GLOSSARY

After January 1, 1998, the California Public Utilities Commission is required by statute (SB 960) to categorize each case that comes before it. There are three categories, quasi-legislative, adjudicatory and ratesetting. If a case does not require hearings before it is resolved, the case is removed from the SB 960 category requirements. The legend below shows the abbreviation for each of the categories and provides a brief explanation.

- Q** **Quasi-legislative** proceedings are proceedings that establish policy or rules (including generic ratemaking policy or rules) affecting a class of regulated entities, including those proceedings in which the Commission investigates rates or practices for an entire regulated industry or class of entities within the industry.
- A** **Adjudicatory** proceedings are: (1) enforcement investigations into possible violations of any provision of statutory law or order or rule of the Commission; and (2) complaints against regulated entities, including those complaints that challenge the accuracy of a bill, but excluding those complaints that challenge the reasonableness of rates or charges, past, present, or future.
- RS** **Ratesetting** proceedings are proceedings in which the Commission sets or investigates rates for a specifically named utility (or utilities), or establishes a mechanism that in turn sets the rates for a specifically named utility (or utilities). Ratesetting proceedings include complaints that challenge the reasonableness of rates or charges, past, present, or future.
- N/A** Removed from the SB 960 category requirements.

Summary: On April 7, 1998, Bruce Foster, Vice President for Southern California Edison Company (Edison), met with Cmmr. Bilas in San Francisco. Also present was Russell Worden, Regulatory Affairs Manager for Edison. The Edison representatives stated that the draft decision contains the correct interpretation of section 369. The Edison representatives pointed out that only if the incremental load is isolated from the utility transmission and distribution system, is Edison exempt from paying under section 369. The Edison representative stated that only one synchronous cogenerator connected to the Edison system has a "black start" capability. The Edison representatives further stated that because these generators rely upon the Edison system, customers would be obligated to pay Competitive Transition Cost, if the generators were to serve incremental load. The Edison representatives stated that the very parties seeking to expand section 369 exemptions are those primarily responsible for 70 percent of Edison's uneconomic cost, namely the above-market Qualifying Facilities contracts.

4/16/98 A97-07-030 Pacific Gas and Electric Company, to sell and Modesto Irrigation District to acquire electric distribution and transmission facilities serving the Cities of Ripon, Escalon, Riverbank, Oakdale, and surrounding rural areas.

Summary: On April 13, 1998, Jana Corey, Director Regulatory Relations, Pacific Gas and Electric Company (PG&E), met with Cmmr. Conlon in San Francisco. Also present were: James Hendry, advisor to Cmmr. Conlon; Chris Mayer, Assistant General Manager for Modesto Irrigation District (MID); Scott Steffen, Assistant General Counsel For MID; Tom Kimball, Assistant General Manager, Electric Transmission and Distribution for MID; Les Guliasi, Manager Regulatory Relations, PG&E; and Bill Manheim, attorney for PG&E. Written materials (attached to the notice) were used. Guliasi stated that PG&E would like the proposed decision (PD) modified to allocate the gain on sale to shareholders, preserving the Redding II decision, and to reflect changes to the service area agreement by PG&E and MID. Manheim stated that the changes allow the Commission to express termination rights over the service area agreement, allow any form of distribution competition ordered by the Commission to be introduced into MID and PG&E's service territories, and reduce the term of the agreement from 25 to 15 years. Mayer stated that on April 1, MID implemented a direct access program in MID territory. Mayer stated further that, MID's Competition Transition Cost is approximately 40 percent of a customer's bill. Mayer stated that there has been no increase in MID's rates in 3-4 years and there has been a 10 percent rate reduction for small customers. Manheim suggested that the Commission consider an OII to fully examine all aspects of distribution competition Mayer stated that the PD's reference to PG&E's rate design window options discounting is only available to customers over 20kW, which largely excluded residential and agricultural customers, most of who are being acquired by MID through this transaction.

4/16/98 C97-08-004 Commission Instituting Investigation and Suspension of the Commission's own motion of tariff filed by Advice Letter No. 287 and 287-A of San Jose Water Company in Santa Clara County.

Summary: On April 15, 1998, Fred Meyer, Vice President of Regulatory Affairs for San Jose Water Company (SJWC), met with Cmmr. Duque in San Francisco. Also present was Timothy Sullivan, advisor to Cmmr. Duque. Meyer explained that the raw water tariff proposed by SJWC is a cost based, generic tariff applicable to all customers, and that the tariff price should not be determined based on the cost of service to any individual customer. Meyer noted that the incremental cost of connecting any new water customer to the existing system is always low. Meyer pointed out that if the Commission adopted

Garcia's proposed rate for raw water, SJWC will lose margin which will ultimately lead to higher rates for other customers. Meyer further explained that raw water is not considered a "new basic water supply", and, if the Commission approved a tariff rate for raw water which is below the existing rate for recycled water, the tariff would conflict with the policy objectives and negate the recycled water incentives.
