**QUESTION 959**

The NBC Bay Area investigative unit article titled Gas Leaks & Repair Delays at PG&E dated August 13, 2012, states "A document containing data from the California Public Utility Commission obtained by NBC Bay Area shows that PG&E had 988 leaks not repaired in the time required by state regulators." Please: (1) describe and explain PG&E's understanding of the identity and purpose of the document referred to in the article; (2) describe the scope of the 988 leaks repaired statistic in terms of time period and operations covered; (3) indicate if PG&E has the document and provide the document; and (4) identify and explain the underlying sources of the leaks repaired late statistics shown on the document. Indicate if the statistics were taken from PG&E's IGIS system and Gas Statistical Reports.

**ANSWER 959**

The document referred to in the NBC Bay Area News article was originally provided to the CPUC as part of the "San Bruno GT Line Rupture Investigation" as CPUC\_203-Q04. It is attached for your reference as GasDistributionExpendituresAudit\_DR\_OverlandConsulting\_027-Q959Atch01.

The CPUC forwarded this document to House Representative, Jackie Speier, who in turn provided the document to NBC Bay Area News. Based on inquiries from NBC Bay Area News, PG&E prepared responses to a number of questions that explained and clarified the information in the document originally provided to the CPUC. See attachments GasDistributionExpendituresAudit\_DR\_OverlandConsulting\_027-Q958Atch01 through GasDistributionExpendituresAudit\_DR\_OverlandConsulting\_027-Q958Atch03.

PG&E also responded to NBC Bay Area News' story in a letter to Assemblyman Jerry Hill, and subsequently prepared supplemental information for clarification and expansion of the information in the letter to Assemblyman Hill. See attachments GasDistributionExpendituresAudit\_DR\_OverlandConsulting\_027-Q958Atch04 and GasDistributionExpendituresAudit\_DR\_OverlandConsulting\_027-Q958Atch05.
