GLOSSARY

After January 1, 1998, the California Public Utilities Commission is required by statute (SB 960) to categorize each case that comes before it. There are three categories, quasi-legislative, adjudicatory and ratesetting. If a case does not require hearings before it is resolved, the case is removed from the SB 960 category requirements. The legend below shows the abbreviation for each of the categories and provides a brief explanation.

- Q** **Quasi-legislative** proceedings are proceedings that establish policy or rules (including generic ratemaking policy or rules) affecting a class of regulated entities, including those proceedings in which the Commission investigates rates or practices for an entire regulated industry or class of entities within the industry.
- A** **Adjudicatory** proceedings are: (1) enforcement investigations into possible violations of any provision of statutory law or order or rule of the Commission; and (2) complaints against regulated entities, including those complaints that challenge the accuracy of a bill, but excluding those complaints that challenge the reasonableness of rates or charges, past, present, or future.
- RS** **Ratesetting** proceedings are proceedings in which the Commission sets or investigates rates for a specifically named utility (or utilities), or establishes a mechanism that in turn sets the rates for a specifically named utility (or utilities). Ratesetting proceedings include complaints that challenge the reasonableness of rates or charges, past, present, or future.
- N/A** Removed from the SB 960 category requirements.

Summary: On August 17, 1998, Russell Worden, Regulatory Affairs Manager for Southern California Edison Company (Edison), spoke with James Hendry, advisor to Cmmr. Conlon. Written material (attached to the notice) transmitted by "facsimile" was used. Worden stated, referring to Section 372 of Assembly Bill 1890, that the phrase "self-cogeneration" was not necessarily synonymous with "self-generation". Worden pointed out that the California Legislature had expressed a policy of encouraging cogeneration in Section 372 of AB 1890. Worden stated that Edison felt the authors of the statute understood the potential difference between "self-cogeneration" and "self-generation". Worden noted that Edison relies upon the definition of cogeneration contained in the Public Utilities Regulatory Policies Act (PURPA). Worden explained that under the PURPA definition, in order to qualify as a cogenerator, the facility must be a power plant that produces two forms of energy - electric power and any other form of useful energy, such as steam gas or heat.
