1	LONG-TERM ENERGY AND CAPACITY
2	POWER PURCHASE AGREEMENT
3	BETWEEN
4	MILL AND SULPHUR CREEK POWER PLANT PARTNERSHIP
5	AND
6	PACIFIC GAS AND ELECTRIC COMPANY
7	
8	
9	
10	Mill and Sulphur Creek Power Plant Partnership
11	("Seller"), and PACIFIC GAS AND ELECTRIC COMPANY ("PGandE"),
12	referred to collectively as "Parties" and individually as
13	"Party", agree as follows:
14	
15	ARTICLE 1 QUALIFYING STATUS
16	
17	Seller warrants that, at the date of first power
18	deliveries from Seller's $\underline{Facility}^1$ and during the \underline{term} of
19	agreement, its Facility shall meet the qualifying facility
20	requirements established as of the effective date of this
21	Agreement by the Federal Energy Regulatory Commission's
22	rules (18 Code of Federal Regulations 292) implementing the
23	Public Utility Regulatory Policies Act of 1978 (16 U.S.C.A.
24	796, et seg.).
25	
26	· · · · · · · · · · · · · · · · · · ·
27	¹ Underlining identifies those terms which are defined in Section A-1 of Appendix A.
28	
	3 S.O. #4

н^а н н

> S.O. #4 May 7, 1984

3

The prices to be paid Seller for energy and/or capacity 3 delivered pursuant to this Agreement have wholly or partly 4 been fixed at the time of execution. Actual avoided costs $\mathbf{5}$ at the time of energy and/or capacity deliveries may be 6 substantially above or below the prices fixed in this 7 Therefore, the Parties expressly commit to the Agreement. 8 prices fixed in this Agreement for the applicable period of 9 performance and shall not seek to or have a right to 10renegotiate such prices for any reason. As part of its 11 consideration for the benefit of fixing part or all of the 12 energy and/or capacity prices under this Agreement, Seller 13 waives any and all rights to judicial or other relief from 14 its obligations and/or prices set forth in Appendices B, D, 15 and E, or modification of any other term or provision for 16 any reasons whatsoever. 17

This Agreement contains certain provisions which set 19 forth methods of calculating damages to be paid to PGandE in 20 fails to fulfill certain performance the event Seller 21 inclusion of such provisions is not obligations. The **2**2 intended to create any express or implied right in Seller to **2**3 terminate this Agreement prior to the expiration of the term 24 of agreement. Termination of this Agreement by Seller prior **2**5 to its expiration date shall constitute a breach of this 26 Agreement and the damages expressly set forth in this 27

4

28

18

1

2

1 Agreement shall not constitute PGandE's sole remedy for such 2 breach. 3 4 ARTICLE 3 PURCHASE OF POWER 5 6 Seller shall sell and deliver and PGandE shall (a) 7 purchase and accept delivery of capacity and energy at the 8 voltage level of 12 kV. 9 10 Seller shall provide capacity and energy from its (b) 11 995 kW Facility located at Dinsmore in Humboldt County. 12 13 (c) The scheduled operation date of the Facility is 14 November 1, 1984. At the end of each calendar quarter 15 Seller shall give written notice to PGandE of any change in 16 the scheduled operation date. 17 18 (d) To avoid exceeding the physical limitations of the 19 facilities, Seller shall limit the interconnection 20 Facility's actual rate of delivery into the PGandE system to $\mathbf{21}$ 1,300 kW. 22 23 The primary energy source for the Facility is (e) 24 water. 25 26 If Seller does not begin construction of its (f) 27December 1986. PGandE reallocate Facility by may 28 the existing capacity on PGandE's transmission and/or 5 S.O. #4 May 7, 1984

1 which would have been used distribution system to 2 accommodate Seller's power deliveries to other uses. In the 3 event of such reallocation, Seller shall pay PGandE for the 4 cost of any upgrades or additions to PGandE's system $\mathbf{5}$ necessary to accommodate the output from the Facility. Such 6 additional facilities shall be installed, owned and 7 maintained in accordance with the applicable PGandE tariff. 8 9 (g) The transformer loss adjustment factor is 1.0^{1} . 10 11 ARTICLE 4 ENERGY PRICE 12 13 PGandE shall pay Seller for its net energy output² 14 under the energy payment option checked below³: 15 16 Energy Payment Option 1 - Forecasted Energy Prices Х 17 18 During the fixed price period, Seller shall be 19 paid for energy delivered at prices equal to 80⁴ percent 20 1 If Seller chooses to have meters placed on Seller's side of the 21 transformer, an estimated transformer loss adjustment factor of 2 percent, unless the Parties agree otherwise, will be applied. This $\mathbf{22}$ estimated transformer loss figure will be adjusted to a measurement of actual transformer losses performed at Seller's request and $\mathbf{23}$ expense. 24 2 Insert either "net energy output" or "surplus energy output" to show the energy sale option selected by Seller. 25Energy Payment Option 2 is not available to oil or gas-fired 3 $\mathbf{26}$ cogenerators. 27 Insert either 0, 20, 40, 60, 80, or 100, at Seller's option. If 4 Seller's Facility is an oil or gas-fired cogeneration facility, $\mathbf{28}$ either 0 or 20 must be inserted. 6 S.O. #4 May 7, 1984

of the prices set forth in Table B-1, Appendix B, plus 20¹ percent of PGandE's <u>full short-run</u> avoided <u>operating costs</u>.

For the remaining years of the <u>term of agreement</u>, Seller shall be paid for energy delivered at prices equal to PGandE's <u>full short-run</u> <u>avoided</u> <u>operating</u> <u>costs</u>.

If Seller's <u>Facility</u> is not an oil or gas-fired cogeneration facility, Seller may convert from Energy Payment Option 1 to Energy Payment Option 2 and be subject to the conditions therein, provided that Seller shall not change the percentage of energy prices to be based on PGandE's <u>full short-run avoided operating</u> <u>costs</u>. Such conversion must be made at least 90 days prior to the date of initial energy deliveries and must be made by written notice in accordance with Section A-17, Appendix A.

Energy Payment Option 2 - Levelized Energy Prices

During the <u>fixed price</u> period, Seller shall be paid for energy delivered at prices equal to 2^{2}

Insert the difference between 100 and the percentage selected under footnote 1 above.

7

² Insert either 20, 40, 60, 80, or 100, at Seller's option.

S.O. #4 May 7, 1984 Å

percent of the levelized energy prices set forth in Table B-2, Appendix B for the year in which energy deliveries begin and <u>term of agreement</u>, plus _____1 percent of PGandE's <u>full short-run avoided operating</u> <u>costs</u>. During the <u>fixed price period</u>, Seller shall be subject to the conditions and terms set forth in Appendix B, Energy Payment Option 2.

28

_____.

Capacity Loss Adjustment Factors shall be as shown in Appendix D and Appendix E, dependent upon Seller's capacity election set forth in Article 5 of this Agreement.

Energy Loss Adjustment Factors shall be considered as 7 unity for all energy payments related to Energy Payment 8 Options 1 and 2 set forth in Appendix B for the entire fixed 9 price period of this Agreement, except for the percentage of 10 payments that Seller elected in Article 4 to have calculated 11 based on PGandE's full short-run avoided operating costs. 12 Energy Loss Adjustment Factors for all payments related to 13 PGandE's full short-run avoided operating costs are subject 14 to CPUC rulings for the entire term of agreement. 15

ARTICLE 7 CURTAILMENT

Seller has two options regarding possible curtailment by PGandE of Seller's deliveries, and Seller's selection is indicated below:

22 X Curtailment Option A - Hydro Spill and Negative Avoided 23 Cost

Curtailment Option B - Adjusted Price Period

The two options are described in Appendix C.

11

ARTICLE 8 RETROACTIVE APPLICATION OF CPUC ORDERS

•

۰,

1

2	
3	Pursuant to Ordering Paragraph 1(f) of <u>CPUC</u> Decision
4	No. 83-09-054 (September 7, 1983), after the effective date
5	of the <u>CPUC</u> 's Application 82-03-26 decision relating to line
6	loss factors, Seller has the option to retain the relevant
7	terms of this Agreement or have the results of that decision
8	incorporated into this Agreement. To retain the terms
9	herein, Seller shall provide written notice to PGandE within
10	45 days after receipt of the relevant CPUC decision on
11	Application 82-03-26. Failure to provide such notice will
12	result in the amendment of this Agreement to comply with
13	that decision.
14	
15	As soon as practicable following the issuance of a
16	decision in Application 82-03-26, PGandE shall notify Seller
17	of the effective date thereof and its results.
18	
19	ARTICLE 9 NOTICES
20	
21	All written notices shall be directed as follows:
22	To PGandE: Pacific Gas and Electric Company Attention: Vice President -

		APPENDIX A
	1	GENERAL TERMS AND CONDITIONS
	2	GENERAL IERRS AND CONDITIONS
	3	
	4	A-1 DEFINITIONS
	5	
	6	Whenever used in this Agreement, appendices, and
	7	attachments hereto, the following terms shall have the
	8	following meanings:
	9 10	
	11	Adjusted firm capacity price - The \$/kW-year purchase
	12	price for <u>firm</u> <u>capacity</u> from Table E-2, Appendix E for the
	13	period of Seller's actual performance.
	14	
	15	As-delivered capacity - Capacity delivered to PGandE
	16	in excess of firm capacity or in lieu of a firm capacity
	17	commitment.
	18	
	19	<u>CPUC</u> - The Public Utilities Commission of the State
	2 0	of California.
	21	
	2 2	Current firm capacity price - The \$/kW-year capacity
	2 3	price from PGandE's firm capacity price schedule effective
	24	at the time PGandE derates the <u>firm</u> <u>capacity</u> pursuant to
	2 5	Section E-4(b), Appendix E or Seller terminates performances
	2 6	under this Agreement, for a term equal to the period from
	27	
	28	A-2 S.O. #4

Ś

Designated PGandE switching center - That switching identified in installation PGandE other center or Article 10.

Facility - That generation apparatus described in Article 3 and all associated equipment owned, maintained, and operated by Seller.

Firm capacity - That capacity, if any, identified as firm in Article 5 except as otherwise changed as provided herein.

Firm capacity availability date - The day following the day during which all features and equipment of the Facility are demonstrated to PGandE's satisfaction to be capable of operating simultaneously to deliver firm capacity continuously into PGandE's system as provided in this Agreement.

Firm capacity price - The price for firm capacity **2**3 applicable for the firm capacity availability date and the number of years of firm capacity delivery from the firm **2**5 capacity price schedule, Table E-2, Appendix E. 26

A-3

<u>Firm capacity price schedule</u> - The periodically published schedule of the \$/kW-year prices that PGandE offers to pay for <u>firm capacity</u>. See Table E-2, Appendix E.

E

<u>Fixed price period</u> - The period during which forecasted or levelized energy prices, and/or forecasted <u>as-delivered capacity</u> prices, are in effect; defined as the first five years of the <u>term of agreement</u> if the <u>term of</u> <u>agreement</u> is 15 or 16 years; the first six years of the <u>term</u> <u>of agreement</u> if the <u>term of agreement</u> is 17, 18, or 19 years; or the first ten years of the <u>term of agreement</u> if the <u>term of agreement</u> is anywhere from 20 through 30 years.

<u>Forced outage</u> - Any outage resulting from a design defect, inadequate construction, operator error or a breakdown of the mechanical or electrical equipment that fully or partially curtails the electrical output of the Facility.

<u>Full</u> <u>short-run</u> <u>avoided</u> <u>operating</u> <u>costs</u> -<u>CPUC</u>-approved costs which are the basis of PGandE's published energy prices. PGandE's current energy price calculation is shown in Table B-5, Appendix B. PGandE's published off-peak hours' prices shall be adjusted, as appropriate, if Seller has selected Curtailment Option B.

A-4

Interconnection facilities - All means required and apparatus installed to interconnect and deliver power from the Facility to the PGandE system including, but not limited switching, metering, transformation, connection, to, communications, and safety equipment, such as equipment required to protect (1) the PGandE system and its customers from faults occurring at the Facility, and (2) the Facility from faults occurring on the PGandE system or on the systems of others to which the PGandE system is directly or Interconnection facilities also indirectly connected. include any necessary additions and reinforcements by PGandE a result of the system required as PGandE the to interconnection of the Facility to the PGandE system.

25

26

27

28

<u>Scheduled</u> operation <u>date</u> - The day specified in Article 3(c) when the <u>Facility</u> is, by Seller's estimate, expected to produce energy that will be available for delivery to PGandE.

<u>Special facilities</u> - Those additions and reinforcements to the PGandE system which are needed to accommodate the maximum delivery of energy and capacity from the <u>Facility</u> as provided in this Agreement and those parts of the <u>interconnection facilities</u> which are owned and maintained by PGandE at Seller's request, including metering and data processing equipment. All <u>special facilities</u> shall be owned, operated, and maintained pursuant to PGandE's electric Rule No. 21, which is attached hereto.

<u>Station use</u> - Energy used to operate the <u>Facility's</u> auxiliary equipment. The auxiliary equipment includes, but is not limited to, forced and induced draft fans, cooling towers, boiler feed pumps, lubricating oil systems, plant lighting, fuel handling systems, control systems, and sump pumps.

Surplus energy output - The Facility's gross output, in kilowatt-hours, less station use, and any other use by

s.o. #4 A-6 May 7, 1984

Seller, and transformation and transmission losses to the point of delivery into the PGandE system.

<u>Term of agreement</u> - The number of years this Agreement will remain in effect as provided in Article 12.

<u>Voltage</u> <u>level</u> - The voltage at which the <u>Facility</u> interconnects with the PGandE system, measured at the point of delivery.

A-2 CONSTRUCTION

A-2.1 Land Rights

Seller hereby grants to PGandE all necessary rights 15 of way and easements, including adequate and continuing 16 access rights on property of Seller, to install, operate, 17 replace, and remove the special facilities. maintain, 18 Seller agrees to execute such other grants, deeds, or 19 documents as PGandE may require to enable it to record such **2**0 rights of way and easements. If any part of PGandE's 21 equipment is to be installed on property owned by other than 22 Seller, Seller shall, at its own cost and expense, obtain 23 from the owners thereof all necessary rights of way and 24 easements, in a form satisfactory to PGandE, for the **2**5 construction, operation, maintenance, and replacement of **2**6 PGandE's equipment upon such property. If Seller is unable 27

to obtain such rights of way and easements, Seller shall reimburse PGandE for all costs incurred by PGandE in obtaining them. PGandE shall at all times have the right of ingress to and egress from the Facility at all reasonable for any purposes reasonably connected with this hours Agreement or the exercise of any and all rights secured to PGandE by law or its tariff schedules.

and Maintenance Construction, Ownership, A-2.2 Design,

(a) Seller shall design, construct, install, own, operate, and maintain all interconnection facilities, except special facilities, to the point of interconnection with the 13 PGandE system as required for PGandE to receive capacity and energy from the Facility. The Facility and interconnection 15 facilities shall meet all requirements of applicable codes 16 and all standards of prudent electrical practices and shall 17 be maintained in a safe and prudent manner. A description 18 of the interconnection facilities for which Seller is solely 19 the in Appendix F, if OT forth set responsible is **2**0 interconnection requirements have not yet been determined at 21 the time of the execution of this Agreement, the description 22 of such facilities will be appended to this Agreement at the 23 time such determination is made. 24

Seller shall submit to PGandE the design and all (b) specifications for the interconnection facilities (except special facilities) and, at PGandE's option, the Facility,

28

Seller shall deliver the energy at the point where Seller's electrical conductors (or those of Seller's agent) contact PGandE's system as it shall exist whenever the deliveries are being made or at such other point or points as the Parties may agree in writing. The initial point of delivery of Seller's power to the PGandE system is set forth in Appendix F.

A-3.4 Operating Communications

(a) Seller shall maintain operating communications with the <u>designated PGandE switching center</u>. The operating communications shall include, but not be limited to, system paralleling or separation, scheduled and unscheduled shutdowns, equipment clearances, levels of operating voltage or power factors and daily capacity and generation reports.

(b) Seller shall keep a daily operations log for each generating unit which shall include information on unit availability, maintenance outages, circuit breaker trip operations requiring a manual reset, and any significant events related to the operation of the <u>Facility</u>.

(c) If Seller makes deliveries greater than one megawatt, Seller shall measure and register on a graphic recording device power in kW and voltage in kV at a location

> A-12 S.O. #4 May 7, 1984

within the Facility agreed to by both Parties.

1

2

3

4

5

6

7

22

23

24

(d) If Seller makes deliveries greater than one and up to and including ten megawatts, Seller shall report to the <u>designated PGandE</u> <u>switching center</u>, twice a day at agreed upon times for the current day's operation, the hourly readings in kW of capacity delivered and the energy in kWh delivered since the last report.

If Seller makes deliveries of greater than ten (e) 10 megawatts, Seller shall telemeter the delivered capacity and 11 energy information, including real power in kW, reactive 12 power in kVAR, and energy in kWh to a switching center 13 selected by PGandE. PGandE may also require Seller to 14 telemeter transmission kW, kVAR, and kV data depending on 15 the number of generators and transmission configuration. 16 Seller shall provide and maintain the data circuits required 17 for telemetering. When telemetering is inoperative, Seller 18 shall report daily the capacity delivered each hour and the 19 energy delivered each day to the designated PGandE switching **2**0 center. 21

A-3.5 Meter Testing and Inspection

(a) All meters used to provide data for the
computation of the payments due Seller from PGandE shall be
sealed, and the seals shall be broken only by PGandE when
the meters are to be inspected, tested, or adjusted.

A-13

(b) PGandE shall inspect and test all meters upon their installation and annually thereafter. At Seller's request and expense, PGandE shall inspect or test a meter more frequently. PGandE shall give reasonable notice to Seller of the time when any inspection or test shall take place, and Seller may have representatives present at the test or inspection. If a meter is found to be inaccurate or defective, PGandE shall adjust, repair, or replace it at its expense in order to provide accurate metering.

I

Energy Payment Option 2 - Levelized Energy Prices

Pursuant to Article 4, the energy payment calculation for Seller's energy deliveries during the <u>fixed price period</u> shall include the appropriate prices set forth in Table B-2 for the year in which energy deliveries begin and <u>term of</u> <u>agreement</u>, multiplied by the percentage Seller has specified in Article 4. If Seller has selected Curtailment Option B in Article 7, the levelized off-peak hours' energy prices listed in Table B-2 shall be adjusted upward by 7.7% for Period A and 9.6% for Period B. The discount specified in (c)(vi) below, if applicable, will be applied to the energy payments during the <u>fixed price period</u>.

During the <u>fixed price period</u>, Seller shall be subject to the following conditions and terms:

(a) Minimum Damages

1

2

3

4

5

6

7

8

9

16

17

18

19

20

21

22

23

24

25

26

27

28

The Parties agree that the levelized energy prices which PGandE pays Seller for the energy which Seller delivers to PGandE is based on the agreed value to PGandE of Seller's energy deliveries during the entire <u>fixed price period</u>. In the event PGandE does not receive such full performance by reason of a termination, Seller shall pay PGandE an amount based on the difference between the net present values, at the

time of termination, of the payments Seller would receive at the forecasted energy prices in Table B-1 and the payments Seller would receive at the levelized energy prices, for the remaining years of the <u>fixed</u> <u>price period</u>. This amount shall be calculated by assuming that Seller continued to generate for the remaining years of the <u>fixed price period</u> at a level equal to the average annual energy generation during the period of performance, and by applying the weighted annual average levelized price applicable to Seller's <u>Facility</u> and the weighted annual average forecasted energy prices in Table B-1 for the remaining years of the <u>fixed price period</u>. The following formula shall be used to make this calculation:

$$P = \sum_{n=1}^{Y} \frac{(F_n)(A)(W)}{(1.15)^n} - \sum_{n=1}^{Y} \frac{(L)(A)(W)}{(1.15)^n}$$

where:

27

28

P = amount due PGandE.

B-4

Y = number of years remaining in the <u>fixed price</u> period.

 F_n = weighted annual average forecasted energy price in the nth year after the breach, failure to perform, or expiration of security, as shown in Table B-1 for the corresponding calendar year.

1	L = weighted annual average levelized energy
2	price applicable to Seller's Facility.
3	A = average annual energy generation by Seller
4	during the period of performance.
5	$n = summation index;$ refers to the n^{th} year
6	following termination.
7	<pre>W = percent of Seller's energy payments based on</pre>
8	the levelized energy prices, as specified in
9	Article 4.
10	
11	(b) Performance Requirements
12	
13	Seller shall operate and maintain the Facility in
14	accordance with prudent electrical practices in order
15	to maximize the likelihood that the Facility's output
16	as delivered to PGandE during the part of the fixed
17	price period when the levelized price is below the
18	forecasted price ("last part") shall equal or exceed
19	70% of the Facility's output during the part of the
2 0	fixed price period when the levelized price is above
21	the forecasted price ("first part"). In the event that
2 2	the Facility's output during any year or series of
2 3	years in the last part of the fixed price period is
2 4	less than 70% of the average annual production during
2 5	the first part of the <u>fixed price period</u> , PGandE may,
2 6	at its discretion (taking into consideration events
27	occurring during such year or series of years such as
28	curtailment by PGandE, Seller's choice not to operate
	B-5 S.O. #4

May 7, 1984

I

during adjusted price periods, or scheduled maintenance including major overhauls, and the probability that Seller's future performance will be adequate), either request payment from Seller or immediately draw on the security posted, up to the amount equal to $P \ge \frac{A-B}{A}$, where:

P and A are as defined in Section (a) above.
B = Seller's average annual energy generation during the year or series of years in which the 70% performance requirement was not met.

PGandE shall not request payment from Seller or draw on the security posted if the <u>Facility's</u> output during the last part of the <u>fixed price period</u> falls below 70% of the average annual energy generation during the first part of the <u>fixed price period</u> solely because of force majeure as defined in Section A-8, Appendix A or a lack of or limited availability of the primary energy resource of the <u>Facility</u>, if such energy resource is wind, water, or sunlight.

L

- R = nameplate rating, in kW, of the Facility.
- C = estimated capacity factor of the <u>Facility</u>, which shall be established by mutual agreement of the Parties at the time of execution of this Agreement.
- H = number of hours from the <u>scheduled</u> <u>operation</u> <u>date</u> through the end of the following calendar year.
- (ii) In the second calendar year of operation and each year thereafter until the end of the <u>fixed price period</u>, from December 1 through December 1 of the following year, security shall be in place in an amount calculated by the formula set forth in Section (a) above assuming Seller continued to deliver energy in each month through the end of the following calendar year, at a level equal to the average monthly energy deliveries to date, and then terminated this Agreement.

S.O. #4 May 7, 1984

B-9

(3) Security must be maintained throughout the <u>fixed</u> <u>price period</u> as specified above. Any security with a fixed expiration date must be renewed by Seller prior to that date. If such security is not renewed at least 30 days prior to its expiration, PGandE may, at its discretion, either request payment from Seller or immediately draw on the security posted, up to the amount calculated in accordance with the formula set forth in Section (a) above.

TABLE B-5

ENERGY PRICES

Energy Prices Effective May 1 - July 31, 1984

The energy purchase price calculations which will apply to energy deliveries determined from meter readings taken during May, June and July 1984 are as follows:

(a)	(b)	(c) Revenue Requirement	(d) Energy Purchase Price ⁴
Incremental Energy Rate ¹ (Btu/kWh)	Cost of Energy ² (\$/10 ⁸ Btu)	for Cash <u>Working Capital³</u> (\$/kWh)	$\frac{(d) = [(a) \times (b)] + (c)}{(8/kWh)}$
			0.07446
13,674	5.4152		0.06896
12,665			0.05513
10,119	5,4152	0.00033	
11,538	5.4152	0.00036	0.06284
	Incremental Energy Rate ¹ (Btu/kWh) 13,674 12,665 10,119	Incremental Cost of Energy ² [Btu/kWh] Cost of Energy ² (\$/10 ⁸ Btu) (\$/10 ⁸ Btu) 13.674 5.4152 12.665 5.4152 10,119 5.4152	(a) (b) Revenue Requirement for Cash Incremental Energy Rate ¹ Cost of Energy ² Working Capital ³ (Btu/kWh) (\$/10 ⁸ Btu) (5/kWh) 13,674 5.4152 0.00041 12,665 5.4152 0.00036 10,119 5.4152 0.00033

Incremental energy rates (Btu/kWh) for Seasonal Period A are derived from the marginal energy costs (including variable operating and maintenance expense) adopted by the CPUC in Decision 1 No. 83-12-068 (page 339). They are based upon natural gas as the incremental fuel and weighted average hydroelectric power conditions.

Cost of natural gas under PGandE Gas Schedule No. G-55 effective April 18, 1984 per Advice 2 No. 1261-G.

Revenue Requirement for Cash Working Capital as prescribed by the CPUC in Decision No. 83-12-068. 3

Energy Purchase Price = (Incremental Energy Rate x Cost of Energy) + Revenue Requirement for Cash Working Capital. The energy purchase price excludes the applicable energy line loss adjustment 4 factors. However, as ordered by Ordering Paragraph No. 12(j) of CPUC Decision No. 82-12-120, this figure is currently 1.0 for transmission and primary distribution loss adjustments and is equal to marginal cost line loss adjustment factors for the secondary distribution voltage level. These factors may be changed by the CPUC in the future. The currently applicable energy loss adjustment factors are shown in Table C.

1	APPENDIX C
2	CURTAILMENT OPTIONS
3	
4	Seller has two options regarding curtailment of energy
5	deliveries and Seller has made its selection in Article 7.
6	The two options are as follows:
7	
8	CURTAILMENT OPTION A - HYDRO SPILL AND NEGATIVE AVOIDED COST
9	(a) In anticipation of a period of hydro spill
10	(a) In anticipation of a period of hyper of conditions, as defined by the <u>CPUC</u> , PGandE may notify Seller
11 12	that any purchases of energy from Seller during such period
12	shall be at hydro savings prices quoted by PGandE. If
14	Seller delivers energy to PGandE during any such period,
15	Seller shall be paid hydro savings prices for those
16	deliveries in lieu of prices which would otherwise be
17	applicable. The hydro savings prices shall be calculated by
18	PGandE using the following formula:
19	
2 0	$\frac{AQF - S}{AQF} \times PP \qquad (\geq 0)$
21	
2 2	a superior to be available
2 3	and the second s
24	
25	qualifying fueries price provisions.

(

- Potential energy, in kWh, from PGandE hydro S = facilities which will be spilled if all AQF is delivered to PGandE.
- Prices published by PGandE for purchases PP = during other than hydro spill conditions.

PGandE shall give Seller notice of general periods when hydro spill conditions are anticipated, and shall give Seller as much advance notice as practical of any specific hydro spill period and the hydro savings price which will be applicable during such period.

(b) PGandE shall not be obligated to accept or pay for and may require Seller with a Facility with a nameplate rating of one megawatt or greater to interrupt or reduce deliveries of energy during periods when PGandE would incur negative avoided costs (as defined by the <u>CPUC</u>) due to continued acceptance of energy deliveries under this Whenever possible, PGandE shall give Seller Agreement. reasonable notice of the possibility that interruption or reduction of deliveries may be required.

(c) Before interrupting or reducing deliveries under subsection (b), above, and before invoking hydro savings : prices under subsection (a), above, PGandE shall take reasonable steps to make economy sales of the surplus energy **2**6 If such economy sales are giving rise to the condition. 27 made, while the surplus energy condition exists Seller shall 28

(d) If Seller is selling <u>net energy output</u> to PGandE and simultaneously purchasing its electrical needs from PGandE and Seller elects not to sell energy to PGandE at the hydro savings price pursuant to subsection (a) or when PGandE curtails deliveries of energy pursuant to subsection (b), Seller shall not use such energy to meet its electrical needs but shall continue to purchase all its electrical needs from PGandE. If Seller is selling <u>surplus energy</u> <u>output</u> to PGandE, subsections (a) or (b) shall only apply to the <u>surplus energy output</u> being delivered to PGandE, and Seller can continue to internally use that generation it has retained for its own use.

CURTAILMENT OPTION B - ADJUSTED PRICE PERIOD

(a) In each calendar year, the price which PGandE is obligated to pay Seller for energy deliveries during 1,000 off-peak hours (as defined in Table B-4, Appendix B) may be adjusted to a price equal to, but not in excess of, PGandE's available alternative source. This adjusted price shall be effective under any of the following conditions:

> (i) when PGandE's energy source at the margin is not a PGandE oil- or gas-fueled plant, and PGandE

> > C-3

can replace Seller's energy with energy from this 1 source at a cost less than the price paid to Seller; 2 3 (ii) when PGandE would incur negative avoided 4 costs (as defined by the CPUC) due to continued 5 acceptance of energy deliveries under this Agreement; 6 7 or 8 (iii) when PGandE is experiencing minimum system 9 operations. 10 11 During any of the conditions described above the 12 adjusted price may be zero. 13 14 Seller shall give (b) Whenever possible, PGandE 15 reasonable notice of any price adjustment for energy 16 deliveries and its probable duration. 17 18 If Seller is selling net energy output to PGandE 19 (c) and simultaneously purchasing its electrical needs from **2**0 PGandE and Seller elects not to sell energy to PGandE at the 21 adjusted price, Seller shall not use such energy to meet its **2**2 electrical needs but shall continue to purchase all its **2**3 electrical needs from PGandE. 24 **2**5 (d) After Seller receives notice of the probable **2**6 duration of the period during which the adjusted price will 27 be paid, Seller may elect to perform maintenance during such 28 S.O. #4 C-4

May 7, 1984

period and so inform the PGandE employee in charge at the designated PGandE switching center prior to the time when the adjusted price period is expected to begin. If Seller makes such election, the number of off-peak hours of probable duration guoted in PGandE's notice to Seller shall be applied to the 1,000-hour calendar year limitation set forth in this section. After an election to do maintenance, if Seller makes any deliveries of energy during the quoted probable duration period, Seller shall be paid the adjusted price quoted in its notice from PGandE without regard to any subsequent changes on the PGandE system which may alter the adjusted price or shorten the actual duration of the condition.
2 designated PGandE switching center prior to the time when 3 the adjusted price period is expected to begin. If Seller 4 makes such election, the number of off-peak hours of 5 probable duration quoted in PGandE's notice to Seller shall 6 be applied to the 1,000-hour calendar year limitation set 7 forth in this section. After an election to do maintenance, 8 if Seller makes any deliveries of energy during the quoted 9 probable duration period, Seller shall be paid the adjusted 10 price quoted in its notice from PGandE without regard to any 8 subsequent changes on the PGandE system which may alter the 12 adjusted price or shorten the actual duration of the 13 condition.
2 designated PGandE switching center prior to the time when 3 the adjusted price period is expected to begin. If Seller 4 makes such election, the number of off-peak hours of 5 probable duration quoted in PGandE's notice to Seller shall 6 be applied to the 1,000-hour calendar year limitation set 7 forth in this section. After an election to do maintenance, 8 if Seller makes any deliveries of energy during the quoted 9 probable duration period, Seller shall be paid the adjusted 10 price quoted in its notice from PGandE without regard to any 8 subsequent changes on the PGandE system which may alter the 12 adjusted price or shorten the actual duration of the 13 condition.
2 designated PGandE switching center prior to the time when 3 the adjusted price period is expected to begin. If Seller 4 makes such election, the number of off-peak hours of 5 probable duration quoted in PGandE's notice to Seller shall 6 be applied to the 1,000-hour calendar year limitation set 7 forth in this section. After an election to do maintenance, 8 if Seller makes any deliveries of energy during the quoted 9 probable duration period, Seller shall be paid the adjusted 10 price quoted in its notice from PGandE without regard to any 8 subsequent changes on the PGandE system which may alter the 12 adjusted price or shorten the actual duration of the 13 condition.
the adjusted price period is expected to begin. If Seller makes such election, the number of off-peak hours of probable duration quoted in PGandE's notice to Seller shall be applied to the 1,000-hour calendar year limitation set forth in this section. After an election to do maintenance, if Seller makes any deliveries of energy during the quoted probable duration period, Seller shall be paid the adjusted price quoted in its notice from PGandE without regard to any subsequent changes on the PGandE system which may alter the adjusted price or shorten the actual duration of the condition.
4makes such election, the number of off-peak hours of5probable duration quoted in PGandE's notice to Seller shall6be applied to the 1,000-hour calendar year limitation set7forth in this section. After an election to do maintenance,8if Seller makes any deliveries of energy during the quoted9probable duration period, Seller shall be paid the adjusted10price quoted in its notice from PGandE without regard to any11subsequent changes on the PGandE system which may alter the12adjusted price or shorten the actual duration of the14151617
probable duration guoted in PGandE's notice to Seller shall be applied to the 1,000-hour calendar year limitation set forth in this section. After an election to do maintenance, if Seller makes any deliveries of energy during the quoted probable duration period, Seller shall be paid the adjusted price quoted in its notice from PGandE without regard to any subsequent changes on the PGandE system which may alter the adjusted price or shorten the actual duration of the condition.
6 be applied to the 1,000-hour calendar year limitation set 7 forth in this section. 	APPENDIX D
1	AFFENDIX D AS-DELIVERED CAPACITY
2 3	
4	D-1 AS-DELIVERED CAPACITY PAYMENT OPTIONS
5	
6	Seller has two options for as-delivered capacity
7	payments and Seller has made its selection in Article 5.
8	The two options are as follows:
9	
10	AS-DELIVERED CAPACITY PAYMENT OPTION 1
11	
12	PGandE shall pay Seller for <u>as-delivered</u> capacity at
13	prices authorized from time to time by the CPUC. The
14	
15	execution are calculated as shown in Exhibit D-1.
16	
17	AS-DELIVERED CAPACITY PAYMENT OPTION 2
18	the scale livered
19	
	capacity prices will be calculated in accordance with
20	D-1 S.O. #4
	May /, 1984
13 14 15 16 17 18	prices authorized from time to time by the <u>CPUC</u> . The <u>as-delivered capacity</u> prices in effect on the date of execution are calculated as shown in Exhibit D-1. AS-DELIVERED CAPACITY PAYMENT OPTION 2 During the <u>fixed price period</u> , the <u>as-delivered</u> <u>capacity</u> prices will be calculated in accordance with Exhibit D-1 and the forecasted shortage costs in Table D-2. For the remaining years of the <u>term of agreement</u> , PGandE shall pay Seller for <u>as-delivered capacity</u> at the

. •

(

1

The <u>as-delivered</u> <u>capacity</u> price (in cents per kW-hr) for power delivered by the <u>Facility</u> is the product of three factors:

(a) The shortage cost in each year the <u>Facility</u>
 is operating. Currently, this shortage cost is \$156
 per kW-year.

(b) A capacity loss adjustment factor which provides for the effect of the deliveries on PGandE's transmission and distribution losses based on the Seller's interconnection voltage level. The applicable capacity loss adjustment factors for non-remote¹ Facilities are presented in Table D-1(a). Capacity loss adjustment factors for remote Facilities shall be calculated individually.

(c) An allocation factor which accounts for the different values of <u>as-delivered capacity</u> in different time periods and converts dollars per kW-year to cents per kWh. The current allocation factors are presented in Table D-1(b). The time periods to which they apply are shown in Table B-4, Appendix B. The allocation factors are subject to change from time to time.

	1	APPENDIX E
~	2	FIRM CAPACITY
	3	
	4	E-1 GENERAL
	5	
	6	This Appendix E establishes conditions and prices under
	7	which PGandE shall pay for firm capacity.
	8	
	9	PGandE's obligation to pay for firm capacity shall
	10	begin on the firm capacity availability date. The firm
	11	capacity price shall be subject to adjustment as provided
	12	for in this Appendix E.
	13	in mable E 2 are applicable
i ⊊ç∕	14	The <u>firm capacity prices</u> in Table E-2 are applicable
	15	for deliveries of firm capacity beginning after December 30,
	16	1982.
	17	
	18	E-2 PERFORMANCE REQUIREMENTS
	19	(a) To receive full capacity payments, the firm
	2 0	capacity shall be delivered for all of the on-peak hours ¹ in
	21	the peak months on the PGandE system, which are presently
	2 2 2 3	the months of June, July, and August, subject to a 20
	2 3 2 4	percent allowance for <u>forced</u> <u>outages</u> in any month.
	2 4 2 5	Compliance with this provision shall be based on the
	2 6	deliveries for each of the peak
	20 27	
	28	1 On-peak, partial-peak, and off-peak hours are defined in Table B-4,
		Appendix B. E-2 S.O. #4 May 7, 1984

(

months and shall exclude any energy associated with generation levels greater than the <u>firm capacity</u>.

24

25

26

27

28

(b) If Seller is prevented from meeting the performance requirements because of a forced outage on the PGandE system, a PGandE curtailment of Seller's deliveries, or a condition set forth in Section A-7, Appendix A, PGandE shall continue capacity payments. <u>Firm capacity</u> payments will be calculated in the same manner used for scheduled maintenance outages.

(c) If Seller is prevented from meeting the performance requirements because of force majeure, PGandE shall continue capacity payments for ninety days from the occurrence of the force majeure. Thereafter, Seller shall be deemed to have failed to have met the performance requirements. <u>Firm capacity</u> payments will be calculated in the same manner used for scheduled maintenance outages.

(d) If Seller is prevented from meeting the performance requirements because of exteme dry year conditions, PGandE shall continue capacity payments. Extreme dry year conditions are drier than those used to establish firm capacity pursuant to Section E-8. Seller shall warrant to PGandE that the Facility is a hydroelectric facility and that such conditions are the sole cause of Seller's inability to meet its firm capacity obligations.

S.O. #4 May 7, 1984

E-3

(e) If Seller is prevented from meeting the performance requirements for reasons other than those described above in Sections E-2(b), (c), or (d):

(1) Seller shall receive the reduced <u>firm</u> <u>capacity</u> payments as provided in Section E-5 for a probationary period not to exceed 15 months, or as otherwise agreed to by the Parties.

(2) If, at the end of the probationary period Seller has not demonstrated that the <u>Facility</u> can meet the performance requirements, PGandE may derate the <u>firm capacity</u> pursuant to Section E-4(b).

10

11

12

13

14

Outage periods for scheduled maintenance shall not 15 exceed 840 hours (35 days) in any 12-month period. This 16 allowance may be used in increments of an hour or longer on 17 Seller may nonconsecutive basis. consecutive or а 18 accumulate unused maintenance hours from one 12-month period 19 to another up to a maximum of 1,080 hours (45 days). This **2**0 accrued time must be used consecutively and only for major 21 overhauls. Seller shall provide PGandE with the following 22 advance notices: 24 hours for scheduled outages less than 23 one day, one week for a scheduled outage of one day or more 24 ÷. (except for major overhauls), and six months for a major 25 overhaul. Seller shall not schedule major overhauls during **2**6 the peak months (presently June, July and August). Seller 27 shall make reasonable efforts to schedule or reschedule 28

> S.O. **#**4 May 7, 1984

routine maintenance outside the peak months, and in no event shall outages for scheduled maintenance exceed 30 peak hours during the peak months. Seller shall confirm in writing to PGandE pursuant to Article 9, within 24 hours of the original notice, all notices Seller gives personally or by telephone for scheduled maintenance.

If Seller has selected Curtailment Option B, off-peak hours of maintenance performed pursuant to Section (d) of Curtailment Option B, Appendix C shall not be deducted from Seller's scheduled maintenance allowances set forth above.

(a) Seller may increase the <u>firm capacity</u> with the
approval of PGandE and receive payment for the additional
capacity thereafter in accordance with the applicable
capacity purchase price published by PGandE at the time the
increase is first delivered to PGandE.

(b) Seller may reduce the <u>firm capacity</u> at any time prior to the <u>firm capacity availability date</u> by giving written notice thereof to PGandE. PGandE may derate the <u>firm capacity</u> in accordance with Section E-2(e) as a result of appropriate data showing Seller has failed to meet the performance requirements of Section E-2.

> S.O. #4 May 7, 1984

E-5 FIRM CAPACITY PAYMENTS

1

2

3

4

5

6

7

8

9

10

17

18

19

The method for calculation of firm capacity payments is shown below. As used below in this section, month refers to a calendar month.

The monthly payment for firm capacity will be the product of the Period Price Factor (PPF), the Monthly Delivered Capacity (MDC), the appropriate capacity loss adjustment factor from Table E-1 based on the Facility's interconnection voltage, and the appropriate performance 11 bonus factor, if any, from Table E-3, plus any allowable 12 payment for outages due to scheduled maintenance. The firm 13 capacity price shall be applied to meter readings taken 14 during the separate times and periods as illustrated in 15 Table B-4, Appendix B. 16

The PPF is determined by multiplying the firm capacity price by the following Allocation Factors¹:

n 17

2 0		Allocation Factor	X Capa	<u>Firm</u> = city Price	PPF (\$/kW-month)
21	Seasonal	.18540			
22	Period A	.10340			
2 3	Seasonal Period B	.01043	·		
24	v Period D				
2 5					onus in Desision
2 6	1 These	allocation facto	ors were pr llocation f	escribed by the factors are sub	e <u>CPUC</u> in Decision ject to change by st allocation, as
27	PGano	E based on PGand	E.P. Wordtu	musesedings	before the CPUC.
28	Gete Seas	onal Periods A an	d B are d		
			E-6	S.O. # May 7,	4 1984
	11			_	

The MDC is determined in the following manner:

(1) Determine the Performance Factor (P), which is defined as the lesser of 1.0 or the following quantity:

 $P = \frac{A}{C \times (B-S) \times (0.8^*)} \quad (\le 1.0)$

Where:

28

A = Total kilowatt-hours delivered during all on-peak and partial-peak hours excluding any energy associated with generation levels greater than the firm capacity.

C = <u>Firm</u> <u>capacity</u> in kilowatts.

- B = Total on-peak and partial-peak hours during the month.
 - S = Total on-peak and partial-peak hours during the month <u>Facility</u> is out of service on scheduled maintenance.

(2) Determine the Monthly Capacity Factor (MCF), which is computed using the following expression:

 $MCF = P \times (1.0 - \frac{M}{D})$

Where:

*

Ľ

M = The number of hours during the month <u>Facility</u> is out of service on scheduled maintenance.
 D = The number of hours in the month.

0.8 reflects a 20% allowance for forced outage.

E-7	S.O. #4
_ <i>i</i>	May 7, 1984

(3) Determine the MDC by multiplying the MCF by C: MDC (kilowatts) = MCF x C

capacity loss

The monthly payment for <u>firm capacity</u> is then determined by multiplying the PPF by the MDC, by the appropriate capacity loss adjustment factor presented from Table E-1, and by the appropriate performance bonus factor, if any, from Table E-3.

(1) Release requirements for support of fish life and any other operating constraints imposed on the project;

(2) Operating characteristics of the proposed equipment of the <u>Facility</u> such as efficiencies, minimum and maximum operating levels, project control procedures, etc.;

(3) The design characteristics of project facilities
such as head losses in penstocks, valves, tailwater
elevation levels, etc.; and

(4) Release requirements for purposes other than power 14 generation such as irrigation, domestic water supply, etc. 15 The theoretical operation study for each month shall 16 assume an even distribution of generation throughout the 17 month unless Seller can demonstrate that the Facility has 18 For the study to show water storage characteristics. 19 monthly capacity ratings, the Facility shall be capable of **2**0 operating during all on-peak hours in the peak months on the 21 PGandE system, which are presently the months of June, July, **2**2 If the project does not have this capability and August. **2**3 throughout each such month, the capacity rating in that 24 month of that year shall be set at zero for purposes of this 4 **2**5 theoretical operation study. **2**6

> S.O. #4 May 7, 1984

DETERMINATION OF AVERAGE DRY YEAR CAPACITY RATINGS E-8

Based on the results of the theoretical operation study developed under Section E-7, the average dry year capacity rating shall be established for each month. The average dry year shall be based on the average of the five years of the 6 shown in the theoretical lowest annual generation as 7 lowest annual years of Once such 8 study. operation generation are identified, the monthly capacity rating is 9 determined for each month by averaging the capacity ratings 10 from each month of those years. The firm capacity shown in 11 Article 5 shall not exceed the lowest average dry year 12 monthly capacity ratings for the peak months on the PGandE 13 system, which are presently the months of June, July, and 14 15 August.

INFORMATION REQUIREMENTS 17 E-9

1

2

3

4

5

16

18

Seller shall provide the following information to 19 **2**0 PGandE for its review:

(1) A summary of the average dry year capacity ratings 21 based on the theoretical operation study as provided in **2**2 **2**3 Table E-4;

(2) A topographic project map which shows the location 24 of all aspects of the Facility and locations of stream **2**5 gauging stations used to determine natural flow data; **2**6 (3) A discussion of all major factors relevant to 27

28 project operation;

> S.O. #4 May 7, 1984

(4) A discussion of the methods and procedures used to establish the natural flow data. This discussion shall be in sufficient detail for PGandE to determine that the methods are consistent with those outlined in Section E-6 and are consistent with generally accepted engineering practices; and

(5) Upon specific written request by PGandE, Seller's theoretical operation study.

10 E-10 ILLUSTRATIVE EXAMPLE

1

2

3

4

5

6

7

8

9

11

21

flows are These flows natural (1) Determine 12 developed based on historic stream gauging records and are 13 compiled by month, for a long-term period (normally at least 14 periods which which covers dry more) years or 15 50 historically occurred in the 1920's and 30's and more 16 recently in 1976 and 77. In all but unusual situations this 17 will require application of hydrological engineering methods 18 to records that are available, primarily from the USGS 19 publication "Water Resources Data for California". **2**0

(2) Perform theoretical operation study - Using the **2**2 natural flow data compiled under (1) above a theoretical **2**3 operation study is prepared which determines, for each month 24 of each year, energy generation (kWh) and capacity rating **2**5 This study is performed based on the Facility's **2**6 (kW). operating capabilities, constraints, etc., and 27 design, should take into account all factors relevant to project 28

> S.O. #4 May 7, 1984

operation. Generally such a study is done by computer which features, project flows through natural the routes considering additions and withdrawals from storage, spill past the project, releases for support of fish life, etc., to determine flow available for generation. Then the generation and capacity amounts are computed based on equipment performance, efficiencies, etc.

24

25

26

27

28

(3) Determine average dry year capacity ratings -After the theoretical project operation study is complete the five years in which the annual generation (kWh) would have been the lowest are identified. Then for each month, the capacity rating (kW) is averaged for the five years to arrive at a monthly average capacity rating. The firm capacity is then set by the Seller based on the monthly average dry year capacity ratings and the performance 16 requirements of this appendix. An example project is shown in the attached completed Table E-4. 18

Revised Cal. P.U.C. Sheet No. <u>B616-E</u> Cancelling <u>Original</u> Cal. P.U.C. Sheet No. <u>7693-E</u>

		RULE NO. 21 NONUTILITY-OWNED PARALLEL GENERATION	(1)
gen sou	erati: rces :	cribes the minimum operation, metering and interconnection requirements for any ng source or sources paralleled with the Utility's electric system. Such source or nay include, but are not limited to, hydroelectric generators, wind-turbine generators, gas driven turbine generators and photovoltaic systems.	
٨.	CEN	ERAL	
	1.	The type of interconnection and voltage available at any location and the Utility's specific interconnection requirements shall be determined by inquiry at the Utility's local office.	
	2.	The Utility's distribution and transmission lines which are an integral part of its overall system are distinguished by the voltages at which they are operated. Distribution lines are operated at voltages below 60 kv and transmission lines are operated at voltages 60 kv and higher.	(N) (N)
	3.	The Power Producer (Producer) shall ascertain and be responsible for compliance with the requirements of all governmental authorities having jurisdiction.	
	4.	The Producer shall sign the Utility's written form of power purchase agreement or parallel operation agreement before connecting or operating a generating source in parallel with the Utility's system.	
	5.	The Producer shall be fully responsible for the costs of designing, installing, owning, operating and maintaining all interconnection facilities defined in Section B.1.	
	6.	The Producer shall submit to the Utility, for the Utility's review and written acceptance, equipment specifications and detailed plans for the installation of all interconnection facilities to be furnished by the Producer prior to their purchase or installation. The Utility's review and written acceptance of the Producer's equipment specifications and detailed plans shall not be construed as confirming or endorsing the Producer's design or as warranting the equipment's safety, durability or reliability. The Utility shall not, by reason of such review or lack of review, be responsible for strength, details of design adequacy, or capacity of equipment built pursuant to such specifications, nor shall the Utility acceptance be deemed an endorsement of any such equipment.	
	7.	No generating source shall be operated in parallel with the Utility's system until the interconnection facilities have been inspected by the Utility and the Utility has provided written approval to the Producer.	
	8.	Only duly authorized employees of the Utility are allowed to connect Producer-installed interconnection facilities to, or disconnect the same from, the Utility's overhead or underground lines.	
Β.	INTE	RCONNECTION FACILITIES	
	1.	GENERAL: Interconnection facilities are all means required, and apparatus installed, to interconnect the Producer's generation with the Utility's system. Where the Producer desires to sell power to the Utility, interconnection facilities are also all means required, and apparatus installed, to enable the Utility to receive power deliveries from the Producer. Interconnection facilities may include, but are not limited to: a. connection, transformation, switching, metering, communications, control, protective and safety equipment; and b. any necessary additions to and reinforcements of the Utility's system by the 	
	2.	Utility. METERING a. A Producer desiring to sell power to the Utility shall provide, install, own and maintain all facilities necessary to accommodate metering equipment specified by the Utility. Such metering equipment may include meters, telemetering (applicable where deliveries to the Utility exceed 10 MW) and other recording and communications devices as may be required for the reporting of power delivery data to the Utility. Except as provided for in Section 8.2.b following, the Utility shall provide, install, own and maintain all metering equipment as	(T)
		special facilities in accordance with Section F. (Continue	ed)

(T) RULE ND. 21 -- NONUTILITY-OWNED PARALLEL GENERATION (Cont'd.) INTERCONNECTION FACILITIES (continued) Β. UTILITY SYSTEM ADDITIONS AND REINFORCEMENTS Except as provided for in Section B.5, all additions to and reinforcements of the (N) Utility's system necessary to interconnect with and receive power deliveries from Utility's system necessary to interconnect with and receive power deliveries from the Producer's generation will be provided, installed, owned and maintained by the Utility as special facilities in accordance with Section F. Such additions and reinforcements may include the installation of a Utility distribution or transmission line extension or the increase of capacity in the Utility's existing distribution or transmission lines. The Utility shall determine whether any such additions or reinforcements shall include an increment of additional capacity for the Utility's use in furnishing service to its customers. If so, then the costs of providing, installing, owning and maintaining such additional capacity shall be borne by the Utility and/or its customers in accordance with the Utility's applicable tariffs on file with and authorized by the California Public Utilities Commission. Commission (Commission). The Producer shall advance to the Utility its estimated costs of performing a ь. preliminary or detailed engineering study as may be reasonably required to identify any Producer related Utility system additions and reinforcements. Where such preliminary or detailed engineering study involves analysis of the Utility's transmission lines (60 kv and higher), the Utility shall complete its study within twelve calendar months of receiving all necessary plans and specifications from the Producer. PRODUCER-INSTALLED UTILITY-OWNED LINE EXTENSIONS: The Producer may at its option 5. provide and install an extension of the Utility's distribution or transmission lines where required to complete the Producer's interconnection with the Utility. Such extension shall be installed by contractors approved by the Utility and in accordance with its design and specifications. The Producer shall pay the Utility its estimated with its design and specifications. The Producer shall pay the Utility its estimated costs of design, administration and inspection as may be reasonably required to assure such extension is installed in compliance with the Utility's requirements. Upon final inspection and acceptance by the Utility, the Producer shall transfer ownership of the line extension to the Utility where thereafter it shall be owned and maintained as special facilities in accordance with Section F. This provision does not preclude the Deducer for installed in the producer of the section for the Producer from installing, owning and maintaining a distribution or transmission line extension as part of its other Producer-owned interconnection facilities. COSTS OF FUTURE UTILITY SYSTEM ALTERATIONS: The Producer shall be responsible for the LUSIS UP FULUKE UTILITY SYSTEM ALTERATIONS: The Producer shall be responsible for the costs of only those future Utility system alterations which are directly related to the Producer's presence or necessary to maintain the Producer's interconnection in accordance with the Utility's applicable operating, metering and equipment publication in effect when the Producer and the Utility entered into a written form of power purchase agreement. Alterations made at the Producer's expense shall specifically exclude increases of existing line capacity necessary to accommodate the other Producers or Utility customers. Such alterations may, however, include relocation or undergrounding of the Utility's distribution or transmission lines as may be ordered by a governmental authority having jurisdiction. 6. ALLOCATION OF THE UTILITY'S EXISTING LINE CAPACITY: For two or more Producers seeking 7. to use an existing line, a first come, first served approach shall be used. The first Producer to request an interconnection shall have the right to use the existing line and shall incur no obligation for costs associated with future line upgrades needed to accommodate other Producers or customers. The Utility's power purchase agreement shall specify the date by which the Producer must begin construction. If that date shall specify the date by which the Producer must begin construction. If that date passes and construction has not commenced, the Producer shall be given 30 days to correct the deficiency after receiving a reminder from the Utility that the construction start-up date has passed. If construction has not commenced after the 30-day corrective period, the Utility shall have the right to withdraw its commitment to the first Producer and offer the right to interconnect on the existing line to the next Producer in order. If two Producers establish the right of first-in-time simultaneously, the two Producers shall share the costs of any additional line upgrade necessary to facilitate their cumulative capacity requirements. Costs shall be shared based on the relative proportion of capacity each Producer will add to the line. (N) (Continued)

		DILE NO. 21 - NONITELETY-OWNED DADALLEY OF PETION (CONTACT)	
с.	inte	RULE NO. 21 NONUTILITY-OWNED PARALLEL GENERATION (Cont'd.) TRIC SERVICE FROM THE UTILITY: if the Producer requires regular, supplemental, rruptible or standby service from the Utility, the Producer shall enter into separate ractual arrangements with the Utility in accordance with the Utility's applicable tric tariffs on file with and authorized by the Commission.	(
D.	OPER.	ATION	
	1.	PREPARALLEL INSPECTION: in accordance with Section A.7, the Utility will inspect the Producer's interconnection facilities prior to providing it with written authorization to commence parallel operation. Such inspection shall determine whether or not the Producer has installed certain control, protective and safety equipment to the Utility's specifications. Where the Producer's generation has a rated output in excess of 100 kw, the Producer shall pay the Utility its estimated costs of performing the inspection.	
	2.	JURISDICTION OF THE UTILITY'S SYSTEM DISPATCHER: The Producer's generation while operating in parallel with the Utility's system is at all times under the jurisdiction of the Utility's system dispatcher. The system dispatcher shall normally delegate such control to the Utility's designated switching center.	
	3.	COMMUNICATIONS: The Producer shall maintain telephone service from the local telephone company to the location of the Producer's generation. In the event such location is remote or unattended, telephone service shall be provided to the nearest building normally occupied by the Producer's generator operator. The Utility and the Producer shall maintain operating communications through the Utility's designated switching center.	
	4.	GENERATOR LOG: The Producer shall at all times keep and maintain a detailed generator operations log. Such log shall include, but not be limited to, information on unit availability, maintenance outages, circuit breaker trip operations requiring manual reset and unusual events. The Utility shall have the right to review the Producer's log.	
	5.	REPORTING ABNORMAL CONDITIONS: The Utility shall advise the Producer of abnormal conditions which the Utility has reason to believe could affect the Utility's operating conditions or procedures. The Producer shall keep the Utility similarly informed.	
	6.	POWER FACTOR: The Producer shall furnish reactive power as may be reasonably required by the Utility.	(D
		 a. The Utility reserves the right to specify that generators with power factor control capability, including synchronous generators, be capable of operating continuously at any power factor between 95 percent leading (absorbing vars) and 90 percent lagging (producing vars) at any voltage level within ± 5.0 percent of rated voltage. For other types of generators with no inherent power factor control capability, the Utility reserves the right to specify the installation of capacitors by the Producer to correct generator output to near 95 percent leading power factor. The Utility may also require the installation of switched capacitors on its system to produce reactive support equivalent to that provided by operating a synchronous generator. b. Where either the Producer or the Utility determines that it is not practical for the Producer to furnish the Utility's required level of reactive power or when the Utility specifies switched capacitors in its system pursuant to Section D.6.a, the Utility will provide, install, own and maintain the necessary devices 	(1
Ε.	INTER	on its system in accordance with Section F. FERENCE WITH SERVICE AND COMMUNICATION FACILITIES	(1
	1.	GEMERAL: The Utility reserves the right to refuse to connect to any new equipment or to remain connected to any existing equipment of a size or character that may be detrimental to the Utility's operations or service to its customers.
