There was an urgent need for the Commission to issue a final decision on the Back-Up Relief Plan for the upcoming number pooling trial in the 310 NPA in that a letter recently filed with the Commission indicated the exhaustion of the 310 NPA in less than nine months.

Statements made by Pacific Bell in several recent filings concerning numbering promoting overlays with seven-digit dialing instead of the FCC-mandated ten-digit dialing plan were anti-competitive and illegal.

Summary: On February 2, 2000 @ 11:15 a.m., at the CPUC in San Francisco, the following persons met with Commissioner Josiah Neepser and David Gamson, his Advisor, to discuss the Proposed Decision (“PD”) of ALJ Barnett, to wit: Thomas Lu, Business Manager, Watson Cogeneration Company (“Watson”), David Dyck and Alan Lippincott of ARCO Products Company (majority owner of Watson), and R. Thomas Beach of Crossborder Energy, consultant to Watson.

Watson supports the findings in the PD that the Southern California Gas Company’s (“SoCalGas”) Residual Load Service (“RLS”) tariff is driving electric generation loads out of the SoCalGas service territory. To stop the resulting harm to ratepayers, the RLS must be

eliminated or reformed now, not in three years as recommended in the PD. A cost-based peaking rate could be used to replace the current RLS tariff.

Watson opposes the PD's proposal for a Sempra-wide transportation rate for electric generators in Southern California because such a rate will result in a \$10.7 million subsidy from generators in Los Angeles to those in San Diego. There are significant locational differences in electric pricing and new generation is under development in San Diego even without a Sempra-wide rate.
