"CATHODIC PROTECTION STATION REPORT" Instructions

RECORD

Transmission/Distribution/Both:	Check the appropriate box for the type of gas facility that the rectifier is protecting.
Preventative Maintenance No.:	Record the rectifier's preventative maintenance number, FM or PLM.
CP System No.:	Record the cathodic protection system number for the rectifier.
Area/Division/District/Local Office:	Record the names of the area, division, district, and local office where the rectifier is located.

RECTIFIER

Location:	Provide details of the rectifier's location.
City:	Record the name of the city.
Manufacturer/Type/Model/Serial No.:	Complete the rectifier manufacturer's information.
Primary Rating:	Record the unit's input voltage rating per manufacturer's specifications.
Actual Primary Voltage:	Complete the unit's input actual primary voltage rating as measured in the field.
Secondary Rating:	Record the unit's maximum secondary amperage and voltage ratings per the manufacturer.
Initial Setting:	Record the rectifier's initial setting (amperage and voltage).
Date Placed in Operation:	Record the month, day, and year when the rectifier was placed in operation.

ANODE

Number, Weight and/or Size:	Record the number of anodes, weight (or size) in pounds, type (material), backfill used, and the amount of backfill used.

CIRCUIT RESISTANCE

Circuit Resistance:	Rectifier Voltage divided by Rectifier Current (R=E/I) in OHMS.

SOIL RESISTIVITY

Soil Resistivity:	Record soil resistivity readings based on ohm readings and pin spacing in OHMS/CM
Location Sketch:	Include a detailed sketch of the location of the rectifier and the anodes. Ensure the sketch is precise enough to enable a person to locate those structures in the field.
Date/Prepared by:	Record the date, name and LAN ID of the person who conducted the Cathodic Protection Station Report.
Date/Reviewed by:	Record the date, name and LAN ID of the person who reviewed the Cathodic Protection Station Report.
