RESOLUTION NO. G-2152

UTILITIES DIVISION  
BRANCH/SECTION: Gas  
DATE: October 12, 1977

R E S O L U T I O N

SUBJECT: Request to Provide Additional Natural Gas Service  
In Excess of 50 Mcfd

WHEREAS: SOUTHERN CALIFORNIA GAS COMPANY, by Advice Letter No. 1093, filed September 14, 1977, has requested Commission approval under the provisions of Decision No. 85189, to supply additional natural gas in excess of 50 Mcfd to Bourns, Inc. (Applicant) in Riverside, Riverside County under the following circumstances:

1. Applicant's request is for an additional peak daily consumption of 17 Mcf, raising his existing peak daily consumption from 67 Mcf to 84 Mcf.
2. Applicant will use this additional gas to operate one roller hearth tunnel kiln to manufacture ceramic substrates for electronic components.
3. Fuel oil cannot be used due to critical temperature requirements and the need for clean burning atmosphere to avoid product contamination.
4. Solar equipment capable of maintaining temperatures of 2,900°F 24 hours per day is not available.
5. Applicant meets the criteria for FPC Priority 2 classification (Docket No. RP 72-6).
6. We find that this request should be granted and that the Applicant should be classified in Priority 1 under the end-use criteria adopted in Decision No. 85189; therefore, good cause appearing,

IT IS ORDERED that:

1. Authority be granted under the provisions of Decision No. 85189 for Southern California Gas Company to supply the requested service to Bourns, Inc., effective October 14, 1977.
2. The above advice letter be marked to show that it was accepted for filing under Resolution of the Public Utilities Commission of the State of California No. G-2152. The effective date of this Resolution is the date hereof.

I hereby certify that the foregoing Resolution was duly introduced, passed and adopted at a regular conference of the Public Utilities Commission of the State of California, held on the 12th day of October, 1977, the following Commissioners voting favorably thereon:
