**Re: General Order 88-B Request for Authority to Alter the North San Pedro Road At-Grade Highway-Rail Crossing, CPUC Crossing No. 005-18.80 and DOT No. 863514N in the City of San Rafael, County of Marin**

Dear Mr. Gamlen:

This refers to your letter dated May 6, 2015, received by us on May 8, 2015, requesting authorization, pursuant to California Public Utilities Commission (Commission) General Order (GO) 88-B, to alter the North San Pedro Road at-grade highway-rail crossing (crossing) of Sonoma-Marín Area Rail Transit District (SMART) track in the City of San Rafael (City), County of Marin. The crossing is identified as CPUC Crossing No. 005-18.80 and DOT No. 863514N.

The single track crossing is equipped with one curb mounted Commission Standard 9-A (flashing light signal assembly with automatic gate arm and additional flashing light signals over the roadway on a cantilevered arm) and one curb mounted Commission Standard 9 (flashing light signal assembly with automatic gate arm) warning devices. There is currently no rail traffic over the crossing. SMART transit passenger service is scheduled to begin in late 2016 with a projected 32 trains per day at a maximum speed of 45 mph. The average daily traffic on North San Pedro Road is 8,500 vehicles.

The proposed alterations as indicated in the request letter and/or shown in the attachments shall consist of:

- Replacing the Commission Standard 9 warning device in the northbound direction with a median mounted Commission Standard 9-A warning device;
- Replacing the Commission Standard 9-A warning device in the southbound direction with a curb mounted Commission Standard 8-A (flashing light signal assembly with additional flashing light signals over the roadway on a cantilevered arm) and a curb mounted Commission Standard 9;
- Constructing Americans with Disabilities Act (ADA) compliant precast concrete (PCC) sidewalks in the all four quadrants of the crossing;
- Installing a Commission Standard 8 (flashing light signal assembly) warning device at the pedestrian sidewalk approach in the southeast quadrant of the crossing;

- Installing ADA compliant detectable warning strips on all sidewalk approaches, located a minimum of 12 feet from the centerline of the track;
- Extending the existing concrete median an additional 30 feet on the north side of the crossing;
- Modifying the median on the south side of the crossing to accommodate the new warning device;
- Removing the tree in the median on the south side of the crossing;
- Replacing the existing train detection with redundant GE XP4 predictor to provide constant warning time;
- Installing a PCC panel crossing surface for the mainline track; and
- Applying California Manual on Uniform Traffic Control Devices (CA MUTCD) compliant signage and pavement markings, including W10-1, W10-3, and W10-4 advance warning signs and RXR and railroad limit pavement markings as shown on plans.

The City shall file a GO 88-B request regarding traffic signal pre-emption with the crossing and Los Ranchitos Road at a future date. SMART shall not commence rail operations over the North San Pedro Road crossing prior to installation of traffic signal pre-emption.

Commission's Rail Crossings and Engineering Branch (RCEB) staff has investigated SMART's request, and finds it adequately addresses compliance and safety. As SMART and the City are in agreement as to the design and apportionments of the cost under the provisions of GO 88-B, you may proceed with the improvements as described in your request letter, attachments, and summarized above.

SMART must ensure that Emergency Notification Signs are installed to comply with Title 49 Code of Federal Regulations (CFR) Section 234.309.

Temporary traffic controls shall be provided in compliance with Section 8A.08, Temporary Traffic Control Zones, of the CA MUTCD, 2014 Edition, published by the California Department of Transportation.

All parties shall comply with all applicable rules, including Commission General Orders and CA MUTCD.

This project is categorically exempt from the requirements of the California Environment Quality Act of 1970, as amended [California Public Resources Code 21084].

This authorization shall expire if the above conditions are not complied with or if the work is not completed within three years of the date of this letter. Upon written request to this office, the time to complete the project may be extended. Any written request for a time extension must include concurrence letters by involved parties in support of the time extension. If an extension is requested, the RCEB may reevaluate the crossing prior to granting an extension.

Within 30 days after completion of this project, SMART shall notify RCEB that the authorized work is completed, by submitting a completed Commission Standard Form G. Form G requirements and forms can be obtained at the Commission web site Form G page at

<http://www.cpuc.ca.gov/PUC/safety/Rail/Crossings/formg.htm>. This report may be submitted electronically to [rceb@cpuc.ca.gov](mailto:rceb@cpuc.ca.gov).

At the conclusion of the project, SMART should electronically submit an updated Federal Railroad Administration (FRA) inventory form (Form F6180.71) to the FRA, reflecting the changes. Title 49 CFR Section 234.409 requires the railroads to submit periodic crossing inventory updates a minimum of once every three years. Commission requests a concurrent copy of the updated inventory form be submitted to [rceb@cpuc.ca.gov](mailto:rceb@cpuc.ca.gov).

If you have any questions, please contact David Stewart at (916) 928-2515 or [atm@cpuc.ca.gov](mailto:atm@cpuc.ca.gov) .

Sincerely,

Anton Garabetian, P. E.  
Program and Project Supervisor  
Rail Crossings and Engineering Branch  
Safety and Enforcement Division
