

KOP-South-10 was established directly under the transmission lines at Pathfinder Park in Rowland Heights. It was selected because this is a recreational area located adjacent to a large number of residences, and the transmission corridor passes directly overhead. The view is of a grassy area adjacent to picnic tables bordered by decorative trees and walking paths and an access road.

Overall Visual Sensitivity: high. For people relaxing, visiting, and recreating at Pathfinder Park in general and KOP-South-10 specifically, the ratings of high viewer exposure, high viewer concern, and moderate-to-high visual quality lead to a high overall visual sensitivity of the visual setting and viewing characteristics..
