Notes:
¹ SDG&E's prior reports did not include bill credits for January 2022 through June 2022 due to software reprogramming issues. Those issues were resolved in the July 2022 report and reflected in this report.
² Negative amount in January is due to an accrual reversal and true-up of actual program expenditures.
³ Negative amounts in February/May/November are due to accrual reversals and true-up of actual program expenditures.
⁴ February credit is related to Contractual Agreement Discount on Timely Payments.
⁵ Negative amount in March is primarily due to the correction of prior period labor costs.
⁶ Negative amount in April is due to an accrual reversal and true-up of actual program expenditures.
⁷ Negative amount in May/November is due to the reclassification of expense to pre-paid in order to amortize the expense over the periods in which they are incurred.
⁸ Negative amount in July is due to the reversal of June program expense accruals. These program expenditures were true-up in a subsequent period and reflected in this report.
⁹ Negative Amount in August is due to correction of prior period labor cost allocations.
¹⁰ Negative amount in August is due to an accrual reversal and true-up of actual program expenditures.
¹¹ Negative amount in August is due to a correction of program expenditures from CBP to CBP Elect Incentives Only.
¹² Negative amount in December due to the correction of prior period labor cost allocations.
¹³ Due to software reprogramming issues, December 2022 bill credits are unavailable at this time, reflecting a lower amount being spent than actual. SDG&E is actively working to resolve this issue and will re-serve the corrected report as soon as the data becomes available.

NOTE: Any required corrections/adjustments are reported herein and supersede results reported in prior months and may reflect YTD adjustments.

Notes:

¹ SDG&E's prior reports did not include bill credits for January 2022 through June 2022 due to software reprogramming issues. Those issues were resolved in the July 2022 report and reflected in this report.

² Negative amount in January is due to an accrual reversal and true-up of December actual program expenditures.

³ Negative amount in March is primarily due to the correction of prior period labor costs allocations.

⁴ Program Cycle to Date column "O" has been revised to include December 2021 Bill Credits.

⁵ Negative amount in July is due to the reversal of June program expense accruals. These program expenditures were true-up in a subsequent month and reflected in this report.
