

E 11 1/2

PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

ENERGY DIVISION

RESOLUTION E-3481
FEBRUARY 19, 1997

R E S O L U T I O N

RESOLUTION E-3481. ALL ENERGY UTILITIES. ORDER
REQUIRING ENERGY UTILITIES TO REVISE INCOME LIMITS FOR
THE CALIFORNIA ALTERNATE RATES FOR ENERGY (CARE) AND FOR
THE LOW-INCOME WEATHERIZATION PROGRAM.

SUMMARY

1. The California Alternate Rates for Energy (CARE) program offers eligible ratepayers a 15% discount on their energy bills. The energy utilities' Low-Income Weatherization (LIW) Program income criteria are the same as ULTS and CARE with certain exceptions, as of 1992.
2. This Resolution increases CARE and LIW Standards by 2.9% beginning on March 8, 1997 through March 11, 1998.

BACKGROUND

1. The Commission authorized the LIRA program by D.89-07-062 and D.89-09-044 to become effective on November 1, 1989, in compliance with Senate Bill 987. The LIRA program became the CARE program effective January 1, 1995 in accordance with SB 491. The CARE Standards are revised each year when the ULTS Standards are revised.
2. The LIW Programs are approved in each utility's general rate case. By Resolution E-3254, adopted January 21, 1992, the income limitation for the LIW Program was adjusted with some exceptions to match the CARE Program to reduce customer confusion. Thus, the income criteria for all three programs are now the same.
3. The first level of income limitation in the ULTS/CARE/LIW programs is for an average household size of 2.3 persons. This income criteria is used for 1 and 2 person households.

DISCUSSION

1. The Standards are established at approximately 150% of the Federal poverty guidelines and adjusted for inflation each year based on the Federal Consumer Price Index. The adjusted figures are rounded to the nearest hundred dollars.
2. The latest change in the Consumer Price Index -- Urban Areas is 2.9% and will be used in determining the Household Income Limitations for the period from March 8, 1997 through March 11, 1998.
3. Resulting income limits are as follows:

<u>Household Size</u>	<u>Income Limits</u>		
	<u>CARE and LIW Programs</u>	<u>Pacific Power CARE Program Only</u>	<u>LIW 60+ years & Handicapped</u>
	(150%)	(130%)	(200%)
1 - 2	\$17,000	\$14,700	\$22,700
3	20,000	17,300	26,700
Each additional member, add:	\$ 4,000	\$ 3,500	\$ 5,300

Conditions:

- (1) All utilities may use the 150% federal poverty guidelines.
 - (2) Pacific Power may use 130% federal poverty guidelines.
 - (3) Community-type or block weatherization programs may use 80% of the county median income in a specifically designated low-income area with Commission approval.
 - (4) 200% of the federal poverty guidelines apply to the weatherization programs only for all low-income customers who are 60 years old or older and handicapped persons.
4. By D.89-07-062, each utility is required to notify customers of the availability of CARE before the summer season or in the fall. At that time the notification should indicate the new and higher income limitation. A separate mailing at this time would increase administrative expenses. If each utility notifies its customers of the revision of the CARE Standard with its next informative mailing and when recertifying customers, all potential participants will be notified during the year.
 5. The Energy Division recommends that all energy utilities adjust their LIW standards to the same level as the CARE standards except as otherwise approved. The Electric Division of Southern California Water Company is not required to have a LIW Program at this time. The utilities are not required to file tariffs for the LIW program.

FINDINGS

1. D.89-07-062 and D.89-09-044 established the household income criteria for the Low-Income Ratepayer Assistance Program to be consistent with the ULTS Program. Resolution E-3375 established the income criteria for the Low-Income Weatherization program to be the same as the CARE (formerly LIRA) program except when authorized otherwise.
2. The change in the Consumer Price Index -- Urban Areas is 2.9% and this change should be used in determining the household income limits beginning on March 8, 1997.
3. It is reasonable that each energy utility notify its customers of the increased CARE limits in its next informative mailing and when recertifying customers.
4. Revised CARE income limits require tariff filings.
5. Changes in the income limit levels of the LIW Program do not require tariff filings.

THEREFORE, IT IS ORDERED that,

1. Pacific Gas and Electric Company, Pacific Power & Light Company, San Diego Gas & Electric Company, Sierra Pacific Power, Southern California Edison Company, Southern California Gas Company, Southern California Water Company, Southwest Gas Corporation, and Washington Water Power (The Utilities) shall file revised tariff schedules increasing the household income limits applicable to the California Alternate Rates for Energy on March 8, 1997, and these revised tariff sheets shall be effective from March 8, 1997 through March 11, 1998.
2. The Utilities shall notify their customers of the increased income limits of the CARE Program with the next informative mailing and when recertifying customers.
3. The Utilities may adjust the income level of their Low-Income Weatherization Programs to the same level as the ULTS/CARE Programs.
4. All tariff filings shall be marked to show that they were approved by Commission Resolution E-3481.
5. This Resolution is effective today.

February 19, 1997

I certify that this Resolution was adopted by the Public Utilities Commission at its regular meeting of February 19, 1997. The following Commissioners approved it:

WESLEY FRANKLIN
Executive Director

P. Gregory Conlon, President
Jessie J. Knight, Jr.
Henry M. Duque
Josiah L. Neeper
Richard A. Bilas
Commissioners
