GLOSSARY

After January 1, 1998, the California Public Utilities Commission is required by statute (SB 960) to categorize each case that comes before it. There are three categories, quasi-legislative, adjudicatory and ratesetting. If a case does not require hearings before it is resolved, the case is removed from the SB 960 category requirements. The legend below shows the abbreviation for each of the categories and provides a brief explanation.

- Q** **Quasi-legislative** proceedings are proceedings that establish policy or rules (including generic ratemaking policy or rules) affecting a class of regulated entities, including those proceedings in which the Commission investigates rates or practices for an entire regulated industry or class of entities within the industry.
- A** **Adjudicatory** proceedings are: (1) enforcement investigations into possible violations of any provision of statutory law or order or rule of the Commission; and (2) complaints against regulated entities, including those complaints that challenge the accuracy of a bill, but excluding those complaints that challenge the reasonableness of rates or charges, past, present, or future.
- RS** **Ratesetting** proceedings are proceedings in which the Commission sets or investigates rates for a specifically named utility (or utilities), or establishes a mechanism that in turn sets the rates for a specifically named utility (or utilities). Ratesetting proceedings include complaints that challenge the reasonableness of rates or charges, past, present, or future.
- N/A** Removed from the SB 960 category requirements.

5/6/98	R95-04-043	Rulemaking on the Commission's own motion into competition for local exchange service and
	I95-04-044	Investigation on the Commission's own motion into competition for local exchange service.

Summary: On May 5, 1998, Rick Witherington, AT&T Communications of California, Inc. ("AT&T"), Governmental Affairs Vice President, met with Cmmr. Bilas in San Francisco. Also present were: Lester Wong, advisor to Cmmr. Bilas, and Rochelle Chong, a telecommunications consultant. Written materials (attached to the notice) were used. Chong stated that the 1996 Telecommunications Act requires the Commission to verify that all aspects of the 14-point checklist have been met, before allowing a Bell Operating Company (BOC) entrance in the long distance market. Chong further stated that the key issue, involved in the SBC filing, is the limitation of local competition, not the expansion of long distance competition. Chong described the possibility of future Local exchange carriers involvement in the long distance market as a powerful incentive for the SBC-Pacific Bell (PacBell) cooperation in the opening of the local market to competition. Chong stated that premature BOC entrance into the long distance market, however, would dissolve that incentive, delay local competition for several years, cripple or drive local competitors out of the market, and injure the consumer. Chong further stated that SBC-PacBell's application fails to meet the 14-point checklist in four categories. Chong recommended that the Commission reject the request of SBC-PacBell for entrance into the long distance market until full implementation of the 14-point competitive checklist has occurred.

5/7/98 A97-12-043 Southern California Edison Company, for order approving termination agreement for termination of Interim Standard Offer No. 4 Power Purchase Agreement with Harbor Cogeneration Company.

Summary: On May 24, 1998, Emilio Varanini III, attorney for Indeck Capital Inc.(Indeck), on behalf of Harbor Cogeneration Company, met with Julie Halligan, advisor to Cmmr. Bilas and David Gamson, advisor to Cmmr. Neeper, in San Francisco. Also present were: John Salyer, President of Indeck; Gary Allen, Manager of Strategic Planning - QF Resource Business Unit for Southern California Edison Company (Edison); and Bruce Foster, Vice President - Regulatory Affairs for Edison, (collectively the "Proponents"). Referring to the Administrative Judge's ruling of 4/15/98, the Proponents stated that knowing that all information can be obtained or required to be provided to competitors would stifled the flow of information to the Commission and severely limit discussions regarding power purchase agreement termination. if the Commission does not protect detailed power plants records as confidential, power plants owners will be reluctant to provide detailed viability and operational information to the Commission. The Edison representatives stated that Edison has routinely requested that this type of information be covered by protective order, and such request has been granted until now. The Edison representatives further stated that a change of policy protecting such information would jeopardize the Commission's stated intention of encouraging Qualifying Facilities (QF) contract restructuring. The Edison Representatives stated that the only party harmed by this additional release of information would be Edison's customers, because value that could be secured for customers would have to be conveyed to the QF side of further negotiations.
