**Re: General Order 88-B Request for Authority to Alter the Menlo Park Station Pedestrian South Rail Crossing**

Dear Stacy Cocke:

This refers to your letter dated November 29, 2022, received by us on December 28, 2022, requesting authorization, pursuant to California Public Utilities Commission (Commission/CPUC) General Order (G.O.) 88-B, to alter the Menlo Park Station Pedestrian South rail crossing (crossing) of the Peninsula Corridor Joint Powers Boards (Caltrain) tracks in the City of Menlo Park (City), County of San Mateo. The crossing is identified as CPUC Crossing Number 105E-28.80-D and DOT Number 922720P.

Due to unforeseen circumstances, the Commission's Rail Crossings and Engineering Branch (RCEB) is late in submitting this GO 88-B request authorization.

The crossing is a northeast-southwest pedestrian station crossing that consists of two main tracks. The crossing is equipped with two Commission Standard 9 (Flashing Light Signal Assembly with Automatic Gate Arm) pedestrian warning devices.

The RCEB reviewed the request by Caltrain. The following alterations, as described and specified in the request letter and its attachments, are authorized:

- Install a two-speed check (2SC) system to replace the constant warning time crossing activation system.
- Replace the constant warning time devices (predictors) at grade crossings with audio frequency overlay equipment (AFTAC-II) and microprocessor-based equipment (ElectroLogIXS) with the traction power system.

Temporary traffic controls shall be provided in compliance with the California Manual on Uniform Traffic Control Devices (CA MUTCD), published by the California Department of Transportation. All parties shall comply with all applicable rules, including Commission General Orders and CA MUTCD.

This authorization shall expire if the full scope of alterations is not complete within three years of the date of this letter. Caltrain may request a time extension at least 30 days prior to the expiration date. The time extension request shall include evidence of agreement by the involved parties. This authorization may be revoked or modified if public convenience, necessity, or safety requires.

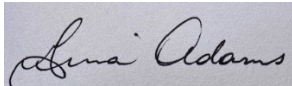

This project is categorically exempt from the requirements of the California Environmental Quality Act of 1970, as amended. [California Public Resources Code §21084].

The following requirements pertain to this authorization:

- The crossing shall have the configuration and operational characteristics as described and specified in the request letter and its attachments.
- At least 45 days prior to the date that the new or modified train detection is placed in service, Caltrain shall notify RCEB of the scheduled date of the signal cutover by sending a notification to [rceb@cpuc.ca.gov](mailto:rceb@cpuc.ca.gov).
- Within 30 days after the authorized scope of alterations is complete, Caltrain shall notify RCEB of the alterations by submitting a Form G to [rceb@cpuc.ca.gov](mailto:rceb@cpuc.ca.gov). Form G requirements and forms are available on the CPUC website at <http://www.cpuc.ca.gov/crossings>.
- Caltrain shall electronically submit an updated Federal Railroad Administration (FRA) inventory form (Form F6180.71) to the FRA per 49 C.F.R. § 234.411(c).

If you have any questions, please contact Eyitejumade “Ade” Sogbesan at (415) 703-1869 or [ES3@cpuc.ca.gov](mailto:ES3@cpuc.ca.gov).

Sincerely,

A rectangular box containing a handwritten signature in cursive script that reads "Gina Adams".
