

Future Scenic Integrity: High, with Areas of Moderate. The proposed Project would not utilize this site or area for a helicopter staging area or a marshalling yard. Therefore, there would be no change to existing scenic conditions. The majority of this landscape in the Tujunga River Canyon has high scenic integrity, but this hillside has been modified and currently has moderate scenic integrity. This moderate level of scenic integrity would remain unchanged under the proposed Project.

Adverse Visual Impacts. In the vicinity of KOP-Center-16, implementation of the proposed Project would not result in any visual changes.

Mitigation Measures. No Mitigation Measures are necessary at this location for the proposed Project.
