

KOP-North-8 was established on Avenue N at Agena Road looking southwest. From S5 MP 4.4 to S5 MP 6.4, the proposed Project would cross over the crest of Portal Ridge, which forms a landscape backdrop for much of the Antelope Valley and the City of Lancaster.

Overall Visual Sensitivity: moderate. For residents and visitors to western Lancaster in general and KOP-North-8 specifically, the high viewer exposure, moderate viewer concern, and low-to-moderate visual quality lead to a moderate overall visual sensitivity of the visual setting and viewing characteristics.
