CORRECTION TO THE 8/5/97 DAILY CALENDAR

Summary: On July 30, 1997, Sabrina J. Miller, Regulatory Relations, Pacific Gas and Electric Company (PG&E), met with Robert Lane, advisor to Cmmr. Knight. Also present was Les Gulasi, Regulatory Relations, PG&E. Materials (attached to notice) consisting of a seven-page handout supporting PG&E's position were used. Miller stated that the Diablo Canyon settlement agreement (Agreement) states that PG&E has the right and obligation to purchase all Diablo Canyon output, except during hydro spill conditions on PG&E's system. Miller stated that D. 82-04-071 states that PG&E shall spill its hydro resources after it has

made all feasible economy sales. Miller stated that the Agreement's provision that ratepayers shall not pay for Diablo Canyon output to the extent of hydro spill means that ratepayers are excused from paying for Diablo Canyon output only during hydro spill conditions, otherwise ratepayers are obligated to pay for Diablo Canyon power as if it were purchased by PG&E under a power purchase contract at the prices set forth in the Agreement. Miller stated that PG&E's actions during the 1993 electric operations were reasonable, and it would be wrong for the Commission to penalize PG&E for complying with the terms of the Agreement.

Summary: On July 30, 1997, Jerome Candelaria, Senior Staff Attorney for California Cable Television Association (CCTA), met with Lester Wong, advisor for Cmmr. Bilas, in San Francisco. Also present were: Dorothy Duda, advisor for Cmmr. Knight; Walter Mosley, Regulatory Manager for AT&T Communications of California, Inc. (AT&T); and Richard Scheer, Regulatory Manager for AT&T. Mosley stated that the Coalition supported the draft decision concerning Pacific Bells' application for rehearing of D9612068 and the draft decision concerning relief of the 209 area code. Mosley stated reasonable solutions to area code relief are possible where overlays are not an option, but noted that where an overlay may be considered, the planning process is gamed. Mosley and Candelaria stated that D9612086 is good policy for preserving an open local exchange market, flawed only by the exception for the 310 area code, which was not justified. Mosley requested that a three-way split be presented to the public in all high growth NPAs such as 310 for longevity of relief and that the Commission modify its response to a petition to modify D9612086 accordingly. Scheer stated that the Coalition has growing concerns that Pacific and GTE are dragging their feet on implementing permanent local number portability. Written materials outlining the Coalition's position were used and are attached to the notice.

Summary: On July 28, 1997, Richard B. Severy, Director of Public Policy for MCI Telecommunications Corporation (MCI), met with Cmmr. Bilas, in San Francisco. Also present were: Lester Wong, advisor to Cmmr. Bilas; Anthony J. DiTirro, MCI Regulatory Manager, and others as shown in the list of attendees included in the notice. Severy stated that he was encouraged by GTE's representation that it was willing to resale voice mail, and added that MCI agreed with the legal and policy arguments advanced by AT&T in support of the proposed decision. DiTirro stated that Centrex service has been available for resale by an ILEC in Iowa for three years. Severy stated that voice mail is an integral aspect of telephone service, and that customers premises equipment is not an adequate substitute for a network based service. Severy stated that if Pacific Bell was acting as a competitive firm, it would be eager to provide voice mail to other firms on a resale basis and the fact that Pacific Bell turns away such business opportunities indicates that it faces no real competitive threat. Severy stated that other competitive local carriers could provide network based voice messaging services if Pacific Bell were to provide unbundled switching.

Summary: On July 30, 1997, Manager, Regulatory Policy & Affairs, for Southern California Edison Company (Edison), met with Bob Lane, advisor to Cmmr. Knight, in San Francisco. Hoover stated that Edison's load dispatch costs are distribution-related and should be allocated to distribution, and that Franchise Fees are clearly distribution related. Hoover stated that Edison's customer Service and Informational costs are not generation related, and thus an additional \$8 million should be allocated to distribution. Hoover stated that clarity and closure are needed regarding the \$25 million in fixed Administrative and General allocated to fossil generation, and if the Commission sustains this view it should order Edison to file an advice letter. Hoover stated that the Commission should authorize the inclusion of \$19 million in nuclear costs in a Decommissioning-like account—the Commission needs to increase funding somewhere to recover these costs. Hoover lastly stated that the \$14 million Nuclear Unit Incentive Procedure reward can be treated as a regulatory asset and collected through the Competition Transition Charge.

Also present were: James Hendry, and John Scadding, advisors to Cmmr. Conlon; and Michael Hoover, Manager, Regulatory Policy & Affairs of Edison. Foster stated that the revised proposed decision (PD) fails to correct many of the significant errors in the original PD. Foster stated in regards to the \$25 million reduction in distribution revenue elated to SONGS and Palo Verde Administrative and General (A&G) costs that these costs have been approved and need to be recovered, as provided for in D.96-04-059. Foster stated that no party introduced evidence opposing Edison's treatment of these costs allocated to nuclear operations or recommended the actions taken by the revised PD. Foster stated that the \$30 million in fixed A&G costs should continue to be recovered in utility rates, and it is unfair to assume that fixed A&G costs will be recovered through the maintenance contracts Edison will enter into for two years after a plant is sold. Foster stated that the Commission should clearly state that these costs are recoverable, and designate the procedural vehicle for recovering them after divestiture. Foster stated that no justification exists to reduce the distribution revenue requirement by \$11 million.
