Re: General Order 88-B Request for Authority to Alter the South Linden Avenue Rail Crossing

Dear Aaron Marx:

This refers to your letter dated March 7, 2023, received by us on March 7, 2023, requesting authorization, pursuant to California Public Utilities Commission (Commission/CPUC) General Order (G.O.) 88-B, to alter the South Linden Avenue rail crossing (crossing) of the Peninsula Corridor Joint Powers Board (Caltrain) tracks in the City of South San Francisco (City), County of San Mateo. The crossing is identified as CPUC Crossing Number 105E-10.13 and D.O.T. Number 754866U.

The crossing is an east-west, two-lane roadway that consists of two main tracks. The crossing is equipped with one curb-mounted Commission Standard 9 (Flashing Light Signal Assembly with Automatic Gate Arm), one curb mounted Commission Standard 9-A (Commission Standard 9 and Additional Flashing Light Signals over the Roadway on a Cantilevered Arm), two Commission Standard 9 pedestrian warning devices, and a traffic pre-signal for westbound motorists.

The Commission's Rail Crossings and Engineering Branch (RCEB) reviewed the request by Caltrain. As the City and Caltrain agree on the alterations and apportionment of costs under the provisions of G.O. 88-B, the following alterations, as described and specified in the request letter and its attachments, are authorized:

- Install in-service wayside crossing controller programming application update.
- Install application logic update to integrate positive train control (PTC) crossing controls with the grade-crossing warning system.

Temporary traffic controls shall be provided in compliance with the California Manual on Uniform Traffic Control Devices (CA MUTCD), published by the California Department of Transportation. All parties shall comply with all applicable rules, including Commission General Orders and CA MUTCD.

This authorization shall expire if the full scope of alterations is not complete within three years of the date of this letter. Caltrain may request a time extension at least 30 days prior to the expiration date. The time extension request shall include evidence of agreement by the involved parties. This authorization may be revoked or modified if public convenience, necessity, or safety requires.

This project is categorically exempt from the requirements of the California Environmental Quality Act of 1970, as amended. [California Public Resources Code §21084].

The following requirements pertain to this authorization:

- The crossing shall have the configuration and operational characteristics as described and specified in the request letter and its attachments.
- At least 45 days prior to the date that the new or modified train detection is placed in service, Caltrain shall notify RCEB of the scheduled date of the signal cutover by sending a notification to rceb@cpuc.ca.gov.
- Within 30 days after the authorized scope of alterations is complete, Caltrain shall notify RCEB of the alterations by submitting a Form G to rceb@cpuc.ca.gov. Form G requirements and forms are available on the CPUC website at <http://www.cpuc.ca.gov/crossings>.
- Caltrain shall electronically submit an updated Federal Railroad Administration (F.R.A.) inventory form (Form F6180.71) to the F.R.A. per 49 C.F.R. § 234.411(c).

If you have any questions, please contact Eyitejumade “Ade” Sogbesan at (415) 703-1869 or ES3@cpuc.ca.gov.

Sincerely,

Gina Adams
Program and Project Supervisor
Rail Crossings and Engineering Branch
Rail Safety Division
