RE: GO165 ANNUAL COMPLIANCE REPORT

Dear Docket Clerk:

Enclosed for filing with the Commission are the original and five copies of the **SOUTHERN CALIFORNIA EDISON COMPANY'S (U 338-E) ANNUAL COMPLIANCE REPORT FILED PURSUANT TO GENERAL ORDER 165** in the above-referenced proceeding.

We request that a copy of this document be file-stamped and returned for our records. A self-addressed, stamped envelope is enclosed for your convenience.

Your courtesy in this matter is appreciated.

Very truly yours,

Janine M. Watkins-Ivie

**SOUTHERN CALIFORNIA EDISON COMPANY'S (U 338-E) ANNUAL  
COMPLIANCE REPORT FILED PURSUANT TO GENERAL ORDER 165**

Pursuant to General Order No. 165 ("GO165") and Decision No. 97-03-070 (D.97-03-070) issued by the California Public Utilities Commission (the "Commission"), and to Rule 3.2 of the Commission's Rules of Practice and Procedure (Title 20, *Cal. Code Reg's*, § 3.2), Southern California Edison Company ("SCE") hereby timely files this Annual Compliance Report describing its compliance activities completed in 1999 and compliance activities planned for 2000.

**I.**

**INTRODUCTION AND SUMMARY**

In 1999, SCE completed 2,250,778 circuit patrol inspections, 198,010 detailed and intrusive inspections, and 11,470 corrective actions. At present, SCE is aware of only one requirement in GO165 with which it did not comply in 1999. This matter is discussed in *infra* section D. This report contains two attachments which are attached hereto and incorporated herein by this reference: Attachment A is a table containing summary data of SCE's compliance activities for 1999 presented on

a systemwide basis. Attachment B contains a series of tables containing detailed presentation of SCE's 1999 compliance activities, by equipment type, with district-by-district breakdowns.

## II.

### BACKGROUND

Public Utilities Code Section 364<sup>1/</sup> requires the Commission to adopt standards for the inspection, maintenance, repair, and replacement of electric utility distribution facilities. Subdivision (b) of that section provides that, in setting standards for maintenance, repair, and replacement, the Commission shall consider cost, local geography and weather, applicable codes, national electric industry practices, sound engineering judgment, and experience.

In Decision No. 96-11-021, the Commission proposed standards for electric distribution system inspections. These proposed rules specified certain inspection intervals for overhead and underground facilities and established criteria for maintenance and replacement of those facilities. In Decision No. 96-09-045, the Commission adopted reporting and recording requirements for electric system reliability and for individual circuits that persistently perform poorly. In Decision No. 96-09-073, the Commission proposed standards for tree trimming and vegetation management around utility distribution and transmission facilities in urban and suburban areas.

Finally, to implement the mandates of Section 364, in Decision No. 97-03-070, effective March 31, 1997, the Commission adopted GO165, which established minimum requirements for electric distribution facilities for inspection (including maximum allowable inspection cycle lengths), condition rating, scheduling and

---

<sup>1/</sup> All code references are to the California Public Utilities Code unless otherwise noted.

performance of corrective action, record-keeping, and reporting; these GO165 requirements are in addition to the requirements imposed upon utilities under General Orders 95 and 128 to maintain a safe and reliable electric system. GO165 further imposed the following reporting requirements.

Each utility shall submit to the Commission an annual report detailing its compliance with the general order. These reports will include the utility's plans for the types of inspections and equipment to be inspected during the coming year. The report shall identify the number of facilities, by type, which have been inspected during the previous period. It shall identify those facilities which were scheduled for inspection but which were not inspected according to schedule and shall explain why the inspections were not conducted, and a date certain by which the required inspection will occur. The report shall also present the total and percentage breakdown of equipment rated at each condition rating level, including that equipment determined to be in need of corrective action. Where corrective action was scheduled during the reporting period, the report will present the total and percentage of equipment which was and was not corrected during the reporting period. For the latter, an explanation will be provided, including a date certain by which required corrective action will occur. The report will also present totals and the percentage of equipment in need of corrective action, but with a schedule date beyond the reporting period, classified by the amount of time remaining before the scheduled action. All of the above required information shall be presented for each type of identified facility and shall be aggregated by district.<sup>2/</sup>

---

<sup>2/</sup> GO165, Section IV.

### III.

## SUMMARY OF SCE'S INSPECTIONS AND CORRECTIVE ACTION

### ACTIVITIES DURING CALENDAR YEAR 1999

GO165 requires annual inspection performance data, condition ratings, and corrective action information. The following is a summary of the required data. In addition, Attachments A and B provides detailed historical data.

#### **A. Patrols**

As defined in GO165, a circuit patrol is a visual inspection of all distribution facilities, excluding streetlights which are inspected separately. In 1999, SCE planned to patrol a total of 3,581 circuits, encompassing 2,135,833 pieces of equipment (not including streetlights). In 1999, SCE actually patrolled 3,738 circuits and 2,250,778 pieces of equipment (not including streetlights).

##### **1. Urban Circuit Patrols**

GO165 requires annual patrol of all urban circuits. In 1999, SCE actually patrolled 3,523 circuits, representing 100% of SCE's urban circuit total.

##### **2. Rural Circuit Patrols**

GO165 requires biannual patrols of rural circuits. Between 1997 (when the GO165 inspection cycles became effective) and December 31, 1998, all of SCE's rural circuits had received a first round of patrol. In addition, in 1998 SCE completed a second round of patrol for a large percentage of its rural circuits (this second round of patrol would have been due in 1999), leaving only a small percentage of rural circuits still due for patrol in 1999. In 1999, SCE patrolled 65% of its rural circuits – including all of those which had not received a second patrol in 1998.

### **3. Streetlight Patrols (Urban and Rural)**

GO165 requires annual patrol of all urban streetlights, and biannual patrol of all rural streetlights. In 1997, SCE actually patrolled 100% of urban and 100% of rural streetlights. In 1998, SCE completed a second round of patrol for a large percentage of its rural streetlights which would have otherwise been due for patrol in 1999, leaving a small percentage of streetlights still due for patrol in 1999. In 1999, SCE patrolled 552,113 streetlights, representing 100% of urban and 46% of rural streetlights, including all rural streetlights which had not received a second patrol in 1998.

## **B. Detailed and Intrusive Inspections**

### **1. Generally**

In this report, SCE reports it planned to complete 128,085 detailed and intrusive inspections in 1999 – an 84% increase over the number of detailed and intrusive inspections reported in the 1998 Annual Compliance Report as planned for completion in 1999. In fact, SCE actually completed detailed and intrusive inspections of a total of 198,010 pieces of equipment in 1999, or 55% more than planned this year. As required by GO165, SCE assigned condition ratings based on those detailed and intrusive inspections, as discussed in *infra* section C.

### **2. Intrusive Inspections**

In the GO165 Annual Report for 1998, SCE reported its plan to complete intrusive inspections of a total of 24,000 wood poles in 1999. During 1999, SCE actually completed a total of 9,476 intrusive inspections. SCE reports it plans to complete intrusive inspections of 60,000 poles in 2000.

SCE plans and is on-track to have all poles older than 15 years (as of 1997) receive their first intrusive inspection by the end of 2006, as required by GO165.

**3. Detailed Circuit Patrols**

For 1999, SCE planned to complete 400 detailed circuit patrols. SCE actually completed 792 detailed circuit patrols throughout the course of 1999. SCE plans to complete 500 detailed circuit patrols in 2000 and to have all circuits receive their first round of detailed inspection by the end of 2002, as required by GO165.

**C. Condition Ratings**

GO165 requires SCE to rate the condition of all equipment inspected. The inspections SCE conducted in 1999 resulted in findings of 12,592 facilities with Level 4 condition ratings, and 2,111 facilities with Level 5 condition ratings. The remaining balance of equipment was rated at condition Levels 1, 2, or 3.

**D. 1999 Corrective Actions**

In the Annual Compliance Report for 1998, SCE outlined its plan to complete corrective actions on 2,221 facilities with Level 4 condition ratings, and on 2,651 facilities with Level 5 condition ratings, for a total of 4,872 planned corrective actions during 1999. SCE actually completed corrective actions on 5,546 facilities with Level 4 condition ratings and on 5,924 facilities with Level 5 condition ratings, for a total of 11,470 completed corrective actions on reported distribution plant in 1999. SCE completed 6,598 corrective actions (135%) more than planned. These actual totals include (a) corrective actions planned for completion in 1999, (b) corrective actions that were identified during inspections conducted in 1999 and due for completion in 1999, (c) corrective actions that were identified during

inspections conducted in 1999 that were due for completion in subsequent years which were actually completed ahead of schedule, and (d) corrective actions that were in the backlog of previous findings and due for completion in subsequent years which were actually completed ahead of schedule.

While the total number of corrective actions completed by SCE in 1999 exceed the plan in aggregate, there is one equipment area in which SCE did not complete all of the scheduled corrective actions. As indicated in the 1998 Annual Report, SCE had planned to complete 3,917 corrective actions on wood poles in 1999. SCE actually completed 6,183 corrective actions in 1999, 2,266 corrective actions more than planned. Nevertheless, as of December 31, 1999, there was a remaining balance of 78 wood poles identified as requiring corrective action in the 1999 plan that are still in need of corrective action.

The remaining balance of 78 wood poles is primarily due to SCE's decision to halt one contractor's work near the end of 1999 until problems in the contractor's work habits could be corrected. In addition, environmental permitting and access allowances hampered corrective action efforts at year-end. As of the writing of this report, corrective work on all but four poles in the remaining balance has been completed. All four poles are located in the habitats of federally listed endangered species. In one instance, SCE is required to await the end of the species' 2000 nesting season before corrective action can begin. SCE expects to complete remaining work on this pole by December 31, 2000. The remaining three poles lie in the habitat of a different endangered species, and await further permitting from federal environmental agencies. We expect to obtain all necessary permits by mid-2001, and to complete remaining work on these three poles by December 31, 2001.

## **E. Discrepancies Between 1998 and 1999 Annual Compliance Reports**

In two instances, there are numerical discrepancies between estimates provided in the 1998 Annual Compliance Report (regarding activities planned for 1999) and figures in this 1999 Annual Compliance Report regarding scheduled activities for the same period. These discrepancies are discussed below.

### **1. Planned Number of Streetlight Patrols**

In the Annual Compliance Report for 1998, SCE reported plans to patrol 547,564 streetlights in 1999. In this Annual Compliance Report for 1999, SCE reports that it planned to patrol 551,098 streetlights in 1999. This change is due to an increase in SCE's overall streetlight inventory from 552,540 to 556,062 during the calendar year.

### **2. Planned Number of Detailed and Intrusive Inspections**

In its Annual Report for 1998, SCE reported that it planned to complete detailed and intrusive inspections on 69,726 pieces of equipment in 1999. In this Annual Compliance Report, SCE reports that we planned to complete detailed and intrusive inspections on 128,085 pieces of equipment in 1999. This increase in the equipment total is due to the inclusion of equipment in 400 circuits SCE planned to detail inspect in 1999, but which were not included on the tables in the 1998 Annual Compliance Report's planned numbers for 1999.<sup>3/</sup> In the summary and detailed attachments to this Annual Compliance Report, we have included new data fields to include ongoing reporting of planned and actual circuit detailed inspections.

---

<sup>3/</sup> The planned detailed inspection of 400 circuits was discussed in the 1998 Annual Report filed summary document, but the equipment totals from those circuits were not included in the figures of the accompanying tables.

Of the 128,085 equipment inspections currently reported planned for completion in 1999, SCE includes plans to inspect 7,689 underground switches and 990 padmounted switches. These totals are smaller than the totals for planned inspections of underground switches (9,193) and padmounted switches (1,560) reported in the 1998 Annual Compliance Report for 1999 completion. These decreases are due to elimination of miscellaneous equipment not reportable under GO165 that SCE had mistakenly added the calculation of switch figures in the 1998 plan.

**F. Discrepancies Within the Systemwide Circuit Count Used in the 1999 Annual Compliance Report**

In different sections of this report, SCE has used two different totals for its systemwide circuit total.

In the sections describing SCE's 1999 planned and completed compliance activities, this uses a total systemwide circuit count of 3,856. In the sections forecasting SCE compliance activities for 2000, this report uses the total systemwide circuit count of 3,998. This discrepancy arises from two newly implemented changes in SCE's accounting practices. First, beginning in 2000, SCE is including in its calculation of total circuits those which are constructed 100% underground ("fully undergrounded circuits"). Although these fully undergrounded circuits were not counted in the system totals in reporting activities completed up to and including 1999, the patrols of equipment contained in the fully undergrounded circuits *were* included in the equipment counts shown in those reported activities. Starting in 2000, SCE is including all 411 fully undergrounded circuits in its systemwide total calculation so all portions of the reported activities can reflect the inclusion of the fully undergrounded circuits and associated equipment.

The second accounting change concerns circuits which cross SCE district lines. Until 1999, these cross-district circuits were counted more than once – in each district where they appeared. Beginning this year, SCE is counting these circuits only once – in the district which contains the source substation. This accounting change results in a decrease of 269 circuits in the systemwide total.

The cumulative impact of these two accounting changes is a net increase of 142 circuits in SCE's total systemwide circuit count for 2000 planned activities shown in this report, and which will be reported in the 2000 Annual Compliance Report.

Respectfully submitted,

**CERTIFICATE OF SERVICE**

I hereby certify that, pursuant to the Commission's Rules of Practice and Procedure, I have this day served a true copy of SOUTHERN CALIFORNIA EDISON COMPANY'S (U 338-E) ANNUAL COMPLIANCE REPORT FILED PURSUANT TO GENERAL ORDER 165 on all parties identified on the attached service list. Service was effected by means indicated below:

- Placing the copies in properly addressed sealed envelopes and depositing such envelopes in the United States mail with first-class postage prepaid (Via First Class Mail);
- Placing the copies in sealed envelopes and causing such envelopes to be delivered by hand to the offices of each addressee (Via Courier);
- Transmitting the copies via facsimile, modem, or other electronic means (Via Electronic Means).

Executed this **3rd day of July, 2000**, at Rosemead, California.

(1) SCE is required to patrol 94% (100% of urban & 30% of rural) of its circuits in 2000.  
 99% (100% of urban & 54% of rural) of street lights are planned to be patrolled in 2000.  
 (2) Corrective actions planned to be completed in 2000 based on items found through previous inspections.
