, except for the percentage of
11	payments that Seller elected in Article 4 to have calculated
12	based on PGandE's full short-run avoided operating costs.
13	Energy Loss Adjustment Factors for all payments related to
14	PGandE's full short-run avoided operating costs are subject
15	to <u>CPUC</u> rulings for the entire <u>term</u> of <u>agreement</u> .
16	
17	ARTICLE 7 CURTAILMENT
18	
19	Seller has two options regarding possible curtailment
20	by PGandE of Seller's deliveries, and Seller's selection is
21	indicated below:
22	X Curtailment Option A - Hydro Spill and Negative Avoided
23	Cost
24	Curtailment Option B - Adjusted Price Period
2 5	
26	The two options are described in Appendix C.

28

A-3.1 Inspection and Approval

Seller shall not operate the Facility in parallel 5 PGandE authorized an until system PGandE's with 6 representative has inspected the interconnection facilities, 7 and PGandE has given written approval to begin parallel 8 Seller shall notify PGandE of the Facility's operation. 9 start-up date at least 45 days prior to such date. PGandE 10 shall inspect the interconnection facilities within 30 days 11 of the receipt of such notice. If parallel operation is not 12 authorized by PGandE, PGandE shall notify Seller in writing 13 reason the inspection of after days five within 14 authorization for parallel operation was withheld. 15

A-3.2 Facility Operation and Maintenance

Facility maintain its operate and shall Seller 19 according to prudent electrical practices, applicable laws, **2**0 orders, rules, and tariffs and shall provide such reactive 21 power support as may be reasonably required by PGandE to **2**2 maintain system voltage level and power factor. Seller **2**3 shall operate the Facility at the power factors or voltage 24 levels prescribed by PGandE's system dispatcher or desig-25 If Seller fails to provide reactive nated representative. **2**6 power support, PGandE may do so at Seller's expense. 27

> A-11 S.O. #4 May 7, 1984

A-3.3 Point of Delivery

2	
3	Seller shall deliver the energy at the point where
4	Seller's electrical conductors (or those of Seller's agent)
5	contact PGandE's system as it shall exist whenever the
6	deliveries are being made or at such other point or points
7	as the Parties may agree in writing. The initial point of
8	delivery of Seller's power to the PGandE system is set forth
9	in Appendix F.
10	
11	A-3.4 Operating Communications
12	
13	(a) Seller shall maintain operating communications
14	with the <u>designated</u> <u>PGandE</u> <u>switching</u> <u>center</u> . The operating
15	communications shall include, but not be limited to, system
16	paralleling or separation, scheduled and
17	shutdowns, equipment clearances, levels of operating voltage
18	or power factors and daily capacity and generation reports.
1	9
2	(b) Seller shall keep a daily operation
2	each generating unit which shall include information on unit
2	availability, maintenance outages, circuit breaker trip
2	operations requiring a manual reset, and any significant
2	events related to the operation of the Facility.
2	25
2	(c) If Seller makes deliveries greater than one (c) If Seller makes deliveries greater than one
	26 27 megawatt, Seller shall measure and register on a graphic 27 megawatt, Seller shall measure and register on a graphic
	27 megewater, 28 recording device power in kW and voltage in kV at a location
	A-12 S.O. #4 May 7, 1984

within the Facility agreed to by both Parties.

(d) If Seller makes deliveries greater than one and up to and including ten megawatts, Seller shall report to the <u>designated PGandE</u> <u>switching center</u>, twice a day at agreed upon times for the current day's operation, the hourly readings in kW of capacity delivered and the energy in kWh delivered since the last report.

(e) If Seller makes deliveries of greater than ten 10 megawatts, Seller shall telemeter the delivered capacity and 11 energy information, including real power in kW, reactive 12 power in kVAR, and energy in kWh to a switching center 13 PGandE may also require Seller to selected by PGandE. 14 telemeter transmission kW, kVAR, and kV data depending on 15 the number of generators and transmission configuration. 16 Seller shall provide and maintain the data circuits required 17 for telemetering. When telemetering is inoperative, Seller 18 shall report daily the capacity delivered each hour and the 19 energy delivered each day to the designated PGandE switching **2**0

21 <u>center</u>.

Energy Payment Option 2 - Levelized Energy Prices

1

2 Pursuant to Article 4, the energy payment calculation 3 for Seller's energy deliveries during the fixed price period 4 shall include the appropriate prices set forth in Table B-2 5 for the year in which energy deliveries begin and term of 6 agreement, multiplied by the percentage Seller has specified 7 in Article 4. If Seller has selected Curtailment Option B 8 in Article 7, the levelized off-peak hours' energy prices 9 listed in Table B-2 shall be adjusted upward by 7.7% for 10 The discount specified in Period A and 9.6% for Period B. 11 (c)(vi) below, if applicable, will be applied to the energy 12 payments during the fixed price period. 13 14 During the fixed price period, Seller shall be subject 15 to the following conditions and terms: 16 17 Minimum Damages (a) 18 19 The Parties agree that the levelized energy prices **2**0 which PGandE pays Seller for the energy which Seller 21 delivers to PGandE is based on the agreed value to 22 PGandE of Seller's energy deliveries during the entire **2**3 In the event PGandE does not fixed price period. 24 reason of а performance by full such receive **2**5 termination, Seller shall pay PGandE an amount based on **2**6 the difference between the net present values, at the 27 28 B-3

S.O. #4 May 7, 1984 time of termination, of the payments Seller would receive at the forecasted energy prices in Table B-1 and the payments Seller would receive at the levelized energy prices, for the remaining years of the <u>fixed</u> <u>price period</u>. This amount shall be calculated by assuming that Seller continued to generate for the remaining years of the <u>fixed price period</u> at a level equal to the average annual energy generation during the period of performance, and by applying the weighted annual average levelized price applicable to Seller's <u>Facility</u> and the weighted annual average forecasted energy prices in Table B-1 for the remaining years of the <u>fixed price period</u>. The following formula shall be used to make this calculation:

$$P = \sum_{n=1}^{Y} \frac{(F_n)(A)(W)}{(1.15)^n} - \sum_{n=1}^{Y} \frac{(L)(A)(W)}{(1.15)^n}$$

P = amount due PGandE.

- Y = number of years remaining in the <u>fixed price</u> period.
- F_n = weighted annual average forecasted energy price in the nth year after the breach, failure to perform, or expiration of security, as shown in Table B-1 for the corresponding calendar year.

13	
1	L = weighted annual average levelized energy price applicable to Seller's <u>Facility</u> .
2	price applicable to belief a section by Seller
3	A = average annual energy generation by Seller
4	during the period of performance.
5	$n = summation index;$ refers to the $n^{\underline{th}}$ year
6	following termination.
7	W = percent of Seller's energy payments based on
8	the levelized energy prices, as specified in
9	Article 4.
10	(b) Performance Requirements
11	χ
12	Seller shall operate and maintain the Facility in
13	accordance with prudent electrical practices in order
14	to maximize the likelihood that the Facility's output
15	as delivered to PGandE during the part of the fixed
16	price period when the levelized price is below the
17	forecasted price ("last part") shall equal or exceed
18	70% of the <u>Facility's</u> output during the part of the
19	fixed price period when the levelized price is above
2 0	the forecasted price ("first part"). In the event that
21	the forecasted price (line in any year or series of the Facility's output during any year or series of
2 2	years in the last part of the fixed price period is
2 3	less than 70% of the average annual production during
24	the first part of the <u>fixed</u> price period, PGandE may,
2 5	at its discretion (taking into consideration events
2 6	at its discretion (cuning in occurring during such year or series of years such as
27	curtailment by PGandE, Seller's choice not to operate
28	B .E S.O. #4

r.

during adjusted price periods, or scheduled maintenance including major overhauls, and the probability that Seller's future performance will be adequate), either request payment from Seller or immediately draw on the security posted, up to the amount equal to $P \ge \frac{A-B}{A}$, where:

P and A are as defined in Section (a) above.
B = Seller's average annual energy generation during the year or series of years in which the 70% performance requirement was not met.

PGandE shall not request payment from Seller or draw on the security posted if the <u>Facility's</u> output during the last part of the <u>fixed price period</u> falls below 70% of the average annual energy generation during the first part of the <u>fixed price period</u> solely because of force majeure as defined in Section A-8, Appendix A or a lack of or limited availability of the primary energy resource of the <u>Facility</u>, if such energy resource is wind, water, or sunlight.

Section 6103(a)). 27 28 s.o. #4 B-19 May 7, 1984

TABLE B-5

ENERGY PRICES

Energy Prices Effective May 1 - July 31, 1985

The energy purchase price calculations which will apply to energy deliveries determined from meter readings taken during May, June, and July 1985 are as follows:

	(a)	(b)	(c) Revenue Requirement	(d) Energy Purchase
Time Period	Incremental Energy Rate ¹ (Btu/kWh)	Cost of Energy ² (\$/10 ⁵ Btu)	for Cash Working Capital ³ (\$/kWh)	$\frac{\text{Price}^{4}}{(d) = [(a) \times (b)] + (c)}$ $\frac{(d) = [(a) \times (b)] + (c)}{(s/kWh)}$
May 1 - July 31 (Period A)				
Time of Delivery Basis:				
On-Peak	12,168	5.2445	0.00041	0.06423
Partial-Peak	11,369	5.2445	0.00038	0.06000
Off-Peak	9,429	5.2445	0.00033	0.04978
Seasonal Average (Period A)	10,515	5.2445	0.00036	0.05551

Incremental energy rates (Btu/kWh) for Seasonal Period A and Seasonal Period B are derived from the marginal energy costs (including variable operating and maintenance expense) adopted by the <u>CPUC</u> in Decision No. 83-12-068 (page 339). They are based upon natural gas as the incremental fuel and weighted average hydroelectric power conditions. The incremental energy rates in column (a) include the Helms Pumped Storage Facility and Diablo Canyon Unit 1. If Diablo Canyon Unit 1 does not become commercially operative May 1, the incremental energy rates in column (a) will not apply and instead the incremental energy rates, and the resulting energy prices, shown in this footnote will apply until Diablo Canyon Unit 1 is commercially operative.

	Incremental Energy Rate (Btu/kWh)	Energy Purchase Price (\$/kWh)
On-Peak Partial-Peak Off-Peak	14,086 13,382 10,499	0.07428 0.07056 0.05539
Seasonal Average	e 12,031	0.06346

- 2 Cost of natural gas under PGandE Gas Schedule No. G-55 effective May 1, 1985.
- 3 Revenue Requirement for Cash Working Capital as prescribed by the <u>CPUC</u> in Decision No. 83-12-068.
- 4 Energy Purchase Price = (Incremental Energy Rate x Cost of Energy) + Revenue Requirement for Cash Working Capital. The energy purchase price excludes the applicable energy line loss adjustment factors. However, as ordered by Ordering Paragraph No. 12(j) of <u>CPUC</u> Decision No. 82-12-120, this figure is currently 1.0 for transmission and primary distribution loss adjustments and is equal to marginal cost line loss adjustment factors for the secondary distribution voltage level. These factors may be changed by the <u>CPUC</u> in the future. The currently applicable energy loss adjustment factors are shown in Table B-6.

1	APPENDIX C		
2	CURTAILMENT OPTIONS		
3			
4	Seller has two options regarding curtailment of energy		
5	deliveries and Seller has made its selection in Article 7.		
6	The two options are as follows:		
7			
	CURTAILMENT OPTION A - HYDRO SPILL AND		
8	CURTAILMENT OFFICE A NEGATIVE AVOIDED COST		
9	(a) In anticipation of a period of hydro spill		
10	(a) In anticipation of a period of all a second sec		
11	conditions, as defined by the <u>brow</u> , form seller during such period		
12	that any purchases of energy from Seller during such period		
13	shall be at hydro savings prices quoted by PGandE. If		
14	Seller delivers energy to PGandE during any such period,		
15	Seller shall be paid hydro savings prices for those		
16	deliveries in lieu of prices which would otherwise be		
17	applicable. The hydro savings prices shall be calculated by		
18	PGandE using the following formula:		
19			
2 0	$\frac{AQF - S}{AQF} \times PP \qquad (\geq 0)$		
21			
2 2	where:		
2 3	AQF = Energy, in kWh, projected to be available		
24			
25	qualifying facilities under agreements		
20	containing hydro savings price provisions.		
2	7		
2			
	C-1 S.O. #4 May 7, 1984		
	riay /, 200-		

	· ·
1	S = Potential energy, in kWh, from PGandE hydro
2	facilities which will be spilled if all AQF
3	is delivered to PGandE.
4	PP = Prices published by PGandE for purchases
5	during other than hydro spill conditions.
6	
7	PGandE shall give Seller notice of general periods when
8	hydro spill conditions are anticipated, and shall give
9	Seller as much advance notice as practical of any specific
10	hydro spill period and the hydro savings price which will be
11	applicable during such period.
12	
13	(b) PGandE shall not be obligated to accept or pay for
14	and may require Seller with a Facility with a nameplate
15	
16	
17	
18	
19	
2 0	reasonable notice of the possibility that interruption or

27

28

(d) If Seller is selling net energy output to PGandE 4 and simultaneously purchasing its electrical needs from 5 PGandE and Seller elects not to sell energy to PGandE at the 6 hydro savings price pursuant to subsection (a) or when 7 PGandE curtails deliveries of energy pursuant to subsection 8 (b), Seller shall not use such energy to meet its electrical 9 needs but shall continue to purchase all its electrical 10 If Seller is selling surplus energy needs from PGandE. 11 output to PGandE, subsections (a) or (b) shall only apply to 12 the surplus energy output being delivered to PGandE, and 13 Seller can continue to internally use that generation it has 14 retained for its own use. 15

CURTAILMENT OPTION B - ADJUSTED PRICE PERIOD

(a) In each calendar year, the price which PGandE is
obligated to pay Seller for energy deliveries during 1,000
off-peak hours (as defined in Table B-4, Appendix B) may be
adjusted to a price equal to, but not in excess of, PGandE's
available alternative source. This adjusted price shall be
effective under any of the following conditions:

(i) when PGandE's energy source at the margin is not a PGandE oil- or gas-fueled plant, and PGandE

C-3	S.O.	#4	
• -	May	7,	1984

replace Seller's energy with energy from this 1 can source at a cost less than the price paid to Seller; 2 3 when PGandE would incur negative avoided (ii) 4 costs (as defined by the CPUC) due to continued 5 acceptance of energy deliveries under this Agreement; 6 7 OT 8 (iii) when PGandE is experiencing minimum system 9 operations. 10 11 During any of the conditions described above the 12 adjusted price may be zero. 13 14 give Seller PGandE shall possible, (b) Whenever 15 reasonable notice of any price adjustment energy for 16 deliveries and its probable duration. 17 18 (c) If Seller is selling net energy output to PGandE 19 and simultaneously purchasing its electrical needs from **2**0 PGandE and Seller elects not to sell energy to PGandE at the 21 adjusted price, Seller shall not use such energy to meet its **2**2 electrical needs but shall continue to purchase all its **2**3 electrical needs from PGandE. 24 **2**5 (d) After Seller receives notice of the probable **2**6 duration of the period during which the adjusted price will 27 be paid, Seller may elect to perform maintenance during such 28 s.o. #4 C-4 May 7, 1984

1	period and so inform the PGandE employee in charge at the
2	designated PGandE switching center prior to the time when
3	the adjusted price period is expected to begin. If Seller
4	makes such election, the number of off-peak hours of
5	probable duration quoted in PGandE's notice to Seller shall
6	be applied to the 1,000-hour calendar year limitation set
7	forth in this section. After an election to do maintenance,
8	if Seller makes any deliveries of energy during the guoted
9	probable duration period, Seller shall be paid the adjusted
10	price quoted in its notice from PGandE without regard to any
11	subsequent changes on the PGandE system which may alter the
12	adjusted price or shorten the actual duration of the
13	condition.

APPENDIX D 1 AS-DELIVERED CAPACITY 2 3 D-1 AS-DELIVERED CAPACITY PAYMENT OPTIONS 4 5 has two options for <u>as-delivered</u> capacity Seller 6 payments and Seller has made its selection in Article 5. 7 The two options are as follows: 8 9 AS-DELIVERED CAPACITY PAYMENT OPTION 1 10 11 PGandE shall pay Seller for as-delivered capacity at 12 prices authorized from time to time by the CPUC. The 13 as-delivered capacity prices in effect on the date of 14 execution are calculated as shown in Exhibit D-1. 15 16 AS-DELIVERED CAPACITY PAYMENT OPTION 2 17 18 During the fixed price period, the as-delivered 19 capacity prices will be calculated in accordance with 20 Exhibit D-1 and the forecasted shortage costs in Table D-2. 21 22 For the remaining years of the term of agreement, **2**3 PGandE shall pay Seller for as-delivered capacity at the 24 **2**5 **2**6 27 28 s.o. #4 D-1 May 7, 1984

1 higher of: 2 prices authorized from time to time by the 3 (i) CPUC; 4 5 the as-delivered capacity prices that were (ii) 6 paid Seller in the last year of the fixed 7 price period; or 8 9 the as-delivered capacity prices in effect in (iii) 10 the first year following the end of the fixed 11 price period, provided that the annualized 12 shortage cost from which these prices are 13 derived does not exceed the annualized value 14 of a gas turbine. 15 16 D-2 AS-DELIVERED CAPACITY IN EXCESS OF FIRM CAPACITY 17 18 The amount of capacity delivered in excess of firm 19 capacity will be considered <u>as-delivered</u> capacity. This **2**0 as-delivered capacity is based on the total kilowatt-hours 21 delivered each month during all on-peak, partial-peak and 22 off-peak hours excluding any energy associated with 23 generation levels equal to or less than the firm capacity. 24 **2**5 Seller has the two options listed in Section D-1 for **2**6 payment for such as-delivered capacity. Seller has made its 27 selection in Article 5. 28 s.o. #4 **D-2** May 7, 1984

1	EXHIBIT D-1
2	
3	The as-delivered capacity price (in cents per kW-hr)
4	for power delivered by the <u>Facility</u> is the product of three
5	factors:
6	
7	(a) The shortage cost in each year the Facility
8	is operating. Currently, this shortage cost is \$60 per
9	kW-year.
10	
11	(b) A capacity loss adjustment factor which
12	provides for the effect of the deliveries on PGandE's
13	transmission and distribution losses based on the
14	Seller's interconnection voltage level. The applicable
15	capacity loss adjustment factors for non-remote ¹
16	Facilities are presented in Table D-1(a). Capacity
17	loss adjustment factors for remote Facilities shall be
18	calculated individually.
19	
2 0	(c) An allocation factor which accounts for the
21	different values of <u>as-delivered</u> <u>capacity</u> in different
2 2	time periods and converts dollars per kW-year to cents
2 3	per kWh. The current allocation factors are presented
24	in Table D-1(b). The time periods to which they apply
2 5	are shown in Table B-4, Appendix B. The allocation
26	factors are subject to change from time to time.
27	
28	¹ As defined by the <u>CPUC</u> .

APPENDIX E 1 FIRM CAPACITY 2 3 GENERAL E-1 4 5 This Appendix E establishes conditions and prices under 6 which PGandE shall pay for firm capacity. 7 8 PGandE's obligation to pay for firm capacity shall 9 begin on the firm capacity availability date. The firm 10 capacity price shall be subject to adjustment as provided 11 for in this Appendix E. 12 13 The firm capacity prices in Table E-2 are applicable 14 for deliveries of firm capacity beginning after December 30, 15 1982. 16 17 E-2 PERFORMANCE REQUIREMENTS 18 19 (a) To receive full capacity payments, the firm **2**0 capacity shall be delivered for all of the on-peak hours¹ in 21 the peak months on the PGandE system, which are presently **2**2 the months of June, July, and August, subject to a 20 23 month. outages in any forced percent allowance for 24 Compliance with this provision shall be based on the **2**5 Facility's total on-peak deliveries for each of the peak **2**6 27 On-peak, partial-peak, and off-peak hours are defined in Table B-4, 1 28 Appendix B. S.O. #4 E-2 May 7, 1984

months and shall exclude any energy associated with generation levels greater than the <u>firm capacity</u>.

Outage periods for scheduled maintenance shall not exceed 840 hours (35 days) in any 12-month period. This 16 allowance may be used in increments of an hour or longer on 17 Seller may basis. nonconsecutive consecutive or а 18 accumulate unused maintenance hours from one 12-month period 19 to another up to a maximum of 1,080 hours (45 days). This 20 accrued time must be used consecutively and only for major 21 overhauls. Seller shall provide PGandE with the following 22 advance notices: 24 hours for scheduled outages less than 23 one day, one week for a scheduled outage of one day or more 24 (except for major overhauls), and six months for a major • • **2**5 overhaul. Seller shall not schedule major overhauls during 26 Seller the peak months (presently June, July and August). 27 shall make reasonable efforts to schedule or reschedule 28

E-4

s.o. #4 May 7, 1984

routine maintenance outside the peak months, and in no event shall outages for scheduled maintenance exceed 30 peak hours during the peak months. Seller shall confirm in writing to PGandE pursuant to Article 9, within 24 hours of the original notice, all notices Seller gives personally or by telephone for scheduled maintenance.

If Seller has selected Curtailment Option B, off-peak hours of maintenance performed pursuant to Section (d) of Curtailment Option B, Appendix C shall not be deducted from Seller's scheduled maintenance allowances set forth above.

E-5 FIRM CAPACITY PAYMENTS

1

2

3

4

5

6

17

18

19

The method for calculation of <u>firm capacity</u> payments is shown below. As used below in this section, month refers to a calendar month.

The monthly payment for firm capacity will be the 7 product of the Period Price Factor (PPF), the Monthly 8 Delivered Capacity (MDC), the appropriate capacity loss 9 adjustment factor from Table E-1 based on the Facility's 10 interconnection voltage, and the appropriate performance 11 bonus factor, if any, from Table E-3, plus any allowable 12 payment for outages due to scheduled maintenance. The firm 13 capacity price shall be applied to meter readings taken 14 during the separate times and periods as illustrated in 15 Table B-4, Appendix B. 16

The PPF is determined by multiplying the <u>firm capacity</u> <u>price</u> by the following Allocation Factors¹:

				1	PPF
20		Allocation Factor	X Capa	Firm =	(\$/kW-month)
21		Allotation			
2 2	Seasonal Period A	.18540		<u></u>	
2 3	Seasonal Desired P	.01043			
24	Period B				
2 5					muc in Decision
2 6	1 Thes	e allocation facto B3-12-068. All al	rs were p location	rescribed by the factors are sub	ject to change by
27	PGan	dE based on PGand	- 2 margin		before the CPUC.
2 8	Seas	rmined in general onal Periods A and	l B are d	El Thea an I and	
			E-6	S.O. # May 7,	4 1984
	11				

The MDC is determined in the following manner: 1 (1) Determine the Performance Factor (P), which is 2 defined as the lesser of 1.0 or the following quantity: 3 4 (≦ 1.0) $P = \frac{A}{C \times (B-S) \times (0.8^{\star})}$ 5 6 Where: 7 A = Total kilowatt-hours delivered during all on-peak 8 partial-peak hours excluding energy any and 9 associated with generation levels greater than the 10 firm capacity. 11 C = Firm capacity in kilowatts. 12 B = Total on-peak and partial-peak hours during the 13 month. 14 S = Total on-peak and partial-peak hours during the 15 month Facility is out of service on scheduled 16 maintenance. 17 18 (2) Determine the Monthly Capacity Factor (MCF), which 19 is computed using the following expression: 20 21 $MCF = P \times (1.0 - \frac{M}{D})$ 22 Where: **2**3 = The number of hours during the month Facility is M 24 out of service on scheduled maintenance. **2**5 = The number of hours in the month. D **2**6 27 0.8 reflects a 20% allowance for forced outage. * 28 S.O. #4 May 7, 1984 E-7

Determine the MDC by multiplying the MCF by C: (3) 1 (kilowatts) = MCF x C MDC 2 3 The monthly payment for firm capacity is then 4 determined by multiplying the PPF by the MDC, by the 5 appropriate capacity loss adjustment factor presented from 6 Table E-1, and by the appropriate performance bonus factor, 7 if any, from Table E-3. 8 9 performance capacity loss monthly payment 10 X = PPF x MDC х adjustment factor bonus factor for firm capacity 11 Furthermore, the payment for a month in which 12 there is an outage for scheduled maintenance shall also 13 include an amount equal to the product of the average hourly 14 firm capacity payment¹ for the most recent month in the same 15 type of Seasonal Period (i.e., Seasonal Period A or Seasonal 16 Period B) during which deliveries were made times the number 17 of hours of outage for scheduled maintenance in the current 18 Firm capacity payments will continue during the month. 19 outage periods for scheduled maintenance provided that the 20 provisions of Section E-3 are met. 21 **2**2 probationary period Seller's monthly During а **2**3 bу determined be shall capacity firm payment for 24 substituting for the firm capacity, the capacity at which **2**5 **2**6 Total monthly payment divided by the total number of hours in the 27 1 monthly billing period. 28 S.O. #4 E-8 May 7, 1984

Seller would have met the performance requirements. In the event that during the probationary period Seller does not meet the performance requirements at whatever firm capacity was established for the previous month, Seller's monthly for firm capacity shall be determined by 4 substituting the firm capacity at which Seller would have payment 5 met the performance requirements. The performance bonus 6 factor shall not be applied during probationary periods. 7 8 9 10 TABLE E-1 11 If the Facility is non-remote¹ the firm capacity loss 12 13 adjustment factors are as follows: 14 . Loss Adjustment Factor 15 Voltage Level .989 16 Transmission 17 .991 Primary Distribution 18 .991 Secondary Distribution 19 If the Facility is remote the firm capacity loss adjustment 20 21 2 factor is _____ 22 **2**3 24 As defined by the CPUC. 1 25 Determined individually. 2 **2**6 27 s.o. #4 28 E-9 May 7, 1984

28	than the firm capacity.
20	E-11 S.O. #4 May 7, 1984

= Total on-peak hours during the month. W = Total on-peak hours during the peak month that the 2 scheduled service OD of out is Facility 3 maintenance. 4 = Firm capacity in kilowatts. 5 Q (ii) the arithmetic average of the above firm capacity 6 7 factors shall be determined for that span, 8 (iii) the average of the above arithmetic average firm 9 capacity factors for the most recent span(s), not to exceed 10 5, shall be calculated and shall become the Demonstrated 11 12 Firm Capacity Factor. To calculate the performance bonus factor for a 13 Demonstrated Firm Capacity Factor not shown in Table E-3 use 14 15 the following formula: 16 Performance Bonus Factor = Demonstrated Firm Capacity Factor (%) 17 18 19 **2**0 SECTIONS E-6 THROUGH E-10 SHALL APPLY ONLY TO HYDROELECTRIC 21 22 PROJECTS **2**3 24 E-6 DETERMINATION OF NATURAL FLOW DATA . **2**5 Natural flow data shall be based on a period of record **2**6 of at least 50 years and which includes historic critically 27 28 s.o. #4 May 7, 1984 E-12

1

In the event Seller demonstrates that a dry periods. natural flow data base of at least 50 years would be 2 unreasonably burdensome, PGandE shall accept a shorter 3 period of record with a corresponding reduction in the 4 averaging basis set forth in Section E-8. Seller shall 5 determine the natural flow data by month by using one of the 6 following methods: 7 8 Method 1 9 10 If stream flow records are available from a recognized 11 gauging station on the water course being developed in the 12 general vicinity of the project, Seller may use the data 13 from them directly. 14 15 Method 2 16 17 If directly applicable flow records are not available, 18 Seller may develop theoretical natural flows based on correlation with available flow data for the closest 19 adjacent and similar area which has a recognized gauging **2**0 station using generally accepted hydrologic estimating 21 22 methods. **2**3 24 THEORETICAL OPERATION STUDY s E-7 **2**5 Based on the monthly natural flow data developed under **2**6 Section E-6 a theoretical operation study shall be prepared 27 28 s.o. #4 May 7, 1984 E-13

1

by Seller. Such a study shall identify the monthly capacity rating in kW and the monthly energy production in kWh for each month of each year. The study shall take into account operating constraints, limitations, and relevant all requirements including but not limited to --

(1) Release requirements for support of fish life and any other operating constraints imposed on the project; proposed the characteristics of (2) Operating equipment of the Facility such as efficiencies, minimum and maximum operating levels, project control procedures, etc.; 9 The design characteristics of project facilities 10 (3) 11 losses in penstocks, valves, tailwater head such as 12 elevation levels, etc.; and

(4) Release requirements for purposes other than power generation such as irrigation, domestic water supply, etc. The theoretical operation study for each month shall

assume an even distribution of generation throughout the 16 month unless Seller can demonstrate that the Facility has 17 18 For the study to show water storage characteristics. monthly capacity ratings, the Facility shall be capable of 19 operating during all on-peak hours in the peak months on the **2**0 PGandE system, which are presently the months of June, July, 21 and August. If the project does not have this capability 22 throughout each such month, the capacity rating in that 23^{1} month of that year shall be set at zero for purposes of this 24 **2**5 theoretical operation study. **2**6

E-14

s.o. #4 May 7, 1984 E-8 DETERMINATION OF AVERAGE DRY YEAR CAPACITY RATINGS

1

2

3

28

Based on the results of the theoretical operation study developed under Section E-7, the average dry year capacity 4 rating shall be established for each month. The average dry 5 year shall be based on the average of the five years of the 6 shown in the theoretical lowest annual generation as 7 lowest annual years of such Once operation study. 8 generation are identified, the monthly capacity rating is 9 determined for each month by averaging the capacity ratings from each month of those years. The firm capacity shown in 10 Article 5 shall not exceed the lowest average dry year 11 monthly capacity ratings for the peak months on the PGandE 12 system, which are presently the months of June, July, and 13 14 August. 15 16 E-9 INFORMATION REQUIREMENTS 17 Seller shall provide the following information 18 to 19 PGandE for its review: (1) A summary of the average dry year capacity ratings **2**0 based on the theoretical operation study as provided in 21 **2**2 (2) A topographic project map which shows the location Table E-4; **2**3 of all aspects of the Facility and locations of stream 24 gauging stations used to determine natural flow data; **2**5 (3) A discussion of all major factors relevant to **2**6 27 project operation;

E-15

s.o. #4 May 7, 1984

(4) A discussion of the methods and procedures used to 1 establish the natural flow data. This discussion shall be 2 sufficient detail for PGandE to determine that the 3 in methods are consistent with those outlined in Section E-6 4 and are consistent with generally accepted engineering 5 practices; and 6 (5) Upon specific written request by PGandE, Seller's 7 theoretical operation study. 8 9 E-10 ILLUSTRATIVE EXAMPLE 10 11 flows are These natural flows -Determine (1)12 developed based on historic stream gauging records and are 13 compiled by month, for a long-term period (normally at least 14 which periods dry covers which more) years or 15 50 historically occurred in the 1920's and 30's and more 16 recently in 1976 and 77. In all but unusual situations this 17 will require application of hydrological engineering methods 18 to records that are available, primarily from the USGS 19 publication "Water Resources Data for California". 20 21 (2) Perform theoretical operation study - Using the **2**2 natural flow data compiled under (1) above a theoretical **2**3 operation study is prepared which determines, for each month 24 of each year, energy generation (kWh) and capacity rating • **2**5 This study is performed based on the Facility's **2**6 (kW). and operating capabilities, constraints, etc., 27 design, should take into account all factors relevant to project 28 s.o. #4 E-16 May 7, 1984

operation. Generally such a study is done by computer which routes the natural flows through project features, considering additions and withdrawals from storage, spill past the project, releases for support of fish life, etc., to determine flow available for generation. Then the generation and capacity amounts are computed based on equipment performance, efficiencies, etc.

(3) Determine average dry year capacity ratings -9 After the theoretical project operation study is complete 10 the five years in which the annual generation (kWh) would 11 have been the lowest are identified. Then for each month, 12 the capacity rating (kW) is averaged for the five years to 13 arrive at a monthly average capacity rating. The firm 14 capacity is then set by the Seller based on the monthly 15 average dry year capacity ratings and the performance 16 requirements of this appendix. An example project is shown 17 in the attached completed Table E-4. 18

E-11 MINIMUM DAMAGES

1

2 (a) In the event the firm capacity is derated or 3 Seller terminates this Agreement, the quantity by which the 4 firm capacity is derated or the firm capacity shall be used 5 to calculate the payments due PGandE in accordance with 6 7 Section (d). 8 (b) Seller shall be invoiced by PGandE for all amounts 9 due under this section. Payment shall be due within 30 days 10 of the date of invoice. 11 12 If Seller does not make payments pursuant to (c) 13 Section (b), PGandE shall have the right to offset any 14 amounts due it against any present or future payments due 15 16 Seller. 17 Seller shall pay to PGandE: 18 (ð) 19 difference (i) an amount equal to the **2**0 between (a) the firm capacity payments already 21 paid by PGandE, based on the original term of 22 agreement and (b) the total firm capacity payments **2**3 which PGandE would have paid based on the period 24 of Seller's actual performance using the adjusted **2**5 firm capacity price. Additionally, Seller shall 1 **2**6 pay interest, compounded monthly from the date the 27 excess capacity payment was made until the date 28 S.O. #4 E-19 May 7, 1984

Seller repays PGandE, on all overpayments, at the published Federal Reserve Board three months' Prime Commercial Paper rate; plus

(ii) a sum equal to the amount by which the firm capacity is being terminated or derated times the difference between the current firm capacity price on the date of termination or deration for a term equal to the balance of the term of agreement and the firm capacity price, multiplied by the appropriate factor shown in Table E-5 below. In the event that the current firm capacity price is less than the firm capacity price, no payment under this subsection (ii) shall be due either Party.

BULE NO. 21 -- NONUTILITY-DUNED PARAULEL GENERATION

This describes the minimum operation, matering and interconnection requirements for any generating source or sources paralleled with the Utility's electric system. Such source or sources may include, but are not limited to, hydroelectric generators, mind-turbine generators, steam or gas driven turbine generators and photovoltaic systems.

A. CENERAL

٠**١**.

٩.

- The type of interconnection and voltage available at any location and the Utility's apecific interconnection requirements shall be determined by inquiry at the Utility's local office.
- The Utility's distribution and transmission lines which are on integral part of its (N) overall system are distinguished by the voltages at which they are operated. Distribution lines are operated at voltages below 60 kv and transmission lines are operated at voltages below 60 kv and transmission lines are operated at voltages below 60 kv and transmission lines are operated at voltages 60 kv and higher. (N)
- 3. The Power Producer (Producer) shall ascertain and be responsible for compliance with the requirements of all governmental authorities having jurisdiction.
- A. The Producer shall sign the Utility's written form of power purchase agreement or parallel operation agreement before connecting or operating a generating source in parallel with the Utility's system.
- 5. The Producer shall be fully responsible for the costs of designing, installing, swning, operating and maintaining all interconnection facilities defined in Section 3.1.
- 6. The Producer shall submit to the Utility, for the Utility's review and written occeptance, equipment specifications and detailed plans for the installation of all interconnection facilities to be furnished by the Producer prior to their purchase or installation. The Utility's review and written acceptance of the Producer's equipment specifications and detailed plans shall not be construed as confirming or endorsing the Producer's design or as werranting the equipment's safety, durability or reliability. The Utility shall not, by reason of such review or lock of review, be responsible for strength, details of design adequacy, or especity of equipment built pursuant to such specifications, nor shall the Utility acceptance be deemed an endorsement of any such equipment.
- 7. No generating source shall be operated in perallel with the Utility's system until the interconnection facilities have been inspected by the Utility and the Utility has provided written approval to the Producer.
- Only duly authorized exployees of the Utility are allowed to connect Producer-installed interconnection facilities to, or disconnect the same from, the Utility's overhead or underground lines.
- B. INTERCONNECTION FACILITIES
 - GENERAL: Interconnection facilities are all means required, and apparatus installed, to interconnect the Producer's generation with the Utility's system. Where the Producer desires to sell power to the Utility, interconnection facilities are also all means required, and apparatus installed, to enable the Utility to receive power deliveries from the Producer. Interconnection facilities may include, but are not limited to:
 - connection, transformation, writching, matering, communications, control, protective and safety equipment; and
 - b. any necessary additions to and reinforcements of the Utility's system by the Utility.

2. HETERING

A Producer desiring to sell power to the Utility shall provide, install, own and maintain all facilities necessary to accommodate metering equipment specified by the Utility. Such metering equipment may include meters, tolemetering (applicable where deliveries to the Utility exceed 10 NW) and other recording and communications devices as may be required for the reporting of power delivery (1) deta to the Utility. Except as provided for in Section 8.2.5 following, the Utility shall provide, instell, own and maintain all metering equipment as special facilities in accordance with Section F. (Continued)

BULE NO. 21 -- MONUTILITY-DWHED PARALLEL GENERATION (Cont'd.)

ELECTRIC SERVICE FROM THE UTILITY: If the Producer requires regular, supplemental, interruptible or standby service from the Utility, the Producer shall enter into separate contractual errengements with the Utility in accordance with the Stillty's applicable C. electric tariffs on file with and authorized by the Commission.

D. **OPERATION**

1.

- PREPARALLEL INSPECTION: In accordance with Section A.7, the Utility will inspect the Producer's interconnection facilities prior to providing it with written authorization to commence parallel operation. Such inspection shall determine whether or not the 1. (Producer has installed certain control, protective and safety equipment to the Utility's specifications. Where the Producer's generation has a rated output in excess of 100 km, the Producer shall pay the Utility its estimated costs of performing
- JURISDICTION OF THE UTILITY'S SYSTEM DISPATCHER: The Producer's generation while operating in perallel with the Utility's system is at all times under the jurisdiction of the Utility's system dispatcher. The system dispatcher shall mormally delegate such control to the Utility's designated writching conter. 2.
- CONCLUSICATIONS: The Producer shall maintain telephone service from the local telephone company to the location of the Producer's generation. In the event such location is remote or unattended, telephone service shall be provided to the mearest building normally occupied by the Producer's generator operator. The Utility and the Producer shall maintain operating communications through the Utility's designated 3.
- GENERATOR LDC: The Producer shall at all times keep and meintain a detailed generator ۹. operations log. Such log shall include, but not be limited to, information on unit availability, meintenance outages, circuit breaker trip operations requiring menual reset and unusual events. The Utility shall have the right to review the Producer's
- REPORTING ABNORMAL CONDITIONS: The Utility shall advise the Producer of abnormal conditions which the Utility has reason to believe could affect the Utility's operating conditions or procedures. The Producer shall keep the Utility similarly S.
- POWER FACTOR: The Producer shall furnish reactive power as may be reasonably required (D) 6.
 - The Utility reserves the right to specify that generators with pamer factor The Utility reserves the right to specify that generators with power factor control sepability, including synchronous generators, be capable of operating continuously at any power factor between 95 percent leading (absorbing vers) and 90 percent legging (producing vers) at any voltage level within a 5.0 percent of rated voltage. For other types of generators with no inherent power factor control capability, the Utility reserves the right to specify the installation of capacitors by the Producer to correct generator output to near 95 percent leading power factor. The Utility may also require the installation of switched capacitors on its system to produce reactive support equivalent to that provided by operating a synchronous generator. Where either the Fraducer or the Utility determines that it is not practical for the Producer to furnish the Utility determines that it is not practical for the Producer to furnish the Utility's required level of reactive power or when the Utility apecifies emitched capacitors in its system pursuant to Section A., (†)
 - ۵. the Utility specifies writched capacitors in its system pursuant to Section B, G, a, the Utility will provide, install, our and maintain the necessary devices on its system in accordance with Section F_a
- E. INTERFERENCE WITH SERVICE AND CONNUNICATION FACILITIES
 - GENERAL: The Utility reserves the right to refuse to connect to any new equipment or to remain connected to any existing equipment of a size or character that may be detrimental to the Utility's operations or service to its customers. 1.

2. The Producer shall not operate equipment that superimposes upon the Utility's system a voltage or current which causes interference with the Utility's operations, service to the Utility's customers or interference to communication facilities. If the Producer causes service interference to others, the Producer must diligently pursue and take corrective action at the Producer's expense after being given motice and reasonable or continues to operate the equipment causing the interference without restriction or limit, the Utility may, without liability, disconnect the Producer's equipment from the Utility's aystem until a suitable permanent solution provided by the Producer is expense.

F. SPECIAL FACILITIES

- There the Producer requests the Utility to furnish interconnection facilities or where it is necessary to make additions to or reinforcements of the Utility's system and the Utility agrees to do so, such facilities shall be deemed to be special facilities and the costs thereof shall be borne by the Producer, including such continuing sumership 1.
- 2. Special facilities are (a) these facilities installed at the Producer's request which the Utility does not normally furnish under its tariff achedules, or (b) a prorata portion of existing facilities requested by the Producer, allocated for the sele use of such Producer, which usual not normally be allocated for such acts use such otherwise provided by the Utility's filed tariff achedules, special facilities will be installed, owned and maintained or allocated by the Utility as an occumodation to the Producer only if acceptable for operation by the Utility and the reliability of service to the Utility's Sustamers is not impaired.
- 3. Special Facilities will be furnished under the terms and conditions of the Utility's "Agreement for installation or Allocation of Special Facilities for Parallel Operation (N) "Agreement for installation or Allocation of Special Facilities for Parallel Operation of Nonutility-sumed Generation and/or Electrical Standby Service" (form 79-280, effective June 1984) and its Appendix A, "Detail of Special Facilities Charges" (Form 79-702, effective June 1984). Prior to the Producer signing such an agreement, the Utility shall provide the Producer with a Braskdown of special facilities costs in a form having detail sufficient for the information to be reasonably understood by the Producer. The special facilities agreement will include, but is not limited to, a binding quotation of anarges to the Producer and the following general terms and conditions: {N}
 - Where facilities are installed by the Utility for the Producer's use as special facilities, the Producer shall advance to the Utility its estimated installed most of the special facilities. The amount advanced is subject to the monthly unmership charge applicable to customer-financed special facilities as set forth in Section 1 of the Utility's Bule No. 2. . (1)
 - At the Producer's option, and where such Producer's generation is a qualifying facility' and the Producer has established credit worthingss to the Utility's b. . satisfaction, the Utility shall finance those special facilities it doesns to be removable and reusable equipment. Such equipment shall include, but not be limited to, transformation, disconnection and metaring equipment.
 - c. Existing facilities allocated for the Producer's use as special facilities and removable and reusable equipment financed by the Utility in accordance with Section F.3.b are subject to the monthly emership charge applicable to Stility-financed special facilities as set forth in Section 1 of Bule 2.

A qualifying facility is one which meets the requirements established by the Federal Energy Regulatory Commission's rules (18 Code of Federal Regulations 292) implementing the Public Utility Regulatory Policies Act of 1978 (16 U.S.C.A. 796, st seq.).
