

March 21, 2014

Edward Randolph Director of the Energy Division California Public Utilities Commission 505 Van Ness Avenue San Francisco, CA 94102

Re: A.08-06-001-Report of Southern California Edison

Company (U 338-E) on Interruptible Load Programs and

Demand Response Programs

Dear Mr. Randolph:

Enclosed is Southern California Edison Company's ("SCE") Report on Interruptible Load Programs and Demand Response Programs pursuant to Ordering Paragraph No. 39 of Decision 09-08-027. SCE's report presented in Appendix A, follows the reporting requirements and uses the approved template from Energy Division. It is posted on a publicly available website:

- Go to www.sce.com;
- Click on the "Regulatory Information" link at the bottom right of the page;
- Select "CPUC Open Proceedings";
- Enter "A.08-06-001" in the search box;
- Locate and select the "SCE February 2014 Report on ILP and DR Programs" links to access associated documents.

Very truly yours,

/s/ R. Olivia Samad

R. Olivia Samad

cc: Kelly Hymes, Administrative Law Judge Bruce Kaneshiro

All Parties of Record in A.08-06-001 and A.11-03-001 - via email

RMS: LIMS- 314-5796

Enclosure(s)

Ordering Paragraph No. 39 requires PG&E and the other utilities to "...use a consistent monthly report format approved by Energy Division staff, and ...provide these monthly reports to the Director of the Commission's Energy Division, with service on and the most recent service list in this proceeding."

Notes

- 1. Ex Ante Estimated MW = The monthly ex ante average load impact per customer reported in the annual April 1, 2013 D. 08-04-050 Compliance Filing multiplied by the number of currently enrolled service accounts for the reporting month, where the ex ante average load impact is the average hourly load impact for an event that would occur from 1 6 pm on the system peak day of the month with the exception of CPP where the average hourly load impacts from 2 6 pm are used. Monthly ex ante estimates are indicated only for programs which can be called for events that reporting month. For programs that are not available that month or do not have a positive load impact, a value of zero is reported. SDP Residential is available year-round, however due to no events being called during these months in previous years no ex ante data is available.
- 2. Ex Post Estimated MW = The annual ex post average load impact per customer reported in the annual April 1, 2013 D.08-04-050 Compliance Filing multiplied by the number of currently enrolled service accounts for the reporting month, where the ex post load impact per customer is the average load impact per customer for those customers that may have participated in an event(s) between 1 6pm on event days in the preceding year when or if events occurred. New programs report "n/a", as there were no prior events. Ex Post OBMC Load Impacts are based on program year 2008.
- 3. Load Impacts are not available for the SLRP, therefore MW are estimated based on the hour of peak scheduled load reduction.
- 4. Readers should exercise caution in interpreting or using the estimated MW values found in this report in either the ex post or ex ante columns. Ex post estimates reflects historic event(s) that have taken place during specific time periods and actual weather conditions by a mix of customers that participated on event day(s). Ex ante forecasts account for variables not included in the ex-post estimate such as normalized weather conditions, expected customer mix during events, expected time of day which events occur, expected days of the week which events occur, and other lesser effects forecast impact estimates that would occur between 1 pm and 6pm during a specific DR program's operating season, based on 1-in-2 (normal) weather conditions. The ex ante and ex post load impact serior to various other agencies (CAISO, FERC, NERC, etc.) which may differ from the load impact estimates in this report but are still based on the June 1st Compliance Filing. The differences are attributed to the use of average values over specific load impact to various of average values over specific to the use of average values over specific time periods and actual weather conditions by a mix of customers that participated on event days. Ex anterior periods and other lesser effects from the load interior periods and other lesser effects from the load interior periods and other lesser effects from the load interior periods and other lesser effects from the load interior periods and other lesser effects from the load interior period of the week which events occur, and other lesser effects from the load interior periods and other lesser effects from the load interior periods and other lesser effects from the load interior periods and other lesser effects from the load interior periods and other lesser effects from the load interior periods and other lesser effects from the load interior periods and other lesser effects from the load interior periods and other lesser effects from the load interior periods and other lesser effects from t
- 5. PTR Service Accounts reflects the total number of customers eligible for PTR notifications as of Jan 1, 2014.

Notes:

Estimated Average Ex Post Load Impact kW / Customer = Average kW / Customer service account over actual event hours during the 1 - 6 pm window for the preceding year if events occurred omitting 0 and negative load values if program was available, but not dispatched. Some programs may experience no events or few events or few events while other programs may operate regularly depending on event triggers. For existing programs, the Average Ex Post Load Impact per customer service account remains constant across all months with the exception of RTP. A zero (0) load impact value is reported for RTP for June and September as the load impacts for these months are negative.

*Ex Post OBMC Load Impacts are based on program year 2008.

Notes:

Average Ex Ante Load Impact kW/Customer = Average kW / Customer, under 1-in-2 weather conditions, of an event that would occur from 1 - 6 pm on the system peak day of the month, as reported in the load impact reports filed April 1, 2013. For programs that are not active outside of the summer season a zero load impact value is reported. For programs available outside of the summer season, estimated Average Ex Ante Load Impacts for November through March/April/May are used depending on available data and reflect a typical event that would occur from 4 - 9 pm under the same conditions. Data from Ex Ante load impact reports filed in 2009 is used for OBMC reporting.

- 1. The accounts eligible to participate in OBMC is not available because the number of customers who can reduce 15% of their entire circuit load during every rotating outage cannot be reasonably estimated
- 2. PTR Service Accounts reflects the total number of customers eligible for PTR notifications as of Jan 1, 2013.
- 3. Effective April 1, 2013, DBP is available to all non-residential customers.

Notes:

TI Verified MW

Activity reflects projects initiated in 2009-2011.

Customer counts reported on this page are not excluded from counts in the Program MW tab. MWs reported on this page are not directly related to MW reported in the Program MW tab.

TA Identified MW Represents identified MW for service accounts from completed TA.

AutoDR Verified MW Represents verified/tested MW for service accounts that participated in Auto DR.

Represents verified MW for service accounts that participated in TI (i.e. must be enrolled in DR) and not in AutoDR; MW reported here not necessarily amount enrolled in DR

*A reduction in standard TI MWs can occur when a customer upgrades to Auto-DR (subsequently, the ADR MWs increase).

*Also, if a customer leaves a DR program it will reduce the MWs for that particular DR program.

Represents the sum of verified MW associated with the service accounts in the TI and Auto DR programs

Total Technology MW
Represents the sum of verified MW associated with the service accounts in the TI and Auto DR programs

General Program category
Represents MW of participants in the TA stage and may include participants who have completed TI and Auto DR

Notes:

(1) Utility Marketing includes all activities to market individual utility programs or rates, demand response concepts, and customer tools, that were approved or directed by Decision 12-04-045, whether or not the marketing budget was approved as a line item in the Decision. For example, PG&E should not include marketing for TOU and PDP because funding was authorized in another proceeding. However, PG&E must document all amounts spent on marketing individual demand response programs such as Peak Choice even though a specific marketing budget was not approved for the program. This example applies to all of the utilities. The programs and activities listed in item II of the template are meant as examples, and may not be exhaustive. However, the utilities must include all programs or rates that meet this description. The totals for Items II, III and IV should be equal.

(2) 3-Year Funding 2012-2014 for Flex Alert includes \$12,000,000 approved in D.13-04-021 and recorded to SCE's Statewide Marketing, Education & Outreach Balancing Account (SME&OBA).

Notes

(1) Utility Marketing includes all activities to market individual utility programs or rates, demand response concepts, and customer tools, that were approved or directed by Decision 12-04-045, whether or not the marketing budget was approved as a line item in the Decision. For example, PG&E should not include marketing for TOU and PDP because funding was authorized in another proceeding. However, PG&E must document all amounts spent on marketing individual demand response programs such as Peak Choice even though a specific marketing budget was not approved for the program. This example applies to all of the utilities. The programs and activities listed in item II of the template are meant as examples, and may not be exhaustive. However, the utilities must include all programs or rates that meet this description. The totals for Items II, III and IV should be equal.

(2) 3-Year Funding 2012-2014 for Flex Alert includes \$12,000,000 approved in D.13-04-021 and recorded to SCE's Statewide Marketing, Education & Outreach Balancing Account (SME&OBA).

FUND SHIFTING DOCUMENTATION PER DECISION 09-08-027 ORDERING PARAGRAPH 35

OP 35: The utilities may shift up to 50% of a program's funds to another program within the same budget category.

The utilities shall document the amount of and reason for each shift in their monthly demand response reports.

Program Category	Fund Shift	Programs Impacted	Date	Rationale for Fundshift
Category 9	\$97,000	From Federal Power Reserve Partnership (FedPower) to Statewide IDSM	5/31/2012	In D. 09-09-047 there were eight tasks defined for Statewide IDSM Pilot program. The
				total fund required for the eight tasks were \$535,647 for 2012. Due to minimal approval
				from D.12-04-045, the scope of work has been reduced to half with required fund of
				\$126K in 2012. Fund shift is needed to be in compliance with D.09-09-047.
Category 2	\$1,200,000	From Summer Discount Plan Transition to 10:10 Summer Readiness	6/30/2012	, , , , , , , , , , , , , , , , , , , ,
				associated program costs submitted in SCE Advice Letters 2721-E and 2721-E-A. This
				fund shift is for the estimated implementation costs for the 10 For 10 Program.
Category 9	\$28,600	From Federal Power Reserve Partnership (FedPower) to Statewide IDSM	12/31/2012	In D. 09-09-047 there were eight tasks defined for Statewide IDSM Pilot program. The
				total fund required for the eight tasks were \$535,647 for 2012. Due to minimal approval
				from D.12-04-045, the scope of work has been reduced to half with required fund of
				\$126K in 2012. Fund shift is needed to be in compliance with D.09-09-047.
Category 9	\$142,555	From DR Energy Leadership Partnership (ELP) to Statewide IDSM	12/31/2012	In D. 09-09-047 there were eight tasks defined for Statewide IDSM Pilot program. The
				total fund required for the eight tasks were \$535,647 for 2012. Due to minimal approval
				from D.12-04-045, the scope of work has been reduced to half with required fund of
				\$126K in 2012. Fund shift is needed to be in compliance with D.09-09-047.
Category 9	\$53,515	From Integrated DSM Marketing to Statewide IDSM	12/31/2012	In D. 09-09-047 there were eight tasks defined for Statewide IDSM Pilot program. The
				total fund required for the eight tasks were \$535,647 for 2012. Due to minimal approval
				from D.12-04-045, the scope of work has been reduced to half with required fund of
				\$126K in 2012. Fund shift is needed to be in compliance with D.09-09-047.
Category 9	\$167,295	From DR Energy Leadership Partnership (ELP) to DR Institutional	12/31/2012	D.12-04-045 limited the total budget for the 2012 DR Institutional Partnership to
		Partnership		\$109,001. Increased customer interest from this sector has resulted in additional
				integrated education, outreach, coordination, and identification of partnership
				opportunities. Increased costs resulted from enhanced engagement from county
				properties, campus facilities, rehabilitation centers, and federal and state agencies,
				ramping up in late 2012. Fund shift is needed to meet these additional customer
				commitments.
Category 9	\$56,886	From Integrated DSM Marketing to Commercial New Construction	12/31/2012	D. 12-04-045 limited the total budget for 2012 Commercial New Construction to
				\$277,225 for Commercial New Construction Program. Stronger customers engagement
				and increased outreach activities to increase customer knowledge and participation in
				the programs has required aadditional funds to meet all commitments including those
				are carried over to 2013.
Category 9	\$55,500	From Integrated DSM Marketing to Workforce Education & Training	12/31/2012	D. 12-04-045 limited the total budget for 2012 WE&T to \$49,828. Higher than expected
		Smart Students (SmartStudents)		student engagement and increased curriculum development activities in order to meet
				IDSM strategic goals requires additional funds to meet all commitments including
				activities carried over to 2013.

Category 11 - Dynamic Pricing							

Notes:

- (1) Emergency programs' load reductions are normally requested by the ISO. The ISO does not call for load reductions by program. OBMC is activated by SCE concurrent with the ISO's request for firm load curtailment (rotating outages) to the minimum % level required to meet the ISO's firm load curtailment request. Other programs are triggered according to the terms of the tariff associated with the program.
- (2) Initial event data subject to change based on billing records and verification.
- (3) Customer's load reduction (MW) is measured as follows:
 - BIP: The maximum hourly load reduction compared to 10 day rolling average, measured over the duration of the entire event day. 10 in 10 baseline is used and calculated for each 15 minute interval.
 - DBP: The maximum hourly load reduction measured over the duration of the DBP event utilizes a 10 in 10 day baseline with optional day-of adjustment.
 - SDP: Estimated based on ac tonnage, cycling strategy and load diversity at time of event. Based on the CAISO Program Results report. Load impact-weather relationship is provided by the 2012 SDP Load Impact Evaluation study. OBMC: The maximum hourly load reduction compared to 10 day rolling average, measured over the duration of the entire event day. 10 in 10 baseline is used and calculated for each 15 minute interval.
 - AP-I: The maximum hourly load reduction compared to 10 day rolling average, measured over the duration of the entire event day. 10 in 10 baseline is used and calculated for each 15 minute interval.
 - SAI: The maximum hourly load reduction measured over the duration of the CPP event is compared to 10 in 10 Adjusted baseline.
 - CBP: Reported to SCE in aggregate by portfolio and by product nominations by APX.
 - AMP: Based on event reduction results using baseline established for each contract.
 - PTR: Based on the CAISO Program Results report. Calculated based on the assumed kW reduction per enrolled customer from the 2013 ex ante report.
- (4) Individual customer tolled hours or event limits may vary due to different customer contact times and/or load blocking.
- (5) Event times are based on GCC start and end times or SCE determined start and end times.
