GLOSSARY

After January 1, 1998, the California Public Utilities Commission is required by statute (SB 960) to categorize each case that comes before it. There are three categories, quasi-legislative, adjudicatory and ratesetting. If a case does not require hearings before it is resolved, the case is removed from the SB 960 category requirements. The legend below shows the abbreviation for each of the categories and provides a brief explanation.

- Q** **Quasi-legislative** proceedings are proceedings that establish policy or rules (including generic ratemaking policy or rules) affecting a class of regulated entities, including those proceedings in which the Commission investigates rates or practices for an entire regulated industry or class of entities within the industry.
- A** **Adjudicatory** proceedings are: (1) enforcement investigations into possible violations of any provision of statutory law or order or rule of the Commission; and (2) complaints against regulated entities, including those complaints that challenge the accuracy of a bill, but excluding those complaints that challenge the reasonableness of rates or charges, past, present, or future.
- RS** **Ratesetting** proceedings are proceedings in which the Commission sets or investigates rates for a specifically named utility (or utilities), or establishes a mechanism that in turn sets the rates for a specifically named utility (or utilities). Ratesetting proceedings include complaints that challenge the reasonableness of rates or charges, past, present, or future.
- N/A** Removed from the SB 960 category requirements.

 I95-04-044 Investigation on the Commission's own motion into competition for local exchange service.

Summary: On May 12, 1998, Rick Witherington, Government Affairs Vice President for AT&T Communications of California, Inc. (AT&T), met with Cmmr. Duque in San Francisco. Also present were: Tim Sullivan, advisor to Cmmr. Duque; and Rochelle Chong, a telecommunications consultant. Written materials (attached to the notice) were used. Chong stated, on behalf of AT&T, that the 1996 Telecommunications Act requires to verify that all aspects of the 14-point checklist have been met, before allowing a Bell Operating Company (BOC) entrance into the long distance market. Chong explained that the key issue involved, in the SBC filing, is the limitation of local competition, not the expansion of long distance competition. Chong urged against eliminating the incentive of long distance relief before sustainable and broad-based competition in the local exchange market is assured.

Chong described the possibility of future local exchange carrier involvement in the long distance market as a powerful incentive for SBC-PacBell cooperation in the opening of the local market to competition. Chong warned that premature BOC entrance into the long distance market would dissolve that incentive, delay local competition, drive local competitors out of the market, and injure the consumer. Chong recommended that the Commission reject the SBC-PacBell request for entrance into the long distance market until full implementation of the 14-point competitive checklist.

Summary LATE FILED. On May 7, 1998, Margaret Pascoe, Pacific Bell (PacBell) Director - Regulatory, met with Jose Jimenez, advisor to Cmmr. Conlon, in San Francisco. Also present were: ALJ Pulsifer; and Helen Mickiewicz, attorney for the Commission. Pascoe mentioned that the City of San Diego ordered the City Manager to send a letter to the Commission in support of a complete overlay for 619 area code relief. Pascoe pointed out that it was strictly on the initiative of the City of San Diego to send such a letter, even though San Diego benefits from either alternatives 10 a, 10c or 11 for area code relief. Pascoe confirmed that the citizens of La Mesa and Chula Vista would be part of the new area code created as a result of the split in alternative 11.

Summary: On May 14, 1998, Timothy McCallion, Regulatory & Governmental Affairs Vice President of GTE California (GTE), met with Cmmr. Neep in San Francisco. Henry Weissmann, counsel for GTE Corporation and GTE Communication Corporation, was also present. McCallion stated that the Commission should keep the evidentiary record open to allow parties to supply additional evidence. Weissmann stated that the application raised issues of the competitive effects of the merger. Weissmann explained that the Commission should deny the application. Weissmann noted that the existence of a factual dispute necessitated further proceedings. Weissmann noted that one such factual dispute was whether the applicants' market share for the Internet backbone was 20 percent, as the applicants claimed, or 40 to 60 percent, as GTE claimed. McCallion requested the Commission to grant GTE's motion to compel discovery.

Summary: On May 13, 1998, Timothy McCallion, Regulatory & Governmental Affairs Vice President of GTE California (GTE), met with Cmmr. Knight in San Francisco. Also present was Henry Weissmann, Attorney for GTE Corporation and GTE Communications Corporation. McCallion stated that the Commission should keep the evidentiary record open to provide parties the opportunity to present additional evidence. McCallion noted that the primary issues in the proceeding were the effect of the merger on competition in the Internet backbone and long distance markets. Weissmann noted that GTE and other parties have not yet had the opportunity to rebut the factual claims made in the first time in the applicants' reply to protests. Weissmann noted that the factual disputes included such matters as the applicants' market share for the Internet backbone, barriers to entry in that market, and the changing dynamic of the long distance market. Weissmann urged the Commission to examine the effects of the merger on the Internet backbone market. McCallion observed that the European Commission had issued a statement of objection and was currently conducting a hearing.
