Re: General Order 88-B Request for Authority to modify the Terminal Island Fwy Grade Separated Highway-Rail crossing over the tracks of the Port of Long Beach, in City of Long Beach, Los Angeles County.

Dear Mr. Moro:

This refers to your letter, dated July 15, 2010, received July 16, 2010, requesting authorization, pursuant to Commission General Order (GO) 88-B, to alter the Terminal Island Fwy Grade Separated Highway-Rail crossing (crossing), CPUC Crossing No. 120AT-18.64-A, of the Port of Long Beach's (POLB) Alameda Corridor Subdivision tracks in City of Long Beach (City), County of Los Angeles.

POLB owns the railroad right of way and Pacific Harbor Line (PHL) operates freight service on the rail corridor. POLB, a City of Long Beach agency, also controls the street system within the port. The alterations proposed for this crossing are part of a larger project to reconstruct and widen the Terminal Island Fwy (SR-47).

The proposed SR-47 reconstruction will realign the existing northerly track and raise its elevation to match that of the adjacent New Dock St. The existing southerly track and turnout will remain unchanged. The existing SR-47 overhead structure will be removed and replaced with a new structure located at approximately the same horizontal location but at a higher elevation.

The Commission's Rail Crossings Engineering Section (RCES) investigated the request by POLA and finds it adequately addresses compliance and safety. As POLA, PHL and City are in agreement as to the design and apportionments of the cost under the provisions of GO 88-B, the improvements as described in your letter dated July 15, 2010, and summarized above are authorized. Improvements shall comply with all applicable Commission General Orders and the California Manual on Uniform Traffic Control Devices published by the California Department of Transportation.

This project is categorically exempt from the requirements of the California Environment Quality Act of 1970, as amended. [California Pubic Resources Code 21084]

This authorization shall expire if the above conditions are not complied with or if the work is not completed within three years of the date of this letter. Upon written request to this office, the time to complete the project may be extended. Any written request for a time extension must include concurrence letters by involved parties in support of the time extension. If an extension is requested, the Commission's RCES may reevaluate the crossings prior to granting an extension.

Within 30 days after completion of this project, POLA shall notify RCES that the authorized work is completed, by submitting a completed Commission Standard Form G title *Report of Changes at Highway Grade Crossings and Separation*. Form G requirements and forms can be obtained at the CPUC web site Form G page at <http://www.cpuc.ca.gov/formg>. This report may be submitted electronically to rces@cpuc.ca.gov as outlined on the web page.

If you have any questions, please contact Jose Pereyra at (213-576-7083) or jfp@cpuc.ca.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Daren Gilbert". The signature is written in a cursive style with a large initial "D".

Daren Gilbert, Supervisor
Rail Crossings Engineering Section
