

KOP-South-1 is located near the intersection of Royal Oaks Drive and Tocino Drive in the City of Duarte, looking through a typical residential neighborhood toward undeveloped hillsides at the north edge of Duarte. These hillsides are south of and outside the ANF southern boundary. These undeveloped hillsides form a mountain backdrop and skyline in the middleground.

Overall Visual Sensitivity: high. For residents of Duarte in general and KOP-South-1 specifically, ratings of high viewer exposure, high viewer concern, and moderate-to-high visual quality lead to a high overall visual sensitivity.
