

Gas Technical Team Procedures

Summary This utility procedure provides the steps that Pacific Gas and Electric Company (Company) gas technical teams follow to conduct their duties. The gas technical teams must meet, as necessary, to ensure that the Company standards, procedures, tools, and technologies used in their assigned subject matter areas of expertise remain current.

Target Audience Individuals who are part of these gas technical teams.

Safety Conduct this procedure in accordance with [Utility Standard Practice \(USP\) 22, "Safety and Health Program."](#)

Before Starting this Procedure

PPE: None required.

Training: Employees using this procedure must be trained on the steps in this procedure. Untrained employees must work with the assistance of a trained person.

Tools: Standard Company word processing, spreadsheet, and flowcharting software.

Procedural Steps

1. General Information The Company maintains gas technical teams composed of representatives to cover the team's assigned subject matter. To ensure ownership of the Company's gas manuals, there must be one gas technical team to develop, review, and update each volume.

The following are the titles of the approved gas manual volumes:

- Damage Prevention, Excavation, Patrol, and Public Safety Communication
- Security, Operations, Gas Emergency Plan, and Clearances
- Measurement and Control (including Stations)
- Environmental and Safety
- Corrosion Control
- Leak Survey and Response

- Engineering and Operating Documents
- Plastic Pipeline
- Steel Pipeline
- Standard Gas Estimating Design
- Customized Gas Estimating Design
- Gas Field Services

2. Technical Team Members

Each gas technical team is composed of the following members:

- Sponsoring manager
- Gas Standards facilitator
- Engineering representative
- Specialist
- Construction representative
- Maintenance and Operations (M&O) representative
- Human Resources (HR) Learning Academy representative
- Engineers and Scientists of California (ESC) representative
- International Brotherhood of Electrical Workers (IBEW) representative

Note: One team member may cover multiple positions on the team (e.g., an IBEW representative could also be the construction and/or the M&O representative). Gas technical teams may enlist other parties to investigate issues, technologies, or standards documents. However, these individuals must not be official members of these teams.

3. Technical Team Duties and Responsibilities

The gas technical teams assume the duties described in this section.

3.1 Maintain Team Membership

Ensure that the team has the proper membership required to cover its assigned subject matter area.

3.2 Adhere to the Team Charter

Technical teams must operate in accordance with the ["Gas Transmission and Distribution Technical Team Charter" \(Attachment 1\)](#).

If there are suggested changes to a technical team's charter, the sponsoring manager submits them to the manager responsible for approving gas standards.

Each team must produce and maintain copies of agendas and minutes of all its meetings.

3.3 Perform Gas Document Update Procedures

Review and update, if needed, the team's assigned manuals and documents in accordance with [Utility Procedure TD-4001P-02, "Procedures for Reviewing and Updating Gas Manuals."](#)

3.4 Perform New Technology Review Procedures

Review and approve, if appropriate, any new materials, tools, or technologies in accordance with [Utility Procedure TD-4001P-04, "New Gas Product Approval."](#)

3.5 Review Issues

Each team reviews, makes recommendations, and tracks issues brought to its attention. Each team maintains an issues tracking log that includes this information in [Attachment 2, "Gas Technical Team Issues Log"](#) (additional information may be included, if necessary). The issues tracking log must be updated at least once each calendar year, not to exceed 15 months, to the date.

3.6 Document Activities

The department responsible for gas standards procedures must ensure that the procedures in this document are followed, the team's duties are properly documented, and the required documentation is maintained.

Each gas technical team must produce and maintain, at a minimum, the following documentation:

- Team charter.
- Agendas and minutes for all meetings.
- Completed Gas Standards Manual Review and Update Certification Forms (if applicable).
- Completed New Technology Review Forms (if applicable).
- New Product Tracking Log.
- Gas Technical Team Issues Log.

3.7 Schedule Meetings

Technical teams meet in the first quarter of each calendar year to perform the following tasks:

- 1) Review the section's individual documents that comprise the manual assigned to the team to determine if updates are needed.

If updates are needed, the teams provide the necessary updates within the required timeframe.
- 2) Review the team's workload for the year (standard document developments or updates, new product approvals, issues, etc.) to determine how frequently to schedule meetings addressing the workload.
- 3) Schedule meetings as necessary.

3.8 Identify Training Curriculum Development Needs

Technical teams identify training curriculum development needs for new procedures or for significant changes to existing procedures. These needs are forwarded to the Gas Standards Steering Team for review and assignment.

Implementation Responsibilities

Individuals using this procedure are expected to carry out the steps herein.

Governing Authority

This document is governed by [Utility Standard TD-4001S, "Gas Standards Documentation Requirements."](#)

Document Recision

This utility procedure cancels and supersedes Work Procedure WP4000-03, "Gas Technical Team Work Procedures," dated February 2009.

Definitions

ESC: Engineers and Scientists of California – one union representing employees.

Gas technical team: A cross-functional team representing stakeholders in an assigned subject matter. This team is responsible for ensuring that Company standards, work procedures, tools, and technologies in their area of expertise remain current. At a minimum, each team must be composed of subject matter experts and field stakeholders.

HR: Human Resources.

IBEW: International Brotherhood of Electrical Workers – one union representing employees.

SME: Subject matter expert.
