STATE OF CALIFORNIA Edmund G. Brown Jr., Governor

PUBLIC UTILITIES COMMISSION

180 PROMENADE CIRCLE, SUITE 115 SACRAMENTO. CA 95834

July 3, 2012

File Number: G.12-05-009 San Diego, County of San Diego

Chip Finch Project Manager San Diego Association of Governments 401 B Street, Suite 900 San Diego, CA 92101

Re: General Order 88-B Request for Authority to Alter the South 32nd Street At-grade Rail Crossing, CPUC Crossing No. 036-3.40 and DOT No. 661803F in City of San Diego, San Diego County.

Dear Mr. Finch:

This refers to the San Diego Association of Governments' (SANDAG) letter dated April 26, 2012 (received April 30, 2012), requesting authorization, pursuant to California Public Utilities Commission (Commission) General Order (GO) 88-B, to modify the existing at-grade crossing of San Diego and Arizona Eastern Railway (SDAE) Mainline tracks and South 32nd Street in City of San Diego (City), San Diego County. The crossing is identified as CPUC Crossing Number 036-3.40 and DOT Number 661803F.

South 32nd Street is a seven lane roadway, with three lanes in the northbound direction and four in the southbound direction that crosses over two SDAE mainline tracks. The crossing is currently equipped with four Commission Standard 9 (flashing light signal assembly with automatic gate arm) warning devices, medians, pavement markings and advanced warning signage. In addition to freight trains, San Diego Trolley Inc. (SDTI) operates light rail trains over the SDAE mainline. Approximately four (4) freight trains per day at a maximum speed of 40 MPH, typically at night, and one hundred ninety-six (196) light rail trains per day at a maximum speed of 55 MPH operate over this portion of the mainline. The average daily traffic count at this crossing is 24,325 vehicles.

SANDAG proposes the following modifications to the South 32nd Street crossing as part of the Blue Line Crossovers Project that proposes improvements along this corridor:

- Remove the four existing Commission Standard 9 warning devices;
- Install two new curb mounted Commission Standard 9A (flashing light signal assembly with automatic gate arm and additional flashing lights signals over the roadway on a cantilevered arm) warning devices, one each on the northwest quadrant of the crossing for southbound South 32nd Street and on the southeast quadrant of the crossing for northbound South 32nd Street;
- Install two new median mounted Commission Standard 9 warning devices, one for northbound and southbound South 32nd Street;

- Driveways on both quadrants on the south side of the crossing to be reconstructed;
- Install additional flashing lights on the Commission Standard 9 on the southeast quadrant of the crossing aimed at the driveway (NOTE: The GO88 request and drawings incorrectly note this as the southwest quadrant);
- Reconstruct existing medians to new 8 inch high raised medians on both crossing approaches, as shown in plans;
- Reconstruct the existing driveway on the southeast quadrant of the crossing;
- Construct Americans with Disabilities Act (ADA) complaint sidewalks on both sides of South 32nd Street crossing;
- Install ADA compliant detectable warning tactile strips on all sidewalk approaches to the crossing. Placement: a minimum of 36 inches in the direction of travel over the full width of the sidewalk, 2 feet in front of the warning device (where present), but no closer than 10 feet from the centerline of the tracks;
- Install street lighting at the northwest quadrant of the crossing, as shown in plans; and
- Install California Manual on Uniform Traffic Control Devices (CA MUTCD) compliant signage and pavement markings, including W10-1 advance warning signs, W48 (CA) 2 tracks signs, R3-2 'No Left Turn' signs, R3-4 'No U-Turn' signs, R4-7 'Keep Right' signs, and RXR pavement markings, as shown in plans.

The Commission's Rail Crossings Engineering Section (RCES) investigated the request filed by SANDAG and finds it adequately addresses compliance and safety. As SANDAG, SDAE and the City are in agreement as to the design and apportionments of the cost under the provisions of GO 88-B, the improvements as described in your request letter dated April 26, 2012 and summarized above are authorized.

Temporary traffic controls shall be provided in compliance with the CA MUTCD, published by the California Department of Transportation. All parties shall comply with all applicable rules, including Commission General Orders and the CA MUTCD.

This project is categorically exempt from the requirements of the California Environment Quality Act of 1970, as amended. [California Pubic Resources Code 21084]

This authorization shall expire if the above conditions are not complied with or if the work is not completed within three years of the date of this letter. Upon written request to RCES, the time to complete the project may be extended. Any written request for a time extension must include concurrence letters by involved parties in support of the time extension. If an extension is requested, RCES may reevaluate the crossing prior to granting an extension.

Within 30 days after completion of this project, SANDAG and/or SDAE shall notify RCES that the authorized work is completed, by submitting a completed Commission Standard Form G titled *Report of Changes at Highway Grade Crossings and Separations*. Form G requirements and forms can be obtained at the CPUC web site Form G page at http://www.cpuc.ca.gov/formg. This report may be submitted electronically to rees@cpuc.ca.gov as outlined on the web page.

Chip Finch G.12-05-009 July 3, 2012 Page 3 of 3

At the conclusion of the project, SDAE should also submit an updated FRA inventory form to the Federal Railroad Administration, reflecting the changes. Commission requests a concurrent copy of the updated inventory form be submitted to rces@cpuc.ca.gov.

If you have any questions, please contact Jose Pereyra at (213) 576-7083 or jfp@cpuc.ca.gov.

Sincerely,

Daren Gilbert, Manager
