

ACCESS SERVICE

16. Expanded Interconnection Service

Expanded Interconnection Service is offered pursuant to Decision No. 95-04-073.

16.1 Service Description

Expanded Interconnection Service (EIS) provides for the collocation and interconnection of collocator-provided fiber optic facilities and basic transmission equipment, and upon bona fide request, microwave transmission facilities, where feasible, to certain Utility-provided Switched or Special Access. EIS will be provided via physical collocation, subject to space availability, in the Utility's Central Offices. Physical collocation may be sought in additional Utility locations via bona fide request. (C)

In any central office in which all options for physical collocation offered by the Utility have been exhausted, the Utility shall not be permitted to provide additional space in that central office for any of its affiliates. 1(T)  
| |  
1(T)

Interconnection between Collocator-provided facilities and the Utility's Switched, Special Access or Broadband Fast Packet Services will be provided via the EIS Cross-Connection (EISCC).

Interconnection between Collocator-provided facilities and the Utility's Switched Access Service will be provided via the EISCC DS1 or DS3 for Switched Access Service. The Special Access EISCC is only available with Metallic, Telegraph Grade, Voice Grade, Analog Video, ADN, DDS, DS1 or DS3 Services, or SONET Ring and Access Services. Interconnection to other Switched or Special Access Services may be sought via bona fide request. (T)  
(C)

NOTE 1: Pending CPUC Approval of Advice Letter No. 20412. (N)

16. Expanded Interconnection Service (Cont'd)

16.2 Regulations

The regulations, rates, and charges contained herein are in addition to the applicable regulations, rates, and charges specified in other sections of this schedule.

16.2.1 Obligation to Provide Service

The Utility's obligation to provide EIS is contingent upon the Utility's receipt of a collocation application and pre-payment of 50% of the nonrecurring charges specified in (Section 16.7.1(A) (1) and (2), Section 16.7.2(D) or the amount quoted by the Utility. The collocator also has the option of submitting a surety bond to cover the 50% pre-payment, in lieu of a check.

(T)  
(N)  
|  
(N)

16.2.2 Microwave Collocation

Expanded interconnection will be available for microwave transmission facilities upon bona fide request on a case by case basis, where reasonably feasible. Charges, calculated on a time and materials basis will apply for determining the feasibility of microwave interconnection.

16.2.3 Termination and Cancellation

The Utility may terminate Expanded Interconnection Service and reclaim space from a collocator for any breach of the provisions contained in the Utility's tariffs.

The license to utilize the space may be terminated at any time subject to the provisions of the Utility's tariffs.

The Utility shall have the right to terminate the Expanded Interconnection Service arrangement by providing 180 days written notice that the wire center will be closed or sold.

ACCESS SERVICE

16. Expanded Interconnection Service (Cont'd)

(N)

16.2 Regulations (Cont'd)

16.2.3 Termination and Cancellation (Cont'd)

The Utility shall have the right to terminate EIS at any time including the use of any licensed space and associated cable conduit space where any part of the wire center becomes the subject of a taking under eminent domain. The Utility will notify the collocator of the termination and identify the schedule by which the collocator will proceed to remove its equipment and property.

The collocator shall have no claim against the Utility for any relocation expenses or any part of any award or any value of any unexpired term of service. Nor shall the collocator have any claim against the Utility for any loss of business from full or partial interruption or interference due to any termination. The collocator may pursue its own claim against the eminent authority ordering the taking of the wire center.

The Utility may terminate the license and Expanded Interconnection Service if there has been partial or total damage or destruction of the wire center, and the Utility, in its sole opinion, decides not to repair or rebuild the wire center.

The Utility Shall have the right to cancel EIS service if:

- The collocator fails to timely pay any rate or charge and still fails to pay within 30 days of written notice.
- The collocator breaches any provision of this tariff and fails to cure the breach within 15 days of written notice.
- The collocator, despite written or verbal notice, fails to immediately correct any security violation.

The Utility may individually cancel EIS in a wire center without prior notice if, in the opinion of the Utility, a serious security breach is committed by the collocator.

(N)

ACCESS SERVICE

16. Expanded Interconnection Service (Cont'd) (T)

16.2 Regulations (Cont'd) (N)

16.2.3 Termination and Cancellation (Cont'd)

The Utility may terminate service immediately at any time if in the Utility's sole opinion the license for space or Expanded Interconnection Service is in conflict with any law, judicial ruling, or regulatory determination then in effect. The Utility shall have no liability to the collocator for such termination, other than refunding to the collocator that unused portion of any rates and charges.

A collocator will continue, after terminating EIS, to be responsible for all actions or lack thereof during the time it utilized EIS.

16.2.4 Responsibility for Damage

The collocator will be responsible for any damage or outage to the Utility's network occurring as a result of the installation, operation, or maintenance of its equipment, including any type of defect, or due to the actions/inactions, willful, or negligent of its employees, vendors, or contractorshaving access to the Utility's property, including wire centers, wire center equipment, manholes, property, facilities, and equipment.

The collocator will be responsible for all costs associated with correcting all damage including all applicable Credit Allowances, as described in Section 2 preceding, which the Utility was required to pay.

The collocator will be responsible for any loss, damage, or injury to the licensed space, Utility property or personnel, property of others on or in the Utility's property, or any other loss or damage arising out of the collocator's use of EIS or presence on or in the Utility's property.

16.2 Regulations (Cont'd) (N)

16.2.5 Insurance Requirements

The collocator will be responsible for obtaining and maintaining at its expense, appropriate insurance coverage, including fire, theft, and liability as set forth below.

(A) The Collocator will maintain Commercial General Liability insurance, including supplementary coverages for:

- Contractual liability to cover liability assumed under this tariff.
- Personal Injury Liability with the "employee" and "contractual" exclusions deleted.
- Product and Completed Operations liability.
- Broad Form Property Damage liability

(B) The collocator will also maintain:

- Fire Legal Liability Insurance.
- Business Automobile Liability Insurance if the collocator causes a vehicle to be operated on Telephone Company property, whether owned by the collocator or not.

(C) The minimum amount of coverage that will be maintained for (A) and (B) above is \$5 million combined single limit per occurrence.

(D) The collocator will also maintain Employer's Liability insurance of not less than \$1 million.

(E) The insurance will name the Utility, its directors and officers, affiliates and employees as additional insureds and will be provided as primary coverage for those insureds. (N)

16.2.5 Insurance Requirements (Cont'd)

- (F) The insurance will contain a Standard Cross Liability Endorsement. It will also contain a waiver of subrogation for property damage, fire and bodily injury and contain a waiver of workers' compensation subrogation claims against the Utility.
- (G) The insurance will be issued by insurance companies that hold a current rating of not less than "A", according to Best's Key Rating Guide. The insurance company must be admitted (licensed) to transact business in the State of California or be a "non-admitted" company that is currently designated "no objection to use" by the Surplus Lines Association of California. A collocator proposing to use a "non-admitted" company may be required to have its insurance broker provide written confirmation that the non-admitted company is currently designated "no objection to use."
- (H) The insurance will include a requirement that the insurer provide the Utility written notice at least 30 days prior to the effective date of any cancellation or material change.
- (I) If requested, the collocator will provide the Utility with a Certificate of Insurance executed by an authorized representative of the insurer. The information provided must contain coverages, limits, and all other items listed in (A) through (H), preceding. (T)

16. Expanded Interconnection Service (Cont'd) (T)

16.2 Regulations (Cont'd) (N)

16.2.6 Obligations for Permits, Licenses, and Extraordinary Costs

The Utility will obtain and pay for any permits required to enclose the licensed space. Except as provided above, the collocator is responsible for obtaining any other licenses and permits.

The collocator must separately apply for a structural license in order to use conduit space in conjunction with Expanded Interconnection Service.

Any modification or upgrades the Utility is required to make to its wire center or cable space under building or fire codes or regulations, or the Americans with Disabilities Act, or in compliance with any other governmental regulation or safety requirement, resulting from any actual or planned use of the licensed space by the collocator shall be done at the sole cost and expense of the collocator.

The collocator will be responsible for any additional taxes, charges or assessments made against the Utility and its property as a result of ordering EIS service under this tariff. (N)

16.2 Regulations (Cont'd) (N)

16.2.7 Clearing of Trouble Reports

The Utility and the collocator will work cooperatively to test and clear trouble reports.

16.2.8 Contact Number

The collocator must provide to the Utility a current local contact and telephone contact number that is readily accessible 24 hours a day, 7 days a week.

16.2.9 Shared Network Services

The regulations for Shared Use Analog and Digital High Capacity Services, as specified in Section 7.4.8, are applicable to the services under EIS, as described in 16.6.10 following.

16.2.10 Limitations on Entities in Existing Condominium Arrangements

Entities in existing condominium arrangements that seek to purchase EIS will not be required to route fiber optic facilities out of the building and back into the building. Such entities will be required to order EIS licensed space and furnish it with appropriate electronic transmission equipment and fiber optic cable. Such entities will be billed at rates set forth in Section 16.7.1(D) following, for the cost of installing fiber optic cable from the entry point to the designated collocation space. Such entities will also be billed at rates set forth in Section 16.7.1(C) following, for the use of the cable space.

16.2.11 Hazardous Materials Warning

In compliance with the Safe Drinking Water and Toxic Enforcement Act of 1986, California Health and Safety Code Sections 25249.5, et. seq. ("Proposition 65"), the collocator shall issue, and shall require its subcontractors to issue, warnings to the Utility's personnel on the worksite, and the public for exposure to chemicals on the Governor's List known to the State of California to cause cancer, birth defects, and/or other reproductive harm ("Chemicals") which are provided by the collocator and/or its subcontractors from the time that any such Chemicals becomes present on the Utility's property.

The collocator shall warn, and shall require its subcontractors to warn, the Utility of any exposure to chemicals which may continue after the collocator and/or its subcontractors have completed their work and/or terminated the license. Such warnings will comply with Proposition 65 and associated regulations which may take the form of, but not limited to, a Material Safety Data Sheet ("MSDS") as defined in Title 8 of the California Code of Regulations, Section 5194.

16.2 Regulations (Cont'd) (N)

16.2.12 Confidential Information

(A) All information such as specifications, drawings, sketches, models, samples, tools, computer programs, technical information, confidential business, customer or personnel information or data, written, oral or otherwise that is obtained by the collocator from the Utility shall remain the property of the Utility, regardless of whether EIS is ordered. All copies of all information shall be returned to the Utility upon request.

Unless the information was previously known to the collocator to be free of any obligation to keep it confidential or until that information is made public by the Utility or a third party, the collocator shall keep it confidential, and shall use it only as needed in the provisioning or maintenance of services provided under this tariff. The Utility shall have the right to review and approve the collocator's procedures for handling the information and may make such inspections as the Utility deems necessary to assure that the information is being properly protected.

(B) No information such as specifications, drawings, sketches, models, samples, tools, computer programs, technical information, business information or data, written, oral or otherwise that is furnished by the collocator to the Utility, in contemplation of service provided under this tariff, shall be considered to be confidential.

However, if the collocator provides the Utility with any proprietary or confidential information which is conspicuously designated as such, the Utility will use the same level of care in preventing its disclosure to others as the Utility uses with respect to its own proprietary or confidential information. (N)

16.2.13 Notices

All notices or other communications are deemed given when made in writing and either delivered in person, or delivered to an agent, such as an overnight or similar delivery service, or deposited in the United States mail, postage prepaid and addressed to the person that was each provided by the collocator and the Utility.

The address to which notices or demands may be given may be changed by written notice.

16.2.14 Assignment of EIS

The collocator may not assign or transfer the use of EIS; however where there is no interruption of use or relocation of the EIS, assignment or transfer may be made of the services to an affiliate, provided that the affiliate has assumed of the collocator all outstanding indebtedness for and obligations associated with the EIS.

In all cases of assignment or transfer, the written acknowledgment of the Utility is required prior to such assignment or transfer which acknowledgment shall be made within 15 days from the receipt of notification. All regulations and conditions contained in this tariff shall apply to such assignee or transferee.

(T)

16.2 Regulations (Cont'd)

(N)

16.2.15 Facility Routing Point

(A) The Utility will designate an Interconnection Point for each entrance into the building. The Utility will provide two (2) entrances into the building, where available. The collocator will construct its fiber optic cable to the interconnection point location. The collocator is responsible for placing its fiber optic cable from the interconnection point into the central office vault and providing sufficient optical fiber non conductive riser cable (OFNR) length for the Utility to extend and remove such cable to terminate where the collocator-owned equipment will be placed in the central office.

(B) A maximum of two fiber cables, each not to exceed 1.5 inches in diameter, may be placed from the point(s) of entry to the collocator's licensed space(s).

(C) The Utility will furnish observer(s) when the collocator is pulling the cable within the vault, splicing in the vault, or performing other critical tasks that could involve personnel safety risks or result in network outages. Labor rates as described in Section 13, preceding, will apply.

16.2.16 Work Stoppages

In the event of work stoppages, a separate entrance will be established for the collocator, where possible. Failure to provide a separate entrance shall not render the Utility liable for any claim for damages. The collocator will notify the Utility of any work stoppage by the collocator's employees.

16. Expanded Interconnection Service (Cont'd) (T)

16.2 Regulations (Cont'd) (N)

16.2.17 Compliance

The collocator shall abide by all policies and practices of the Utility, including safety, fire, environmental, and security.

16.2.18 Individuals Requiring Wire Center Access

If for any lawful reason the Utility requests a collocator to discontinue allowing any person access to the Utility's property, the collocator will immediately comply. Any such person shall leave the Utility's property promptly, and the collocator shall not allow that person again to be on the Utility's property without the Utility's consent.

The Utility reserves the right to require collocators, from time to time, to follow special security procedures, including access to the wire center for national security reasons.

16.2.19 Waste and Nuisance

The collocator shall not cause, maintain, or permit any nuisance in, on or about the licensed space or in any part of the Utility's property. Nor shall the collocator commit or suffer to be committed any waste in or upon the licensed space or in any part of the Utility's property.

16.2.20 Parking

Parking will be provided to the collocator only when "No Parking" is posted around the entire area within a 1/4 mile radius of the wire center, and if no public or private parking lots exist nearby where parking is generally available. Where these conditions exist, the Utility will provide parking upon terms and conditions to be mutually agreed upon.

16.2 Regulations (Cont'd)

16.2.21 Improvements

The collocator shall not construct nor cause to be constructed any improvements in the licensed space or in or on Utility property.

16.2.22 Service Intervals

The standard interval for processing an application is 15 calendar days. The standard installation interval for physical collocation, which begins after the application processing interval, is listed by wire center and by physical collocation phase in Section 16.8, following.

(T)  
|  
(T)

16.2.23 Telephone Service

The collocator may order, separately, from the Utility, exchange telephone service that may be used only for required testing and maintenance purposes in the licensed space.

16.2.24 Customer Premises Designation

The collocator's physical space in the Utility wire center shall be deemed not to be a customer premises except for the application of Labor Rates as set forth in Section 13, preceding, which will apply to all activities not otherwise described herein.

16.2.25 Installation and Removal Procedures

Installation and removal of Collocator's equipment must comply with the Utility's Central Office Equipment Installation and Job Acceptance Handbook (IJAH), also known as the TP76300, electrical standards, engineering standards, fire, safety, health, environmental, and network safeguards. No storage or staging area will be provided outside of the licensed space.

16.2.26 Relocation of Equipment

Customer requested relocation of the collocator's equipment and facilities, when feasible, within the central office, will be handled on an individual case basis, at the collocator's expense.

The Utility can, with 90 days' written notice, request the collocator to relocate its facilities or equipment to another space, conduit or cable space designated by the Utility. Under physical collocation, the Utility will reimburse the collocator for all reasonable costs incurred in the relocation and will make all reasonable efforts to minimize disruptions of the collocator's services.

(T)  
(N)

If the Utility deems it necessary to relocate a collocator to a different physical collocation space within the central office for reasons other than an emergency, the Utility will provide at least 180 days advance written notification, and reimburse the collocation for all reasonable costs incurred in th relocation. The Utility will make reasonable efforts to minimize the disruptions of the collocator's services.

(N)  
|  
(N)

16.2.27 Connections Between Licensed Spaces

The collocator shall not connect nor cause to be connected equipment or facilities in its licensed space(s) to equipment or facilities within any other collocator's licensed space(s).

A connection will be provided between licensed space by the Utility upon receipt of an application or a request from the collocator.

(N)  
|

The connections are wired in the Utility work area i.e.DSX, MDF. No connections are made at the pot bay.

The Utility shall, within 15 days of a request, provide cage-to-cage connections between collocation cages leased by two or more collocators as long as both collocators have previously ordered connecting facilities.

16.2 Regulations (Cont'd)

16.2.28 Equipment Standards

All CLEC equipment and facilities to be installed in Utility's Eligible Structures must be necessary for interconnection or access to UNES of the ILEC.

(N)

All CLEC equipment and facilities installed in Utility Eligible Structures and conduit must comply with Technical Publication 76200MP, Network Equipment Power, Grounding, Environmental and Physical Design Requirements and any federal, state, and local laws and regulations, industry safety standards, engineering standards, electrical standards, and other environmental standards.

(N)

(T)

(T)

Except as stated in this paragraph, the Utility requires

that all equipment to be collocated in the Utility Eligible Structures meet Level 1 safety requirements as set forth in the Utility's Technical Publication TP76200MP. The Utility will not impose safety requirements on the Collocator's equipment that are more stringent than the safety requirements it imposes on its own equipment. The Utility will not deny collocation of Collocator equipment because the equipment fails to meet TP76200MP performance and reliability standards. Notwithstanding the foregoing, the Collocator shall be allowed to collocate equipment which is established in writing to have been in any Incumbent local exchange carrier premises, without any known or documented safety problems, since prior to January 1, 1998 if the equipment also meets the requirements in section 16.2.30 following.

(N)

If the Utility denies collocation of Collocator's equipment, citing safety standards, the Utility will, within 5 business days of the denial, provide the Collocator with a list of equipment that the Utility locates within the Eligible Structure in question, together with an affidavit attesting that the equipment meets or exceeds the safety standard that the Utility contends Collocator's equipment fails to meet. The affidavit will include the exact safety requirement that the Collocator's equipment does not satisfy; the Utility's basis for concluding that the Collocator's equipment does not meet this safety requirement; and the Utility's basis for concluding why collocation of equipment not meeting this safety requirement would compromise network safety.

(N)

Material omitted now on Sheet 709-A.

| |  
(T) (L)  
(N)

16.2.30 Equipment That May Be Collocated

(A) In accordance with Section 251(c)(6) of the Telecommunications Act, CLEC may collocate equipment "necessary for interconnection or access to unbundled network elements," if the equipment also meets the Utility's equipment safety standards, which are described in another section. For purposes of this section, "necessary" means directly related to and thus necessary, required, or indispensable to interconnection or access to unbundled network elements. Such uses are limited to interconnection to the Utility's network "for the transmission and routing of telephone exchange service or exchange access," or for access to the Utility's unbundled network elements" for the provision of a telecommunications service." Equipment that may be collocated solely for these purposes includes: (1) transmission equipment including, but not limited to, optical terminating equipment and multiplexers; and (2) equipment being collocated to terminate basic transmission facilities pursuant to sections 64.1401 and 64.1402 of 47 C.F.R. (Expanded Interconnection) as of August 1, 1996.

16.2 Regulations (Cont'd)

16.2.30 Equipment That May Be Collocated (Cont'd)

(B) Multifunctional Equipment is not "necessary" for interconnection or access to unbundled network elements. CLEC may not collocate Multifunctional Equipment except as expressly and specifically allowed, on a voluntary basis, in this Section or mutually agreed to by the Utility and CLEC. For purposes of this section, "Multifunctional Equipment," means equipment that has both (1) functions that make the equipment "necessary for interconnection or access to unbundled network elements" and (2) additional functions that are not "necessary" for these purposes. Such additional functions include, but are not limited to, switching and enhanced service functions.

(N)

Continued

ACCESS SERVICE

16. Expanded Interconnection Service (Cont'd)

16.2 Regulations (Cont'd)

16.2.30 Equipment That May Be Collocated (Cont'd)

(N)

(C) The Utility permits CLEC collocation, on a non-discriminatory basis, of complete pieces or units of equipment specified in the definition of "Advanced Services Equipment" in section 1.3.d of the SBC/Ameritech Merger Conditions. To the extent that certain complete units of Advanced Services Equipment are not "necessary" for interconnection or access to unbundled network elements because they are Multifunctional Equipment and for other reasons, the Utility voluntarily allows such CLEC collocation. Under the SBC/Ameritech Merger Conditions, "Advanced Services Equipment" is defined as, and limited to, the following equipment: "(1) DSLAMs or functionally equivalent equipment; (2) spectrum splitters that are used solely in the provision of Advanced Services; (3) packet switches and multiplexers such as ATMs and Frame Relay engines used to provide Advanced Services; (4) modems used in the provision of packetized data; and (5) DACS frames used only in the provision of Advanced Services. Spectrum splitters (or the equivalent functionality) used to separate the voice grade channel from the Advanced Services channel shall not be considered Advanced Services Equipment; any such splitters installed after the Merger Closing Date that are located at the customer premises shall be considered network terminating equipment." To qualify for collocation, the complete units of Advanced Services Equipment must either (A) be solely of the types, and exclusively for the uses, included in this definition or (B) be of such types, and for such uses, combined solely with additional functions that are "necessary for interconnection or access to unbundled network elements." For instance, additional switching use, except as included below, or enhanced services functionality would disqualify the equipment from collocation. The Utility voluntarily allows CLEC to collocate Optical Concentrator Devices ("OCDs") or functionally equivalent equipment used to provide Advanced Services.

16.2.30 Equipment That May Be Collocated (Cont'd)

(N)

(D) To qualify for collocation, the equipment must be a complete piece, unit, or item of such equipment, not a piece-part or sub-component (such as a line card) of a complete unit of equipment. CLEC may not collocate, or place into the Utility's equipment, CLEC's equipment sub-components or piece-parts.

(E) The Utility does not allow collocation of other Multifunctional Equipment, except that the Utility voluntarily allows CLEC collocation, on a non-discriminatory basis, of remote switch modules ("RSMs") solely under the following conditions: (1) the RSM may not be used as a stand-alone switch; the RSM must report back to and be controlled by a CLEC identified and controlled (i.e., CLEC owned or leased) host switch, and direct trunking to the RSM will not be permitted, and (2) the RSM must be used only for the purpose of interconnection with the Utility's network for the transmission and routing of telephone exchange service or exchange access or for access to the Utility's unbundled network elements for the provision of a telecommunications service. The Utility voluntarily will allow CLEC to collocate, on a non-discriminatory basis, other multi-functional equipment only if the Utility and CLEC mutually agree to such collocation.

16.2 Regulations (Cont'd)

16.2.30 Equipment That May Be Collocated (Cont'd)

(N)

(F) The Utility will not allow collocation of stand-alone switching equipment, equipment used solely for switching, or any enhanced services equipment. For purposes of this section, "stand-alone switching equipment" is defined as any equipment that can perform switching independently of other switches or switching systems. "Stand-alone switching equipment" includes, but is not limited to, the following examples: (1) equipment with switching capabilities included in 47 C.F.R. section 51.319(c); (2) equipment that is used to obtain circuit switching capabilities, without reliance upon a host switch, regardless of other functionality that also may be combined in the equipment; and (3) equipment with the functionality of a class 4 or 5 switch including, without limitation, the following: Lucent Pathstar, 5E, 4E, or 1A switch; DMS 10, 100, 200, or 250 switch; Ericsson AXE-10 switch; Siemens EWSD; and any such switch combined with other functionality.

16. Expanded Interconnection Service (Cont'd)

16.2 Regulations (Cont'd)

16.2.30 Equipment That May Be Collocated (Cont'd)

(N)

(F) (Cont'd)

Ancillary equipment is not "necessary" for interconnection or access to unbundled network elements. The Utility voluntarily allows CLECs to place in its premises certain ancillary equipment solely to support and be used with equipment that the CLEC has legitimately collocated in the same premises. Solely for this purpose, cross-connect and other simple frames, routers, portable test equipment, equipment racks and bays, and potential other ancillary equipment may be placed in the Utility's premises, on a non-discriminatory basis, only if the Utility and CLEC mutually agree to such placement. CLEC may not place in the Utility's premises types of ancillary equipment, including but not limited to Battery Distribution Fuse Bays ("BDFBs"), that would duplicate equipment used by the Utility, and/or that would duplicate functions performed by the Utility, as part of its provision of infrastructure systems for collocation. Such placement would waste space and other resources and, in at least some cases (such as BDFBs), harm the Utility's ability to plan for and provide service to other customers including, but not limited to, other CLECs.

(N)

(G) Pending the FCC's reasonably timely completion of remand proceedings in accordance with the Court's Opinion in *GTE Service Corporation v. FCC*, 205 F.3d 416 (D.C. Cir. 2000) ("*GTE Opinion*"), The Utility voluntarily will not disturb (1) equipment and (2) connection arrangements between different collocators' equipment in a Utility premises, that prior to the May 11, 2000 effective date of the *GTE Opinion* (1) were in place in the Utility or (2) were requested by CLEC and accepted by the Utility on the same basis as under the FCC's original, pre-partially-vacated Collocation Order (*Deployment of Wireline Services Offering Advanced Telecommunications Capability*, CC Docket No. 98-147, *First Report and Order* (FCC 99-48), 14 FCC Rcd 4761 (1999)). The Utility's agreement not to disturb these collocation arrangements pending timely completion of the remand proceedings will immediately expire if a federal or state court or regulatory agency (1) attempts to apply any of the most favored nation provisions of the Act, of any state Merger Conditions, or of the FCC SBC/Ameritech Merger Conditions to such arrangements or (2) deems such arrangements to be discriminatory vis-à-vis other carriers.

ACCESS SERVICE

16. Expanded Interconnection Service (Cont'd)

16.3 Ordering

The ordering of the Expanded Interconnection Service Cross Connect will be in accordance with Sections 2 and 5, preceding. A completed application, accompanied by the appropriate nonrecurring charges, is required before an order for other EIS is accepted by the Utility.

(T)  
(T)  
(D)  
|  
(D)

16.3.1 First Come, First Served

(A) Subject to availability of space, including conduit, facilities, and floor space, EIS will be provided on a first-come, first-served basis.

(B) The Utility will process completed applications accompanied by 50% of the nonrecurring charges as set forth in Section 16.7.1., following, or of the amount quoted by the Utilities in the order in which the applications are received. The customer also has the option of submitting a surety bond to cover the 50% pre-payment, in lieu of a check.

(T)  
|  
(T)  
(N)  
(N)

(C) In such instances where two or more orders for spaces are received on the same day and the total requested spaces cannot be provided by the Utility, a lottery will be held at a location determined by the Utility within ten calendar days to determine the order of selection of applicants. In addition to a representative of the Utility, one representative of each collocator may elect to be present for the lottery. Each collocator's name will be recorded and deposited in a receptacle. A representative of the Utility will select entries up to the number of spaces available. Selected entries will be assigned specific spaces in the order in which the entries are drawn. Following the lottery, collocators whose requests for space cannot be fulfilled will be offered virtual collocation in accordance with California Public Utilities Commission requirements.

ACCESS SERVICE

16. Expanded Interconnection Service (Cont'd)

16.3 Ordering (Cont'd)

16.3.2 Submission of Application and Charges

The collocator must provide to the Utility all materials listed in Section 16.3.1. (B), preceding. These materials are submitted to the collocator's Utility account team. The request must provide all of the information requested, which is necessary to process the order.

16.3.3 Orders for Additional Space

(A) An order for additional space will be treated as a new order which requires a separate application, pre-payment of 50% of the nonrecurring charges or the submission of a surety bond to cover the 50% pre-payment, in lieu of a check. (T)  
(T)

(B) To the extent possible, the Utility will not fill cages consecutively but will fill in cages in a manner that would allow for contiguous growth. However, if other collocators want to collocate in that central office and the unassigned contiguous space is needed, the space will be granted to the first collocator submitting an application and the requisite deposit or surety bond. (T)  
(T)  
(N)  
(N)

(C) Orders for additional space will not be accepted until each existing licensed space of the collocator in the requested wire center is "efficiently used." "Efficiently used" means all except one existing collocation space be at 100% utilization, with one cage between 60% and 100% utilization (T)  
(T)  
The determination as to whether this criterion is met is solely within the reasonable judgment of the Utility.

Orders for additional space will be accepted when the Utility negotiates and accepts a collocator's forecast of future service needs that will exceed the efficient utilization of existing collocation space as defined above. (T)  
(T)

When the forecast upon which such an order is placed, is revised downward before the licensed space is turned over to the collocator, the order for the licensed space shall be considered canceled, with all applicable cancellations charges due and payable, and a new order for a licensed space must be placed in compliance with these regulations.

ACCESS SERVICE

16. Expanded Interconnection Service (Cont'd)

16.3 Ordering (Cont'd)

16.3.3 Ordering for Additional Space (Cont'd)

(D) After additional space is granted, the collocator must continue to "efficiently use" all previously-occupied licensed space.

When an order is accepted based on an agreed-upon forecast, all but one of the collocator's licensed spaces in that wire center must be efficiently used within 180 days of the last licensed space being turned over to the collocator and must continue to be efficiently used thereafter. The determination as to whether this criterion is met is solely within the reasonable judgment of the Utility. 1(T)  
1(T)

16.3.4 Nonrecurring Charge Proration 1(T)

For physical collocation, the first collocator interconnecting in a Utility location will be responsible for all costs incurred by the Utility associated with the preparation of the wire center to provide collocation arrangements. 1(T)

When all existing prepared space has been exhausted in a wire center, and the Utility receives an additional order for collocation in that wire center, the Utility will prepare additional space, where such additional space is available, to accomodate collocators. The first collocator in the additional space will be responsible for all costs incurred by the Utility to prepare the additional space. The rates and charges for additional space may be different than those for currently occupied space. The wire center where additional space has been made available, will be designated as Phases. Phases are shown as phase 2,3,4, etc in Section 16.7.1. 1(T)  
1(T)

The Utility shall refund nonrecurring charges for cage installation to collocators that surrender their occupied collocation space, if that space is needed by another collocator within 24 months of surrender of the collocation space. (N)

ACCESS SERVICE

16. Expanded Interconnection Service (Cont'd)

16.3 Ordering (Cont'd)

16.3.4 Nonrecurring Charge Proration (Cont'd)

The nonrecurring charges will be prorated and the prorated share refunded to the previous collocator as additional collocators utilize collocation space at that location, within the same phase utilizing the following schedule: 1(T)  
(T)

<u>Collocator</u>	<u>Nonrecurring Charge</u>	<u>Refund</u>
1st	100%	NA%
2nd	50%	50%
3rd	33.33%	16.67%
4th	25%	8.33%
5th	20%	5%
6th	16.67%	3.33%
7th	14.29%	2.38%
8th	12.5%	1.79%
9th	11.11%	1.39%
10th	10%	1.11%
11th and beyond	0%	

No interest will be paid on refunds. Refunds shall be based on the applicable nonrecurring charges actually paid by the first collocator. This section shall also apply to a collocator ordering service from the applicable interstate tariff.

16.3.5 Cancellation of Interconnection Order

In the event that the collocator cancels prior to notice of availability to occupy, the Utility will refund any payments made by the collocator less costs incurred by the Utility. If within 24 months the physical collocation space is assigned to another collocator, the Utility shall refund the nonrecurring charges retained by the Utility. (N)

16. Expanded Interconnection Service (Cont'd)

16.3 Ordering (Cont'd)

16.3.6 Discontinuance of EIS

The collocator must provide written notice of discontinuance of EIS services at least 30 days prior to the actual discontinuance. Monthly rates will apply until all non-Utility equipment and facilities are removed from Utility property, unless otherwise agreed to by the Utility.

16.3.7 Minimum Period

The minimum period for purchasing EIS shall be one month.

16.4 Physical Collocation *Revised*

The Utility retains ownership of its wire center floor space, and any Utility facilities, equipment, or other property used to provide EIS. Only a license to occupy designated space is granted to the collocator. The designated space may be used only for the purposes of installing, maintaining, and operating the collocator's transmission facilities and associated equipment to interconnect with telecommunications services and facilities provided by the Utility in accordance with Section 6 and/or 7, preceding.

(L) Formerly on Sheet 712.

16.4 Physical Collocation (Cont'd)

16.4.1 Use of Licensed Space

The licensed space may not be used for administrative purposes and may not be used as an employee's assigned work location. The licensed space shall not be used as a mailing or shipping address. Any deliveries of the collocator's equipment to the wire center must be immediately handled by the collocator's employees, agents, or contractors.

The collocator shall not use the licensed space in a way that will conflict with any law, statute, ordinance, rule or regulation affecting the condition, use, or occupancy of the licensed space including but not limited to the use, handling, storage, transportation, disposition, or release of a contaminant or hazardous materials/waste.

16.4.2 Designated Floor Space

The Utility will designate the floor space within each wire center which will serve as the collocator's licensed space. Each space will be 100 square feet. The collocator's space will be enclosed in a manner determined by the Utility in order to comply with all laws, regulations, safety, building, and security requirements.

16.4.3 Request for Additional Space

Each collocator may be granted a license for 100 square feet of floor space, in increments of 100 square feet, per wire center. Space above 100 square feet in a single request will be provided on an individual case basis. (T)

16.4.4 Cooperative Planning

The Utility will work cooperatively with the collocator to develop implementation plans associated with:

- Placement of collocator's fiber into the Central Office vault
- Location and completion of all splicing
- Collocator's use of loading docks, freight elevators or other areas of the Central Office not accessible to the collocator through normal Utility security processes, subject to Section 16.4.13. following.
- Post installation and subsequent inspections.

16.4.5 Collocator's Responsibilities

The collocator will be responsible for providing, installing, maintaining, and repairing:

- Fiber optic cable from the interconnection point to the Utility's cable vault
- Collocated transmission equipment
- Cable from collocator's transmission equipment to the Utility's designated EIS Point of Termination.

ACCESS SERVICE

16. Expanded Interconnection Service (Cont'd)

16.4 Physical Collocation (Cont'd)

16.4.10 Inspection of Collocator's Space

The Utility reserves the right to inspect completed installations of the collocator's equipment and facilities and to make periodic or subsequent inspections of the collocator's equipment and facilities occupying Utility space and property. The Utility will provide two (2) weeks advance written notification for non-emergency inspections. For emergency situations, see Section 16.4.1. preceding.

(T)  
|  
(T)

If an inspection is conducted by an outside agency (e.g., fire, safety, insurance), the Utility will notify the collocator promptly in writing of the outside agency's inspection unless notice in writing is not practiceable.

(N)

If notice in writing is not practiceable, the Utility will provide the collocator with prompt, non-written notification so that the collocator can exercise its right to be present at the inspection.

(N)

16.4.11 Termination of License

(A) Upon termination of the collocator's license for any 100 square foot increment of wire center space, the collocator shall remove its equipment from that space within 7 days. Any equipment not removed within that time may be removed by the Utility and stored in a non-Utility location, at the expense of the collocator.

(B) Upon removal of the equipment, the collocator will restore the space to its original condition at time of occupancy.

16.4 Physical Collocation (Cont'd)

16.4.12 List of Individuals Requiring Access

The collocator will supply the Utility with a list of its employees, contractors, and vendors who require access. The collocator will notify the Utility, within 24 hours of its determination, of any employees, contractors, and vendors who no longer have a need for access to its cage in any wire center, and return keys, access cards, and identification cards to the Utility within 7 days. All credentials and access cards must be returned upon termination of the license agreement.

Collocator will immediately notify the Utility of any lost, stolen, or damaged identification and/or access cards or keys. Replacements will be provided at tariff rates.

16.4.13 Access to Utility Locations

Access to Utility locations which are equipped with secured access to the Collocation Infrastructure Area will be provided via Access Card. The Collocation Infrastructure Area is the common area providing access to, and area surrounding the collocators licensed spaces. When access to the Collocation Infrastructure Area is not secure escort will be provided by Utility designated personnel. Labor rates as set forth in Section 13 preceding, will apply.

ACCESS SERVICE

16. Expanded Interconnection Service (Cont'd)

16.6 Expanded Interconnection Cross-Connection

16.6.1 Service Description

The Expanded Interconnection Cross Connection connects the EIS Point of Termination located in the Utility's Central Office with the Utility's Switched Access, or Special Access High Capacity DS1 Fiber Advantage(sm) DS1 or DS3, SONET Ring and Access Services, ADN, DDS, Analog Video, Voice Grade, Telegraph or Metallic grade services. The connection shall be electrical, except when connecting to Ocn services which shall have an optical connection. (T)

16.6.2 DS3 Connection to Special Access

EIS DS3 service will be connected to DS3 High Capacity Service, or SONET Ring and Access Services, and subject to all appropriate nonrecurring charges, monthly rates, and other applicable rates and charges as described in Section 7. (T)

16.6.3 DS1 Connection to Special Access

EIS DS1 service will be connected to Fiber Advantage DS1 or DS1 High Capacity Service, or SONET Ring and Access Services and subject to all appropriate nonrecurring charges, monthly rates, and other applicable rates and charges as described in Section 7. (T)

16.6.4 Low Speed Connection to Special Access

EIS Low Speed service will connect to Metallic, Telegraph Grade, Voice Grade, ADN, or DDS service, or SONET Ring and Access Services, which will be subject to all applicable nonrecurring charges, monthly rates, and other applicable rates and charges as described in Section 7. The EIS Low Speed Connection must meet the technical parameters for the Special Access Service to which it is connecting. (T)

16.6.5 SONET Connection to Special Access

(N)

EIS SONET Service will be connected from the EIS Point of Termination to SONET Ring and Access Services and will be subject to all appropriate nonrecurring charges, monthly rates, and other applicable rates and charges as described in Section 7, preceding. The EIS SONET connection must meet the technical parameters of the SONET Service to which it is connecting.

(N)

16.6.6 Analog Video Connection to Special Access

EIS Analog Video will connect to a hubbed Analog Video Special Access Service which will be subject to all applicable nonrecurring charges, monthly rates, and other applicable rates and charges as described in Section 7, preceding and Section 13, following. The EIS Analog Video Connection must meet the technical parameters for the Special Access Analog Video Service to which it is connecting.

There will be three (3) EIS Analog Video Connections:

A Non Hub-Video/Audio EISCC will be used when the collocator's cage to which the EIS Analog Video Connection terminates is not in the same central office as the Analog Video Hub to which the service connects.

A Hub-Combined Video and Audio EISCC will be used when the collocator's cage to which the EIS Analog Video Connection terminates is in the same central office as the Analog Video Hub to which the service connects, and the customer delivers, at the EIS POT, a combined hand-off of a video signal and its associated audio channels.

A Hub-Video plus Audio EISCC will be used when the collocator's cage to which the EIS Analog Video Connection terminates is in the same central office as the Analog Video Hub to which the service connects, and the customer delivers, at the EIS POT, separate hand-offs of a video signal and its associated audio channels.

ACCESS SERVICE

16. Expanded Interconnection Service (Cont'd)

16.6 Expanded Interconnection Cross-Connection (Cont'd)

16.6.9 Letters of Agency or Authorization

EISCCs may be ordered by the collocator. The Utility will accept Letters of Authorization that authorize a collocator who is sub-leasing space from another collocator to order and be billed for EIS Channel Termination.

EISCCs may also be ordered by the customer ordering the Switched or Special Access Service that will terminate at the collocator's cage. The EISCC will be ordered and billed under the same regulations that apply to Switched or Special Access Service as set forth in Sections 2 and 5, preceding.

16.6.10 Ready for Service

The collocator will place the initial order(s) for EISCC Low Speed, EISCC DS1 or EISCC DS3 service, connecting to Switched, or Special Access High Capacity, in sufficient time to coincide, with when the collocator's equipment is ready for use. The licensed space may be reclaimed if the collocator has not activated its equipment and interconnected with the Utility's Switched or Special Access Services within 180 days of notification by the Utility that the licensed space is available for occupancy.

Advice Letter No. 19757

Issued by

Date Filed: Oct. 15, 1998

Decision No.

A.E. Swan

Effective: **NOV 24 1998**

Executive Director

Resolution No.

ACCESS SERVICE

16. Expanded Interconnection Service (Cont'd)

16.10 Ordering and Provisioning (Cont'd)

(N)

16.10.1 Dedicated Space (Cont'd)

(A) Types of Available Physical Collocation Arrangements (Cont'd)

(5) Adjacent Structure Collocation (Cont'd)

When power requirements are outside of the office capacity and distance limitations, the Utility will treat the requirements on an Individual Case Basis and coordinate a mutually agreeable solution for provisioning power with the Collocator. At its option, the Collocator may choose to provide its own AC and DC power to the Adjacent Structure. The Utility will provide Physical Collocation services and facilities to Adjacent Structures, subject to the same nondiscriminatory requirements as other collocation arrangements in this tariff and the appropriate approved building permits.

When physical collocation space becomes available in a previously exhausted Utility structure, a Collocator can either maintain its adjacent collocation arrangement or move into the newly available structure. If the Collocator chooses to move into the newly available structure it will be done at the Collocator's expense once the interior space is available in the Eligible Structure. Appropriate charges applicable for collocation within the eligible Structure will apply. The utility will work cooperatively with the Collocator to relocate facilities into the Eligible Structure.

ACCESS SERVICE

-

16. Expanded Interconnection Service (Cont'd)

16.10 Ordering and Provisioning (Cont'd)

(N)

16.10.1 Dedicated Space (Cont'd)

(6) Special Interconnection Arrangement (Adjacent Location)

Adjacent Location is an additional method besides Collocation and access to Unbundled Network Elements (UNEs) to be used by the collocator for the purpose of combining UNEs. The Adjacent Location method for accessing UNEs is not Collocation or Access to UNEs.

With the objective of providing access to UNEs at any technically feasible point, Adjacent Location provides the customer access to LINE loops, ports, and dedicated transport at the customer location. Adjacent Location extends the UNE from the Utility MDF, then cross connects to the IDF via the appropriate Expanded Interconnection Cross Connect. The UNE is extended to the customer location via a customer-terminated cable on the IDF.

16.10 Ordering and Provisioning (Cont'd)

(N)

16.10.1 Dedicated Space (Cont'd)

(C) Application Interval for Physical Collocation (Cont'd)

(3) Should multiple applications be submitted by a Collocator within a 10 day period, the following intervals will apply:

<u>Number of Applications by One Collocator</u>	<u>Response Interval</u>
1 - 10	10 Days
11 - 20	20 Days
21 - 30	30 Days

Should the Collocator submit 31 or more applications within ten (10) days, the response interval will be increased by ten (10) days for every ten (10) additional applications or fraction thereof.

(4) Should the Utility deem a Collocator's application unacceptable, the Utility will advise the requestor of any deficiencies within the ten (10) calendar day application period. The Utility will provide sufficient detail so that the requesting carrier has an opportunity to cure each deficiency. To retain its place in the Utility's collocation queue, the Collocator must cure any deficiencies in its collocation application within ten calendar days after being advised of the deficiency(s).
