For authorization to sell certain generating plants and related assets pursuant to Public Utilities Code § 851. **Interim Order - PG&E shall conduct an auction of the Morro Bay Power Plant, Moss Landing Power Plant, and Oakland Power Plant. In**

any such auction, PG&E shall permit bidders to bid on any combination of the plants. The sale of the plants shall be subject to conditions that the Commission may require to mitigate any adverse environmental impacts that we may determine will arise from such physical changes or as may be needed in connection with making the continued availability of must-run plants consistent with maintaining open competition and avoiding an over-concentration of market power. If the plants are sold, and if PG&E's proposed Competition Transition Charge (CTC) Revenue Account is approved in A96-08-070, PG&E may apply the accounting and ratemaking treatment described in this application; provided, however, that if the CTC Revenue Account is not approved, PG&E shall promptly file an application with a proposal for disposition of any amounts realized. PG&E shall require the successful bidder to disclose to the Commission all other generation assets in California under common ownership or control with the bidder.

For authority, among other things, to change its rates and charges for electric service. **In its 1997 Electric Rate Design Window proceeding, PG&E proposes five new optional rate schedules under the auspices of the Public Utilities Code § 378, enacted as part of Assembly Bill (AB) 1890, which mandates the Commission to authorize "new optional rate schedules and tariffs, including new service of service, cost of service, and market opportunities of customer classes and subclasses". Specifically, Schedules E-36 and E-37 are optional oil pumping rates; and Schedules E-TD, ETDI, and AG-8 are optional rates for pricing flexibility to help avoid uneconomic transmission and distribution bypass. The Commission adopts all the above proposals. This proceeding is closed.**

- Establishes the approach the Commission will take to review past and future expenditures for non-nuclear capital additions put into service by Pacific Gas and Electric Company, San Diego Gas & Electric Company, and Southern California Edison Company. We will review capital additions put into service in 1996 and 1997 on an after-the-fact (ex post facto) basis. For capital additions made in 1998 and beyond, we adopt the market control approach proposed by Office of Ratepayer Advocates and others, with certain modifications.

D97-09-049 A96-11-046 - Southern California Edison Company (Edison). For authority to sell gas-fired electrical generation facilities. **Interim Order - Edison may commence an auction of the Cool Water, Ellwood, Highgrove, Long Beach, Ormond Beach, San Bernadino, Alamitos, El Segundo, Etiwanda, Huntington Beach, Mandalay, and Redondo plants, but shall not receive final bids for any of the plants until further order of the Commission approving a mitigated negative declaration and, for the Alamitos, El Segundo, Etiwanda, Huntington Beach, Mandalay, and Redondo plants, an order of the Federal Energy Regulatory Commission approving the form of agreement with the Independent System Operator for the operation of those plants. Edison shall permit bids on any combination of plants, subject to the likelihood that we will not approve any sale to related entities that results in 33% or more of the capacity being transferred. The sale of the plants shall be subject to conditions that the Commission may require (a) to avoid or reduce to non-significant levels any adverse environmental impacts that we may determine will arise from physical changes reasonably foreseeable in connection with the transfer of the plants and (b) in connection with ensuring the continued availability of must-run plants consistent with maintaining open competition and avoiding an over-concentration of market power. If the plants are sold, the sale shall be subject to the Operations and Maintenance Agreement in the form proposed in the application. If the plants are sold, Edison may apply the accounting and ratemaking treatment described in this application**

- to such sales, subject to confirmation of net book value of the plants in A96-08-001 *et al.*, and to the extent not inconsistent with D97-08-056. If the plants are sold, Edison shall not consider post-auction overbids. Edison may amend its application in this proceeding to establish what portion, if any, of each plant site is transmission-related. For all unsold portions of the existing plant sites and other generation-related assets (such as emissions reduction credits), Edison shall either file an application pursuant to Public Utilities (PU) Code Section 851 for the sale of such assets, or file an application to retain such assets pursuant to PU Code Section 377.
