ADVICE 144-W-A (U 338-W)

PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA WATER DIVISION

SUBJECT: Supplement to Advice 144-W, Implementation of Southern California Edison Company's Catalina Water General Rate Case Application 20-10-018 as Authorized in Decision 23-12-007, Decision 24-10-008, Catalina Monterey Style Water Adjustment Mechanism and Incremental Cost Balancing Account Status and Sales Forecast Update, and Amortization Request

In accordance with General Order (GO) 96-B, General Rule 7.5.1, SCE hereby submits this supplemental advice letter and the following changes to its tariffs. The revised tariff sheets are listed on Attachment A and are attached hereto.

PURPOSE

The purpose of this supplemental advice letter is to remove the rate impacts to Southern California Edison Company's (SCE) proposed January 1, 2025 consolidated revenue requirement and rate change resulting from the implementation of its Monterey-Style Water Revenue Adjustment Mechanism (M-WRAM) and Incremental Cost Balancing Account (ICBA). The modifications to SCE's consolidated revenue requirement and rate change result from postponing the review and implementation of SCE's M-WRAM and ICBA. Various tariffs are modified as a result as further explained below. This advice letter supplements 144-W in part.

BACKGROUND

At the time of filing Advice 144-W, SCE projected a \$664,118 overcollection in its M-WRAM / ICBA of which \$573,338 is attributed to the M-WRAM and \$90,780 is attributed to the ICBA. These amounts were calculated based on the M-WRAM / ICBA methodology that was adopted in Decision (D.) 23-12-007 (Decision). AL 144-W was SCE's first filing with this new methodology. SCE is filing this supplemental advice letter to postpone the review of the balance in its M-WRAM and ICBA because we found a misalignment in the single tier rate calculation / methodolgy and believe it is pre-mature to fully implement any overcollections or potential undercollections without a full years worth of data. The misalignment is due to the fact that Catalina Water has seasonal rate structures for residential cusomters due to its tourist-centric economy, 1 and the calculated single-tier rate did not account for the seasonal rate differences. This is problematic because the calculated single tier rate is essentially an average rate over 12 months whereas the authorized winter and summer rates were designed to have lower rates in the winter months and higher rates in summer months to better align cost recovery with the peak tourist season on Catalina. As such, comparing a calculated average rate with a designed lower winter season rate and a designed higher summer season rate will have predictiable monthly imbalances and only even out over the full 12 month cycle. Additionally, as part of the calculation methodology in Advice 144-W, SCE included its single-tier rate schedules, e.g., Schedule W-1-GS, and though these schedules also differ by the summer and winter seaons, they were purposely not designed to be conservation rates. As such, upon review, SCE believes it is not appropriate to include the comparison of a calculated single-tier rate to authorized single-tier rates in the M-WRAM / ICBA methodology.²

The current M-WRAM and ICBA process requires SCE to record the difference between SCE's recorded revenues under its authorized conservation (tiered) rate structure against calculated revenues that would have been collected from customers if they were billed under a single-tiered rate structure. Thus, SCE derived a single-tiered rate by utilizing the annual sales forecast authorized in Advice 140-W, the authorized revenue requirement, and applying other authorized rate design factors to each of its respective customer classes. SCE did not incorporate seasonal rates into the analysis, rather SCE calculated a single-tiered average rate for the entire year. The current authorized rate structure used to bill Catalina customers incorporates a seasonal structure creating a large variance between a customer being billed under the summer rate structure versus

¹ SCE's summer rates are in effect from June through September and its winter rates are in effect from October through May.

Since discovery of the summer and winter season discrepancy, SCE has conducted preliminary analyses that suggest the M-WRAM / ICBA can lead to bad outcomes for customers and SCE. SCE will further investigate which could lead to other recommendations and/or changes to the M-WRAM / ICBA methodology with the filing in March / April 2025 and/or in a future Application filing.

the winter rate structure. The M-WRAM / ICBA overcollection presented in Advice 144-W thus only accounts for seven months worth of revenue collection, April through October 2024, due to (1) the implementation of SCE's 2022 GRC in March 2024, and (2) SCE's annual reporting requirement of the M-WRAM / ICBA amounts by November of each year.³ The November reporting requirement has only allowed SCE to record seven full months of revenues under the M-WRAM / ICBA methodology, and four of those months were under summer rates, which were purposely designed to be much higher than its winter rate structure. In order to obtain a more accurate and complete comparison of the M-WRAM methodology and assess any over/undercollections, SCE would need to also include all the winter months in addition to the summer months in its analysis.

SCE proposes in this advice letter to postpone the implementation of its M-WRAM and ICBA in its January 1, 2025 rate change and allow SCE to re-submit its M-WRAM and ICBA in March / April 2025 when a complete 12-month analysis can be provided for review. With this proposal, SCE will be re-submitting its bill impact analysis, and updated rate tariffs to remove the M-WRAM / ICBA surcredit.

While OP 10 of D.23-12-007 authorizes SCE to submit the CAM by March 31, SCE elected to consolidate the submittal of the CAM and its escalation year rate adjustment in the November filing to reduce the administrative work and the number of rate changes Catalina customers will experience throughout the year.

BILL IMPACTS

Tables A-1 and A-2, below, show the average monthly bill impacts by customer type and meter size at Current Rates and Authorized Rates, respectively. The average bill comparisons are reflective of the authorized revenue requirement of \$7.738 million, a sales forecast of 103.5 MG, and include the various structural rate changes and surcredits described above.

			Average	Monthly	y Bills at O	Current R	lates - \$

Table A-2: Average Monthly Bills (\$) by Customer Type at Authorized Rates

ESCALATION YEAR RATE ADJUSTMENT

Pursuant to the Decision, the Commission directed SCE to submit Tier 1 advice letters 45 days prior to the start of the escalation year for any rate adjustments seeking escalation and proposing new revenue requirements.⁴ Additionally, the Commission directed SCE to submit Tier 1 advice letters no later than March 31 requesting approval of the Consumption Adjustment Mechanism (CAM) annual update.⁵

PROPOSED TARIFF CHANGES

Attachment A provides all applicable tariff sheets reflecting the January 1, 2025 consolidated revenue requirement and rate change, as discussed above. These rate changes will be reflected in customers' bills for service rendered on and after January 1, 2025.

TIER DESIGNATION

Pursuant to OP 7 of the Decision, this advice letter is submitted with a Tier 1 designation.

EFFECTIVE DATE

This advice letter will become effective on January 1, 2025.

⁴ Decision, OP 7.

⁵ Decision, OP 10.

NOTICE

Anyone wishing to protest this advice letter may do so only electronically. Protests must be received no later than 20 days after the date of this advice letter. Protests should be submitted to the CPUC Water Division at:

Director, Water Division California Public Utilities Commission E-mail: water_division@cpuc.ca.gov

In addition, protests and all other correspondence regarding this advice letter should also be sent electronically to the attention of:

Connor Flanigan Managing Director, State Regulatory Operations Southern California Edison Company E-mail: <u>AdviceTariffManager@sce.com</u>

and

Adam Smith Director, Regulatory Relations c/o Karyn Gansecki Southern California Edison Company E-mail: <u>Karyn.Gansecki@sce.com</u>

There are no restrictions on who may file a protest, but the protest shall set forth specifically the grounds upon which it is based and shall be submitted expeditiously.

In accordance with Section 4 of GO 96-B, SCE is serving copies of this advice filing to the interested parties shown on the SCE's Water GO 96-B and A.20-10-018 service lists. Address change requests to the GO 96-B service list should be directed by electronic mail to <u>AdviceTariffManager@sce.com</u> or at (626) 302-6838. For changes to all other service lists, please contact the Commission's Process Office at (415) 703-2021 or by electronic mail at <u>Process Office@cpuc.ca.gov</u>.

To view other SCE advice letters submitted to the Commission, log on to SCE's web site at <u>https://www.sce.com/wps/portal/home/regulatory/advice-letters</u>.

For questions, please contact Christopher Benitez at (626) 238-4206 or by electronic mail at Christopher.Benitez@sce.com.

The Service Charge is a readiness-to-serve charge applicable to all metered service which is added to the quantity charge computed at the Quantity Rates.

SPECIAL CONDITIONS

- 1. Residential service is the provision of water for domestic use at a dwelling premises, including water used on the premises for sprinkling of lawns; gardens and shrubbery; washing vehicles; and other similar and customary purposes pertaining to single or multifamily dwellings.
- 2. Dual Service is defined as service to residential customers who require a larger meter size to accommodate the potential larger flow of water associated with an installed fire sprinkler system.
- 3. For the purpose of fire protection under this Schedule, SCE will supply only such water at such pressure as may be available from time-to-time as a result of its operation of the system. Section 774 of the Public Utilities Code limits the liability of SCE resulting from a claim regarding the provision or maintenance of an adequate water supply, water pressure, equipment or other fire protection facility or service. Acceptance of service under this tariff is acknowledgment of notice of the provisions of Section 774 of the Public Utilities Code.
- 4. If customers request service for a meter connection size not reflected above, SCE will apply the sizing relationship established in A.10-11-009 for the requested connection size to determine a service charge for the non-standard Dual Service connection, upon field verification of the base and connected pipe size.
- 5. In situations where a meter serves a combination of residential, general service, and irrigation water usage, SCE will work with the customer to determine the most appropriate rate schedule.

SPECIAL CONDITIONS

- 1. The installation of, or changes to, facilities for a private fire protection system is subject to SCE's applicable tariffs.
- 2. The expense of maintaining the private fire protection facilities on the customer's premises (including the vault, meter and backflow device) shall be paid for by the customer.
- 3. All private fire protection facilities, excluding the connection at the main and any service pipe located in a public-right-way, are the sole property of the customer. SCE and its duly authorized agents shall have the right of ingress to, and egress from, the customer's premises for all purposes relating to said facilities and the provision of private fire protection water service.
- 4. No structure shall be built over or enclosing the private fire protection facilities and the customer shall maintain and safeguard the area occupied by said facilities from traffic and other hazardous conditions. Exceptions may be made on a case-by-case basis for extenuating circumstances.
