### GLOSSARY

After January 1, 1998, the California Public Utilities Commission is required by statute (SB 960) to categorize each case that comes before it. There are three categories, quasi-legislative, adjudicatory and ratesetting. If a case does not require hearings before it is resolved, the case is removed from the SB 960 category requirements. The legend below shows the abbreviation for each of the categories and provides a brief explanation.

- Q     **Quasi-legislative** proceedings are proceedings that establish policy or rules (including generic ratemaking policy or rules) affecting a class of regulated entities, including those proceedings in which the Commission investigates rates or practices for an entire regulated industry or class of entities within the industry.
- A     **Adjudicatory** proceedings are: (1) enforcement investigations into possible violations of any provision of statutory law or order or rule of the Commission; and (2) complaints against regulated entities, including those complaints that challenge the accuracy of a bill, but excluding those complaints that challenge the reasonableness of rates or charges, past, present, or future.
- RS    **Ratesetting** proceedings are proceedings in which the Commission sets or investigates rates for a specifically named utility (or utilities), or establishes a mechanism that in turn sets the rates for a specifically named utility (or utilities). Ratesetting proceedings include complaints that challenge the reasonableness of rates or charges, past, present, or future.
- N/A   Removed from the SB 960 category requirements.

**Summary: AUGMENTATION REQUIRED.** On May 22, 1998, Sharon Nelson, a member of the Board of Directors of Nextlink Communications, Inc. (Nextlink), met with Cmmr. Conlon. Also present were: Gerry Salemme, Senior Vice President of Nextlink; and Karen Potkul, Vice President, Legal and Regulatory Affairs of Nextlink. Written materials

(attached to the notice) were used. Referring to the request of Pacific Bell (PacBell) to enter the interLATA market in California, the Nextlink representatives stated that PacBell's request should be denied because its Operational Support Systems do not meet the Section 271 requirements. The Nextlink representatives further stated that the problems it has experienced obtaining collocation space from PacBell demonstrate a pervasive attempt by PacBell to impede competition and not to cooperate with new entrants.

**Summary: LATE FILED.** On May 27, 1998, Bruce Foster, Vice President of Southern California Edison Company (Edison), wrote a letter (attached to the notice) to Cmmr. Neeper. On May 27, 1998, Russell Worden, Regulatory Affairs Manager for Edison, hand-delivered copies of the letter to the offices of Cmmrs. Neeper, Bilas, Duque, and Knight; and to Commissioners' advisors James Hendry, Julie Halligan, Robert Lane, David Gamson, and Michelle Cooke; and to ALJ Minkin. While delivering copies of the letter to Julie Halligan, James Hendry, and David Gamson, Worden stated that the letter was in response to an April 29, 1998 letter from the City of San Diego's Metropolitan Waste Water District (MWWD) regarding the interpretation of the Public Utilities Code section 369 as it pertains to the obligation for customers to pay the competition transition charge (CTC). Worden stated that the Foster's letter pointed out that MWWD's letter departed from the evidence in that MWWD seeks a CTC exemption for a "direct transaction" that would occur between two division of the city, an arrangement that MWWD's witness testified was structured specifically to obtain the CTC exemption. Worden stated that Foster's letter explained that because MWWD's facilities will be interconnected to the local utility's transmission and distribution system, it will use that system for purposes of section 369.

**Summary:** On May 29, 1998, Stanley Hulett, a representative for Southwest Gas Corporation (Southwest), spoke to Cmmr. Conlon. Hulett noted the magnitude of the disallowance resulting from the implementation of the proposed decision (PD) as compared to other California utilities. Hulett pointed out at the negative impact the PD would have on profits from Southwest's operations in California. Hulett referred to the significant level of support for the settlement agreement in Truckee and the likely delay in completion or modification of the scope of the expansion, if the PD is adopted. Hulett stated that the economics of the expansion have been completely ignored in the PD.
