GLOSSARY

After January 1, 1998, the California Public Utilities Commission is required by statute (SB 960) to categorize each case that comes before it. There are three categories, quasi-legislative, adjudicatory and ratesetting. If a case does not require hearings before it is resolved, the case is removed from the SB 960 category requirements. The legend below shows the abbreviation for each of the categories and provides a brief explanation.

- Q** **Quasi-legislative** proceedings are proceedings that establish policy or rules (including generic ratemaking policy or rules) affecting a class of regulated entities, including those proceedings in which the Commission investigates rates or practices for an entire regulated industry or class of entities within the industry.
- A** **Adjudicatory** proceedings are: (1) enforcement investigations into possible violations of any provision of statutory law or order or rule of the Commission; and (2) complaints against regulated entities, including those complaints that challenge the accuracy of a bill, but excluding those complaints that challenge the reasonableness of rates or charges, past, present, or future.
- RS** **Ratesetting** proceedings are proceedings in which the Commission sets or investigates rates for a specifically named utility (or utilities), or establishes a mechanism that in turn sets the rates for a specifically named utility (or utilities). Ratesetting proceedings include complaints that challenge the reasonableness of rates or charges, past, present, or future.
- N/A** Removed from the SB 960 category requirements.

Summary: LATE FILED. On September 1, 1998, Southern California Edison (“SCE”) representative Bruce C. Foster in attendance at an all party meeting at CPUC extended oral ex parte remarks to Commissioner Duque and other attendees. Entities having representatives in attendance were CCUE, SoCalWater dba BVE, San Diego Gas &

Electric (“SDG&E), DGS, Pacific Gas & Electric, CEC, Cellnet, NEV, University of California/California State University, Enron, CLECA/CMA, and the Energy Division, Public Utilities Commission. Mr. Foster praised the proposed decision (“PD”) with respect to revenue cycle service (“RCS”) credits being calculated on the utility’s net avoided cost of providing those services. He expressed concern, however, that several methodological aspects of the PD will result in cost credits not accurately reflecting SCE’s net avoided costs. Mr. Foster further stated one of the significant differences between SCE and SDG&E with respect to the PD’s methodology is that SDG&E assumes all labor costs are avoidable. Mr. Foster stated basing SCE’s credits on SDG&E’s methodology is contrary to the principle of accurately reflecting net avoided costs. Mr. Foster then pointed out the PD incorrectly rejects proposed geographic deaveraging. SCE, like the other utilities, identified savings that could be accomplished if up to 10% penetration occurred according to Mr. Foster’s commentary. He concluded by saying this assumption, if anything, errs on the side of providing too large a credit for 1999, during which the penetration level is very likely to remain in the 1 to 2% range.
