NOTICES

Delivery of Formal Pleadings for Filing

Unless otherwise directed, all *courier-delivered documents* submitted for filing as part of the formal record in a proceeding should be *hand-carried directly* to the Commission's Docket Office, Room 2001, 505 Van Ness Avenue in San Francisco; Room 5109, 107 South Broadway in Los Angeles; or Room 4006, 1350 Front Street in San Diego. All *documents sent through the mail* for formal filing should be addressed *ONLY* to the Commission's Docket Office, Room 2001, 505 Van Ness Avenue, San Francisco, CA 94102.

Charge for Commission Documents

To purchase Commission documents, there is a charge of 20 cents a printed page (postage prepaid) with a minimum purchase of \$2.00.

GLOSSARY

After January 1, 1998, the California Public Utilities Commission is required by statute (SB 960) to categorize each case that comes before it. There are three categories, quasi-legislative, adjudicatory and ratesetting. If a case does not require hearings before it is resolved, the case is removed from the SB 960 category requirements. The legend below shows the abbreviation for each of the categories and provides a brief explanation.

- Q** **Quasi-legislative** proceedings are proceedings that establish policy or rules (including generic ratemaking policy or rules) affecting a class of regulated entities, including those proceedings in which the Commission investigates rates or practices for an entire regulated industry or class of entities within the industry.
- A** **Adjudicatory** proceedings are: (1) enforcement investigations into possible violations of any provision of statutory law or order or rule of the Commission; and (2) complaints against regulated entities, including those complaints that challenge the accuracy of a bill, but excluding those complaints that challenge the reasonableness of rates or charges, past, present, or future.
- RS** **Ratesetting** proceedings are proceedings in which the Commission sets or investigates rates for a specifically named utility (or utilities), or establishes a mechanism that in turn sets the rates for a specifically named utility (or utilities). Ratesetting proceedings include complaints that challenge the reasonableness of rates or charges, past, present, or future.
- N/A** Removed from the SB 960 category requirements.

SUBSCRIPTION INFORMATION

Subscription Notice for Draft Agenda Items

In compliance with Public Utilities Code Section 311.5, parties who wish to subscribe to receive draft agenda items may do so by writing to the Public Utilities Commission; Attention: Poly Arca, Room 1003; 505 Van Ness Avenue; San Francisco, CA 94102; or by calling (415) 703-1798. The cost for a one-year subscription to the entire public agenda package (which excludes Executive Session materials) is \$1,000. You may also order a partial agenda package (energy agenda items only or telecommunication agenda items only) at the cost of \$500 per year. The package you receive via mail will include only those agenda items available at the time of the agenda distribution date, which is usually 10 to 12 days prior to the Commission meeting. If agenda items (including revisions) are not ready on the distribution date, they will be made available at no charge in the lobby outside the Commission Auditorium at 9:00 a.m. on the morning of the Commission meeting, but not earlier.

In addition, the Commission will make draft agenda items available for viewing and photocopying (at 20 cents per page) at the Commission's Central Files Office (Room 2002), 505 Van Ness Avenue, San Francisco, and in the Los Angeles, San Diego, and the following field offices: El Centro, Eureka, Sacramento and San Bernardino. Since the agenda package will be mailed to these locations, it will be available at these locations a day or two after the distribution date. These locations will not receive agenda items that are not ready on the distribution date.

If an agenda item is held over to a subsequent Commission meeting, that agenda item and any revisions to that agenda item that were available on the morning of the initial Commission meeting (as well as any further available revisions) will be mailed in the Escutia package for the subsequent Commission meeting; the item and its revisions will also be available for viewing and photocopying in the Commission's Central Files Office and field offices as set forth above.

Intervenors who have a financial hardship determination pending or granted shall be eligible to receive draft agenda item packets at no charge.

The cost to receive the agenda only, without copies of draft agenda items, remains at \$75 per year.

Subscription Notice for Daily Calendar and/or Agenda

Parties who wish to subscribe to the Daily Calendar and/or the Agenda may do so by writing to the Public Utilities Commission; Attention: Poly Arca, Room 1003; 505 Van Ness Avenue; San Francisco, CA 94102; or by calling (415) 703-1798. The subscription cost for the Daily Calendar is \$225 per year. The Biweekly Daily Calendar is \$50 per year. The Agenda is \$75 per year. Checks are to be made payable to the Public Utilities Commission.

10/19/98	R95-04-043	Rulemaking on the Commission's own motion into competition for local exchange service and
	I95-04-044	Investigation on the Commission's own motion into competition for local exchange service.

Summary: On October 14, 1998, GTE California Inc. ("GTE") representative Jenny Wong initiated and conducted two (2) ex parte sessions with, respectively, Jose M. Jimenez, advisor to Commissioner Conlon, and Lester Wong, advisor to Commission President Bilas. The first session was at CPUC in the morning, and the second in the afternoon at Spuntinos Café, 524 Van Ness Avenue, San Francisco, CA.. Both oral and written ex parte communications were conveyed in each session, and the contents in each the same. Ms Wong stated it is GTE's view that Internet calls are interstate in nature and should not be considered as local or intrastate. She said GTE is concerned that if the proposed decision

on the jurisdictional issue is adopted, it would create an incentive for the competitive local carriers (CLC's) to target their market segment exclusively at Internet service providers while being subsidized by GTE. She concluded by saying if the Commission claims jurisdiction of this traffic, carriers must be given the opportunity to seek alternative compensation in their interconnection agreements. The written communication to each advisor consisted of a four (4) page handout in three (3) sections entitled, respectively: (a) "GTE...positions on proposed decision...", (b) "Existing revenues for switching to not cover the cost of reciprocal compensation..." (and listing certain cost data), and (c) "Existing rates do not cover...costs of reciprocal compensation." (and listing cost data in two columns, e.g. "45 minutes daily usage" and "2 hours daily usage").

Summary: On October 14, 1998 Pacific Bell ("PacBell") representatives initiated a meeting with Lester Wong, advisor to Commission President Bilas, at CPUC and thence engaged in oral and written ex parte communications. Bill Blase and Dan Jacobsen were the PacBell representatives. Mr. Blase said PacBell's position is that reciprocal compensation for Internet calls between competing carriers is inappropriate because it creates an inequitable flow of funds from originating carriers to carriers serving Internet service providers ("ISP"). Mr. Jacobsen said there is no technical justification for the proposed decision's finding that Internet calls consist of two (2) calls. Mr. Jacobsen added that originating carriers do not receive sufficient revenues from customers to cover reciprocal compensation to terminating carriers serving ISP's with predominantly one way traffic. The PacBell team provided the commissioner a fifteen (15) page handout in support of their positions.

Summary: On October 14, 1998 Pacific Bell ("PacBell") representatives initiated a meeting with Commissioner Knight and his advisor, Dorothy Duda, at CPUC and thence engaged in oral and written ex parte communications. Jim Callaway, Bill Blase, Jim Young, Ross Ireland, and Dan Jacobsen were the PacBell representatives. Mr. Blase said PacBell's position is that reciprocal compensation for Internet calls between competing carriers is inappropriate because it creates an inequitable flow of funds from originating carriers to carriers serving Internet service providers ("ISP"). Mr. Ireland said there is no technical justification for the proposed decision's finding that Internet calls consist of two (2) calls. Mr. Jacobsen said originating carriers do not receive sufficient revenues from customers to cover reciprocal compensation to terminating carriers serving ISP's with predominantly one way traffic. The PacBell team provided the commissioner a fifteen (15) page handout in support of their positions.

Pacific Bell, for a certificate of public convenience and necessity to provide InterLATA and IntraLATA and

local exchange telecommunications services.

Summary: On October 14, 1998 Pacific Bell (“PacBell”) representatives initiated a meeting with Commissioner Neeper, at CPUC and thence engaged in oral ex parte communications. Jim Callaway, Virginia Vann, Bill Blase, Jim Young, Dave Morse, and Dan Jacobsen were the PacBell representatives. Mr. Morse told the commissioner PacBell service representatives do not have access to carrier billing detail for the big three (3) IXC’s, and they only refer to carrier billing information to carry out billing tasks as requested by carriers. He added that service representatives do not use carrier billing information to market PacBell or affiliate services. Mr. Jacobsen said PacBell can readily identify costs of service representative involvement in joint marketing and that the Federal Communication Commission’s “CPNI” rules provide the basis for fair use of subscriber information by all carriers.

Summary: On October 15, 1998, GTE California Inc. (“GTE”) representative Jenny Wong initiated and conducted consecutive ex parte sessions with, respectively, Mr. Fassil Fenikile, advisor to Commissioner Neeper, and Mr. Jose Mr. Jimenez, advisor to Commissioner Conlon. Two written ex parte handouts were conveyed to each advisor. One was a copy of H.R. 4801 (InterLATA Communication Improvements Act of 1998 (Introduced in the House). The other was a copy of the Notice of Investigation by the PUC of the State of Maine on Brooks Fiber Communication related to the Internet issue. An introductory sentence in the latter states: “In this Notice we propose to find that Brooks’s actions constitute an unreasonable act or practice by a public utility within the meaning of...(citation)...and to order corrective actions.” The introduction further identifies Brooks as a competitive local exchange carrier (“CLEC”), and that Brooks obtained fifty two (52) central office codes in Maine that are outside the area that it designated in its terms and conditions as its local exchange service area. It adds: “Brooks...use of a large number of CO codes for a purpose other than providing local exchange service presents a serious risks that Maine will run of CO codes in the 207 area code, and will need a second area code, thus causing substantial disruption to a large number of customers.” The Maine PUC document is fourteen (14) pages in length and, along with H.R. 4801, is attached to GTE’s Notice of Ex Parte Communication.

Summary: On October 15, 1998, GTE California Inc. (“GTE”) representative Jenny Wong initiated and conducted an ex parte session with Commissioner Duque. Both oral and written ex parte communications were conveyed. In regard to the administrative law

judge’s proposed decision (“PD”), Ms Wong stated it is GTE’s view that Internet calls are interstate in nature and should be exempted from local reciprocal compensation. The PD on the jurisdictional issue would have significant impact on GTE, Ms Wong said, and she provided the commissioner a handout delineating such impact. She said GTE is concerned that if the proposed decision on the jurisdictional issue is adopted, it would create an incentive for competitive local carriers (CLC’s) to target their market segment exclusively at Internet service providers while being subsidized by GTE. She further indicated the Commission should allow carriers the opportunity to seek alternative methods of compensation in their interconnection agreements if the PUC is to claim jurisdiction of this traffic. The written communication consisted of three (3) handouts. The first was a four (4) page handout in three (3) sections entitled, respectively: (a) “GTE...positions on proposed decision...”, (b) “Existing revenues for switching to not cover the cost of reciprocal compensation...” (and listing certain cost data), and (c) “Existing rates do not cover...costs of reciprocal compensation.” (and listing cost data in two columns, e.g. “45 minutes daily usage” and “2 hours daily usage”). The second handout was a copy of H.R. 4801, proposed legislation on the regulation of Internet traffic. The third handout was a copy of the Notice of Investigation of the PUC of the State of Maine on Brooks Fiber Communications as it relates to the Internet issue.

Summary: On October 16, 1998, in San Diego, Cox California Telcom, LLC (“Cox”) gave a presentation to Commissioner Neepser and other PUC staff. The presentation was entitled “Challenges Facing Cox as a Facilities Based Competitor.” The location of the briefing was 5159 Federal Boulevard in San Diego. The other PUC staff members in attendance were the director and assistance director of the Consumer Services Division and a member of the Public Advisor’s staff from PUC’s San Diego office. Cox representatives attending were Richard Smith, William Geppert, Mary Ball, Bill Fitzsimmons, Jacqui Vines, Steve Gautereaux, Roger Kain, Randy Gohler, Stan Gafner, Robert Long, Sheri Stinchcomb, Art Reynolds, David Vaughn, Marco Valenti, and John Chan. In addition to the oral presentation, a thirteen (13) page handout was provided the PUC attendees. Cox indicated the key issues facing the company included: (1) access to multi-tenant properties, (2) access to telephone numbers, (3) access to the remainder of the telephone network, and (4) access to effective operational support systems. Cox said 52% of San Diego’s residents

live in rental housing and 40% of the homes serviced by Cox are multi-dwelling units (“MDU”). Cox urged the Commission to ensure non-discriminatory access for CLC’s to incumbent local exchange carrier (“ILEC”) controlled facilities on MDU’s, to enforce access to MDU wiring and conduit, and ensure MDU owners are not denied access to competitive alternatives because of existing arrangements of ILEC facilities on MDU properties. In regard to developing competition in California, Cox stated there is a continuing problem of access to telephone numbers, and frequent controversy over area code realignment and rationing among 182 million telephone numbers. Mr. Smith stated only a fraction of the state’s 182 million numbers are presently assigned, and that the number “shortage” was due to the way that telephone numbers are allocated to carriers. Neither the geographical nor overlay approaches address the inefficiencies of current number allocation procedures, Mr. Smith said, and that only number conservation methods could dramatically reduce the need for frequent area code relief. Cox urged PUC to implement the porting of unassigned numbers and individual telephone number pooling. Contrary to most businesses, Cox stated, local exchange carriers must cooperate with each other, else an uncooperative ILEC can impair the quality services of new carriers in response to events occurring within the ILEC’s network. Mr. Smith stated that competitive local carriers’ (“CLC’s”) service quality is directly affected by problems caused by an ILEC within the ILEC’s network. CLC’s must rely on the ILEC’s for access to the remainder of the public switches network, Cox said, but ILEC’s have delayed CLC orders for trunk connections. Cox said some ILEC’s have intentionally prevented their customers from calling CLC customers, or have failed to promptly load and retain CLC NXX codes in ILEC switches. ILEC’s have generally been unresponsive to CLC trouble reports, Mr. Smith said, and that they are often unwilling or unable to identify the source of problems in ILEC networks which are negatively affecting CLC services. He urged PUC to establish operational support system (“OSS”) performance standards and enforcement mechanism for ILEC provisioning to CLC’s. Cox said the Commission’s proposed end user service quality standards would be stricter than existing inter-company standards. This could place CLC’s in a “squeeze,” Mr. Smith said, between strict end user requirements and the more lenient requirements for ILEC’s provisioning of service to CLC’s. Mr. Smith concluded by saying the Commission should coordinate any end user new service quality standards with OSS performance standards. The thirteen (13) page handout summarized the oral presentation.
