

**PACIFIC GAS AND ELECTRIC COMPANY
Gas Distribution Expenditures Audit
Data Response**

PG&E Data Request No.:	OverlandConsulting_025-903		
PG&E File Name:	GasDistributionExpendituresAudit_DR_OverlandConsulting_025-Q903		
Request Date:	December 4, 2012	Requester DR No.:	025
Date Sent:	December 18, 2012	Requesting Party:	Overland Consulting, Inc.
PG&E Witness:		Requester:	Gary Harpster

QUESTION 903

Referring to the response to OC-574, Attachment 1, Page 11, Leak Data Summary - Year to Year Comparison, please update all lines of this table to include 2010 and 2011 actual results.

ANSWER 903

Please refer to GasDistributionExpendituresAudit_DR_OverlandConsulting_025-Q903Atch01.

The table on page 11 of Attachment 1 to PG&E's response to OC-574 was created to help understand the effect of the 2008 Leak Survey Operator Qualification (OQ) & Training and the Accelerate Leak Survey (ALS). It was last updated in March of 2011 to reflect the completion of the ALS and included partial data from 2010. In order to provide the requested update and include all 2010 and 2011 leak repair data, PG&E accessed its current leak repair database and generated a dataset to identify leak repairs by the categories indicated. There could be an inconsistency in the process to develop the table due to a change in individual preparing the 2010 and 2011 dataset and analysis. The table should be viewed as a close representation and not a numerically precise evaluation.
