

KOP-South-20 is located within a residential neighborhood in the City of Ontario. Four lattice-steel transmission towers are visible in this foreground view. The nearest of these is 700 feet to the north-northeast, and it is a dead-end lattice steel tower with greater visual bulk because of the extra strength needed to change directions of the transmission line.

**Overall Visual Sensitivity: moderate-to-high.** For residents of Chaparral Street and Clover Way in general and KOP-South-20 specifically, the ratings of high viewer exposure, high viewer concern, and moderate visual quality lead to a moderate-to-high overall visual sensitivity of the visual setting and viewing characteristics.
