Re: General Order 88-B Request for Authority to Modify the Fruitdale Avenue Rail Crossing

Dear Kenneth Ronsse:

This refers to your letter dated March 20, 2023, received by us on April 24, 2023, requesting authorization, pursuant to California Public Utilities Commission (Commission/CPUC) General Order (GO) 88-B, to alter the Fruitdale Avenue rail crossing (crossing) of the Santa Clara Valley Transportation Authority (VTA) tracks in the City of San Jose (City), County of Santa Clara. The crossing is identified as CPUC Crossing Number: 82D-4.71 and U.S. DOT Crossing Number 750161P.

The crossing is a north-south, four-lane roadway that consists of two rail transit tracks and one heavy rail freight track. The crossing is equipped with two curb-mounted and two median-mounted Commission Standard 9 (Flashing Light Signal Assembly with Automatic Gate Arm) warning devices, one curb-mounted Commission Standard 9-A (Commission Standard 9 and Additional Flashing Light Signals over the Roadway on a Cantilevered Arm) warning device, and one curb-mounted Commission Standard 8 (Flashing Light Signal Assembly) warning device.

The Commission's Rail Crossings and Engineering Branch (RCEB) reviewed the request by VTA. As the City and VTA agree on the alterations and apportionment of costs under the provisions of GO 88-B, the following alterations, as described and specified in the request letter and its attachments, are authorized:

- Install one Commission Standard 9 pedestrian gate warning device in the southeast quadrant.
- Install emergency egress swing gates in the southeast quadrant.
- Relocate the detectable warning surfaces in the southeast quadrant.
- Install pedestrian channelization in the southeast quadrant.
- Install new concrete crossing panels.
- Apply California Manual on Uniform Traffic Control Devices (CA MUTCD)-compliant signage and pavement markings, including "KEEP CLEAR" pavement markings, "STOP HERE" pavement markings, restriped crosswalks, 12" white pedestrian pathway striping, edgeline striping pavement markings, W82-1 "TROLLEY" regulatory signs, W10-9P "NO TRAIN HORN" regulatory signs, and Type G white retroreflective markers.

Temporary traffic controls shall be provided in compliance with the CA MUTCD, published by the California Department of Transportation. All parties shall comply with all applicable rules, including Commission General Orders and CA MUTCD.

This authorization shall expire if the full scope of alterations is not complete within three years of the date of this letter. VTA may request a time extension at least 30 days prior to the expiration date. The time extension request shall include evidence of agreement by the involved parties. This authorization may be revoked or modified if public convenience, necessity, or safety requires.

This project is categorically exempt from the requirements of the California Environmental Quality Act of 1970, as amended. [California Public Resources Code §21084].

The following requirements pertain to this authorization:

- The crossing shall have the configuration and operational characteristics as described and specified in the request letter and its attachments.
- Within 30 days after the authorized scope of alterations is complete, VTA shall notify RCEB of the alterations by submitting a Form G to rceb@cpuc.ca.gov. Form G requirements and forms are available on the CPUC website at <http://www.cpuc.ca.gov/crossings>.
- VTA shall electronically submit an updated Federal Railroad Administration (F.R.A.) inventory form (Form F6180.71) to the F.R.A. per 49 C.F.R. § 234.411(c).

If you have any questions, please contact Eyitejumade "Ade" Sogbesan at (415) 703-1869 or ES3@cpuc.ca.gov.

Sincerely,

Matthew Bond, P.E.
Program and Project Supervisor
Rail Crossings and Engineering Branch
