**Re: General Order 88-B Request for Authority to Modify the East Park Avenue At-Grade Highway-Rail Crossing, Identified as CPUC Crossing Number 036-14.13 and DOT Crossing Number 966233R, in the City of San Diego, San Diego County.**

Dear Ms. Parra:

This refers to your letter dated June 10, 2021, and email received by us on August 6, 2021, requesting authorization pursuant to California Public Utilities Commission (CPUC/Commission) General Order (GO) 88-B to modify the East Park Avenue at-grade highway-rail crossing (crossing) on the San Diego Metropolitan Transit System (MTS) Trolley track in the City of San Diego (City), San Diego County. The crossing is identified as CPUC Crossing Number 036-14.13 and DOT Crossing Number 966233R.

The crossing is comprised of two tracks and a one-lane northbound roadway with street parking on the east side of the roadway. The crossing is equipped with two curb-mounted Commission Standard 9 (Flashing Light Signal Assembly with Automatic Gate Arm) warning devices. Approximately 196 rail transit trains and 4 freight trains operate through the crossing daily at a maximum speed of 55 miles per hour (MPH) for rail transit trains and 40 MPH for freight trains. The average daily traffic at the crossing is approximately 2300 vehicles.

The San Diego Association of Government (SANDAG) proposes to make the following alterations as indicated in the request letter and/or shown in the attachments:

- Install pavement markings along the west side of the roadway to define a new bicycle lane and provide a three-foot buffer between the vehicle traffic and the bicycle lane.
- Start striping approximately ten feet from the track on the north side of the crossing and continue north providing a six-foot wide bicycle lane.
- Start striping approximately 26 feet from the southerly track and terminate at the stop bar.
- Paint a single stripe for on-street parking on the east side of the roadway.

The Commission's Rail Crossings and Engineering Branch (RCEB) investigated the request filed by SANDAG and finds that it adequately addresses compliance and safety. As SANDAG, MTS, and the City are in agreement as to the design and apportionments of the cost under the provisions of GO 88-B, the improvements as described in your request dated August 6, 2021, and summarized above, are authorized. All parties shall comply with all applicable rules, including Commission GOs and current version of the California Manual on Uniform Traffic Control Devices (CA MUTCD), published by the

California Department of Transportation. SANDAG must complete all the proposed alterations mentioned above for RCEB to consider this GO 88-B application closed.

Temporary traffic controls shall be provided in compliance with the current version of the CA MUTCD. Refer to CA MUTCD Section 6G.18 and Figure 6H-46 regarding "Work in the Vicinity of a Grade Crossing."

This project is categorically exempt from the requirements of the California Environment Quality Act of 1970, as amended [California Public Resources Code 21084].

This authorization shall expire if the above conditions are not complied with, or if proposed project is not completed, within three years of the date of this letter. Upon written request to RCEB, the time to complete the project may be extended. Any written request for a time extension must include concurrence letters by involved parties in support of the time extension. If an extension is requested, RCEB may re-evaluate the crossing prior to granting an extension.

Within 30 days after completion of this project, SANDAG shall notify RCEB that the authorized work is completed by submitting a completed Commission Standard Form G titled *Report of Changes at Highway Grade Crossing and Separations*. Form G requirements and forms can be obtained at the Commission web site at <http://www.cpuc.ca.gov/crossings/>. This report may be submitted electronically to [rceb@cpuc.ca.gov](mailto:rceb@cpuc.ca.gov).

At the conclusion of the project, MTS shall submit an updated Federal Railroad Administration (FRA) inventory form (Form F6180.71) to the FRA, reflecting the changes. 49 CFR 234 Section 234.409 requires the main operating railroad to submit periodic crossing inventory updates a minimum of once every three years. RCEB request a concurrent copy of the updated inventory from the submitted to [rceb@cpuc.ca.gov](mailto:rceb@cpuc.ca.gov).

If you have any questions, please contact Howard Huie at [howard.huie@cpuc.ca.gov](mailto:howard.huie@cpuc.ca.gov) or (415) 308-0533.

Sincerely,

Anton Garabetian, P.E.  
Program Manager  
Rail Crossings and Engineering Branch  
Rail Safety Division
