GLOSSARY

After January 1, 1998, the California Public Utilities Commission is required by statute (SB 960) to categorize each case that comes before it. There are three categories, quasi-legislative, adjudicatory and ratesetting. If a case does not require hearings before it is resolved, the case is removed from the SB 960 category requirements. The legend below shows the abbreviation for each of the categories and provides a brief explanation.

- Q** **Quasi-legislative** proceedings are proceedings that establish policy or rules (including generic ratemaking policy or rules) affecting a class of regulated entities, including those proceedings in which the Commission investigates rates or practices for an entire regulated industry or class of entities within the industry.
- A** **Adjudicatory** proceedings are: (1) enforcement investigations into possible violations of any provision of statutory law or order or rule of the Commission; and (2) complaints against regulated entities, including those complaints that challenge the accuracy of a bill, but excluding those complaints that challenge the reasonableness of rates or charges, past, present, or future.
- RS** **Ratesetting** proceedings are proceedings in which the Commission sets or investigates rates for a specifically named utility (or utilities), or establishes a mechanism that in turn sets the rates for a specifically named utility (or utilities). Ratesetting proceedings include complaints that challenge the reasonableness of rates or charges, past, present, or future.
- N/A** Removed from the SB 960 category requirements.

Summary: On September 1, 1998, Russell G. Worden of Southern California Edison Company ("Edison") met with Commissioner Neepser and his advisor, David Gamson, at CPUC at the initiation of Edison. Oral ex parte communications were conveyed. Mr. Worden informed the commissioner about the protest filed against the application by the Office of Ratepayer Advocates ("ORA"), and that in discovery Edison had turned over confidential information to ORA concerning forecasts of Standard Offer 1 prices for

electricity. Edison stated that ORA in support of their protest utilized this confidential information to analyze the proposed qualifying facilities (“QF”) contract amendments. Later, according to Edison, four (4) of the affected QF’s sought the forecast from ORA. Edison stated to the commissioner an unwillingness to authorize the release of the information because to do so would make future negotiations regarding QF contract restructuring more difficult, and compromise Edison’s position. Mr. Worden concluded by saying he hoped the Commission would not compel Edison to release the forecast because to do so would be harmful to Edison’s customers.

Summary: On September 1, 1998, Pacific Gas & Electric (“PG&E”) attended an all party meeting in which Commissioner Duque and his advisor, Michelle Cooke, received oral and written ex parte communications. According to PG&E’s notice of Ex Parte communications, the meeting was initiated by Enron corporation. The notice had attached to it PG&E’s position paper on various issues discussed, and an attendance sheet. The attendance sheet indicated in addition to PG&E, the following parties sent representatives to the meeting: Coalition of California Utility Employees, Southern California Water Company, Sempra, Ellison & Schneider, California Energy Commission, Cellnet, New Energy Ventures, “Univ. of Calif/Calif. State Univ” (sic) (Jody London representing), Southern California Edison, Enron, and MRW & Associates. PG&E’s one page position paper attached to the notice contained supporting comments for each of the four (4) listed headlines as follows: (1) “PG&E agrees with the five general principles set forth in the PD,” (2) “PG&E agrees with the overall conclusion: credits should be based on avoided costs,” (3) “PG&E believes that basing credits on fully allocated costs is inconsistent with the principles in the PD, and (4) “PG&E believes that the PD should be modified to reflect the following.”. Andy Niven, PG&E attorney, additionally made oral comments to the effect that meter reading credits should be geographically “deaveraged,” that the Commission should acknowledge problems with full enhanced service provider (“ESP”)

consolidated billing credits, that fully allocated costs is not an appropriate basis for calculating credits, and that, if necessary, PG&E is not opposed to reviewing the line extension rules and tariffs in the line extension proceeding. Mr. Niven stated the Commission should not conclude PG&E is engaging in potentially anti-competitive behavior by providing customers with a meter as part of the line extension service.

Summary: On September 1, 1998, Pacific Bell ("PacBell") representative Bill Blase (Vice President-Regulatory) met briefly with Mr. Tim Sullivan, advisor to Commissioner Duque. Oral ex parte communications were conveyed. The meeting was initiated by PacBell and occurred at CPUC. Mr. Blase reiterated PacBell's position that reciprocal compensation for Internet calls between competing carriers is not appropriate because it creates an inequitable flow of funds from originating carriers to carriers serving Internet service providers.
