**Re: General Order 88-B Request for Authority to Modify the First Street At-Grade Highway-Rail Crossing, Identified as CPUC Crossing No. 101VE-433.30 and DOT No. 745909L in the City of Simi Valley, Ventura County.**

Dear Mr. Patel:

This refers to your letter, dated May 6, 2014, received by us on May 7, 2014, requesting authorization, pursuant to California Public Utilities Commission (Commission) General Order (GO) 88-B, to modify the First Street at-grade highway-rail crossing (crossing) of the Southern California Regional Rail Authority (SCRRA) Ventura Subdivision track in the City of Simi Valley (City), Ventura County. The crossing is identified as CPUC Crossing No. 101VE-433.30 and DOT No. 745909L.

The single track crossing is a six-lane roadway, located approximately 300 feet south of Agnew Street and First Street intersection. The crossing is equipped with two curb-mounted Commission Standard 9-A (flashing light signal assembly with automatic gate arm and additional flashing light signals over the roadway on a cantilever arm) and two median-mounted Commission Standard 9 (flashing light signal assembly with automatic gate arm) warning devices. Union Pacific Railroad Company (UPRR) operates approximately five freight trains daily with a maximum speed of 60 miles per hour (MPH); the National Passenger Railroad Corporation (Amtrak) and SCRRA operate approximately 28 passenger trains daily with a maximum speed of 73 MPH.

As part of the Ventura County Sealed Corridor Project, SCRRA proposes the following modifications:

- Install four Commission Standard 9 pedestrian gate warning devices in combination with emergency exit swing gates, one at each crossing quadrant;
- Install pedestrian treatments per SCRRA engineering standards, including Americans with Disabilities Act (ADA) compliant detectable warning tactile strips, channelization, right-of-way fencing, signage, and striping at all four crossing quadrants; and
- Apply California Manual on Uniform Traffic Control Devices (CA MUTCD) standard signage and pavement markings, as shown per plans.

The Commission's Rail Crossings Engineering Section (RCES) investigated the request filed by SCRRA, and finds it adequately addresses compliance and safety. As City, UPRR, and SCRRA are in agreement as to the design and apportionments of the cost under the provisions of GO 88-B, the improvements as described in your request dated May 6, 2014 and summarized above are authorized.

SCRRA must also ensure that Emergency Notification Signs are installed to comply with CFR 234.309. Temporary traffic controls shall be provided in compliance with the current version of the CA MUTCD, published by the California Department of Transportation. All parties shall comply with all applicable rules, including Commission General Orders, ADA, and the CA MUTCD.

This project is categorically exempt from the requirements of the California Environment Quality Act of 1970, as amended. [California Pubic Resources Code 21084].

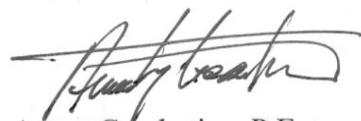

This authorization shall expire if the above conditions are not complied with or if the work is not completed within three years of the date of this letter. Upon written request to RCES, the time to complete the project may be extended. Any written request for a time extension must include concurrence letters by involved parties in support of the time extension. If an extension is requested, RCES may re-evaluate the crossing prior to granting an extension.

Within 30 days after completion of this project, SCRRA shall notify RCES that the authorized work is completed, by submitting a completed Commission Standard Form G titled *Report of Changes at Highway Grade Crossings and Separations*. Form G requirements and forms can be obtained at the Commission web site Form G page at <http://www.cpuc.ca.gov/PUC/safety/Rail/Crossings/formg>. This report may be submitted electronically to [rces@cpuc.ca.gov](mailto:rces@cpuc.ca.gov) as outlined on the web page.

At the conclusion of the project, SCRRA shall submit an updated Federal Railroad Administration (FRA) inventory form to the FRA, reflecting the changes. Commission requests a concurrent copy of the updated inventory form be submitted to [rces@cpuc.ca.gov](mailto:rces@cpuc.ca.gov).

If you have any questions, please contact Sergio Licon at (213) 576-7085 or [sal@cpuc.ca.gov](mailto:sal@cpuc.ca.gov).

Sincerely,

Anton Garabetian, P.E.  
Program and Project Supervisor  
Rail Crossings Engineering Section  
Safety and Enforcement Division
