

KOP-North-11 was established on Avenue S looking southwest at Sierra Pelona Ridge. As before, two existing 220-kV lines would be replaced by one 500-kV line in this vicinity. This segment is typical of views from many different vantage points, including new residential streets in the Anaverde and Palmdale 1000 Developments, existing residential streets in Palmdale and Acton, Tuckerway Ranch Road, Peaceful Valley Road, and Avenue S.

Overall Visual Sensitivity: moderate-to-high. For residents and visitors who travel along Avenue S looking at Sierra Pelona Ridge in Palmdale and other vantage points described above, and KOP-North-11 specifically, the high viewer exposure, high viewer concern, and moderate visual quality lead to a moderate-to-high overall visual sensitivity of the visual setting and viewing characteristics.
