GLOSSARY

After January 1, 1998, the California Public Utilities Commission is required by statute (SB 960) to categorize each case that comes before it. There are three categories, quasi-legislative, adjudicatory and ratesetting. If a case does not require hearings before it is resolved, the case is removed from the SB 960 category requirements. The legend below shows the abbreviation for each of the categories and provides a brief explanation.

- Q** **Quasi-legislative** proceedings are proceedings that establish policy or rules (including generic ratemaking policy or rules) affecting a class of regulated entities, including those proceedings in which the Commission investigates rates or practices for an entire regulated industry or class of entities within the industry.
- A** **Adjudicatory** proceedings are: (1) enforcement investigations into possible violations of any provision of statutory law or order or rule of the Commission; and (2) complaints against regulated entities, including those complaints that challenge the accuracy of a bill, but excluding those complaints that challenge the reasonableness of rates or charges, past, present, or future.
- RS** **Ratesetting** proceedings are proceedings in which the Commission sets or investigates rates for a specifically named utility (or utilities), or establishes a mechanism that in turn sets the rates for a specifically named utility (or utilities). Ratesetting proceedings include complaints that challenge the reasonableness of rates or charges, past, present, or future.
- N/A** Removed from the SB 960 category requirements.

Summary: On May 26, 1998, Michael Salsbury, General Counsel for MCI

Telecommunications Corporation (MCI) met with Cmmr. Neep in San Francisco. Also present were: James Lewis, Regional Executive - Western Public Policy Group, and Richard Severy, Director of Public Policy, for MCI. Salsbury stated that the companies expect all regulatory approvals to be in hand by July of 1998, and urged the Commission to conclude its approval process by then. Salsbury emphasized that the merger will enhance local competition. Salsbury explained that the combined networks of the two companies can be utilized to serve a larger customer base than MCI could reach on its own. Salsbury also explained the current high prices in California render new entry uneconomic. Salsbury pointed out that, with the inadequacy of local resale discounts, it is essential that competitive local carriers be able to efficiently combine UNEs and to concentrate traffic in ways that overcome today's restrictions on collocation. Salsbury also stressed the importance of workable OSS to local competition.

Corey further stated that for unbundled component-based billing PG&E plans to bill interval meter customers on fully functionalized rates beginning 6/1/98, with full service of monthly direct access customers' bills based on functionalized rates in the summer of 1999 after implementation of PG&E's more flexible billing system. Corey explained that PG&E filed a petition to modify the metering decision to allow PG&E to continue to use PG&E's methodology for VEE for monthly customers only in the interim until permanent standards are approved.

5/29/98	A97-12-043	Southern California Edison Company, for order approving termination agreement for termination of Interim Standard Offer No. 4 Power Purchase Agreement with Harbor Cogeneration Company.
---------	------------	--

Summary: On May 22, 1998, Russell G. Worden, Regulatory Affairs Manager for Southern California Edison Company (Edison), left a voice message for Michelle Cooke, adv. to Cmmr. Duque. Worden stated that Southern California Gas Company's intervention in the proceeding will impede established Commission policy encouraging QF contract restructurings. If Southern California Gas Company's position were to prevail, Edison would not be able to secure future restructurings of contracts with cogenerators. He also stated that Southern California Gas Company had not intervened in renewable QF contract restructuring applications because it enjoys a windfall in benefits from such restructurings, as the renewable generation is typically replaced with gas-fired generation.

Summary: On May 27, 1998, four meetings were held separately with Robert Lane, adv. to Cmmr. Knight; Tim Sullivan, adv. to Cmmr. Duque; Jose Manuel Jimenez, adv. to Cmmr. Conlon; and Fassil Fenikile, adv. to Cmmr. Neeper, at the Commission Office in San Francisco. Kurt Rasmussen, Manager, Regulatory & Governmental Affairs, GTE California (GTE), and Eugene Eng, Manager, Regulatory & Legislative Integration of GTE, were present. GTE believes that Internet traffic should be treated as interstate in nature and not subject to reciprocal compensation. Eng reviewed several FCC decisions which support GTE's belief. Failing to reclassify Internet traffic as interstate, there must be some method of determining reciprocal compensation based on other than per-minute charges such as Bill & Keep or on a flat rate basis. A handout regarding applicability of reciprocal compensation to ISP traffic was distributed to four advisors. It is attached to the notice.
